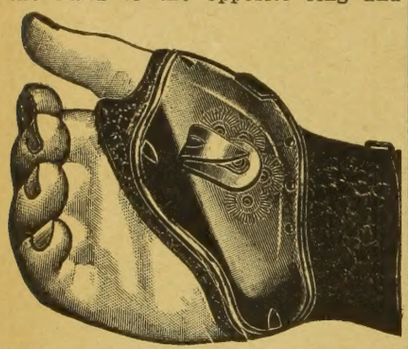
and Stock GROWER

Favorite Corn Husker.

Clark's Corn King with its new self-shedding hook. The spear point enters the husks easily. The slant bend turns the husks for shredding, and the rounded, curved and beveled edges throw out the husks and prevent clogging. As this is the most approved husker on the market, we have selected it as a seasonable subscription premium. The hook sets at any angle; two positions for a thumb hook and five positions as a palm hook. Opening and closing the small end of the plate makes the adjustment perfect for any width of hand and prevents chafing. The strap passes through the leather tongue and the first ring and over the hand to the opposite ring and



back through the first ring. Be sure and have the strap enter the ring from the outer side. It brings the pulling strap underneath, forms the sinch draw and gives you the full benefit of the sinch-lock, which is the same as a half-hitch. The strap then passes to the last ring and then to the buckle, the half-hitch forms one fastening and the buckle holds the end of the strap. We will send The National Farmer and Stock Grower for one year and Clark's Corn King Husker for 50 cents. The Husker is a free premium. Address, **HALE PUBLISHING CO, 3550 Vista Ave., St. Louis, Mo.**

Concise Statement on Alfalfa.

This reading matter comes from Prof. O. O. Churchhill, scientific farmer at the Agricultural College of Oklahoma. It refers particularly to that state, but applies just as well to similar conditions in other states.

Starting the Crop.

There are but few farms on which alfalfa may not be grown profitably, at least on a few acres.

Alfalfa succeeds fairly well on both upland and bottom land, but is much more productive on the bottom land. The rich alluvial bottom lands of the state give the best results. Loamy soil or sandy loam is better than a very heavy clay soil.

Alfalfa will not grow on land having a very compact hardpan, on wet, undrained soil or on sour or acid land.

The soil should be well prepared. Alfalfa should not be seeded on fresh plowing, but the seed bed should be firm with the surface in good tilth.

Seeding may be done in the spring (April) or fall (the last of August or during September), but on unfavorable soil and on weedy land fall seeding will probably give the best results.

Twelve to twenty pounds of seed should be sown per acre, either broadcast or drilled. Care should be used not to plant too deeply, as the seeds are very small.

Alfalfa should always be planted by itself, never with a nurse crop, except when sown in the fall on land which drifts badly. When sown on such a field it may be well to seed a peck of oats or barley at the same time, if the alfalfa is seeded in the fall.

On land devoid of humus and in poor physical condition a good application of barn-yard manure will be exceedingly valuable.

Inoculation is seldom, if ever, necessary in Oklahoma, but it may be elsewhere.

Always start alfalfa in a small way and increase the acreage gradually as desired.

Seed some home-grown variety, if possible, to secure such a strain. There is very little difference in the varieties as commonly sold on the market.

Use nothing but the best seed. Examine for noxious weeds and especially dodder.

Send a sample of the seed to the Experiment Station for germination and purity tests before seeding, but do not wait until a week or so before seeding time. This test will be made free of charge, and a report can be expected inside of two weeks after the sample is received.

Liming the soil has not been found beneficial on the Station farm on either upland or bottom land.

After Treatment.

When weather conditions are very unfavorable, the young plants may die. When this occurs, reseed on the same land the following spring or fall, as the case may be. Do not let one unsuccessful trial discourage you.

If the leaves turn yellow or rust badly, or if severely attacked by insects, or if weeds grow rank and shade the young plants, it should be clipped.

Clip whenever the plants begin to blossom, even during the first year.

Use a spring-tooth harrow, a renovator or a disc harrow in the spring just before a growth starts or just after a crop is removed when the soil becomes hard and compact or very weedy. When a disc is used, set nearly straight and weight down so that it will run the desired depth.

Manure will always give good returns and especially on poor land and when the plants are doing poorly.

Do not pasture late in the fall or during the winter. Most alfalfa growers claim better results when the crop is grown for hay than when the field is pastured.

Do not pasture at all during the first three years, or until the alfalfa becomes thoroughly established.

The alfalfa crop should be cut whenever 5 or 10 per cent. of the plants are in blossom. Even a better method of telling when to mow is to watch the base of the plant and cut whenever the little buds show that a new growth is started.

Allow the plants to wilt but not to become too dry in the swath, then rake and cure in the windrow or in bunches.

Stack or put in the barn when cured, which will be about one week after mowing, depending upon the weather conditions.

When a seed crop is desired, the first crop should be removed and then the plants allowed to go to seed. The production of seed depends very largely upon the weather conditions and upon the thickness of the plants. The seed crop may be mowed and raked the same as the hay crop, and most of the seed can be saved by an ordinary threshing machine.

Feed this valuable hay to good stock; you cannot afford to sell it.

Briefly, this summarizes the more important considerations in starting and caring for the alfalfa crop, and is intended to answer the many questions which are constantly being asked.

WHITMAN'S HAY PRESS

New Model Steel Beauty

FINEST IN AMERICA
Yet costs no more than the ordinary kind

Also Power Ballers

Let us prove that our New Model is the Strongest, Most Durable, Most Economical and Simplest Hay Press in the World—does the best work—has greatest capacity—saves time, labor and trouble—contains exclusive feature found in no other press—with or without self-feed, pull back and hopper condenser—fully guaranteed—we also make largest line of Ballers in the world—write for illustrated catalog

Extravagant Retail Margins.

First of all, a retail margin is not always a retail profit. The London Board of Trade, in its recently published comparison of wages and cost of living in England and in the United States, finds that the average retail price of bread in American cities is double the average in English cities. This not only applies to bread, but it applies in a measure to sugar and coffee, meats, rice and all other staple articles.

The reason why this condition exists is because the population is denser over there than it is here and the English people are not so well supplied with money. The so-called consumer over there may telephone an order to the grocer and another to the butcher and another to the vegetable store (called a green grocer) and have three men with three wagons or carts deliver the goods, and the bill sent monthly; but that is only 5 per cent. of the total population. Over there, 95 per cent. remaining either go or send to the stores and carry the cash and pay the money over the counter and carry home the goods in the market basket. In this country, 80 per cent. of the people run bills and have the supplies delivered and charged up and payable later on. A majority of English families pay cash and a majority of American families run bills. A majority of the English families buy flour and bake bread and a majority of the American families buy bread on the credit system.

Of course, there are exceptions. In New York there are two extremes —the most wasteful credit buying on the part of the wealthy and the closest economical buying on the part of the people who are either poor or in moderate circumstances. This accounts largely for the report by the Department of Agriculture that in the case of meats, the retail margins are the least in New York City.

The farmer, however, pays for much of the American extravagance. His products are sold at high prices at retail to pay for losses incurred and the extra force employed in the credit system. The cash buyer at a credit store pays the credit price and does not obtain the benefit of economical buying; then, again, the credit buyers resist cash buying because they can see no benefit from the change. Time, however, will bring about the change, and some day the American buyer in the American market will buy American products at close margins for cash, unless the food monopolies set all economic laws aside.

The First Kansas Wheat.

According to reports from Abilene, Kansas, on June 16th, the first car of wheat of the new crop sold at 78 cents a bushel; it tested 63 pounds to the bushel measure, and the crop average where it was grown was about 28 bushels per acre. This indicates that the wheat acreage was bringing the best farmers around Abilene, Kansas, an average of 21.84 bushels per acre. This Kansas wheat sold at nearly 1⅛ cents a pound, and if traced through the market and the miller, the baker and the retailer to the consumer it will be found selling at 5 to 6 cents a pound. In other words, the farmer receives 78 cents a bushel, and the consumer pays $3.90 to $4.68 per bushel.

The first car of wheat of this year's crop sold in Kansas City was auctioned off on the floor of the Board of Trade on June 12th. The wheat was shipped from Wagoner, Okla., and sold for 86¼ cents a bushel.

Shrinkage of Corn.

The following summary is taken from Circular No. 81, Bureau of Plant Industry, by Prof. B. T. Galloway, issued by the United States Department of Agriculture:

1. The shrinkage test described in this circular was made with 500 bushels of shelled corn stored in the hopper of a scale in a grain elevator, and extended over a period of 147 days, January 5th to June 1st, 1910, during which time the corn was not "handled" except on May 14th.

2. At the beginning of the test the average moisture content of the corn was 18.8 per cent. The average temperature of the corn and the temperature of the air was 20 degrees Fahrenheit.

3. The shrinkage in weight from January 5th to April 21st, while the corn remained in good condition, was approximately four-tenths of 1 per cent.

4. The shrinkage in weight from April 21st to May 14th was approximately 2.6 per cent., during which time the corn went "out of condition," becoming sour and hot, with a maximum temperature of 138 degrees, Fahrenheit, on May 2d.

5. The shrinkkage during the three elevations on May 14th was 448 pounds, or 1.65 per cent. on the basis of the actual weight of corn in the hopper of the scale just previous to "handling."

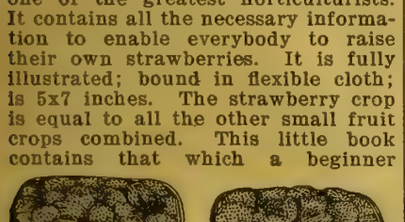
6. The shrinkage during storage from May 14th to June 1st, after the corn was cooled to 55 degrees, Fahrenheit, by handling, was 2.6 per cent.

7. The total shrinkage during the test was 1,970 pounds, or slightly more than 7 per cent., while the natural shrinkage, exclusive of the loss during the three elevations, was 1,522 pounds, or approximately 5.6 per cent., calculated on the actual weight after making deductions for samples drawn for analyses.

8. The rate of shrinkage while the corn remained in good condition was largely influenced by the weather conditions and by the relative humidity and temperature of the atmosphere.

The Strawberry Culturist.

This is a handy little jewel of a book. It is by Andrew S. Fuller, one of the greatest horticulturists. It contains all the necessary information to enable everybody to raise their own strawberries. It is fully illustrated; bound in flexible cloth; is 5x7 inches. The strawberry crop is equal to all the other small fruit crops combined. This little book contains that which a beginner



should have to start on and an expert needs to rely on. We will send a copy of the Strawberry Culturist post free by mail and The National Farmer and Stock Grower for one year for Sixty Cents. This is a splendid opportunity to get a good book for the cost of postage. An average crop of strawberries is 1,701 quarts to the acre. Address, **THE HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

All About Barley.

The United States Department of Agriculture occasionally distributes valuable information and has to collect it before it is distributed. Quite recently Prof. H. B. Derr, the Agronomist in charge of barley investigations, was engaged in collecting an amount of information concerning the origin, history, growing and harvesting barley, and the results have been published in pamphlet form as Farmers' Bulletin No. 443, United States Department of Agriculture, Washington, D. C., and any farmer can get a copy by writing for it.

We hope our readers will not have anything against Prof. Derr because he is called an agronomist. As an an agronomist Prof. Derr is a scientific farmer; one who takes up a grain-growing subject and sifts it to the bottom, giving us the results of his investigations.

Such articles are not written in a day, and the investigations occupy many months. No farm paper can afford to employ a staff of experts to prepare and write such articles. The best we can do is to invite attention to the bulletin as issued by the Department of Agriculture. There are forty-eight pages of matter, including forty-three illustrations. The pamphlet contains chapters and sections devoted to the origin and early history of barley, botanical characters, introduction of barley into the United States, recent importations, types of barley adapted to certain areas, soils adapted to the crop, fertilizers and manures, barley in the rotation, effect of barley on the land, drouth resistance and water requirements, preparation of the land, effect of soil treatment on the yield, sowing the seed, treatment after seeding, cultivation, harvesting, storing, thrashing, variety trials, etc. All grain farmers ought to have this pamphlet.

The Wheat Harvest.

The United States Department of Agriculture's June report indicated that the wheat crop of 1911 will surpass the crop of 1910 by 68,848,857 bushels, bringing the total up to 764,291,857 bushels. The spring wheat is estimated in round figures at 284,000,000 bushels, and the winter wheat is estimated at 480,000,000 bushels.

The indicated yield is 14.7 bushels to the acre; this will give the average farmer $11.47 per acre for his wheat crop. We figure the price at 78 cents a bushel, the price the farmers near Abilene, Kansas, received for the first wheat of the crop of 1911.

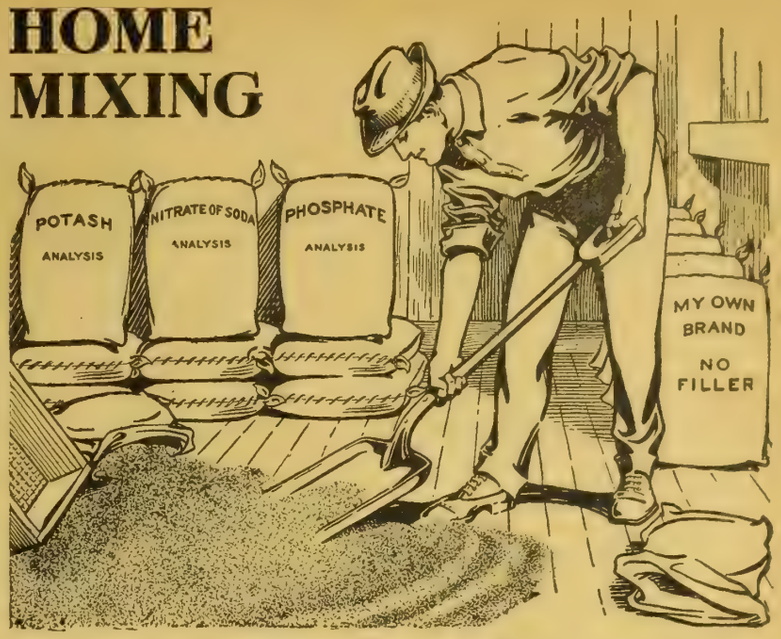
Although the increase over the year 1910 is not so very much, it indicates that the crop is most likely to turn out to be the largest crop on record. The drouth that retarded the corn assisted in clearing the wheat harvest, which may advance the yield above 800,000,000 bushels. The largest yield on record so far is 748,460,000 bushels in 1901.

Save Your Radishes and Onions.

Corvallis, Ore., May 1.:—"Carbolic acid emulsion is used to destroy the eggs and young maggots which infest radishes, onions and similar garden crops, and occasionally for other insects," is a statement of H.F.Wilson, Entomologist at the Oregon Agricultural College, who is about to publish a useful bulletin on the protection of the garden from pests.

To make such an emulsion, dissolve a pound of hard soap in a gallon of boiling water, add a pint of crude carbolic acid and churn (preferably with a hand pump) until the mixture is a creamy white. This forms a stock which may be diluted by adding thirty times as much water as stock. It should be applied to the surface of the ground about the plants.

HOME MIXING



WILL IT PAY?

The best authorities say it will in more ways than one; that you can make a ton of any brand for less than you can buy it; but better still, you can make the brand or formula that is best suited to your own farm, and you know what is in it. You can change it to suit the crop or soil.

But why change it? The old style wheat fertilizers, composed mainly of phosphate, were very profitable on the worn wheat soils, which were always short of phosphoric acid. They supplied this single deficiency, produced larger crops, which at the same time drew heavily on the other plant foods, especially

POTASH

much of which went into the wheat and many times more into the clover.

It is now time to balance the phosphate with Potash. Most of the soil Potash will not be available for a thousand years. Until then it will pay you to buy enough to maintain the supply of available Potash and give the plants a chance. **Potash Pays.**

If you prefer to cling to your old brand, low in Potash, just make a trial of mixing a 200-pound bag of Muriate of Potash with a ton of the old brand and see the difference in the weight of the heads, the strength of the straw and the stand of the clover.

Try 200 to 400 pounds per acre of a mixture of equal parts of Bone and Kainit, or still better 800 pounds Bone, 800 pounds Acid Phosphate and 400 pounds Muriate of Potash.

Get at your dealer right away, before he makes his contracts, and ask him to carry brands of wheat fertilizer that contain 6 to 8 per cent. of Potash or to carry raw materials so that you can mix to suit yourself. We will sell him, or you, Potash Salts in any amount from 1 bag (200 lbs.) up.

Write us for prices and for our two books, **"Fall Fertilizers"** and **"Home Mixing,"** which will show you how to save money and increase the profits in your fertilizer investments.

Selecting Seed Stocks.

Selection of the best heads of wheat and oats as a base of improvement is the quickest method of getting a pure seed supply for general crop. Every field of grain will contain some superior heads and a multitude of inferior heads. Right now, just before harvest, is the proper time to go into grain fields and select sufficient heads to plant a half acre or more next season. The plant breeder looks for desirable characteristics in different plants, and out of a thousand or more heads selected he may find one or two which are worth perpetuating, or, as likely as not, there will be none worthy to be preserved as parent stock. This breeding work, in its strictest sense, belongs to plant breeders, and it is hardly within the province of grain growers to undertake breeding work, but the work of improvement of the general crop by head selection should be carried on by every farmer, and it is better if one person on each farm looks after it. There are great possibilities in this work. Yields may be increased and purer and better quality of grain may be secured.

Select the heads of wheat or oats for seed purposes after the grain is fully ripened. I favor selecting the heads in the field from the standing grain, although many prefer to harvest the grain and then select the heads from the sheaves. By walking through the field one can observe stiffness of straw and physical character of head, both of which are important features. It is essential that one know accurately all the physical characteristics of the variety, else head selection will not do much practical good. This is especially important if one wishes to produce a pure variety. When selecting heads these points should be kept in mind: Select only such heads as are carried on stiff, erect stalks, and it is preferable to select for stiffness of straw from the poorer ground rather than from the best. Then take the largest and best-filled heads. One will find the greatest variation in the way heads fill. Some will be completely filled and some may not be more than two-thirds filled. I have frequently examined the heads of Turked red wheat growing on a piece of ground three feet square. There are scarcely two heads alike, and I have found heads which would contain 40 per cent. more grains than the majority of heads within a given area. These outstanding, heavy, uniform heads are the ones which should be selected for foundation seed stock. Varieties have become so confused that it is only through this work of hand selection of heads can we get back to pure seed stocks. —L. C. Brown.

Growing Better Timothy.

A Parke county, Indiana, correspondent writes: "Can you refer me to anyone who has a superior strain of timothy and alfalfa seed?"

Not much work has been done in the improvement of timothy, but wherever any work has been carried out surprising results have been had. Two points are sought after, viz.: Larger heads and more leafy growth. Those who have selected timothy seed heads averaging six inches or more, and followed up this work, have secured more uniform heads in subsequent crops. There is a good field here to work, and if the work is carried farther, it will pay to select for several years in succession the best individual stems and heads for seed purposes. A variety of alfalfa known as the "Grimm" strain has proved hardier than other strains, and it appears to be adapted to a wider range of conditions than any of the other strains.—L. C. Brown.

To Favor Foreign Interests.

The Citrus Protective League, composed of American lemon growers, is not going to sleep, and we are very glad of it. Most of the lemons marketed in this country have to cross the continent by rail for sale in the East, and the rates from California to New York are higher than the ocean freight rates to New York City from Palermo, Sicily, where most of the foreign lemons come from. The foreign lemons have such a wonderful market here that the government collected $2,233,527.87 in customs duties last year on foreign lemons at the low rate of 1½ cents a pound. This is a revenue duty with incidental protection to home interests.

Naturally, the foreign lemon importers do not care a cent for the United States except as a market for their goods, and they wish to have the duty taken off. The American growers of lemons wish the duties to remain as they are, but unfortunately it appears that Congress was called together for the purpose of reducing duties, and the American lemon growers are just simply fighting the battle of their lives.

They sent abroad to make a study of foreign lemon growing, and one of the items they claim to have found out is that a corruption fund is raised for the purpose of influencing American voters and to influence American legislators. The representative of the American lemon growers found in Palermo a very vigorous organization which is collecting funds and sending them to the United States to be handled through the American-Italian importers. The existence of this fund is no secret in Italy, but its purpose is known and understood by everyone. Prior to May 1st this money was collected by the American importing interests. A change was made in the place of collection on account of the difficulty of making the collection in New York. It was ascertained in Palermo that the collection of the fund is provided for in the steamship rate. The rate was raised to cover the amount of the assessment for the fund, and the amount of the increase is rebated and paid into the anti-tariff campaign fund in the United States, with which the foreign interests are seeking to influence public sentiment and to affect legislation in Congress. We hope that the American lemon growers will be able to retain the duties on foreign lemons.

Reduction of American duties is a stake worth playing for. It is for this that the Sicilian growers are giving up an assessment which has ranged from four cents to ten cents on every box of lemons shipped to the New York market. It is for this that they are vociferously demanding the reduction or abolishing of the lemon tariff. It is for this that they are hiring lawyers and lobbyists to try to influence American legislation. It is because of this meddling with American legislation that the names of certain Congressmen, who are held to be friends of the Sicilian lemon growers, are spoken freely in Italy, and that they are referred to as friends of the alien rather than as representatives of American industry.

With a well-financed campaign like this, aimed at an American industry, it became necessary for the lemon growers to defend their commercial existence, and we are glad to see that they are working.

Mitchell AUTOMOBILES

Runabout, fully equipped, $1200
No cars run more easily.
No cars run more smoothly.
No cars are more easily controlled.
30 h. p. 4 Cyl. $1200

American Meat Products in China.

[From Consul General Samuel S. Knabenshue, Tientsin, to the Bureau of Commerce and Labor.]

The Chinese people very rarely eat beef, and its use is practically confined to the foreign residents of the empire.

The Chinese are extremely fond of pork, but it would be imposible for American firms to ship barreled pork to China and meet the competition of the native-grown article. Good Chinese pork sells at retail at a far cheaper rate than it can possibly be put on the market in the United States, to say nothing of the freight cost halfway around the world. The new trade in Chinese pork which has sprung up between Southern China ports and England is a profitable one, owing to the cheap price of the hog. Pork grown in South China is said to be a very good article, comparing favorably with American pork. Here in the north the animals are inferior.

For the reasons given above it would be impossible for Amerian lard to compete with the Chinese product, and I can not find that any lard compound has ever been placed on the market here. It is the opinion of the Chinese compradores of several firms that I have consulted that it would not be worth their while to try to find a market for vegetable oils, as there is a large production here in the north of such oils (peanut, sesamum, soya, etc.), which are used for soap making and other purposes. Nor would there be any market for oleo oil, as the Chinese do not use butter at all; hence would not take kindly to a butter substitute.

From the Field to the Table.

From Beloit, Kas., June 28th, was announced what is thought to be the world's time record in harvesting, threshing and milling wheat and baking bread was made with grain from the W. S. Gable farm, two miles west of town. The time consumed in the entire process was exactly thirty minutes.

At 3:14 o'clock the team started into the field with the header and one minute later the harvested wheat was at the threshing machine. At 3:23 Mr. Gable drove his touring car to the mill door with a grist, and at 3:29 flour had been made from the wheat by the Beloit Milling Company. At 3:30 the flour was delivered to Walker Bros. bakery and G. H. Mills made biscuits that were taken from the oven at 3:44 o'clock, thirty minutes from the time the header went into the field.

Sale of Jersey Cattle.

On May 28th, from Kirksville, Mo., it was reported that Viola's Golden Jolly, a seven-year-old Jersey bull, which has been the pride of the big Kinloch Farm, brought $13,000 at the annual Jersey sale, the purchasers being the proprietors of the Ellendorf Farms, Lexington, Ky. Jolly Royal Sultan, two years old, a son of Viola's Golden Jolly, dam Lady Papula, was sold to C. G. Southerland, of Bentonville, Ark., for $10,000. Majestic Lady Papula, a six-year-old cow, was sold to the Ellendorf Farms people for $3,425. These figures are said to set world records for the sale of Jersey cattle.

Viola's Golden Jolly is a son of Golden Jolly and Lady Viola. He was brought from St. Queen, Island of Jersey, by T. S. Cooper & Sons, of Coopersburg, Pa., and was bought from them by the Kinloch Farm owners for $12,000 at auction. In all, 175 head of cattle were sold, netting $70,292—$401 per head for cattle of all ages.

Remedies Against Ants.

[By S. Arthur Johnson, Colorado Agricultural College, Fort Collins.]

The kinds of ants are so numerous and their habits vary so greatly that it will be to our advantage to discuss them in groups.

Ants in Houses.—Many kinds of ants infest houses. Sometimes they establish homes there, but more frequently they are in search of food. This they find in all sorts of edibles, and very often a well-defined line of travel is established between the ant nest and some source of supply, such as a sack of sugar or a store of bread crumbs. The first rule in such cases is to keep all food and bits of food out of the reach of the insects. Tight jars and bread boxes should be used. Persistent trapping will reduce the pest and often drive them away from the premises. Moisten a sponge with sweetened water and put it where the ants are frequently seen. They will collect in the sponge in great numbers. The sponge may then be thrown in boiling water and the ants killed. After the sponge has been washed to free it of the dead insects, the trap may again be set. Progress in this way is not always very rapid, but in the course of a few days the trouble will be greatly lessened.

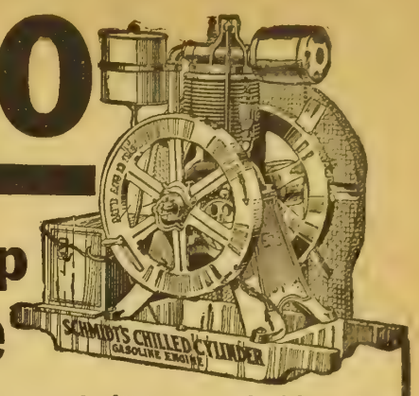
When the nests can be found in the house or near it, a number of remedies may be applied. If the insects are under boards or stones, these may be lifted and boiling water poured on the inhabitants. Nests in the walls and foundations of houses are more troublesome. Often they may be reached with gasoline by pouring it in the cracks and crevices. Sometimes such a substance as carbolic acid or naphthaline may be used as repellants. When ants are in the habit of visiting a table, they may be kept off by setting the table legs in cups containing water. Of course, in this case, the table must not touch the wall.

Ants in the Road and Lawn.—Carbon bisulphide has been found to be about the best remedy in these cases. This is a very volatile and explosive fluid and may be purchased at the drug store. While using this substance, fire of every description must be absolutely banished. With a sharp stick make holes in the nest and pour in from two to four tablespoonfuls of the fluid, depending upon the size of the nest. A tub should be immediately turned over the nest and the edges about it tightly chinked with moist earth to prevent the escape of the fumes. The insects are killed by the gas which is made when the fluid volatilizes. The tub should remain in place for some hours. There may be some danger to the grass from the use of this substance, but it will scarcely be more serious than that which the ants will themselves inflict. The same remedy is often used under flagging, but it is somewhat more difficult to make a thorough application under these circumstances.

Mound-building Ants.—In this Western country a large species of brown ants builds nests in the open fields almost everywhere. The center of the nest is conspicuous because of a mound which is built of sand or small pebbles which the insects collect or dig out of the earth beneath the nest. These mounds vary in height from two inches to two feet, depending upon the size and the age of the colony. The ground for several feet about the nest is kept scrupulously clean of vegetation, which makes the homes of the insects more striking. The interiors of the nests are formed of galleries, about three-eighths of an inch in diameter, which connect chambers one to three inches across. In some of these chambers the eggs and the young are kept; in others, food, consisting of small seeds of all kinds, is stored; still others are used as living rooms. The chambers are most numerous near the surface of the ground, but are sometimes built down for several feet. There are from one to eight openings to the nest, usually about three, which are kept open during the greater part of the day but closed at night.

To kill the insects, enough poison must be used to penetrate every chamber. The Kansas Experiment Station has found that carbon bisulphide is an excellent remedy. Choosing a time of day when the doors are open, place a dish on the top of the mound and pour into it from two to six tablespoonfuls of the fluid. Invert a tub over the mound so as to include as many of the openings as possible and stop the openings around the edges of the tub with dirt. Also, stop up any openings to the nest which the tub does not cover. The tub should be left over the nest not less than five hours. This remedy is not very expensive and will pay well where the ants are troublesome.

$7.50



And You Keep This Great Engine

Yes, sir, that's right—you keep this engine for $7.50, a wonderful gasoline engine offer, an offer without a parallel. We ship you Schmidt's Chilled Cylinder Gasoline Engine on your simple request without an order or any promise from you. You use the engine 10 entire days, use it all you want to. Then if you don't want it, send it back at our expense. If you do wish to keep it, pay us **only $7.50 and the rest in the easiest monthly payments. We send you the engine free,** to prove that it is the greatest **air cooled** 3 horse power engine on earth. It is the only engine with the marvelous, powerful **chilled cylinder.** The only engine for farm use with a **spark retarder.** The new type gasoline engine that has revolutionized the gasoline engine industry. The only engine good enough to send out on **actual free trial** without a cent down in any way.

Ten Days' Trial FREE

This is the first genuine free trial ever offered on gasoline engines for farm and shop use. We want you to see that women and children can run this engine. Use the engine to run any machinery you have—the pump—separator—washing machine—corn sheller—grinder—anything. Engine is ready to run when you get it. We will send you prepaid our sensational offer and our very useful book "How to Use Power" free.

Long Time to Pay

If you like this engine after trying it out for ten whole days you can keep it and take long time to pay for it on **easy monthly payments,** or after using it free for ten days, just send it back at our expense.

Makes Woman's Work Light and Easy

5 Years Guarantee Schmidt's Chilled Cylinder Gasoline Engine is absolutely guaranteed for 5 years in every piece and part. The biggest bank in Iowa backs our $1,000 challenge offer.

How to Use Power To all who will write promptly we will send our useful book "How to Use Power" free. Send us your name and address today.

Schmidt Bros. Co. Engine Works, Dept. 3135Y, Davenport, Iowa

Strawberry Shipments.

From Monett, Mo., on June 27th, it was reported that the Ozark Fruit Growers' Association, with headquarters at Monett, had shipped 290 car-loads of strawberries. The total number of crates shipped by the association was 146,500, for which was received $309,647.60, an average of $2.15 per crate. Owing to the drouth, the berry crop was short, but this looks like a good showing.

SPRAGUE'S Fly Bouncer

drives away flies, mosquitos and insects. No pest can live where this magic liquid is used. Heavy lasting, harmless, healing. Cows feed quietly all day and give one-third more milk. SPECIAL OFFER, if your dealer does not handle Fly Bouncer send $1 for a large sample and special sprayer. Particulars free. Write today.

W. B. McCloud & Co., 327 W. Kinzie St. Chicago

The Trade in Cantaloupes.

About this time of year the cantaloupe trade becomes interesting. On the first market day of July, at St. Louis, the market was steady and the demand good for fancy California, but weak and irregular on overripe and soft; Georgia melons selling at wide range in price, owing to great difference in quality. Fancy California standard crates in jobbing way were delivered at $2.00, and pony crates at $1.50 to $1.65—soft less. Sales included one car standard at $2.00 delivered; one car at $2.00 for standard and $1.50 for pony crates; one car at $2.00 and $1.65; and one car at $1.50 to $1.75 for standard and $1.00 to $1.25 for pony—all delivered; Georgia standard crates selling at 50c. to $1.50—mainly at $1.00 to $1.25; Alabama hampers at 25 to 40c.

Free Veterinary Advice.

On page 14 will be found a coupon which entitles the holder to free advice concerning lameness in horses. This coupon must be cut out and sent with the request for information. The coupon is issued by the McKallor Drug Company, of Binghamton, N.Y., owners of Mack's Thousand Dollar Spavin Cure. Don't forget page 14.

On the Fourth of July the Governor of Missouri was at St. Louis at a flag raising, and he said the reception was the warmest in his life, the thermometer being 101 degrees.

I SAY—ALL MEN ARE EQUAL

before the law—but it costs money to go to law. You need not go to law to get full value of your products if you weigh them on your own scale. Buy the best and your word is law. Buy from me because for forty-six years I have been fighting for you against trusts and dealers alike, who say that because I think your money should buy as much as any dealer's, they will put me out of business. We need no agents you and I. When you tell me what scale you need I will offer you mine on approval—guaranteed to suit—warranted to be standard and at the same price that your dealer would pay me. No better scale is made—no good scale is sold for less. My offer is free and saves you money.

"JONES, He Pays the Freight," 16 Ley St., Binghamton, N. Y.

Castrating Pigs.

Lots of us make the mistake of operating on our pigs after a feed. It is better to let them miss two feeds, but at least one should be omitted before they come under the knife.

If surgeons use scrupulous care to have their hands and instruments clean and disinfected, and never smear into the wound anything, and use care to keep the wound clean, can you see any reason for filling the scrotum of the pig with salt and ashes or axle grease and the like, as many farmers do? If there is danger of flies, it is admissible to smear around the wound something that will keep off flies and not enter the wound. After the operation a run in a clean, shady grass lot is better than in a close pen, and if there is clean running water in which the pigs can bathe at will you have ideal conditions for comfort and prompt healing. It is better to trim a pig when the weather is neither very hot nor very cold. D. M. Magie said the time to trim is when your knife is sharp, regardless of moon or weather, but it is better not to have the weather too hot.

As to the age of pig, trimming may be done any time after the pig is strong enough. A few days before weaning is a good time. If one is a breeder he can make better selection a few weeks after the pigs are weaned and before they begin to ride one another.

The best way for the young man to learn how to castrate is to see it done by a good operator, and then in his presence try it.

Note how he first cuts through the skin a gash long enough to allow the testicles to pass out readily and low enough to permit drainage. After the skin comes the thin, white, paper-like covering. Cut through this and let out the testicles. Pull it out two inches and notice the cord and a flat striffin. Put the point of the knife just under the testicle and next to the cord and cut the striffin loose, and, holding the testicle, pull it out; the cord will break in the body. Next be careful that no part of it or the striffin appears outside the cut. If it does, this is a ready means of infection and blood poison.

Some operators scrape the cord off; others pull out the testicle, letting the fragment recede. Handle the pig as gently as possible, and never use more force than is necessary to give the operator a chance to do his work well. We often see a pig hobble off on three legs because the hind leg has had a wrench unnecessarily. It is easy to break the ham bone by a twist or pull.—Swineherd.

Our Industrial Policy.

The National Farmer and Stock Grower is in favor of the United States collecting a reasonable range of customs duties upon all foreign farm products and on all manufactured goods admitted into the country, said duties to be applied to the support of the national government.

Every farmer in the United States is taxed by his county and state and he pays indirect taxation for the support of the federal government. We believe that the advantage of the markets of the United States belongs to the citizens of the United States, and that all foreign farm productions should pay a duty at the front door as the goods are admitted. By collecting these customs duties the state receives support and the farmer has a very moderate degree of what is called protection. In times of scarcity foreign farm productions can come in on a fair basis, and in times of abundance the country thrives without them.

We believe the farmer as a producer outranks all other people; the manufacturer is next; but without the farmers' products the manufacturer would shut his doors. Legislation against the farming interest is the height of folly. It will cause more poverty in the cities than most people imagine. The non-producing, so-called consumers in cities will be the first to find it out.

Three pieces of proposed legislation now before Congress are foolish and unnecessary. One is the bogus reciprocity bill; the next is the humbug farmers' free list; and the next is the proposed reduction of the duty on wool and woolens. None of these bills ought to pass, and the business of the whole country will learn what stagnation is if these bills do pass. The reciprocity bill may pass or be rejected before this paper is fully distributed, but the other two bills will not be passed so soon. Every effort the individual farmer can bring to bear upon these bills should be exerted to prevent their passage.

THREE-YEAR SUBSCRIPTIONS.

Orders For the National Farmer and Stock Grower Solicited.

Kindly Sign the Blank Form Below and Become a Regular Subscriber.

We desire to invite attention to our three-year subscription proposition. We hope to obtain one hundred thousand additional subscriptions during the present year to continue for three years. It is practically a trial subscription and payable at the end of the first year. The subscription can be stopped at any time by paying for the period the paper is taken. This method of taking subscriptions is the invention of Uncle Piper, our subscription editor, who has guaranteed that every one of them will be paid when they are due. The subscription price of this paper is $1.00 for three years, and the bill for the subscription is sent to the subscriber at the end of the first year. When the bill goes out Uncle Piper slips in a list of handy premiums for the subscriber to select one from, providing he pays the bill promptly, and the general result is that the bill is soon paid. When it comes to getting subscriptions from intelligent, high-class farmers, Uncle Piper is at the head of the class.

Uncle Piper.

SUBSCRIPTION BLANK.

To the Hale Publishing Co., 3550 Vista Ave., St. Louis, Mo.:

Gentlemen: — You are hereby authorized to enter my name as a subscriber to The National Farmer and Stock Grower for three years. At the end of the first year I will pay One Dollar for the three-year period. This order is given with the understanding that I am at liberty to stop the paper at any time by paying the subscription to that date.

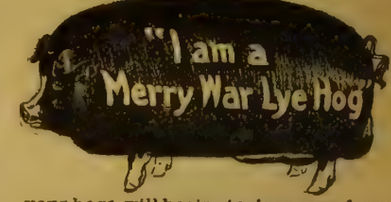
No More Hog Sickness— Feed Merry War Lye

EVERY DAY, and more convincingly than ever before, MERRY WAR LYE is proving its claim to be the Greatest Hog Remedy, Conditioner and Fattener in the World.

When farmers in practically every hog-raising state in the Union declare that MERRY WAR LYE has done more for their hogs than any other remedy they ever used—that it prevents cholera, cures worms, puts their hogs in a fine, sleek, fat condition and INCREASES THEIR PORK PROFITS—YOU surely should be convinced that it will do the same for YOUR hogs. For hog diseases are the same in all parts of the country. Hundreds of farmers write us similar to this:



"It Cured Our Hogs"

Mrs. T. Akins, Hoxie, Ark., writes: "MERRY WAR LYE is all the lye that we use. Before we began using it we had a lot of hogs with Cholera. We used MERRY WAR LYE and it cured our hogs."

"Best Destroyer of Worms"

Mr. H. F. Gustoff, Coon Rapids, Iowa: "MERRY WAR LYE is the best destroyer of worms in hogs I ever used. It is all right."

Keep YOUR Hogs Healthy— Make Them Fat and Thrifty.

TRY MERRY WAR LYE at once. The cost is a trifle. Feed it night and morning EVERY DAY. You will notice that your hogs will begin to improve from the first feed. Makes them immune to disease—fattens them surer and quicker than anything else—tones the system, assists in the perfect assimilation of food and prevents scouring. It saves feed, because every pound of corn or other ration fed goes into flesh and fat and none of it is wasted.

IMPORTANT WARNING!

Don't infer that ordinary, or regular, lye can be used as a hog remedy.

MERRY WAR LYE is prepared ESPECIALLY as a hog remedy and it is the only lye that is guaranteed to be absolutely safe to feed to hogs.

Save These Directions

Follow these directions carefully: Mix one tablespoonful MERRY WAR LYE with slop for 10 hogs, or ½ can with barrel of swill. Stir well and feed night and morning. If your hogs are on a dry feed ration, mix ½ can MERRY WAR LYE to each barrel drinking water.

At All Leading Dealers

Most dealers handle MERRY WAR LYE. If yours can't supply you, write us, stating your dealers' names, and we will see that you are supplied and will also send you, free, a valuable booklet on, "HOW TO GET THE BIGGEST PROFITS FROM HOG RAISING."

MERRY WAR POWDERED LYE comes in 10c cans, full case of 4 dozen cans for $4.80, at Grocers', Druggists' and Feed Dealers'. There are no substitutes.

E. Myers Lye Co., Dept. 22 St. Louis, Mo.

Another Beef Inquiry.

There is another beef inquiry, and it has begun at Washington, D. C. One of the first witnesses examined was Gustav Bischoff, of St. Louis, who is in opposition to the great packers, as President of the St.Louis Independent Packing Company. He gave the committee the benefit of his experience in the packing business since 1863 and dwelt with emphasis upon the great strides that have been made since the introduction of refrigeration. It is his opinion that cattle producers obtain better prices for their product at present than before the days of the big packers, and that the consumers enjoy the benefits of lower prices due to the economies of the packing houses.

He said the packers could undersell the local butcher because they utilized every part of the animal slaughtered.

"Do you believe the consumer gets his meat in better condition now than he did before the advent of the packing establishments?" asked Senator Reed.

"He positively does; I know it," replied Bischoff.

The Wool Situation.

The United States produced 321,000,000 pounds of wool in the year 1910; imported 264,000,000 pounds of wool in 1910 and imported 264,000,000 pounds of woolen goods in 1910. Congress is now trying to do away with a large portion of the revenue derived by the government from the duties on the foreign importations, also to increase the foreign importations at reduced duties for the purpose of decreasing the value of the home productions. This legislation is supposed to be for the good of the country, but it is more likely to be (as was the removal of the duty on hides) for the benefit of other countries.

Crops For Hogging Off.

A Boone county, Indiana, correspondent asks: "I have a piece of corn that I am intending to commence to hog off just as soon as the corn is hard enough. How would it do to sow alfalfa in this corn? Would it make any feed for the hogs this fall?"

It would not pay to sow alfalfa seed among corn which is to be hogged down. Seeding among rows is not considered a safe practice, and the trampling of the hogs would just put another burden upon the crop. If the prime object is to obtain additional green feed for the hogs, I should sow rape or soy beans. Rape makes excellent green food, and while it will not balance up the corn as do peas or beans, still it supplies succulence. There is no short cut in establishing alfalfa or grasses, and I advise against using them for mere catch crops, especially when we have so many other crops which will fill in much better.—L. C. Brown.

COUGHS and DISTEMPER

Among Colts, Mares and Stallions cured with one bottle of FRAZIER'S DISTEMPER CURE, or your money refunded. One dose placed in trough or feed will prevent all cases. Influenza, Pink-Eye, Catarrhal Fever, Colds and all forms of Nose and Throat Troubles cured in four to eight days. $1.00 bottle holds three 50-cent size bottles. Send postal for free booklet on the horse. Sold by druggists or prepaid from

BINKLEY MEDICAL CO., Dept. H, Nappanee, Ind.

The Profit in Alfalfa.

A few years ago it was the generally accepted idea that the successful growing of alfalfa was confined to a few especially favored states. That this belief was without foundation is proven by the crops that have been grown in localities where it was thought this profitable forage crop would not grow. For instance, who would have believed that alfalfa would grow and survive the rigorous winters of the Canadian Northwest? Yet such is the case. As to the time of year best adapted to sowing the seed, much depends upon the locality. It is sure, however, that the seed bed must, in every case, be properly prepared, good seed used and properly sown. The Superior Grain Drill, manufactured by The American Seeding-Machine Co., Incorporated, Springfield, Ohio, is admirably adapted for sowing alfalfa. The seed can be sown through the furrow openers and drilled in rows, or it can be broadcasted by detaching the grass seed tubes from the grain tube tops, thus letting the seed fall between the discs. In either case, whether drilled or broadcasted, the discs give the ground an additional cultivation and thus prepare a more mellow seed bed. The Superior Grain Drill is not only adapted to the sowing of alfalfa, clovers and grasses, but all known seeds, from wheat to seed as large as bush Lima beans, and in any amount desired to the acre. This machine is manufactured in plain grain and combined grain and fertilizer styles. It can also be had in all sizes with different spacing between furrow openers. Single discs, double discs, hoes and shoes can also be had. Write to The American Seeding-Machine Co., Incorporated, Springfield, Ohio, for their Superior Drill catalogue. Then go to your nearest implement dealer and ask to see the Superior, which is guaranteed to do and to be all that the manufacturers claim.

The Value of Grosbeaks to Agriculture.

The grosbeak is a very much maligned bird, and, instead of being destructive to crops, he is, on the contrary, of great benefit, according to Farmers' Bulletin 456, just issued by Secretary Wilson. The bulletin states that seven kinds of finches, commonly known as the grosbeak, summer within our boundaries. A majority of these are good friends of the farmer and deserve to be widely known in order that their services may be appreciated. The grosbeaks are easily distinguished from other finches by their stout form, bright plumage, massive bills and melodious voices. Two of them live mainly in cold, mountainous areas and have little to do with farms or with the insects that prey upon crops, and these may be dismissed without further notice. The other five live largely in agricultural regions and secure most of their food about cultivated lands. They perform invaluable service in destroying certain of our worst insect pests.

The rose-breasted species is a great destroyer of the potato bug. He breeds over Kansas and the mountains of Tennessee. The investigations of the Department show that the bird is fond of green peas, but invariably consumes enough injurious insects to more than offset the damage. He has become famous for his preying on the Colorado potato beetle, and no less than one-tenth of the total food it consumes has been proven to be the potato beetle. It attacks the cucumber beetle. It has proven an active enemy of the Rocky Mountain locust during that insect's ruinous invasions, and among the other pests it consumes are the spring and fall cankerworms, orchard and forest tent caterpillars, tussock, gypsy and brown-tail moths, plum curculio, army worm and chinch bug. In fact, states the bulletin, it attacks the worst enemies of agriculture.

The cardinal or red-bird species, ranges from Southern Mexico, Lower California and Arizona north to Iowa and Ontario, and east to the Atlantic Coast. They are permanent residents, spending the summer and winter in the same locality. It has been claimed that they pull sprouting grain, but no evidence of damage to either grain or other crops is shown from over 500 examinations. On the contrary, they do much good. They feed on locusts, periodical cicado, the Colorado potato beetle, the rose chafer, cotton worm, plum or cherry scale, the zebra caterpillar of the cabbage, the cucumber beetles, billbugs, locust flea beetle, corn-ear worm, cotton cutworm, Southern fig-eater, coddling moth and boll weevil, and, in addition, are great consumers of injurious weed seeds.

The black-headed grosbeak hails from Southern Mexico and invades North Dakota and Nebraska. It fills the same place in the West that the rose-breast does in the East. It is a foe to the worst pests of horticulture, the scale insect composing a fourth of its food.

The blue grosbeak breeds over the southern two-thirds of the United States and is greatly destructive to weevils, grasshoppers, locusts, caterpillars and worms.

The gray grosbeak inhabits Texas, Arizona and New Mexico. It is a consistent enemy of the boll weevil and cotton worm. It also consumes great quantities of harmful weed seeds.

The bulletin winds up with a plea for the protection of the grosbeak, and says: "Present investigations prove that the services of the grosbeak in destroying insect pests are invaluable. Each kind pays especial attention to certain pests, which, if unchecked, would cause enormous loss. Few of our birds are to be credited with more good and with fewer evils than the grosbeak, and none more clearly deserves protection by the practical farmer."

Cost of Raising Grain.

Including the item of rent, the cost of raising wheat in the year 1909 was estimated by the Department of Agriculture at 66 cents a bushel; the cost of raising corn was 38 cents a bushel; and the cost of raising oats was 31 cents a bushel. These figures are probably a reasonable statement of fact where the three grains are successfully grown.

The average wheat fields were 59 acres; corn fields, 30 acres; and average oat fields, 25 acres.

The wheat cost the farmer to raise it $11.15 per acre; the corn, $12.17 per acre; and the oats, $10.91 per acre. On the selling basis of 95 cents a bushel on farms, the wheat showed a profit of $5.33 per acre; on the selling basis of 62 cents a bushel on farms the corn showed a profit of $7.82 per acre; on the basis of 40 cents a bushel at the farm the oats showed a profit of $4.17 per acre. These are the figures of 1909. Today there is considerable decrease in price of grain and farmers are not making any such profits.

Pasture For Next Spring.

A Jasper county, Illinois, correspondent writes: "We are going to be short on pasture next spring. How would it do to sow grass seed in corn?"

Under present conditions I do not think that very much good would result in sowing pasture grasses or clover in corn. The ground is too dry. Sowing clover and timothy seed at present prices would mean a considerable loss, and the chances for the seed amounting to anything would be very small, unless we have more rain during July and August than we had during May and June. Instead of sowing grass seed this summer, expecting it to make a permanent pasture, I should sow winter rye or winter vetches. Both of these crops will make some feed late this fall, and they will come on early next spring and make good feed for all kinds of stock, except horses.—L. C. Brown.

Exporters cleared away the surplus cheese in the month of May, otherwise the New York market would have been overstocked. The May exports were 20,782 boxes, against 2,133 boxes the year before. Cheese is cheap, and that accounts for the exports.

The Howard Watch

As soon as a man owns a motor car he begins to take a new account of time. And as soon as a man appreciates precision in a timepiece he is in line for a HOWARD Watch.

There are 450,000 automobile owners in the United States—and they are rapidly learning that there is no watch for their use like the HOWARD.

Its hard-tempered balance will not knock out of true with the jar and jolt of travel. It is unhurt by changes of temperature or the vibration of the machine.

Its adjustment is permanent and constructive—perfected during the building of the watch, not added afterward as a superficial polish.

Every HOWARD is cased at the factory—and timed and adjusted in its own case.

A HOWARD Watch is always worth what you pay for it.

The price of each watch—from the 17-jewel (*double roller*) in a Crescent or Boss gold-filled case at $40 to the 23-jewel in a 14K solid gold case at $150—is fixed at the factory and a printed ticket attached.

Find the HOWARD jeweler in your town. When a man makes a permanent investment like the purchase of a HOWARD Watch he naturally wants to *see* what he is buying—he wants to get the dealer's expert advice. The HOWARD Watch is sold only by legitimate jewelers—and not every jeweler can sell you a HOWARD. The jeweler who can is a representative merchant—a good man to know.

Send us your name on a postal card and we will send you—FREE—our pamphlet—THE STORY OF EDWARD HOWARD AND THE FIRST AMERICAN WATCH. It is a chapter of History that every man and boy in this country should read.

National Egg-laying Contest.

From Mountain Grove, Mo., it was reported on June 24th that arrangements have been completed and the buildings are being erected for the National Egg-laying Contest, to be held at the Missouri State Poultry Experiment Station at Mountain Grove.

The contest will be under the direct charge of T. E. Quisenberry, Director of the Station, and the Missouri State Poultry Board, assisted by an Executive Board consisting of Prof. F. S. Jacoby, of the Kansas Agricultural College; Prof. W. A. Lippincott, of the Iowa Agricultural College; Prof. A. G. Phillips, of Purdue University, Indiana; Prof. D. O. Barton, of the Illinois Agricultural College; Prof. Jas. G. Halpin, of the Wisconsin Agricultural College; N. E. Chapman, of the Minnesota State Board of Agriculture; and R. C. Mawry, of the Yester Laid Egg Farm, Pacific, Mo. The men are among the leading poultry experts of the country, and they will have direct charge of the details, records, management, etc. Absolute fairness, impartial judgment and correct records are assured, so the best birds will win.

Farmers Can Investigate.

In one of the circulars issued by the German Kali Works we find a paragraph saying:

"Every crop takes from the soil more potash than phosphoric acid, but practically every brand of ready-mixed fertilizer in common use contains more phosphoric acid than potash. Consequently what you need is potash, and lots of it, to make up for the years of underfeeding."

Farmers can investigate this first by sending to their State Agricultural College a sample of their soil for analysis and asking the chemist to designate what amount either of the three ingredients — nitrogen, phosphoric acid and potash—are deficient.

Then take the list of fertilizers sold at retail and see from the guarantee what the mixed fertilizers contain.

It will be found, almost invariably wherever low-grade fertilizers are bought continually, that the land is deficient in nitrogen and deficient in potash.

Millions upon millions of acres of lands, especially in the South, are deficient in nitrogen and potash and stuffed with phosphoric acid. The aim of the fertilizer manufacturer in catering to the demand for cheap goods is to send out fertilizers that contain either none, one or two per cent. of nitrogen, and one or two per cent. of potash, and eight to eleven per cent. of phosphoric acid, because it is the cheapest element.

For many years farmers have been paying for an excess of phosphoric acid when they needed nitrogen, and they have been buying an excess of phosphoric acid when they needed potash. Farmers can verify this for themselves, and directly they prove it they will quit buying low-grade mixed fertilizers and buy each ingredient they need and cut out buying what they do not need.

We have been told that the surplus of phosphoric acid remaining in the soil may not be available; but the phosphoric acid was bought to be available, and, if not available, it is useless to buy any more. But the potash is not available if it is not in the soil; neither is the nitrogen available if it is not in the soil. This simple statement is necessary to clean up the talk about availability. We cannot have a good crop of oats if the land is stuffed with phosphoric acid, if it is also deficient in nitrogen and potash. Sixty bushels of oats take from the soil 55 pounds of nitrogen, 22 pounds of phosphoric acid and 62 pounds of potash. Yet the fertilizer agent sells on the basis of two pounds of potash, no nitrogen, and ten pounds of phosphoric acid for $16 a ton, and then we expect to raise oats on poor land that needs fertilizer. On page 3 there is interesting reading about mixing your own fertilizers; it is worth money to those who will read it.

The Corn Market Situation.

The corn crop of the present year will not be so large as it was last year by several hundred million bushels, but it will be worth more money.

This is not our report, or the government report, or any other report. It is the opinion of the Chicago grain dealers; not any particular one of them, but the composite opinion of the whole push and fraternity. The opinion may vary from day to day, but corn has advanced in price on the opinion already expressed.

On June 30th, a year ago, cash corn at St. Louis was quoted at 60½ cents a bushel, and this year, on June 30th, the quotation was the same. On May 31st cash corn was selling at St. Louis at 52½ cents, and on June 30th at 60½ cents, showing a clean advance of 8 cents a bushel in a month.

We now turn to Chicago and find that the July option quoted May 31st at 53⅜ cents advanced to 58⅞ cents by June 30th. We find the September option quoted June 30th at 61¼ cents a bushel, which is 1½ cents higher than September was quoted a year ago. We also find the December option quoted at 60⅛ cents a bushel, which is 1¾ cents higher than a year ago.

Looking at the market quotation, June 30th, it appears as though 60 cents a bushel is the favorite Chicago market figure for the next six months, with such variations as different opinions may bring forth.

Forget the Overstocked Markets.

The commission firms who collected commissions for selling two and a quarter millions of cases of eggs in New York City in three months of 1911 were the people who started the howl that we had to go to Canada for eggs to feed our people. For the time being they have stopped the racket, but they will start it up again directly they have time to forget who feeds them.

Wheat Heads Not Filled.

Another correspondent writes: "I find scattered through my wheat fields heads of wheat which have ripened prematurely, and which are only partially filled. What is the cause of this?"

Crop observers who have been traveling lately through the early wheat fields have noticed many heads carrying only three or four plump berries. No doubt this has been due to lack of moisture. Light-colored heads which carry no berries or only affected with insects or with a peculiar blight which has been observed in Indiana wheat fields for several years. In other regions where moisture conditions have been more favorable the crop is heading and filling almost perfectly, and the crop in Northern Indiana promises equally as big as last year.—L. C. Brown.

Two Profit Earners
This 1½ H. P. Waterloo Boy Farm Pump Engine
is the simplest, lightest, strongest gasoline engine for its size and rating in the world. It is geared up directly to the pump by a strong double back gear. This cuts out all belting and makes it Simple, Powerful and Economical. You can disconnect it in an instant and belt it up to any other farm machine, from cream separator or washing machine to corn sheller or light dynamo.
Waterloo Boy FARM PUMP Engine
is a general utility engine and will prove the steadiest worker on the farm. It is so simple and convenient that a woman or boy can run it. Starts easy in coldest weather. It's a real "Waterloo Boy" with all the superiority that has made this name famous. For Efficiency and Service the year round, it has everything else on the market badly beaten and It Undersells All Competitors.
5 Year Guarantee
Buttercup Cream Separator
Is a big money-maker because it saves all the golden dollars out of the cream—it skims down to 1-100 of 1% of the butter fat. It's a standard, tried and tested machine with a clean "make good" record. Built low down, with heavy steady frame and big bowl. Light running, sanitary and easy to clean. Will last a life time.
These machines are the product of experience and "knowing how" and are backed up by an 18 year record of square dealing and making good. They are good machines to trust.
Let us tell you the whole story about them. Write today for catalogs.

MAP OF YOUR OWN STATE FREE.

Revised Series Indexed Pocket Map and Shippers' Guide Now Ready For All States and Territories and Containing the New Census.

These Maps are issued as supplements to The National Farmer and Stock Grower. They are on fine stiff paper, double strength; are 22x26 inches; printed in colors. They are folded to pocket size, 4x6½ inches, and contain full and complete information concerning all steam railroads, including all new lines built during the previous year, are shown—all proposed extensions are indicated. All stations and junctions are clearly marked.

All electric roads, including all new lines built during the previous year, are shown in red.

All new countries, boundary lines and changes in surveys are given. All new postoffices and express offices, thousands of which are established each year, are entered.

Population statistics, based on the latest federal census, are given for every city and village. By an index every postoffice can be found instantly.

Send us Fifty Cents to pay for one-year's subscription to The National Farmer and Stock Grower and you can select as a free supplement one of these Maps with booklets, which will be sent free, postpaid, safe delivery guaranteed. You can select any state, New York or California, Maine or California, Texas or Missouri. This offer holds good during the dull summer months to liven up business. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Mexico Importing Food.

Mexico is not collecting import duties upon grain during the month of July. It is a war measure. They have been engaged in a revolution, and it has been found that the crops do not grow if they are not planted. The break from the habit of collecting customs duties is only temporary.

Not a Patent Medicine.

Bodi-Tone, the tablet medicine which is becoming so popular through its cures, is not a patent medicine. Its ingredients are not a secret. It contains Iron Phosphate, Gentian, Lithia, Chinese Rhubarb, Peruvian Bark, Nux Vomica, Oregon Grape Root, Cascara, Capsicum, Sarsaparilla and Golden Seal. Such ingredients guarantee its merit. Read the trial offer on last page.

ASK YOUR DEALER TO SHOW YOU
The BLIZZARD RAPID RELIABLE ENSILAGE CUTTER
It's Guaranteed
You can't afford to buy any ensilage cutter until you have examined the Blizzard which has 40 years of success behind it. Equipped with improved wind elevator, knives that can be adjusted while running. Self-feeding table. Tested by 50% greater strain than is ever called for in actual use. Fully guaranteed. Sold ready for use. Only 3 pieces. Write for "Why Silage Pays" and "The Evidence." Sent free together with latest catalog of Blizzard cutters.

KANSAS CITY VETERINARY COLLEGE

Thorough and complete course. Great Demand for Graduates as Practitioners, Teachers, Investigators, Sanitary Officers, Army Veterinarians, U. S. Inspectors. Catalog and other information sent on application.
DR. S. STEWART, Secretary, 1312 East 15th Street, Kansas City, Mo.

The Market For Peaches.

On July 1st, at St. Louis, receipts of peaches were light, and large-sized fruit with good color in pretty good demand; small and hard on poor-colored stock dull. Texas Elbertas (express receipts) sold at 85c. to $1.25 for four-basket crate, according to condition, and clean-up of a car Arkansas Mamie Ross six-basket crates at $2.25. Express receipts Missouri and Arkansas four-basket crates at 50 to 60c., and one-third bushel boxes at 50c. Alabama flat crates large yellow at 75c. to $1.00, and white at 75c. for sound—specked less. Home-grown and nearby early halves dull at 20 to 50c. per half-bushel basket.

How to Save the Corn Crop.

Sam Jordan, corn expert in the employ of the Missouri State Board of Agriculture, known in every Missouri corn county as a Farmers' Institute lecturer, has issued this statement to corn growers:

"Boys, don't give up the ship. A serious drouth threatens us. All that can be done is frequent, persistent, shallow, level cultivation. Once a week, if possible, make a dust mulch. These things done may mean a crop with very little rain. Neglect it and with little rain it means sure failure. Missouri corn growers can put across a crop with very little rain by borrowing dry-farming methods. You must act. Keep the cultivators going in the dust.

"After a shower a crust forms on the ground. In this crust are thousands of little cracks that are like chimneys to let the water out of the soil into the air. From a soil with reasonable moisture about 126 tons of water per acre evaporate in one week of dry, hot, windy weather. Shallow, frequent cultivation stops this.

"Get busy, keep busy, save the corn. Sit and wait for the rain and you lose."

Here is what President Worst, of the North Dakota Agricultural College, says:

"If I were to come onto your farm and set 750 teams to work for a week hauling water onto a quarter section at the rate of four tons a day, I would then only put on as much water as evaporates in a week when there is a good moisture content in the soil. A thorough harrowing will stop this evaporation and save that amount of water."

Automobile Boat Power.

With the advent of real summer weather a new use has been discovered for the automobile which will doubtless add materially to its popularity in the sunny days of July and August. This latest duty of the family machine is that of a "power plant" on a house boat, a simple but ingenious device serving to apply the power of the engine to navigation.

It was the owner of a Case car on the upper Mississippi river who first devised the simple method of jacking up the rear wheels of his car, after firmly blocking it on his house boat, and then by means of skeleton sprocket wheels bolted onto the wheels of the car, connecting the machine with the paddle wheel on the rear of his craft. By having the driving sprockets small and the paddle wheel sprockets rather large the proper ratio of speed and power is obtained.

After this has once been done it takes but a few minutes to remove the attachments or to put them on again, and a party may have either an automobile or a power house boat at will. There were but few autoists along the water courses and lakes that took advantage of this arrangement last summer, but this year their number has rapidly increased.

While the Case car was the first to prove its versatility in this respect, there have been many other makes put to the same use but with less success. The reason is that the steady drag of a boat is more trying on an engine than is land locomotion, and consequently it takes a better engine to "stand up" under it. The engine put out by the J. I. Case Threshing Machine Company, however, has demonstrated its ability to run smoothly even with this handicap, and, having conquered land and water, it may seek aerial laurels next.

The Oats Market Situation.

It is of very little benefit to the farmer that oats have advanced a little in price. The entire surplus crop of the year 1910 was sold at low figures. For ten straight months the prices in market fluctuated from 31 to 34 cents a bushel. After paying freight bills and commission charges the farmer who netted 25 cents a bushel for his oats was in luck.

The oats crop situation on July 1st, 1911, is an uncertain quantity. The speculative forces look for a very much smaller crop in 1911 than last year. The next crop report issued by the government, available on July 10th, is expected to sustain the reports already received on the market—that it will be one of the lowest acre yields in history.

The people who trade in grain have some regard for the United States government report, mainly because it is issued by authority of the government and is accepted as such in other countries. Active buisness men anticipate the government reports; or, to be more precise, it is proper to say that active business men endeavor to anticipate the effect of the government report on other people. The United States Department of Agriculture does produce some careful compilations, but the Department does not pretend to foretell the future. With the government report in hand and with considerable fresh information coming in from time to time the statistical experts in the employ of the grain dealers are able to reach commercial conclusions upon which it is safe to buy and sell.

After all is said and done, the market quotations represent the consensus of opinion, backed by dollars and cents, and the quotations are not mere figures to play with. "Money talks" is a good old saying, and when we read the Board of Trade quotations we are reading figures backed by money that talks louder than words.

On May 31st, at St. Louis, cash oats were selling at 33½ to 34 cents a bushel, and thirty days later, on June 30th, the cash price was 44 cents; here is an advance of 10 cents a bushel of 32 pounds. We always mention the St. Louis cash quotation, believing it to be the clean result of a competitive market, and the grain appears to be going directly into consumption.

At the Chicago Board of Trade, on May 31st, the May oats option was closed out at 34½ cents a bushel, and the July option was quoted at 35½ cents; on June 30th the Chicago July option closed at 43¼ cents, showing an advance in a month of 7¾ cents a bushel. The September oats option closed on May 31st at 35½ to 35⅝ cents a bushel, and on June 30th the same option closed at 44⅝ cents, an advance of 8¾ cents a bushel in a month. Then again oats have been contracted for delivery in December at 46½ cents. A year ago the same option was quoted at 38⅞ cents.

Whosoever may read this reference to the oats market situation, dated June 30th, should remember that it can be brought completely up to date by looking over the daily market which is just issued. There may be a further advance, and there is room for it.

Let the

Homeseekers' Land Library

Help You to

Home and Fortune

The Union Pacific has collected hundreds of land books, each of which gives you uncolored facts regarding conditions in the thriving Pacific Northwest.

From them you learn what others have done, what crops pay, where you will find a market, what capital you need.

These books give you an accurate account of industrial conditions. They were not written to sell you land, but to help you settle yourself in a land where opportunity is young.

Write and tell us the state and industry which most interests you. We will send you the right books by return mail.

The Juicy Watermelon.

On the first market day in July, at St. Louis, the watermelon trade was weak under large offerings, but there was a pretty active demand (best for large melons) and free movement. The range in a jobbing way delivered at 70 to 90c. per 100 pounds for Watsons and 60 to 75c. for Kolb Gems. Sales on track: One car Alabama Watsons (24,000 pounds) at $145; one car Florida do. (24,000 pounds) at $155; one car 25-pound average Florida Watsons (showing decay) at $160; one car 22-pound Florida Watsons at $190; two cars 26 and 28-pound do. at $225. Delivered, per 100 pounds: Four cars Florida Watsons at 70c. for 20 and 22-pound; 80 and 85c. for 24 and 26-pound, and 90c. for 28-pound; two loads 24 and 25-pound Georiga Watsons at 70c.; half car 28-pound do. at 80 and 85c.; two loads 27-pound do. at 90c.; one car 28-pound Florida do. at 80c.; two cars do. at 85c.

Grain at St. Louis.

Sample wheat, in bulk, on track: No. 2 red—New sold at 86½ to 87½ cents; No. 1 at 87 to 87½ cents; No. 3 red—New sold at 84½ to 85¼ cents; No. 4 red—New sold at 78 to 83 cents; No. 2 hard—Quote at 88 to 95 cents, nominal; No. 3 hard—Quote at 86 to 92 cents, nominal, per bushel.

Sample corn on track: No. 2 corn, 60½ cents; No. 3 corn, 59½ cents, nominal; No. 4 corn, 58 cents, nominal; No. 2 yellow, 60½ to 61 cents; No. 3 yellow, 60 cents, nominal; No. 4 yellow, 59 cents, nominal; No. 2 white, 60½ cents; No. 3 white, 59½ to 60 cents; No. 4 white, 58 cents, nominal. Cob corn—Mixed, 60 cents, nominal; white, 61 cents, nominal, per bushel.

Sample oats on track: No. 2 white, 45½ cents, nominal; standard, 44½ to 45 cents; No. 3 white, 44 to 45 cents; No. 4 white, 43½ to 44 cents; No. 2 oats, 44 cents, nominal; No. 3 oats, 43½ to 44 cents; No. 4 oats, 42 cents, nominal, per bushel.

Poultry at St. Louis.

Live poultry quotations at St. Louis, July 1st: Spring chickens, 1¼ pounds and under, 16c.; do., 1½ pounds, 18c.; do. 1¾ pounds and over, 19c.; chickens, fowls, 10c.; cocks and stags, round, 6c.; turkeys, choice, light or medium hens, 15½c.; turkeys, Toms and heavy rough stock, 13½c.; old ducks, 9c.; spring ducks, 12c.; old geese, 5c.; spring geese, 9c.; Guinea chickens, young, per dozen, $7.00; do. old, per dozen, $2.00. Dressed iced poultry: Turkeys, hens, 16½c.; Toms, 14½c. Spring chickens, 17 to 20c. Fowls, 11c. Stags and cocks, round, 7c. Old ducks, 10c.; spring ducks, 13c. Old geese, 6c.; spring geese, 10c. Eggs, 12 to 13½c. a dozen.

Farmers will not have to sell the 1911 crop of oats at 25 cents a bushel on farms. There will not be so many oats, but there will be just as much profit.

A bread-baking combine is being stocked up with 80 per cent. water. The works ought to be confiscated by law before they start business. It is no better than a combine for housebreaking purposes.

J. G. Robbins & Sons, of Horace, Ind., held an auction sale of Shorthorn cattlle at Omaha, Neb., June 15th. The average of forty-nine head was $123; forty-two females averaged $111.20, and the seven bulls averaged $192.15.

Simple Cream Calculation.

A simple way to determine the amount of cream of any desired richness a given quantity of milk should produce is given by the De Laval Monthly:

This is something one would often like to know, and is capable of determination in a very simple manner, provided the percentage of butter-fat in the milk is first ascertained.

Multiply the pounds of milk by the per cent. of fat in the milk, and then divide the product by the per cent. of fat it is desired that the cream should contain.

The result will be the pounds of cream that the amount of milk would produce of the prescribed degree of richness, and if this is divided by 2.091, which is the weight of one quart of cream, the figure thus obtained will be the number of quarts of cream that would be produced.

For example, if it is desired to know what quantity of 30 per cent. cream would be produced by 100 pounds of 5 per cent. milk, proceed as follows:

Multiply 100 by 5 equals 500; divide 500 by 30 equals 16.66 2-3; divide 16.66 2-3 by 2.091 equals 7.97, the number of quarts of cream there would be.

First Creamery and Separator.

According to Hoard's Dairyman, the first creamery building in the world was erected April 1, 1872, at Spring Branch, three and one-half miles from Manchester, Iowa. It was not a very pretentious building, containing only two rooms, one of which was utilized for storing milk in pans, the other containing a churn and Bennett's Butter Worker. In this building Mr. M. Van Deusen, the first creamery buttermaker in the world, manufactured butter which commanded the highest price on the New York market.

The real cream separator did not appear on the market until 1879. During that year two machines were perfected; one was known as the Danish Weston, invented in Denmark; the other, the De Laval, invented in Sweden. Both of these separators were hollow-bowl machines. The cream separator originated in 1865 when Prandtl, of Munich, Germany, creamed milk by means of two cylindrical buckets revolving upon a spindle.

Cheese was made right after the war by C. W. Gould, of Elgin, Ill., and in 1866 he and David Hammond built a factory on Gould's farm. In 1868 they built one five and one-half miles east of Elgin, in which A. Nolting took an interest and became the owner in 1870. Several others sprung up in these localities at about the same time. Butter was made at some of these cheese factories, but just the exact date we cannot give. The first cheesemakers sold cheese as high as 38 cents and not lower than 12½ cents. Creamery butter sold for 40 cents and over for several years.

Heifer With Congested Udder.

I have a heifer (calved about three weeks ago) which has a lot of blood coming out with the milk; sometimes the milk is half blood. The heifer is very quiet, not knocked about in any way, so that it is not the result of bruising. I do not think that she cleansed properly, or there was some trouble, because a lot of bloody slime came away days after calving. Is there any way to stop the blood coming with the milk, and what is the cause? Yours, etc., "Rustic."

The blood in the milk is probably the result of a congested condition of the udder. The blood-stained slime which came away from the passage for days after she calved points to some after trouble there, and it may be that a portion of the membranes did not come away. This could have a bearing on the present condition of the udder. Unless she gets the blood poisoning as a result of the trouble behind, she should recover, and it is quite possible that she will be all right by the time this reaches you. If she is not, give the passage and the womb a good washing out with a couple of gallons of warm water in which two tablespoonfuls of Jey's fluid has been added. For this use the funnel and tubing supplied for treating cows afflicted with contagious abortion. Also give her a drench composed of Epsom salts, twelve ounces; powdered aniseed, one ounce; warm, thin gruel, one and one-half pints. After an interval of three days follow this with three ounces of Epsom salts once daily for four days. Do not let the udder get full of milk. Draw away all you can three or four times daily.—Farmer and Grazier.

Increase in World's Production of Cotton.

The world's production of cotton in 1910, as measured by the factory supply—that is, the quantity entering into commercial channels—was 19,171,000 bales; in 1909 it was 16,776,000 bales; in 1908, 19,636,000 bales; and in 1907, 16,512,000 bales. The 1910 production for mill consumption represents an increase of 2,395,000 bales, or 14.3 per cent., over the production in 1909—a decrease of 465,000 bales, or 2.4 per cent., from 1908, and an increase of 2,659,000 bales, or 16.1 per cent., from 1907. The average production of cotton for the world during the past seven years has been approximately 18,085,000 bales, or 1,086,000 less than the production of 1910. It is pointed out that the figures are intended to state the world's yield of cotton for mill consumption and not the total production. Large quantities of the fiber grown in China, India, Persia, Russia and other eastern countries and in South and Central America are consumed in the homes of the people and do not enter commercial channels. No accurate estimate can be made of the amount of this cotton. The world's production in 1910, shown in the table, amounted to 9,585,500,000 pounds, with an estimated value of about $1,250,000,000.

In 1910 the United States contributed 59.9 per cent. of the total quantity of commercial cotton of the world; British India, 18.3 per cent.; Egypt, 8 per cent.; and Russia, 4.7 per cent.—From Census Bulletin.

Peas Two Years in Succession.

A Newton county correspondent asks these questions about cowpeas and vetches: "Would it do to sow cowpeas two years in succession on the same piece of ground? Will small grain do to follow winter vetch?"

I do not recommend sowing cowpeas too frequently upon the same piece of ground. The reasons are these: When grown for two or three years in succession peas are liable to become infested with insects, which work upon and destroy the roots of the plants. I frequently have my attention called to fields which seem to be struck with blight; that is, the leaves turn yellow, and many of the vines finally succumb. This is due to nematode worms. Peas will do better when grown in rotation with other crops. Peas really are of the same character as clover—the crop is likely to deteriorate if grown longer than one year on the same piece of ground.

As to vetches, some practical farmers claim that they dry out the ground too much, to be followed by a crop of small grain.—L. C. Brown.

Crimson Clover For Hay.

A correspondent wants to know whether I recommend crimson clover for hay, and also whether there is anything better for a cover crop.

Crimson clover, because of its habits of growth, does not make a first-rate article of hay, although it is used for that purpose in some regions where other clovers have failed. It is sown in the fall and used largely as a cover crop, but has never been looked upon with much favor. Hairy or winter vetch is much better for fall sowing, and it produces the earliest spring feed. Winter vetch is now used very extensively for cover crops in orchards, and when handled right it is an ideal crop for this purpose.—L. C. Brown.

Better Grain-Sorghums.

Another farmers' bulletin, No. 448, from the United States Department of Agriculture, came to hand in the month of June. It is by Carleton R. Ball, the farmer specialist who has charge of grain-sorghum investigations. It begins by saying: "The aim of this paper is to tell the farmer who is growing grain-sorghums how he can best improve these crops." It gives the map of the grain-sorghum belt. It gives pictures of the varieties and history thereof and goes into every particular concerning them. We earnestly advise our readers to send for this bulletin. The varieties specially mentioned are Red Kafir, Shallu, Blackhull, Kafir, White Durra, Brown Kowliang, Milo and Dwarf Milo. There are thirty-six pages to the bulletin.

Quit Doing This → Get a GOOD Spreader

EVERYONE knows that if soil is not fertilized it will soon wear out. The barren condition of thousands of farms in this country proves this statement. A large percentage of this number could be improved if manure were spread judiciously.

Field experiments prove that eight tons of manure evenly spread are as good as twice that number spread in a haphazard way. Hand spreading requires at least twenty loads to cover an acre. With a manure spreader, eight loads will cover the same amount of ground more evenly, but—

Your problem of soil fertility is only half solved when you decide to get a manure spreader. The other half—of equal importance—is in deciding just which spreader is best for you to buy.

If you investigate thoroughly and decide carefully, you will select a spreader that thousands of other progressive farmers are having great success with—one of the

I H C Manure Spreaders

The simple design and unusual strength of all working parts of I H C Spreaders account for their long life and light draft.

The method of transmitting power from the wheels to the beater is simple and direct. There are no unnecessary parts to wear. The beater is large in diameter and the teeth are long, square, and chisel pointed. By using this style of tooth, the manure is thoroughly pulverized and is thrown out before it wedges against the bars. By using a square tooth, rimming of the bars is overcome.

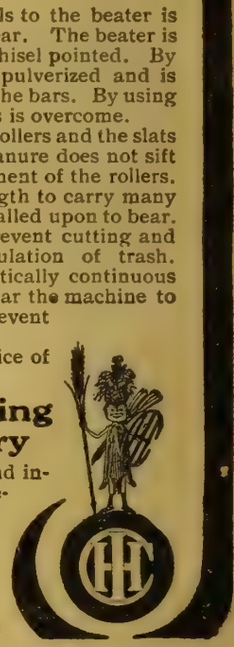
I H C Service Bureau

The Bureau is a clearing house of agricultural data. It aims to learn the best ways of doing things on the farm, and then distribute the information. Your individual experience may help others. Send your problem to the I H C Service Bureau.

The apron is supported by steel rollers and the slats are placed close together, so that manure does not sift down and interfere with the movement of the rollers. The steel wheels have ample strength to carry many times the weight they will ever be called upon to bear. The rims are flanged inwardly to prevent cutting and rutting of meadows and accumulation of trash. Z-shaped lugs give the wheel a practically continuous ground-bearing surface and do not jar the machine to pieces. There is no reach to prevent short turning.

In the I H C line, you have choice of these three famous styles—

Cloverleaf Corn King Kemp 20th Century



All are simple, strong, and durable—all are easily and instantly adjustable to spread light or heavy, as the soil requires, and all three are made in sizes suitable to any size farm. See the IHC local dealer—and get catalogues from him, or, write direct.

INTERNATIONAL HARVESTER COMPANY OF AMERICA
Chicago (Incorporated) U S A

National Dairy Show.

The Sixth Annual National Dairy Show to be held at the International Live Stock Amphitheater, Chicago, October 26th to November 4th, is expected to be the greatest educational and most comprehensive of any exhibition of this class of the dairy industry and all its allied interests previously undertaken. Not since the Columbian Exposition at Chicago and the great World's Fair at St. Louis is it expected there will be such a congregation of conventions, dairy cattle, dairy products, dairy machinery, cold storage and refrigeration apparatus and the manufactured product of their allied commercial accessories.

The National Dairy Cattle Breeders' Associations with their membership of many thousands throughout the United States and Canada, recognizing this great annual Exposition as the premier event of the year, have not only increased their appropriations, but are arranging to hold special conventions of their respective breeds during the Exposition at Chicago, which will be attended by the most noted representatives in the broad field of dairy husbandry.

Fifteen thousand dollars will be offered in cash prizes for dairy cattle. Special premiums will be awarded in the milk, cream and butter tests. Scholarships in the national student judging contest will be given by several Agricultural Colleges, pure-bred dairy cattle clubs, butter manufacturers and individuals. Preparations through special committees of the cattle clubs are being made to assist in bringing out not only a great show, in numbers of their respective breeds, but are planning to exhibit many of the most celebrated animals of the breed.

The National Dairy Show of 1911 will be held in the largest and best fitted live stock amphitheater in America. This modern and convenient building, with complete ventilation, will enable the National Dairy Show Association to present an exhibition in keeping with this great industry, an industry representing an annual output of nearly $1,000,000, greater than any other with the one exception of corn.

THE NATIONAL DAIRY SHOW ASSOCIATION,
A. O. Auten, General Manager.
Chicago, June 20th, 1911.

Once More Dolly Dimple.

Dolly Dimple is a Guernsey cow, and the readers of The National Farmer and Stock Grower have seen her picture before this. She has once more added a wonderful year's work to her credit.

By it she places herself at the head of all Guernseys in milk production—18,808.5 pounds—and is the holder of the best record for three consecutive milking periods of any cow in the world.

Dolly Dimple has been under Advanced Registry test in every one of her lactation periods.

As a two-year-old, she made a record of 14,009.1 pounds milk, 703.36 pounds butter-fat, and placed herself at the head of the two-year-old class, and the ranking two-year-old cow in the world.

As a three-and-one-half-year-old, her second milking period, her record was 18,458.8 pounds milk, 906.89 pounds butter-fat, and placed her again at the head of her class, beating her mother, Dolly Bloom, 12,770, Adv. R. 40, whose record up to that time had been the best, 17,297.51 pounds milk.

Dolly Dimple by her present record extends her former figures to 18,808.5 pounds and still is the "Queen of the Guernsey Milkers."

This young cow is the result of most careful breeding and comes of record-producing stock on both sides.

Her sire was Imp. Yeoman, 8,618, Adv. R. 99, whose dam is Imp. Hayes, Rosie 15,476, Adv. R. 116, with a year's record of 14,633.08 pounds milk, 714.31 pounds butter-fat.

Dolly Dimple was bred and is owned at Langwater Farms, Mr. F. L. Ames, Proprietor, North Easton, Mass.

In the test just closed Dolly Dimple produced a total of 18,808½ pounds of milk in a year; her butter-fat average was 4.66 for the year, and the butter-fat record is **876**.338 pounds for the year.

Dolly Dimple has also to her credit the following records for shorter periods, which are the best of any Guernsey cow:

Single days—**72**.0 pounds milk, **3**.865 pounds butter-fat; **81**.61 pounds milk, **3**.956 pounds butter-fat.

Seven days—**533**.8 pounds milk, **23**.064 pounds butter-fat; **529**.2 pounds milk, **23**.465 pounds butter-fat; **479**.70 pounds milk, **23**.902 pounds butter-fat.

One month—**2,109**.3 pounds milk, **92**.451 pounds butter-fat.

Three months—**6,177**.9 pounds milk, **274**.791 pounds butter-fat.

Six months—**11,296**.9 pounds milk, **499**.271 pounds butter-fat.

New York Milk Plentiful.

During the middle week in June, milk receipts at New York City were 329,000 cans. This is largely in excess of last year's supply and accounts for the low price ruling. Shippers in the twenty-six-cent freight zone were being paid 2½ cents per quart net, which makes the cost $1.31 per can of forty quarts delivered in New York. Dealers are inclined to think that there will be no change from this rate until supplies begin to shorten up.

Plowing Up Oat Ground.

A Vermillion county, Illinois, correspondent asks these questions: "Oats are so short here that they are not even high enough to mow. Many are thinking of plowing up their fields, but do not know what to put in. I have a field of oats and field peas, but they have not done much good. How would it do to mow them and then sow cowpeas?"

Whatever is done with these catch crops must be done promptly now, so that the ground may be kept in good condition and the crop have as long growing period as possible. If one can use rough feed right on the farm, sow millet, Hungarian, cane, cowpeas or soy beans any time up to the middle of July. Millet will make a big lot of tolerably good feed, and it has the advantage that it will stand drouth better than other crops. On clean ground it is profitable to grow it for seed, and here is a good way to turn ground to account. Where hay or rough feed is not wanted, sow good, clean seed, about three pecks per acre, and allow the crops to mature seed. Under ordinary conditions the crop would yield twenty bushels of seed per acre.

The field of oats and peas referred to by our correspondent may be cut now to good advantage, and if well cured it will make a first-class article of hay. If this crop is very short, I should mow it and rake it up, cure it in windrows and mow promptly. This ground may then be plowed and harrowed and sown to cowpeas or millet.

Ground is very dry, so that thorough preparation is essential if much is expected from these late-sown crops. There is a large acreage of ground which will not produce more than a quarter of an oat crop at the very best, and the proper handling of these lands, if plowed up, is a matter of the gravest importance right now.—L. C. Brown.

Demand For Holsteins.

"The demand for our cattle is far beyond the supply; in fact, the present existing demand, in my judgment, cannot be met by the supply which will be afforded us during the next decade, while the demand will continuously increase, thereby making it imperative that the farmer or breeder who would take advantage of the best that is afforded him, direct his attention toward no other breed. Records of butter and milk yields have multiplied, prices of cattle have increased, until it is difficult, upon analysis, to determine whether the records keep pace with the prices readily obtained, or whether the prices keep pace with the records that are constantly being made."—From address of President Chas. W. Wood, of Worcester, Mass., at the Annual Meeting of the Holstein-Friesian Association.

A "Baby Chick" Bulletin Free.

The State Poultry Board have just issued a bulletin on baby chicks. It is very complete and tells all about feeding, incubation, brooding and a great many things which will enable you to overcome much of the trouble you have been having with your chicks. It will be sent free to all Missouri farmers and poultry raisers as long as the edition lasts. Can be had by sending a request to the Secretary, T. E. Quisenberry, Mountain Grove, Mo.

Method of Feeding Calves.

The calf should be allowed to take the first milk from its dam, as nature requires this, and if her rules are violated, there will surely be trouble. After the calf has once nursed, it should be removed from its mother, but fed its mother's milk for a few days, depending on the vigor of the calf. Commence to add skim milk after a week or ten days, adding a small amount at first and increasing it daily until the calf is on an entire skim-milk diet.

There are a few simple rules to follow in growing calves on skim milk. The milk must be sweet; it must be as warm as the mother's milk and care must be exercised not to feed too much of it. There are many more calves injured by being fed too much skim milk than there are by not having enough. Four quarts at a feed twice per day is sufficient for the average size calf for the first month. Add a spoonful of ground flax seed to each feed and teach the calf to eat a little corn meal as soon as possible. Corn is the most economical food to balance a ration containing so much skim milk. Feed shelled corn as soon as the young calf will digest it well.

At the Indiana Experiment Station, in Bulletin No. 47, a record of work is given to show the relative cost of calves grown on skim milk and on whole milk. The skim-milk calves cost less than four cents per pound and the whole-milk calves cost ten cents per pound, and the calves fed skim milk make as good growth as the ones fed whole milk.—Roy C. Potts, Oklahoma Agricultural College.

Government Land in Missouri.

According to the Missouri Blue Book, the 12,600 acres of United States land in Missouri two years ago are now reduced to 1,061 acres. The following are the counties having goverment land and the amount in acres: Benton, 6; Camden, 40; Hickory, 80; Howell, 40; Madison, 80; McDonald, 43; Perry, 40; Pulaski, 193; Reynolds, 40; St. Genevieve, 40; Shannon, 62; Taney, 28; Vernon, 40.

Pure-bred Cattle Importations.

According to the report by the United States Department of Agriculture, from January 1st to March 31st, 1911, 28 head of Alderney cattle, 7 Ayrshires, 262 Guernseys, 182 Jerseys and 39 Shorthorns were imported. The grand total was 518 head, consisting of 47 bulls and 471 females. A full list by names of animals and importers is given in the circular. The Alderneys, consisting of three bulls and twenty-five cows, were imported at New York City by F. G. Benham and W. W. Marsh.

You may consider this to be a pretty good paper if you read it through.

DE LAVAL
CREAM
SEPARATORS

not only save their cost every year but may be bought on such liberal terms as to literally pay for themselves. Why should you delay the purchase of the best separator under such circumstances?

THE DE LAVAL SEPARATOR CO.
165-167 BROADWAY, NEW YORK. 29 E. MADISON ST. CHICAGO.

Shoo-Fly THE ANIMALS FRIEND

Keeps flies and all insects and pests off animals—in barn or pasture—longer than any imitation. Used and endorsed since 1885 by leading dairymen and farmers.

$1 worth saves $20.00 in milk and flesh on each cow in a single season. Cures sores, stops itching and prevents infection. Nothing better for galls. Kills lice and mites in poultry houses.

SEND $1, if your dealer can't supply you, for enough Shoo-Fly to protect 200 cows, and our 3-tube gravity sprayer without extra charge. *Money back if not satisfactory.* Write for Booklet, free. Special terms to agents.

Shoo-Fly Mfg. Co., Dept. 28, 1310 N. 10th St., Philada.

Editor knows from experience that Shoo-Fly is O. K.

PROFITABLE DAIRYING.

A very elegant, illustrated, cloth-bound book of 200 pages is called **Profitable Dairying.** It is all good, satisfactory reading matter relating to the successful management of the dairy business under all circumstances, including the management of the cows and construction of the barn. We have discovered this book lately and we find that there is a better demand for it than for all other dairy books combined. For one dollar we will send

The National Farmer and Stock Grower for two years and we will send the book, **Profitable Dairying,** as a premium. Address

HALE PUBLISHING CO.,
3550 Vista avenue, - St. Louis, Mo.

DAISY FLY KILLER placed anywhere, attracts and kills all flies. Neat, clean, ornamental, convenient, cheap. Lasts all season. Made of metal, cannot spill or tip over; will not soil or injure anything. Guaranteed effective. Of all dealers, or sent prepaid for 20 cents.

HAROLD SOMERS,
150 DeKalb Ave., - Brooklyn, N. Y.

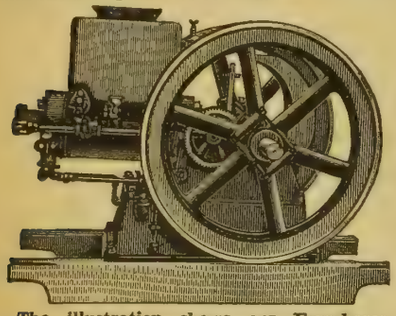
Stover Gasoline Engine.

Claims to superiority of STOVER ENGINES are based upon symmetrical appearance, simplicity of operation, economy of fuel, the correct mechanical workmanship and the best grades of material.



The illustration shows our Four-horse-power Hopper Cooled Engines, popular size. When installed as stationary, are excellent power for operating light machinery. For farm purposes, can be mounted on skids or light truck. The gasoline is contained in the base and engine is shipped ready for operation with all gasoline pipe connections made complete. The series is named THE STOVER JUNIOR. The sizes are 1, 2½ and 4 horse power. This is absolutely the best make of Gasoline Engine on the market today. See us or write us for Stover Junior Catalogue.

WEBER IMPLEMENT AND AUTOMOBILE COMPANY,

1900 Locust Street, St. Louis, Mo.

SPECIFY "FRAZIER'S."

When buying a remedy from your druggist for the cure and prevention of distemper, influenza, shipping fever, catarrhal fever, pink-eye, coughs, colds and other diseases of a similar nature affecting the nose and throat, specify "Frazier's." Such specification will insure your receiving a remedy of the highest attainable purity and which enjoys the confidence of 90 per cent. of the owners, handlers and breeders of horses in the world. "Frazier's" has been the standard distemper remedy in the country for the last twenty-five years. You will find plenty of substitutes and imitations of "Frazier's." Insist on getting the only guaranteed remedy on the market. The $1.00 bottle holds three 50-cent bottles. All first-class druggists sell "Frazier's," or direct, prepaid. Binkley Medical Co., Sole Owners, Nappanee, Ind. Send for free book on the horse.

Top Price For Cattle.

Clay, Robinson & Co., live stock commission agents, sold thirty-eight Hereford steers, averaging 945 pounds, at $6.50 per 100 pounds. This was on June 19th, and the price was the highest paid on the open market for cattle at the Denver Stock Yards in the year 1911. These cattle were bought by the Agricultural College, Fort Collins, Colo., last October, weighing 550 pounds average, at $5.00 per 100 pounds. They were fed for experimental purposes.

The Lightning Rod.

The lightning rod that is the standard and has been manufactured for sixty-five years is advertised in this paper. We refer to the Cole Bros.' Franklin Rod, manufactured in St. Louis and which has stood every possible test. Defective rods sold cheap because they are useless brought the ordinary lightning rod into disrepute; but the reliability of the standard rod has caused the officials of Agricultural Colleges and Experiment Stations to explain the necessity for protection against lightning by reliable means. Write to Cole Bros. Lightning Rod Company, 316 South Seventh street, St. Louis, Mo., for particulars and prices.

Which is the Best Cover Crop?

A Union county, Illinois, correspondent writes: "A neighbor claims that soy beans are better for a green crop, sown in grain stubble, than cowpeas. This is not in accordance with your articles. Please tell me more about it."

This very thing has been tested out many times, and I know of no instances where soy beans produced more green growth than peas. In all the tests I know of the peas made fully one ton more growth above ground, per acre, than soy beans. Although taking top growth and roots together, I think soy beans would be more valuable.—L. C. Brown.

No Lawful Combinations.

According to the Milk Reporter, published at Sussex, N. J., several of the leading milk contractors in New England were indicted by the Federal Grand Jury, May 26th, for "engaging in a combination in undue restraint of trade." The New York, New Haven and Hartford Railroad Company and the Elm Farm Milk Company were also indicted for giving and accepting concessions. The word "undue" is used for the first time in the Federal courts in that state, and follows the decision in the Standard Oil case.

The railroad company is charged sixty counts with permitting the Elm Farm Milk Company to ship from Willimantic, Conn., to Dorchester, Mass., from 1,149 to 1,725 cans per car at $23.02, while others were allowed only 840 cans at that rate. The milk company is charged with accepting the concessions.

The milk contractors are alleged to have agreed on a uniform price to be paid farmers for milk, and William A. Hunter, Secretary of the Boston Co-operative Milk Producers' Association, is indicted with them for agreeing at a metting held in Boston, September 21, 1908, to accept the uniform price.

Home Mixing of Fertilizers.

By writing to the German Kali Works, Continental Building, Baltimore, Md., any farmer can obtain a booklet entitled "Home Mixing of Fertilizers and How to Do It." This is a very interesting publication, and every one of our readers can learn something from it. The whole story is told so chearly that it does not require an interpreter. The book includes a table giving the composition of all farm manures and commercial fertilizers, with formulas adapted to all crops and the amount of fertilizer ingredients taken from the soil by all farm crops. Send for it without delay. See advertisement on page 14.

Course in Agricultural Education.

The State Board of Education has authorized a new course at the Iowa State College—a course in agricultural education. Its purpose is to train teachers for agricultural and domestic science work in secondary schools. There is a wide and rapidly-increasing demand in favor of industrial training in the public schools. The demand is far in excess of the supply of teachers. Public school work has not heretofore appealed to the graduates of the Agricultural Colleges. Recently the demand has become so great that the schools are paying from $1,000 to $1,500 for graduates, with assurance of a rapid advance as merited. Out of 855 students enrolled in the Division of Agriculture at Ames during the past year, comparatively few are looking forward to a teaching profession. Of the seventy-eight students graduating from the Division of Agriculture this year not over 10 per cent. will become teachers. The establishment of this course is in recognition of the demand upon Agricultural Collges for teachers specially trained for the secondary schools. It is recognized that the progress of this work will be measured by the qualifications of the teachers having it in charge. It will probably be many years before the supply of such teachers is equal to the demand. Prof. A. V. Storm has been elected to head the new department.

He Got the Pass.

"I want a pass."

"Pass? You're not entitled to a pass. You are not an employee. Sorry."

"No; but here the anti-pass law says free transportation can be granted to 'necessary caretakers of live stock, poultry and fruit.' Well, I'm going on this trip with an aunt, that's a hen—there's your poultry; a girl that's a peach—there's your fruit; and a nephew that's a mule—there's your live stock. Gimme a pass."—Southwestern Book.

The Wheat Market Situation.

The Hon.W.D.Hoard, who was once Governor of his state, and who is a good authority on farm subjects, has recently expressed his poor opinion of any farmer who is raising wheat, because it is his idea that we all ought to be dairymen. He is also in favor of admitting Canadian wheat into our markets duty free, probably because he does not raise wheat.

Mr. Hoard has only expressed in his own language our oft-repeated question: Why does a farmer raise wheat when he can make more money doing something else? The answer is, that wheat growing is the farmer's pet occupation. He is always hopeful that the yield will be large and that the price will be satisfactory. He is often disappointed, but "hope springs eternal in the human breast," and the farmer continues to raise wheat, even though he may be simply trading dollars.

Farmers have been barely cashing dollars on their wheat crop of the past year, and we regret to see that the prospect for the future is not good. The proposed reciprocity treaty with Canada is for the purpose of reducing the price of wheat produced by American farmers, but not to reduce the price of bread; the duty to protect the miller and the baker still remains, but the duty which protects the farmer in his own market is to be taken away. At present, however, the bill is not passed, although the shadow of a rush of wheat from Canada still remains. We believe the wheat market has ranged 6 to 7 cents a bushel lower than it would have done had the alleged reciprocity bill never been heard of.

A year ago, at St. Louis, June 30th, cash wheat closed at $1.07 per bushel; this year at 87½ cents, which is 19½ cents a bushel less. Last year, at Chicago, July wheat closed at 97 cents; September, 97½ cents; December, 98⅞ cents; this year, June 30th, the figures are: July, 88⅞ cents; September, 89⅞ cents; and December, 92¼ cents.

If Congress passes a law in order to reduce the price of wheat produced by American farmers, Congress should not be surprised if they have shifted the farmer's favorite crop over the border.

FARM AND RANCH LANDS.

ARKANSAS.—Farm of 640 acres, Arkansas river bottom land, all very fertile; 500 acres in cultivation; rents for $7.00 acre, cash; some clover and alfalfa; one nice dwelling house; twenty tenant houses, etc. Can sell at $20,000. A great bargain. **P. O. Box 11,** Little Rock, Ark.

ARKANSAS. — Fine Stock Farm. 887 acres, within 2½ miles of Warren, the county seat of Bradley county. Finest proposition in the state. Creek cuts land in middle. Five hundred acres in grass; level as a floor. Under fence. Price, $25.00 per acre. Terms to suit. **Jno. A. Culbreath & Co.**, Warren, Ark.

FREE Literature will be sent to anyone interested in the wonderful Sacramento Valley, the richest valley in the world. Unlimited opportunities. Thousands of acres available at right prices. The place for the man wanting a home in the finest climate on earth. No lands for sale; organized to give reliable information. Sacramento Valley Development Ass'n, SACRAMENTO. **California**

THE FINEST FARM

In Southern Illinois, located east of Marion, county seat of Williamson county, 540 acres, all in cultivation and grass, excepting 40 acres virgin hardwood timber; fenced and cross-fenced; six-room dwelling, two large barns, outbuildings; finely watered. Splendid stock and grain farm. Coal of finest quality under entire farm.

Owner lives in St. Louis; cannot give farm any personal attention. He is anxious to sell. Terms, $5,000 cash; balance mortgage on land.

ALFRED RICKETTS REALTY CO.,
608 Chestnut Street, St. Louis, Mo.

MISSOURI. — For Sale: Well-improved stock and grain farm; 6½ miles from R. R. station; on public road; rural free delivery and telephone; now occupied by good tenant for crop rent; can give possession January 1 if desired; two sets of improvements. **Charlie Murphy,** Dixon, Missouri.

TENNESSEE.—For Sale: 200-acre stock farm with 250,000 feet of gum and oak timber and sawmill on same. All for $20.00 per acre. **Harry Roberts,** Pinson, Tenn.

I BRING BUYERS AND SELLERS TOGETHER. If you want to buy, sell or exchange a farm or business, write me. Established 1881. **FRANK P. CLEVELAND, 7910 Adams Express Building, Chicago, Ill.**

FARMS WANTED! We have direct buyers. Don't pay commissions. Write describing property, naming lowest price. We help buyers locate desirable property **FREE. American Investment Association, 55 Palace Bldg., Minneapolis, Minn.**

MISSISSIPPI.—Eight hundred acres of land in Mississippi for sale for $5,000. Payments half cash and balance reasonable time at 6 per cent. This land is situated in Tishomingo county, and consists of a square section, 640 acres, and 160 acres adjoining, being 800 acres in a solid body. The land commences a little over a mile east of the station of Holcut, on the Birmingham Branch of the Illinois Central Railway, about twenty miles south of Corinth. This land was cut over a long time ago; is as good soil as any in Northern Mississippi. It consists of ridges, hills and valleys, and every inch is available when cleared for cultivation. Wells can be dug anywhere. This land is in a good farm settlement and will make a fortune for any first-class farmer who can handle it himself, or it will support forty families of vegetable growers. Address the owner, **Philip H. Hale,** 3550 Vista avenue, St. Louis, Mo.

VIRGINIA. — BIGGEST BARGAIN IN VIRGINIA. 555-acre dairy farm, stocked, crops and implements included in price; large modern dairy barn, 40x90 feet; 40 stanchions; box stalls; concrete floor; storage, 100 tons hay; horse barn, 10 head, and storage for 15 tons hay; many other buildings, all in good repair; comfortable six and seven-room houses; two orchards; farm well fenced; two-thirds of land under cultivation, balance good timber; four miles R. R., Loudon county, Virginia, 35 miles from Washington, D. C. A sacrifice. Price, $26,000; $10,000 cash; balance two, three and four years. Further information furnished those interested. **J. W. Latham,** 1420 New York Ave., Washington, D. C.

Raising 228 Bushels An Acre.

The boy who raised 228¾ bushels of corn on an acre of land tells how he did it. His name is Jerry Moore, and he lives in South Carolina. Writing to the Progressive Farmer he says:

"My soil was light, gray sandy upland top soil, about three or four inches deep, with yellow subsoil. Very old land, level, but naturally well drained. Cotton was grown on this acre in 1909, producing about 1,200 pounds of seed cotton.

"I spread three hundred one-horse wagon-loads of rich dirt on this acre during the 1st of March, 1910. Followed this with fifty one-horse wagon-loads of stable manure, scattered broadcast. March 25th broke with two Boy Dixie plows,double-breaking, one plow following in the furrow of the other, and with the two breaking from ten to twelve inches deep. Without harrowing broke across like first time. March 29th, harrowed and laid off in rows 3½ feet with Dixie plow. Distributed 500 pounds 8—3—3 guano in furrow and covered with furrows, making a small ridge, somewhat under surface. March 30th, opened ridge with shovel plow, making a furrow about three inches deep, in which I dropped three gallons of Batt's Prolific Four-ear Corn, dropped corn by hand, almost sowing, covered corn with small shovel plow about 2½ inches deep. Same day sowed 800 pounds acid phosphate along rows and harrowed all over ground, leaving surface about level. Did not harrow just at this time because of the dusty and dry condition of the soil.

"April 24th, good rain. April 25th, sowed 700 pounds kainit along the rows, and harrowed with Little Joe harrow, going twice to the row; also barred-off. May 5th, made a mixture of 600 pounds of cotton-seed meal, 200 pounds acid phosphate and 200 pounds kainit, and with a Cole distributer sowed on each side of rows and in furrow. Then plowed down in middle with a shovel plow and harrowed, going twice in the row.

"On May 10th, made a mixture of 600 pounds cotton-seed meal, 200 pounds acid phosphate and 200 pounds kainit, and sowed on each side of rows, using a Cole distributer and going four inches farther from corn than in making the other application. Sowed by hand 300 pounds nitrate of soda along rows, and harrowed with Little Joe harrow, going twice in row. May 24th, good rain. June 5th and 6th, good rains. June 7th, harrowed and sowed 200 pounds nitrate of soda along rows. Corn about 5½ feet high and growing very fast. June 11th, storm and corn blown down. June 12th, set corn up. Corn beginning to silk. June 4th, harrowed very lightly. Rains very frequent since June 5th, and corn now in full silk.

Gathered fodder middle of August; fodder weighing 3,000 pounds, worth $30. Corn was weighed and measured according to government methods, and made 228 bushels and 3 pecks. Corn was gathered in September.

Cost of preparation of seed-bed	$ 4.00
Cost of planting	2.00
Cost of cultivation	11.50
Cost of gathering fodder	6.00
Cost of gathering corn	8.00
Cost of manure	25.00
Cost of commercial fertilizer	66.55
Total cost	$123.05

Total number bushels corn, 228¾; fodder, 3,000 pounds.

Value of corn	$228.75
Value of fodder	30.00
Total value of crop	$258.75

JERRY MOORE, Winona, S. C.

A. J. MILTON.

RAY DeFOREST.

Cattlemen of Texas, Oklahoma and the Southwest

It will pay you to put your shipments to **EAST ST. LOUIS** through our house. In the two years we have been established at that market we have worked into second place in volume of business handled.

Our head cattle salesman, A. J. MILTON, is universally conceded to be one of the very best cattle salesmen at the National Stock Yards. He was formerly cattle salesman for us at South St. Joseph and has also had long experience with us on the Chicago market.

In the selling of quarantine cattle he will be ably assisted by RAY DeFOREST, who has had long experience on the Fort Worth market and will give you excellent service at his new post.

These two men form a team that will pull hard and effectually for your interests.

Remember that we are equally well equipped to handle your consignments at Kansas City, South St. Joseph, Fort Worth, Chicago and other markets.

Cement Workers' Handbook.

This book is designed to teach anybody how to work with cement; how to mix mortars of all kinds for all concrete purposes; how to make building blocks; how to build walls, floors, ceilings, walks, posts, cisterns, troughs, tanks, etc. It gives estimates of the cost of all kinds of mortars and concretes and all methods of house construction. It is a cloth-bound book of 100 pages and covers more than fifty most important subjects on cement and its uses and construction. This is a diamond of a book for wide-awake farmers. The price of the book alone is 50 cents.

For 60 cents we will credit one-year's subscription to The National Farmer and Stock Grower and send a copy of the **Cement Workers' Handbook.** Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

A NEW DRY-LAND CROP.

Experiments Show Spanish Peanuts Provide Fine Hog Food, Excellent Hay and Dry-land Legume.

[By H. M. Cottrell, Agricultural Commissioner for Rock Island Railroad.]

Last year was the driest year in the Texas Panhandle and Western Oklahoma since the country was settled. Farmers in about forty-four counties in this section planted Spanish peanuts. After the plants became six to eight inches high, there were several weeks of drouth and hot winds. The peanuts withered badly through the day, but freshened at night and stood still, but lived. A shower came and they immediately filled out and matured. The plants were too small to harvest and hogs were turned into the fields to gather the crops. One man who had a large field weighed his hogs carefully when he turned them in and weighed them when he took them out fat, ready to ship to market, and they made a gain of 1,023 pounds for each acre of peanuts pastured. Reports from both states show gains of from 500 to 1,000 pounds of hogs per acre of peanuts, the hogs gathering the crop themselves.

In Western Oklahoma the government demonstration farm men found that on a farm where corn yielded thirteen bushels to the acre, Spanish peanuts yielded forty bushels. Farmers report that in fields where corn gave no grain whatever, Spanish peanuts yielded twenty to twenty-five bushels per acre. Farmers and stockmen all over this region report that the Spanish peanut stands drouth fully as well as either sorghum or milo. The results secured in the Southwest have been so encouraging that farmers throughout Colorado and Central and Southern Kansas should test Spanish peanuts this year on a small scale, and if it does as well as it promises, it will become a staple dry-land crop with them. Each farmer should plant five acres to make a test.

The Spanish peanut is the small red peanut, with only two nuts in a pod. It matures in ninety days after planting. The large peanut found in the candy stores is the Virginia peanut. It requires 140 days for maturing, and is worthless on the plains, as in dry seasons it does not fill out. The Spanish peanut requires one bushel of seed to plant an acre. The seed should be soaked thirty-six to forty-eight hours before planting, soaking the unshelled pods. The wet pods, not shelled, should be planted in rows three feet apart, dropping single pods twelve to fourteen inches apart in the rows. In Eastern Colorado they should be planted from May 20 to June 15. Of course, the wet pods must be planted in damp soil, and if the surface soil is dry, a furrow should be opened down to moist earth. These pods should be covered about two inches deep and the crop should be cultivated about four times, the same as corn. In a year of regular rainfall the vines grow from twelve to eighteen inches in height. The vines of the Spanish peanut grow upright. When the pods are ripe, the vines may be cut and cured the same as alfalfa hay.

The peanut is a legume, the same as alfalfa, clover and cowpeas, and, like these, enriches the soil on which it grows.

In all the leading Southern markets baled peanut hay sells at about the same price as alfalfa and has about the same feeding qualities. Hay from peanut vines and milo make a food equal to alfalfa and corn for fattening steers, and peanut hay is one of the best dairy feeds. In some sections dry-farmers do not have hogs to consume the peanut crop. In that case, when the crop is mature, the row may be opened with a lister or with a sweet potato digger which will throw the whole plant, vines and pods out on the surface. The plant should then be gathered and cured in cocks and stacked the same as alfalfa. As the nuts contain 30 to 50 per cent. of oil,this hay from the whole plant is exceedingly rich and forces dairy cows to high yields. The butter is too soft for market and the cows must be fed some crop like milo with this feed to harden the butter.

I found a planter in Louisiana who is this year putting out 3,500 acres of crops. On several of his farms his work mules while plowing the land and planting the crops, had no feed whatever except the hay from the whole plants of Spanish peanuts, the nuts furnishing the grain and the vines the hay. The mules kept fat throughout the spring.

The highest-priced ham in the United States is the Smithfield ham of Virginia, which sells in Eastern markets for 40 cents per pound and upward. The producers of this ham found that the only feed which would command this price was peanuts. On account of the large quantity of oil in the peanuts, the pork is very soft, and while the peanuts make large gains, the packers object very strongly to hogs fattened on peanuts alone. After becoming fat, the hogs should be fed from two to three weeks on milo or corn and the flesh becomes as firm as if the hogs were fattened on corn alone, while the meat still retains the delicious peanut flavor.

Peas Fail to Grow.

A Morgan county, Indiana, correspondent writes: "I sowed some cowpeas on May 2d, but they did not come up. They were mixed seed and looked all right. What do you think the trouble is?"

In the first place, these peas were sown too early. Cowpeas will not stand as much as corn, and if they are sown when the ground is cold or in poor condition they are liable to be disappointing. The soil must be warm and there must be ample moisture to insure a favorable start of cowpeas. Another thing which has contributed to many failures this season is poor seed. I do not advise sowing cowpeas or soy beans over one year old, and then with the fresh seed only the best quality is sure to give good results. Low-grade seed peas have sold this season as low as $1.35 per bushel, while the choicest grade sold at $3.00 to $3.50 a bushel. This low-grade seed is always unsatisfactory, on account of weak vitality, and seldom makes a decent crop. Those who complain of failure should be more careful and sow nothing but fresh, sound seed.—L. C. Brown.

Cure That Lame Horse Without Risking A Penny

We Take All The Risk, And Protect You With A $1000 Guarantee Bond

WE want to show you that there isn't any affliction causing lameness in horses that can't be cured, no matter how long standing. We will do this for you **absolutely free.** Fill out the "Free Diagnosis Coupon" and send it to us at once.

It means money to you to relieve your horse of its misery at once. **Ask us**—and you will get the **best** and **most reliable** diagnosis **absolutely free.** All you have to do is to fill out the "Free Diagnosis Coupon," mark just where your horse has a swelling, sore or any one of the big number of possible causes for lameness, and send it to us. We will then give the coupon to our trained Veterinary Specialist for his expert diagnosis. This diagnosis is invariably correct. We then inform you of the cause of your horse's lameness and the remedy that **will absolutely cure him.** We do all this for nothing.

He Asks You To Please Send This

Be Positive, Know What You Are Doing and know that you are treating the right spot in the right way. Don't disfigure your horse and reduce his market value. Write to us. Get our **"Free Diagnosis."** You paid good money for him when he was sound. What is he worth to you now, or anyone else when he has a Spavin, or Ringbone, Thoroughpin, Curb, Capped Hock, Shoe Boil, Sprung Knee, Ruptured Tendons, Sweeny, or any one of a hundred different causes of lameness that your horse might be heir to. You know that he isn't worth 50 per cent, no—nor 25 per cent of his original value.

Relieves Cases Formerly Considered Incurable

No matter how long your horse has been lame, or what the nature of his lameness, you can absolutely rely upon **Mack's $1,000 Spavin Remedy.** We know of many cases where owners have paid out big fees and had valuable animals tortured with "firing," "blistering" and other good-for-nothing methods and as a last resort tried **Mack's $1,000 Spavin Remedy,** and were amazed at the painless, positive, quick and permanent cure.

Nearly Every Mail Brings Us Letters Like the Following:

"The remedy you sent me cured the two horses that the hoof was coming off. The mule's foot was nearly off when I got the medicine, but in five days the mule was able to walk on it. The horses are working every day, and have been since using your remedy the third day. It is the best medicine I ever saw for the foot. Our Vet. said those horses would not be able to work in 12 months, but he sees his mistake now. I recommend your medicine to every one as I know it is all O. K." Yours truly,
Ludowici, Ga., Dec. 7, 1910. J. T. COLLINS.

"I am pleased to tell you that MACK'S THOUSAND DOLLAR SPAVIN REMEDY has proved far beyond my expectations. My horse had been lame with side bones on each side of foot for about eighteen months, and I had thought of shooting him at different times. I tried to work him but he would go so bad he would hop along on three legs. My neighbors told me he would never be of any use as they had had horses with the same trouble. I tried other remedies without success, but am working him now and he is sound, and have tested him well. I recommend your 'MACK'S $1,000 SPAVIN REMEDY' to all." Yours truly,
Summerland, B. C., Dec. 4, 1910. R. H. STEWART.

Your Druggist Will Obtain Mack's $1,000 Spavin Remedy For You

if you ask him. Price $5.00 per bottle. If he refuses, remit $5 to us and we will see that your order is filled without delay. Every bottle is absolutely guaranteed, and is accompanied by our $1000 Warranty Bond, which insures you that your money will be refunded if the remedy fails to do all we claim for it, as stated in our guaranty.

Potash in Manuring.

One of the foreign farm papers received at this office says:

"A glance at the relative quantities of the different kinds of plant food extracted from the soil by the principal crops proves that potash is one of the most essential elements of plant life. The following table gives the plant food extracted per acre:

Average Crop.	Nitrogen.	Potash.	Phosphoric Acid.
Potatoes	47	76.5	21.5
Mangels	149	300.7	52.9
Swedes	98	79.7	21.7
Hay	47	50.9	12.3
Oats	52	46.1	19.4

"It is not surprising, therefore, that the application of a due proportion per acre of a good potash manure is attended by good results. The benefit to be derived from the use of potash has been grasped to a far greater extent by cultivators of the soil on the continent than in this country, as is shown by the following figures. The approximate quantities consumed per 100 acres of arable land in continental countries is:

	Pounds.
Holland	976
Germany	695
Belgium	436
Sweden	380
Britain	112
Russia	4

"These figures explain why small countries like Holland and Belgium can produce enormous quantities of market garden produce, not only sufficient for their own populations, but leaving quantities for export to our big cities.

"Some soils, notably heavy clays, contain naturally a good supply of potash, but under intensive cultivation the available supply is soon exhausted and the plant may be starving for potash. Mr. Berry, Professor of Chemistry, West of Scotland Agricultural College, says:

" 'Eighty per cent. or more of the constituents of soils are insoluble in strong acid, and it frequently happens that soils containing abundant supplies of potash and phosphates will not grow good crops without considerable application of soluble phosphatic and potassic manures.' Farmers can also be liberal in the use of potash, as it is not washed out of the soil, and if not utilized by the growing crop in one season, is stored up for the benefit of the following crop."

NEW BOOKS JUST ISSUED.

Weeds of the Farm and Garden.

This new and valuable book is by Prof. L. H. Pammel, Professor of Botany, Iowa State College, and Botanist of the Iowa Agricultural Experiment Station.

The loss caused by weeds amounts annually to hundreds of millions of dollars. The weed question, therefore, is both important and vital to every tiller of the soil. Until the appearance of this booklet, there has been available no modern, up-to-date, authoritative work on the subject. In bringing together the latest knowledge about weed eradication, Professor Pammel has performed a task that will be useful for all time to come. It is peculiarly fitting that this book come from this author. He is the master weed man of the country, and his book is the result of study, investigation and observation for nearly a lifetime.

The important weed problems are discussed from a broad viewpoint. The text matter has been arranged in pedagogical order, making the book useful for both high school and colleges. It is a book for every one who teaches flowers and practical botany, especially weed subjects. Then, too,, there are practical suggestions for the treatment of weeds. In this rspect alone the book is worth while. Moreover, it is a book for the practical man. If a weed trouble is present, turn to this book and get the suggestion for its correction. In a hundred ways the farmer, land owner, gardener and park superintendent will find the book helpful and authoritative.

The book is profusely illustrated, 5x7 inches, 300 pages. It is published at $1.50 per copy, nicely bound in cloth, by the Orange Judd Company, 315 Fourth Avenue, New York City.

The Bakers' Combination.

The principal bakeries of the country have organized a combination which is said to conform to the law, but is intended to be an active, perpetual monopoly in foodstuffs, and which is just as clearly against the law as if it was a combination to commit burglary or to burn down other people's bakeries.

In order to put the people of the cities to sleep and keep them quiet while the conspiracy is forming the announcement is made that under control of this "benevolent" monopoly with a capital of thirty million dollars the price of bread will probably be decreased, and they don't hesitate to say that the purpose of the combination is to buy flour or grain in such immense quantities as to obtain the lowest possible prices.

It is in all probability a combination to control the millers or to establish milling plants, thereby eliminating the miller from the business. Probably some of the millers are in it, but there is no telling. The secrets of such combinations are not told to the newspapers. It is also stated that the bakery combination has been approved by the Department of Justice at Washington, which cannot find in it the elements of a trust. This, however, we doubt, because it is positively intended to be a trust; is organizing for the purpose of controlling the price of wheat, the price of flour and the price of bread. If the law will permit it, this combination should be "nipped in the bud." The millers' organizations and the farmers' organizations should join together in action against this combination, and an injunction should be obtained, if possible, to prevent them doing business.

There ought to be a law to confiscate properties of the trusts which are found to be organized and conducted in defiance of the law. Some day that is what will happen, but it will be difficult to pass such a law under present circumstances.

If this government was satisfactorily organized and proper duties were assigned to the different United States Departments, the Department of Agriculture would be the first to resist the organization of monopolies in food products.

Best Watch in the World.

One hundred and eighty of the leading railroads have adopted the Howard Watch as the standard of excellence. It is because the Howard Watch has no actual competitor. There is an interesting story about this watch which our patrons will take pleasure in reading. Just write a postal card to Dept. 122, Howard Watch Works, Boston, Mass., and ask for the story of The First American Watch. See page 7 and read about the best watch in the world.

The Profit From the Farmer's Toil.

In the cities one hears a great deal about the great profits the farmers are making out of their business. The citizens say: "Of course they are making big profits; look at the prices we have to pay for everything grown on the farms." And the unsuspecting citizen goes to sleep unmindful of the existence of the ones that are really causing the high prices the consumer has to pay.

The farmers are really getting about the same prices they have been getting for a generation back for most of the stuff they produce. The writer has followed the market quotations for over twenty years and knows that this is a fact. To mention these prices is to invite criticism because continual changes are taking place. The market reports will show the proof of our assertion. Cattle, hogs and sheep have often been higher when the population was considerably less than it is now. Whenever the farmer receives less than a dollar a bushel for wheat, 50 cents a bushel for corn and 35 cents a bushel for oats, he is not doing much more than cashing his labor; and when he has to pay freight bills to market out of these figures he is simply farming because he has no other occupation.

Meanwhile the buyers, who are classed as consumers, have to limit the amount of country produce they can buy on account of the high prices they have to pay. In the localities in and around Chicago, in the retail markets, the purchaser pays five cents a head for a stalk of lettuce and thinks himself lucky if he can get three stalks for ten cents. But the farmers that own the truck farms around Chicago are getting no more for their produce than formerly.

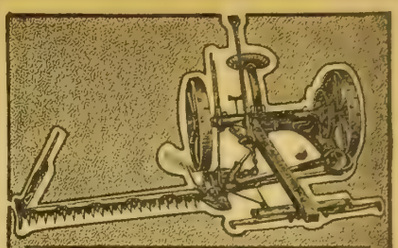
The other day the writer happened to be passing through Haymarket Square, Chicago, the one place in the city where the wagons of the truck farmers stand while they dispose of their loads. The price of lettuce was 15 cents a box. The writer bought a box and found it contained ten beautiful full stalks, which would certainly have retailed at five cents each, or 75 cents for the box. There was a profit of 400 per cent. from the producer to the consumer. He purchased ten bunches of radishes at a cent a bunch. These sell at five cents a bunch in many groceries and are peddled out from wagons of peddlers at two for five cents. But the consumer pays the grocer five times as much as the grocer pays the farmer.

Last year a truck raiser fifteen miles from Chicago fed his lettuce to his hogs because the grocers in Chicago would pay him but two cents a box for it. Yet the poor of Chicago could not afford to eat much lettuce because it was so dear. How long will the great consuming public on the one hand and the great producing public on the other hand stand this sort of thing? When will we be intelligent enough to do business with our eyes open instead of with our eyes shut?

The middleman is a necessity and should have a fair compensation for the services he renders the public; but just now he has worked into a position where he is able to absorb a large part of the revenue of the producing and consuming community.

The illustrations cited above are but a few of the many that might be given. The writer has made it his practice to buy both from the local grocer and from the great market mentioned and knows how far apart are the prices paid.

Education and organization are the only factors that can improve matters and secure to the farmers the returns that justly belong to them.



The DAIN Vertical Lift Mower

leads all others. It's easy on the horses, convenient to handle, and so strongly made that it will be doing duty years after other mowers have gone to the scrap heap.

Its **Compensating Gears** and **Cutter Bar Realigning Device** are successful examples of the wonderful inventive genius of Mr. Joseph Dain. The gears are so mounted in relation to each other that perfect balance and true mesh are permanently insured and the crank shaft is relieved of all end thrust, preventing lost motion, reducing draft and mutiplying cutting power. That is why the Dain Mower runs lightly and cuts where others fail.

Other points of superiority are: **Adjustable Draft Hitch; Automatic Clutch Shifter; Long Pitman and extra large Knife Head.**

The Vertical Lift is so handy to operate a boy can raise the cutter bar with ease. It is the only mower you can realign, yourself, right in the field with your wrench. This practical adjustment for maintaining the cutter bar in line with the pitman, means added efficiency and years of extra service.

The Dain is the mower that will give you complete satisfaction.

Consult the nearest Dain dealer; learn all about this greatest of all Mowers, and about the entire line of Dain Hay Tools, Loaders, Side Delivery Rakes, Stackers, Sweep Rakes, Presses; every one the best of its kind.

We make best hay tools because we've been specializing on them for over a quarter of a century.

Send for full particulars and a **free** copy of "*All About Hay*," the most complete and practical booklet on the subject every written. Write today. A postal card will do.

WESTERN RANGE HORSE SALES.

Horse raisers are advised that sales will be conducted by

Campbell & Reid and Western Sale Stables Co.,

NATIONAL STOCK YARDS, ILL., As usual, during the season of 1911. The Third Sale will be held on

THURSDAY, JULY 13,

And every two weeks thereafter until the close of the season. The Fourth Sale will be held on

THURSDAY, JULY 27.

We will be glad to hear from Ranchmen having Horses for sale. The demand is sure to be good, especially for well-bred Mares and Geldings in good condition.

Please address
J. J. SEARCY, Sale Manager,
NATIONAL STOCK YARDS. ILL.

Hog Market and Prices.

On June 30th, at St. Louis, the good to choice hogs averaging 230 to 300 pounds sold largely at $6.55 to $6.70 per 100 pounds; butcher hogs, 180 to 225 pounds, sold at $6.60 to $6.75, the top hogs weighing 204 pounds. Light hogs, 160 to 185 pounds of good quality, sold at $6.60 to $6.70. A lot of inferior pigs, culls and throw-outs sold at $5.00 to $6.25.

Horse and Mule Notes.

The purchase of the great little race mare, Penisa Maid, 2:04¼, for $25,000, by R. J. McKenzie, a prominent railroad man of Winnipeg, as a wedding present for his bride, is another indication of the fondness for the American trotter.

Emory H. Smith, horse breeder, who has sold his ranch in Texas, has a very fine black Hackney stallion, which he will sell at a bargain. The advertisement is on page 20.

Bargains in Feeding Sheep.

Clay, Robinson & Co. buy large numbers of stock ewes and feeding sheep for their customers. It is one of their specialties to be "strong" for sheep at all the markets. They now announce that this is a good time to stock up. Our readers are advised to keep close to the market reports of Clay, Robinson & Co. They do business at ten markets, as will be seen on page 13.

Hay Market Report.

Hay is selling so high that the commission firms are taking advantage of it to raise the commissions from 50 cents to 75 cents a ton. This is done by the Merchants' Exchange. The shipper is not consulted. At the close of the month of June the following represented the range of prices; Choice timothy, $25 to $25.50; No. 1, $22 to $24.50; No. 2, $18 to $21; clover mixed ranging in price from $12.50 to $21 for heavy stuff up to $22 for light mixed; new timothy ranging in price from $16 to $20.50; choice prairie, $20; No. 1, $18.50 to $20; No. 2, $15 to $18; choice alfalfa, $17.50; No. 1, $16 to $17; No. 2, $13 to $15 per ton.

Mutton Sheep Sales.

At the St. Louis National Stock Yards, during the closing week of June, mutton sheep sold at $3.35 to $3.50 per 100 pounds. Some choice young, good-quality ewes sold to go to the country for breeding purposes at $3.75. Mixed stock sheep sold at $2.00 to $3.00, while old, common cull ewes sold at $1.00 to $1.85. Bucks sold at $2.25 to $2.50 per 100 pounds.

Draft Horse Importation.

Trumans' Pioneer Stud Farm, of Bushnell, Ill., report as follows on June 28th: "Our fourth importation for 1911 arrived at Bushnell in first-class condition. The greater part of the shipment were two-year-old Percheron stallions, and I am satisfied that never at any one time have we had as many strictly high-class Percheron colts as this shipment contained. In addition to our importation that arrived last month, it makes us thirty-five extraordinary Percheron two, three and four-year-old stallions, quite a number of them being dark greys, the balance blacks. Included in the last importation were several horses purchased from the noted Bury studs. We have been enjoying a very fair summer trade in stallions. We had the pleasure of a visit from our old customer, C. L. Hardman, of Marion county, Iowa, and he took home with him an imported Hackney stallion, which will do much to improve the harness-horse industry of his section. We have also sold the following horses: To Harry Broadbent & Company, Henry county, Illinois, an imported three-year-old Shire stallion; an imported Percheron stallion to J. O. & Dick Hendricks, of Colorado; two imported Shire stallions and pair of imported Shire mares to Ed H. Magowan, of Buffalo county, Nebraska; to B. F. & C. E. Reed, Warren county, Iowa, an imported Shire stallion to head their herd of pure-bred Shire mares; to Stratton Percheron Horse Company, Colorado, an imported Percheron stallion; to Peter Hansen & Company, South Dakota, an imported Shire stallion; to C. Julius Fritz, Colorado, an American-bred Percheron stallion; to our old customer, M. P. McKeown, of Muscatine county, Iowa, an imported Shire stallion; to G. W. Davis & Company, Colorado, an American-bred Percheron stallion. We have a few very choice two-year-old Percheron fillies and an extraordinary lot of first-class imported Shire mares for sale."

The St. Louis Mule Trade.

The following is an extract from a recent circular by Holland, Nugent & Maxwell Bros. at the St. Louis National Stock Yards; "The mule trade is about the same as it has been the past two months. Good miners are selling well. Draft mules of quality are selling all right. Some demand for pit mules. The other classes are not wanted and are hard to sell at prices that will do the shippers any good. We look for fair trade right along all summer."

Increase in Horse Business.

Mr. T. H. Holland, head of the firm of Holland, Nugent & Maxwell Bros., horse and mule commission salesmen, said: "I wish you would make a note of the wonderful growth of the horse and mule market at the St. Louis National Stock Yards. Here we have received 93,363 head in six months, an increase of 34,618 head over the same period last year. We sell these horses very well indeed, and it is done quickly. The horses are handled at the least cost in commissions, yardage, feed, freight bills, etc. This is the natural accumulating and distributing center. We never had more horses than we handled comfortably, and the mule buyers naturally concentrate here to fill their contracts." Holland, Nugent & Maxwell Bros. hold auctions every Monday and Tuesday at the National Stock Yards.

A First-class Commission House.

In consigning live stock for sale at the St. Louis National Stock Yards, remember the Evans-Montague Live Stock Commission Company. It is a successful firm, highly competent and persevering in the interest of their customers. The Evans-Montague Commission Company solicit consignments of cattle, hogs and sheep for sale on the market, and desire stockmen to take notice that the company has special buyers who select and buy stock and feeding cattle for their customers. Colonel James H. Campbell, the veteran and renowned cattle salesman, has recently joined this house as Vice-President, in charge of the cattle department. His presence adds strength to the organization. Stockmen requiring market information should address Evans-Montague Commission Company, Box 68, National Stock Yards, Ill.

Western Range Horses.

The auction sales of Western range horses at the St. Louis National Stock Yards continue as advertised. Two have been held, and the July sales on the 13th and 27th are advertised. Campbell & Reid and the Western Sale Stables Company holding these auctions are to be congratulated upon bringing the Western range horseman and the domestic state farmer in close communication. They used to sell all the horses in car-loads, but now the best of them are sold in pairs. We cannot quote all the sales, but give a few: Twenty-one horses went to Kentucky at $115 per head; twenty-two horses to Tennessee at $55 per head; twenty-seven horses to Southern Illinois at $46 per head; twenty-eight to Tennessee at $65 per head; eighteen horses to Tennessee at $71 per head; two bay mares for $290; two brown mares for $225; two bay mares for $395; one bay mare in foal, $125; six yearlings to North Carolina at $36 each; ten horses to Kentucky, $90 per head; nineteen yearlings to Illinois, $52 each. These are sample sales. Anyone desiring further information should address J. J. Searcy, Sale Manager, National Stock Yards, Ill.

Clay, Robinson & Co.'s St. Louis Record.

One of the most remarkable records of modern business achievement is the success of Clay, Robinson & Co at the St. Louis live stock market. Clay, Robinson & Co. are salesmen and buyers of cattle, hogs and sheep in the interest of their customers. They are well established at ten different markets. This firm entered the St. Louis market a little over two years ago and started at the bottom of the list of commission firms. Since then, although the list is a long one, they have now reached the second place in the volume of business done. The St. Louis market is famous for active, reliable, skillful live stock commission firms, and Clay, Robinson & Co.'s record is all the more remarkable for that reason. See page 13 of this paper.

Homeseekers' Land Books Free.

The Union Pacific Railroad Company has gone deeply into land investigations. This is for the purpose of giving the homeseeker correct information. Each farmer has his preference, and the railroad people try to advise the individual to go where he will have the best chance to prosper according to the special ability he may have. To get started right, to save you time and money, write to Homeseekers' Information Bureau, 791 Bee Building, Omaha, Neb., and state what you have done and what you wish to do in a new country.

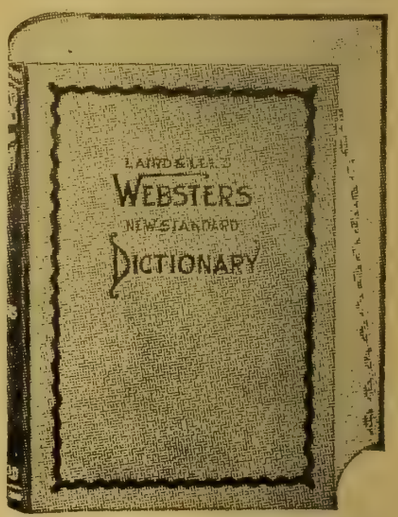
Whitman's Hay Press.

Attention is invited to the Whitman Hay Presses advertised on page 2. These presses are in use in every country of the world and have undergone constant improvement since the first presses were first put on the market forty years ago. For illustrated catalogue address Whitman Agricultural Co., 6901 South Broadway, St. Louis, Mo.

WEBSTER'S DICTIONARY.

The Most Compact, Useful, Handy Book Ever Issued by the American Press.

This is Laird & Lee's Webster's New Standard Dictionary, of the English Language, a wonderful book, 756 pages in all, 840 illustrations, substantially bound, gilt title, red edges, patent thumb index. Special edition for office and general use on farms, estates, ranches, etc.; massive but handy; contains ten encyclopedic features, supplement of new words, dictionaries of biography,



geography, musical terms, Biblical, classical, historical and mythological names, foreign phrases, English word-building, rules in orthography, current abbreviations, metric system with converson tables; weighs twenty-eight ounces. Our offer to you: Send us One Dollar and we will send you The National Farmer and Stock Grower for two years and we will also send you, postage paid, safe delivery guaranteed, one copy of this great Webster's Dictionary We also agree to refund money and pay return postage to anyone who is not satisfied with the bargain. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Lamb Sales at St. Louis.

During the last week in June, on the St. Louis market, the best lambs, averaging 68 to 70 pounds, sold at $7.60 per 100 pounds. A good many sales were made at $7.00 to $7.40. Some loads of 62 to 69-pound lambs classed as Southwest sold at $6.25 to $7.25 per 100 pounds. Culls and common lambs sold largely at $3.50 to $4.50 per 100 pounds.

Evans-Montague Commission Company

THE MEASURE OF SUCCESS attained by a SHIPPER OF LIVE STOCK depends largely upon THE COMMISSION HOUSE to which he consigns his CATTLE, HOGS AND SHEEP.

If you wish to receive TRUSTWORTHY AND RELIABLE SERVICE, and have your consignments SOLD BY CAPABLE AND CONSCIENTIOUS SALESMEN, you cannot do better THAN PATRONIZE OUR HOUSE.

The Shippers' Interests ARE OUR INTERESTS, and our rapidly-increasing business IS THE STRONGEST TESTIMONIAL of our ability TO PLEASE OUR CUSTOMERS.

Evans-Montague Commission Company

P. O. Box 68,
NATIONAL STOCK YARDS, ILL.

Missouri Wheat, July 1, 1911.

The wheat harvest is remarkably early, 96 per cent. of the harvest having been completed, with more than half of the correspondents reporting threshing well under way. Ninety-seven per cent. of the 1,881,000 acres seeded last fall will be harvested, as compared with 86.1 last year. The preliminary estimate on yield is 14.8 bushels per acre; last year, 13.2. Quality of new crop is placed at 91. Straw is fine and is being saved for feed. Much will be baled.

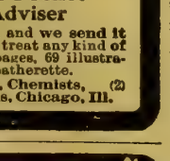
The Blue Grass Fair on August 7th opens the Fair season at Lexington, Ky.

VETERINARY INSTRUMENTS (Trocars, Hopples, Impregnators) for Horses, Cattle, Swine, Poultry, Etc. Received Only Award World's Fairs, Chicago, St.Louis. Write for Illustrated Catalogue.
HAUSSMANN & DUNN CO., 708 So. Clark St., Chicago.

Bone Spavin

No matter how old the blemish, how lame the horse, or how many doctors have tried and failed, use
Fleming's Spavin and Ringbone Paste
Use it under our guarantee—your money refunded if it doesn't make the horse go sound. Most cases cured by a single 45-minute application—occasionally two required. Cures Bone Spavin, Ringbone and Sidebone, new and old cases alike. Not used on splint, curb or soft bunches. Write for
Fleming's Vest-Pocket Veterinary Adviser
Best book on blemishes, and we send it free. Read it before you treat any kind of lameness in horses. 192 pages, 69 illustrations, durably bound in leatherette.
FLEMING BROS., Chemists, (2)
218 Union Stock Yards, Chicago, Ill.

KENDALL'S SPAVIN CURE



—has saved thousands of dollars and thousands of horses. The old reliable cure for Spavin, Ringbone, Splint or any lameness. For sale at all druggists. Price $1 per bottle, 6 for $5. "Treatise on the Horse" free at druggists or write to Dr. B. J. KENDALL COMPANY, Enosburg Falls, Vt., U. S. A. 5

The Cost of Horse Labor.

The tradition that "it doesn't cost anything to keep a horse, when you live on a farm," is rudely shattered in Bulletin No. 15, by Prof. Thomas P. Cooper, just issued by the College of Agriculture, St. Paul, Minn. The writer shows that, taking into account only such items as a city business man would consider in keeping a debit and credit account with a horse, every such animal really does cost the farmer a round sum for his keep.

First, there is the interest on the purchase price or selling value of the horse. Putting the rate at 6 per cent. and the value at only $150, the interest comes to $9.00.

Next, we must consider that the average working life of a horse does not exceed ten or twelve years; therefore at least one-twelfth of his value must be annually charged to depreciation. There goes another $12.50 on the $150 horse; and if the animal is worth $300, the depreciation cost is doubled.

The average duration of a frame barn, according to underwriters' tables, is forty years, and the capital per head, invested in such structures, may be said to average $60. Divide this by forty, and we have $1.50 as depreciation and $3.00 as interest, making the cost of shelter for a horse, per year, $4.50.

The items of use and depreciation of harness, shoeing and miscellaneous expenses add an average of at least $2.87 annually, and bring the total cost on the $150 animal up to $28.87, without any reference to the cost of feed and labor expended in caring for the horse. The farm value of the feed, based on accounts with 100 horses kept in different parts of Minnesota, averages $54.84 per horse; the value of labor spent in caring for them, $15.25 per horse. These items bring the aggregate average cost of keeping a $150 horse in Minnesota, for one year, up to $98.96. Mr. Cooper's tables, however, are based on an average valuation of considerably less that $150 per horse, and omit any allowance for the cost of barn room or shelter; hence, they make the cost of maintenance only about $85 per year.

Even at this lower figure, however, it will be seen that, with say four horses on the farm, the expense entailed reaches the very respectable sum of $340 a year. As the work horse on the average farm actually works only about 1,000 hours in a year, it is seen that the cost of horse labor, with the low-priced animals used as the basis of Mr. Cooper's figures, is 85 cents per day of ten hours.

A variety of suggestions are made, looking to a reduction of this heavy drain upon the farmer's resources. These include: (1) The use of more brood mares on the farm; (2) A better distribution of horse labor throughout the year by diversified farming; (3) Reducing the number of work horses on the farm; (4) More economical methods of feeding; (5) The use, on small farms, of machinery requiring less horse power. Among these methods, the substitution of brood mares for the geldings most commonly employed will commend itself as the most desirable. It is demonstrated that mares in foal can, with care, be worked ten months in the year, not only without injury, but with advantage to both mare and foal. The three and four-year-old colts can be used, for much of the work, in the place of the aged horses now driven. And finally, the sale of colts will more than pay for the keep of the mares.

Best Price For Yearling Cattle.

At Chicago, on June 26th, Clay, Robinson & Co. sold for S. C. Wolf, of Craig, Neb., thirty-two head of Shorthorn yearlings, fourteen of which were heifers, 841 pounds average, that sold for $6.50 per 100 pounds, the best price for yearling cattle on that day.

Dakota Cattle at Chicago.

Mr. J. E. Babcock, a well-known breeder, feeder and farmer of Avon, S. D., was on the Chicago market Friday, June 23d, with forty-four Shorthorn and Angus cattle of his own raising and feeding, all of which were handled by Clay, Robinson & Co.. Included were eighteen steers, mostly horned, which tipped the beam at 1,210 pounds and sold at $6.60, or 35 cents per 100 pounds higher than any other firm obtained that day. In spite of it being Friday, the sale was within 10 cents per 100 pounds of being as high as made on this market since April. There were also twenty-six yearling heifers and steers mixed which averaged 850 pounds and went at $6.40, or 15 cents per 100 pounds higher than any cattle handled by any other firm made.

Missouri Corn Prospect.

On July 1st, the Missouri Crop Report said:

"To-day Missouri stands to make or lose one of the best corn crops in her history. With plenty of rain from now on, an immense yield is assured, fields being free from weeds and well worked. But with continued dry weather during July there will be no pyrotechnical performances (to use a Fourth of July phrase) except that the August report will show that corn condition has fallen like a sky-rocket stick. Condition of corn is now 83.6; one month ago, 85.6; one year ago, when there was still some corn to plant, owing to the wet June, 75.9; ten-year average, 82.5. A favorable early spring, coupled with persistent and proper cultivation, has almost enabled corn to hold its own up to this time. The acreage planted is 3.6 per cent. short, as compared with last year's crop, but the tand is much better."

The Unhappy Calf.

"The prodigal son" was the subject of the Sunday school lesson, and the teacher was dwelling on the character of the elder brother.

"But amidst all the rejoicing," said the teacher, "there was one to whom the preparation of the feast brought no joy, to whom the prodigal's return gave no happiness, only bitterness; one who did not approve of the feast and had no wish to attend it. Now, who can tell me who this was?"

Silence for several moments; then a hand raised and a small, sympathetic voice:

"Please, ma'am, it was the fatted calf."—Exchange.

THE BOARD OF TRADE REPORT.

Snow's report for July 1 shows an increase of 500,000 acres in the corn area, the increase being mainly in Iowa and the Northwest. The condition is reported at 82.4, against 83.1 last year, and with the exception of 1903 is the lowest July average reported in ten years. Hot, dry weather has greatly damaged the crop in the extreme Southwest, and is injuring it in the lower Missouri Valley. In Iowa, Nebraska, and east of the Mississippi river, conditions are high, but in the Western district the crop is under a severe strain at the beginning of the month. Conditions in important states are: Texas, 40; Oklahoma, 47; Kansas, 76; Missouri, 83; Nebraska, 89; Iowa, 97; Illinois, 87; Indiana, 87; Ohio, 87; Kentucky, 88; Tennessee, 90; South Dakota, 87. Present conditions maintained until harvest would warrant a crop expectation of 2,950,000,000 bushels. Snow estimates the crop at 2,920,000,000 bushels.

Mr. M. F. Horine, statistician for the Chicago Union Stock Yards, states that the Western supply of fat cattle is about exhausted.

HORSE AND MULE SALESMEN.

HOLLAND, NUGENT & MAXWELL BROTHERS.

NATIONAL STOCK YARDS,
EAST ST. LOUIS, ILLINOIS.

HORSE AUCTIONS EVERY MONDAY AND TUESDAY.

Horse and Mule consignments are solicited for sale by the most competent firm on the Best Market in the United States. Every consignment given personal attention. Keep in touch with us. Let us sell your Horses and Mules on commission.

HORSE DEPT.—Nugent Bros., Maxwell Bros.
MULE DEPT.—Ed. Conway, Lan Morris.
AUCTIONEERS—Tim Holland, Ike Howard.

Write for market information.
Address,
HOLLAND, NUGENT & MAXWELL BROTHERS,
P. O., National Stock Yards, Ill.

Congress adjourned over the Fourth of July, and if Congress would now adjourn over Christmas it would be a relief. Congress and the drouth in session at the same time is too much for the farmer.

Somewhere about July 15th, or later, we may look for a vote in the Senate upon the alleged reciprocity treaty.

Don't Have a Blind One

"VISIO"

An Absolute Cure for Moon Blindness
(Opthalmia), Cataract and Conjunctivitis
Shying horses all suffer from diseased eyes.
"Visio" will convince any horse owner that it will absolutely cure defects of the eye, irrespective of the length of time the animal has been afflicted. No matter how many doctors have tried and failed, use "VISIO" under our GUARANTEE to refund money if it does not cure.
$2.00 per bottle, postpaid on receipt of price.
VISIO Remedy Ass'n, 2472 Calumet Ave., Chicago, Ill.

THICK, SWOLLEN GLANDS

that make a horse Wheeze, Roar, have Thick Wind or Choke-down, can be removed with
ABSORBINE
also any Bunch or Swelling. No blister, no hair gone, and horse kept at work. $2 per bottle, delivered. Book 3 E free.

W. F. YOUNG, P.D.F., 106 Temple St., Springfield, Mass.

Bickmore's Gall Cure

Harness and Saddle Galls
Great hot weather remedy for galls, sore shoulders, wire cuts, sores. A healing, curing salve in use 18 years; standard remedy with horsemen. *Cures while horse works.* Sold by dealers; money back if it fails. Send 5c (for postage and packing) and get sample and 84-page valuable horse book.
Bickmore Gall Cure Company
Box 482 Old Town, Maine

Poultry and Farm Paper Club.

We are often asked which is the best poultry paper in the United States, and the answer is **The Reliable Poultry Journal.** There are other excellent poultry papers, but the one we take home to read and one the family is determined to read is **The Reliable Poultry Journal.** We have made arrangements whereby we can send The National Farmer and Stock Grower and **The Reliable Poultry Journal,** both papers, one year, for fifty cents. This is a bargain that is good now, but this advertisement may not appear again. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Some Poultry Experiences.

The raising of poultry may be considered a side issue on most farms, but there is a world of things that we have to learn about it. Even some of the oldest experimenters along poultry lines are constantly finding new phases of the subject.

A friend of the writer recently remarked to him that he had found a trick to turn on the sitting hen. He had one that had set for two weeks on some china eggs. Then he went to a hatchery and bought a dozen chickens cheap. He put them under the hen at night and in the morning she was clucking with delight at her new brood. He had saved the price of the eggs he would have set and the losses that would have come from some of the eggs being broken or being infertile. So he got a good start with twelve live chicks.

A few weeks later he said he had worked the same trick on another hen that had sat but a week; he said the hen looked puzzled but had finally decided to quit the nest after he had removed the fake eggs.

A few days ago he said the trick would not work under all cases. He had just had a sad experience. He had put the china eggs under a hen and had allowed her to sit for two days. Then he had gone out at night and pulled out from under her the eggs, and had put a brood of live chicks in their place. Then he returned to the house and went to bed. He was out again early in the morning and visited the newly-set hen. He found her in a belligerent mood and fighting mad. She was busily engaged in slaughtering the brood of chickens he had given her the night before. She was still sitting on the nest, but every time a chicken head appeared from under her feathers she struck it. She had already killed seven of the brood. He removed the other five chicks and broke up the nest. He said the hen knew she had not been sitting long enough to hatch the chickens and was settled on the fact that the chicks were invaders of her domicile.

The man would have done well to be satisfied with the good thing he had found. But he wanted to cheat the hen out of the pleasure of sitting for her brood.

Sitting hens vary enormously in their habits and usefulness. Some seem intelligent and some do not. The writer has just had experience with one of the unintelligent kind. She succeeded in ruining her entire setting of eggs. They were chilled at various stages, and every egg when broken had a dead chick in some stage of development. She was a very light hen, but broke five of the eggs in her nest by jumping in on them. Unlike most sitting hens, she came off about every day and stayed off an unreasonably long time. This resulted in the chilling of the eggs and the killing of the embryonic chicks. Some will say lice were the cause, but that is a mistake, as there are no lice on the hens or in the pens. Other hens of the same flock have brought off good broods of chicks.

The writer once had a heavy hen that smashed every egg put under her, yet had a settled determination to sit. She finally died after having persisted in her determination for over five weeks, though every effort was made to break her up.

Hens that prove successful sitters and good mothers should be marked so they can be used in subsequent years, in preference to the hens that prove themselves unsuitable to the hatching and raising of chickens.

Cold Storage of Eggs.

Cold-storage facilities for eggs have been taxed to the utmost in the East. There is a time when farmers do not estimate the value of cold storage, but it is not when the cold-storage houses are being filled up. In New York City, in the month of May, 847,759 cases of eggs were on the market, and the best Western eggs sold largely for immediate consumption at 16 to 19 cents a dozen; but the market was overstocked and the fresh-egg trade could not handle more than half of them. About 433,759 cases of eggs were all that the New York trade could handle or the people consume at any price during the whole month of May, and if the cold-storage speculators had not stepped in, bought and stored 414,000 cases at a cost averaging 13 to 15 cents a dozen, several hundred thousand cases of eggs would have failed to sell for enough to pay freight bills. Nearly all the excessive supply of eggs on sale would have been dumped at ruinous figures. Notwithstanding the storage buyers were helping the market, daily and hourly, the week ending June 6th saw many cases practically unsalable.

The eggs were affected by the heat and would have deteriorated rapidly but the pure air of the refrigerator chamber soon checked all possible deterioration, and when the eggs come out again to be sold, the market may not be oversupplied and the eggs may cost the buyers a cent or two a dozen over cost and carriage, but then again they may not, for profits are not guaranteed to speculators. But when these egg speculators try to get a profit on the eggs they will most likely be regarded as malefactors and very likely laws will be passed to injure the sale of their eggs.

Our sympathy does not extend very far towards the speculator, but we do believe that refrigeration is one of the greatest blessings derived from modern invention. Cold storage prevents extreme demoralization in advancing or declining markets; but it never injured an egg, let alone a human being. A government that has to be reasonable with the tobacco trust should certainly be reasonable in the matter of cold storage.

Chickens on Range Yield Greater Profit.

"The average farmer who keeps a few hens makes a decided mistake during the summer time in yarding his chickens too close to the farm buildings, instead of letting them run free on the range," says Prof. J. G. Halpin, head of the Poultry Department of the College of Agriculture of the University of Wisconsin. "The objections to yarding the flock on a limited area are that the ground becomes contaminated and diseased from the accumulation of the droppings, and also on account of the great scarcity of insect life near the buildings. Practical experiments have proved that the expense for feed bills may be reduced fully 50 per cent. where the chickens are allowed free access to the range, rather than being yarded.

"On the range, especially where the soil has been cultivated and is free from disease, where there is plenty of insect life and succulent feed, the flock will prosper. Many farmers have small special yards in which they raise chickens year after year. The ground is never plowed; in time it becomes contaminated and may result in the infection of the entire flock with some bacterial disease. Although the small yard is advisable for young chicks, as soon as they attain some size they should be moved out onto the open range; their yard should be plowed and sowed to some crop, such as buckwheat, in order that any possibility of the soil becoming contaminated may be controlled. The preferable time to move the flock out to the range is during late May and early June.

"Another important principle to observe in the care of the farm flock," continued Prof. Halpin, "is to protect late-hatched chickens from extremely strong sunlight. The hen and the chicks or the brooder should be placed in the shade of a tree or else some artificial shade should be provided. An old door fastened upon four stakes two feet above the ground on the north side and one foot high on the south, affords an inexpensive protection for the young chicks from the extreme heat. If desired, a heavy cloth or some old canvas can be tacked on the stakes in the place of the door. The main thing is to control the large losses of late-hatched chickens resulting from exposure to extreme sunlight."

Poultry Notes.

During the Hebrew holiday, "the Feast of Weeks," fat poultry is in great demand. At that time New York City was selling live poultry at 14½ cents for hens, 30 cents for broilers, 9 cents for roosters, and 14 cents for turkeys.

During the month of May the egg receipts in New York City were 847,750 cases, the largest number ever received, and in three months 2,260,070 cases arrived, which is also the largest three-month supply recorded.

I Guarantee to Cure

ECZEMA

TO STAY CURED!

It is also called SALT RHEUM, SCALD HEAD, TETTER, ITCH, WEEPING SKIN, MILK CRUST, PRURITUS—these are different names, but all mean one thing—ECZEMA.

DR. J. E. CANNADAY, THE DOCTOR WHO TREATS NOTHING BUT ECZEMA.

I prove every word that I have said—I give to every sufferer

A FREE TRIAL

Just to show you that you need my treatment. It is yours for the asking. If you have been to other Doctors, if you have taken patent medicine, and used lotions and salves till you are disgusted, write to me—I will send you ABSOLUTELY FREE OF CHARGE, A TRIAL TREATMENT. There are no strings to this statement. There is not one cent to pay—not a penny accepted. I know what my trial treatment will do; I know that it will convince you more than anything else on earth that you need my treatment.

Don't Miss This Chance for a Cure

If you are SUFFERING FROM ECZEMA you can only be cured one way—REMOVE THE CAUSE. What is the cause? ACID IN THE BLOOD. How do you remove it? By cleansing the blood of the ACID.

My treatment is soothing—relieves the dreadful itching at once and cures the disease quickly. You don't have to take treatment for months and months. ONLY ONE CASE IN TEN needs the second treatment—ONE IN FIFTY needs the third—think of that!

What Eczema Is

Eczema is a disease of the blood and affects all parts of the body—the face, lips, ears, hands, feet, genital organ, etc.

SYMPTOMS.—Yellowish red eruption; the pimples or patches may swell and the itching is so great the person will scratch the top off, then they bleed and dark scales form; there is an oozing of matter. In some the skin cracks and bleeds. Itching is terrible; a person suffering will scratch till they bleed. Scales form on parts of the body, where the clothing comes in contact.

Ten Years Guarantee

I positively Guarantee that every case cured by me will stay cured 10 YEARS! It must be good or it could not be sold this way.

Strong as Rock of Gibraltar

I am a graduate from two leading medical schools. I am the holder of a GOLD MEDAL taken in Competitive Examination. Does this not show that I am fully qualified? I will send you my book, showing endorsements of business men of all classes. Also testimonials and pictures from cured patients everywhere. Some of them may be YOUR NEIGHBORS.

MY BOOK

Is the most complete book ever sent out. I explain every form of the disease plainly and fully. I show pictures of many severe cases, which are extremely interesting. I send you names of thousands who have been cured and are grateful.

DR. J. E. CANNADAY
969 Park Square,
Sedalia, Mo.

Reliable Beyond Question

This is a statement from the bank of my home town, where I have done business for years.

THE CITIZENS' NATIONAL BANK OF SEDALIA
SEDALIA, MO.

February 11th, 1908.

TO WHOM IT MAY CONCERN:

This certifies that Dr. Cannaday's patients, from all over the United States, have been placing their money in this bank while they tried his treatment on eczema. In all this time we have been called upon but five times to return the patients money.

One died before the treatment was shipped; two did not get the treatment as it was lost in transit; one paid cash for the treatment three days later after getting her money; and one was not satisfied.

Citizens Nat. Bank

Sheep in Missouri.

During the debate on the wool tariff, Hon. D. C. Dyer, of Missouri, brought forth the new census figures on Missouri sheep which had not previously been published. The figures for the year 1910 show that 44,010 Missouri farms reported sheep and lambs, against 38,013 in 1909. The total number of sheep and lambs reported in 1910 was 1,808,038, compared with 1,087,213 ten years previous, an increase of nearly 80 per cent. The number of wool-producing sheep raised in 1910 was 1,114,216, against 663,703 in 1900.

Treatment of Diarrhoea in Fowls.

[By B. F. Kaupp, Pathologist, Colorado Agricultural College, Fort Collins.]

The Veterinary Section of the Colorado Agricultural Experiment Station has been experimenting with different remedial agents with the view of finding some drug that would, at least, curtail the enormous loss among barn-yard fowls from the various forms of diarrhoea.

Space will permit the discussion of only one agent. The one that has thus far given us the best results is the sulpho-carbolates compound, prepared by The Abbott Alkaloidal Co., of Chicago.

One flock consisted of sixty birds. Several were sick at the time treatment commenced and four had died. The discharge from the bowels was of a greenish-yellow color, somewhat simulating fowl cholera. One thirty-grain tablet was dissolved in a quart of water and this fluid mixed with bran and corn chop. The mixture was then fed in clean troughs. In this way each bird got approximately one-half grain. This was repeated night and morning. No additional birds became sick, only two of those sick died, and the rest recovered.

Another flock consisted of 175 baby chicks. As soon as these birds were taken from the incubator they were fed the unhatched eggs that had been cooked and chopped. This mixture was reported to possess an offensive odor. The birds began dying with symptoms of diarrhoea, white pasty vent, weak, dull, droopy wings, etc. One-half the flock died before treatment was begun. One-half tablet was dissolved in warm water and the bread saturated with it. The birds immediately quit dying.

Still another flock consisted of 200 birds, including a few turkeys. Cholera had appeared on the premises the fall before. The outbreak was studied in the field and laboratory. The germ (B. Avicepticus) was isolated. In the last outbreak fourteen birds had died and several were sick. Similar treatment was used as in the above flocks, except that powder was used instead of the compressed tablets. One tablespoon, rounding full, was dissolved in each two gallons of water. This water was kept constantly before them. No more birds were taken sick and no more died after the sixth day.

The above is a good illustration of three types of diarrhoea in which we have found this drug by far the best agent tried.

The poultry people will probably be able to secure this drug through their local veterinarian or druggist. We have not investigated the commercial side of it.

From Nashua, N. H., on June 3d, it was reported that five cows were killed by lightning on the farm of Mrs. Della Whipple, on the Lowell road, known as the Highland Farm. The cattle gathered under a tree when the shower came and after the flash of lightning it was found that all five were dead.

Extraordinary Announcement: THE BOOK OF LIVE STOCK CHAMPIONS. EDITION OF 1911.

To Contain True to Life Pictures Reproduced From Photographs Taken in the Principal Show Rings of the American Continent by the Greatest Animal Artists.

ONE THOUSAND CHAMPIONS

Winners in the Annual Live Stock Contests at State and National Fairs and Expositions.

THIS is the Fourth Edition of the most valuable book ever published in the interest of high-class stock raising.

The pictures in The Book of Live Stock Champions are of famous animals. There are sweepstakes and championship winners at State, National and International Fairs and Expositions. These include individual awards in breeders' competitions, also herds with prize-ring honors; the beef cattle include grand champion steers and car-loads; the dairy cattle include record makers and large producers of milk and butter; the horses include thoroughbred, trotting, coach, draft, hunters, ponies, jack stock, etc. Every breed of hogs, sheep and goats will be represented by the best in every breed.

There is not a second-class animal or inferior picture in the book. Every animal is a record-maker, record-breaker, famous sire, mother of champions, or winner in the prize ring.

ISSUED AS A SOUVENIR SUPPLEMENT.

The Book of Live Stock Champions is published as a Souvenir Supplement to The National Farmer and Stock Grower, issued monthly at St. Louis, Mo., a nice, clean, general farm publication, full of practical, interesting and instructive information. It contains good reading for all the family. It is very useful to general farmers, vegetable and fruit growers, and especially so to cattle, hog and sheep raisers and feeders, horse and mule raisers and dealers, and it contains more good poultry facts than most of the poultry papers. There are thirty-two pages, four columns to the page.

Special Inducements to Paid-in-Advance Subscribers---To Old Friends and Patrons.

It is worth something for a publisher to know how many books to print and bind. We therefore offer the first ten thousand copies of this edition at One Dollar per copy, including a two-year subscription to The National Farmer and Stock Grower. The first ten thousand copies will be handsomely printed and elegantly bound in red cloth, with gilt title. This is an extraordinary offer. After publication the cloth-bound copies will cost Two Dollars a copy without the subscription.

HERE IS A SUBSCRIPTION BLANK.

Hale Publishing Co., 3550 Vista Ave., St. Louis, Mo.:

Gentlemen:—Herewith please find One Dollar to pay for two-years' subscription to The National Farmer and Stock Grower, for which please give me credit. You will please send me as a Souvenir Supplement, post free, safe delivery guaranteed, one copy of The Book of Live Stock Champions, cloth-bound edition of 1911, immediately after publication.

My occupation is.....

Write to Your Senator.

The bill providing for the bogus reciprocity treaty with Canada has not yet passed the United States Senate, and at this writing, on July 1st, a date has not been set for a vote. There is no telling now how it will be decided, and, as we stated three months ago, the bill may be passed or rejected by one vote. If it was a true reciprocal measure, admitting our goods into Canada duty free and admitting Canadian goods into this country duty free, just the same as Iowa, Illinois and Wisconsin interchange goods without a custom house between them, we would have but little objection; but this proposed treaty is a surrender of the protection due the farmer and retains the protection heretofore existing in other classes. We believe this country thrives best under a protective tariff system applied to all interests, and we do not believe in applying the protective system wrongfully to the disadvantage of the farming people.

All our Senators can be addressed care of United States Senate, Washington, D. C. They are all willing to read letters from their constituents and especially from farmers at this time. Until the bill is passed there is reasonable hope to defeat it. Every farmer has a voice in this matter, and if he fails to use it and the bill passes, he will have no one to blame but himself. There are two Senators from each state; therefore each farmer has two letters to write. Just write freely and frankly that you are opposed to the bill because it will serve no good purpose and is distinctly injurious to the farmer. If you have studied the subject and have arrived at any other conclusion, write and say so. This is the first time that the entire agricultural interest has been brought into politics, and if farmers do not exert themselves they will be considered a lot of dummies, and many laws will be passed against their interest. The time to act is before it is too late.

THE SENATE.

Hon. James S. Sherman, of New York, Vice-President.
Hon. Augustus O. Bacon, of Georgia.
Hon. Joseph W. Bailey, of Texas.
Hon. John H. Bankhead, of Alabama.

Important to Poland-China Breeders.

Notice is given that a meeting of the stockholders of the Standard Poland-China Record Association will be held at the Court House in the city of Maryville, in Nodaway county, Missouri, on Wednesday, August 23d, 1911, at 9 o'clock a. m., for the purpose of voting on the proposition then and there to be submitted to increase the capital stock of said association from ten thousand dollars, its present authorized capital, to thirty thousand dollars, said increased capital to be divided into 2,000 shares of the par value of ten dollars each. The notice is signed by W. O. Garrett, J. R. Roberts, S. McKelvie, J. O. James and C. E. Tennent, Directors. Mr. Geo. F. Woodworth is Secretary of the association, with headquarters at Maryville, Mo. The new stock is required to strengthen the association by adding new members.

Are You Nervous?

Nervousness is often merely a sign of physical weakness, an indication that the body is out of Tone. Bodi-Tone, which is offered on trial to every reader, has proven of immense value in nervous exhaustion, tired nerves, jangling nerves and shattered nerves, because its action in toning the body is just what is needed in the big majority of these cases. See trial offer on last page.

Sales of Fine Cattle.

During the last week in June, at the St. Louis National Stock Yards, a full load of native-beef steers, 1,550 pounds average, fed by R. G. Howard, of Moniteau county, sold at $6.50 per 100 pounds; and on the same day a load of yearlings from Chariton county, 924 pounds average, sold at $6.40 per 100 pounds. They were fed by J. F. Thomas.

Blooded Stock Notes.

Messrs. C. J. Smith & Sons, of Greenville, Ill., breeders of pure-bred Shropshire sheep, are offering fine buck lambs for sale. They have a splendid flock, and their lambs give perfect satisfaction.

Alvey Bros., of Meriden, Kansas, are again advertising O. I. C. pigs. The prices are quite reasonable, considering they have always had a prize-winning herd. See page 20.

Mr. L. P. Sisson, Secretary of the American Devon Cattle Club, announces the removal of his office from Newark, Ohio, to Harvey, Ill. The Devon Cattle Club is in a prosperous condition, although the breed is not creating much of a disturbance.

Bellows Bros., of Maryville, Mo., sold forty-eight head of Shorthorn cattle at auction on June 13th, and the average of forty-eight head was $237.50. The fifteen bulls averaged $242.65, and thirty-three females $235.15. The top price for a bull was $525, and for a cow $610.

LIVE STOCK BREEDERS' CARDS.

SPLENDID POLAND-CHINA SWINE.

Come and see our great herd for yourself. We can show you Sows with litters that will wake you up to your interest. Come and see us or write.
KIRBY STOCK FARM, Marmaduke, Ark.

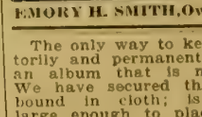
A very fine imported Hackney Stallion; best of formation and disposition; seven years old; has very fine colts; color black without a blemish. Have sold ranch and am out of business.



EMORY H. SMITH, Owner, Fort Worth, Texas.

The only way to keep Post Cards satisfactorily and permanently is to place them in an album that is made for the purpose. We have secured the album. It is nicely bound in cloth; is 8x9½ inches. It is large enough to place two Post Cards on every page. There are openings for 100 Post Cards.

Intensive Methods in Poultry Raising.

There is no branch of farming in which intensive methods can be more advantageously applied than in poultry culture. Yet in the United States we find extensive methods more often used than intensive methods. That is, the common practice is to keep a small flock of fowls and allow them to roam at will over the farm or over the neighborhood. This is extensive culture, as a very large area is devoted to a small number of fowls.

As the population of the country increases in density, it is natural that poultry raising on many farms should take on more of the intensive character. More fowls than ever before are being raised per acre, and this intensity must increase.

Recently a friend of the writer visited friends in a distant state and accidentally ran across a man raising chickens on a four-acre farm. He was himself not a farmer, but was engaged in some mercantile pursuit. He hired a man at $40 per month to do much of the manual labor.

He is clearing about $3,000 per year from that little four-acre farm, and has his own salary to live on besides. He does it by raising poultry on the most intensive plan.

In the first place, he does not content himself with scrub fowls. He has been breeding for many years to get a high quality of egg-laying strain. He has made his reputation on his success in doing this. He has many fowls that exceed the 200-a-year limit, and one that has run as high as 244 eggs in a year.

He sells eggs from these fowls only, and everyone is anxious to get his eggs for setting purposes. He sells his eggs for incubator use and gets over $20 per hundred for them. So, though he has only 1,250 laying hens, he makes a fine income from them.

The poultry manure from such a flock has a considerable value per year, but this is not figured in the general estimates. On most farms, however, it would mean the continual enrichment of the farm. Poultry receive food very high in fertilizing value, as much grain is fed to fowls. The resulting increase of crops would on the ordinary farm amount to a good many hundreds of dollars per year, and this is one of the advantages in intensive poultry production.

There are specialists in every line, but the man referred to above is not even a poultry specialist, for he is engaged primarily in another business. His example, however, is a good one to follow on many a farm, especially on many a small farm. The farm that is run down is well adapted to the production of poultry, for it, more than any other, needs the manure that comes from the well-managed poultry farm.

On the farms that do not carry many fowls, intensive methods will often pay best, for the reason that it would make it possible to double the size of the flock without increasing the space to be devoted to it. The man spoken of above had all his fowls penned up, but in a large number of small houses and small yards. He managed to keep over 300 on each acre. Almost any of our farms could lose an acre of land from the general farm operations without the owner feeling it, and that acre would probably be the most profitable on the farm.

Poultry Notes.

An egg-laying contest instituted by John C. Lee, a poultry rancher at Hillyard, Washington, is to be started in November and continue twelve months. It is planned to have at least two entries of six chickens from each state and territory of the United States and each province of Canada. Important questions as to poultry culture for egg production are to be determined.

The Standard Watch Case.

In buying a watch, be sure to obtain the Keystone Watch Case. In order to understand this subject, see page 23. It is easy to obtain the benefit of the guarantee, for the reason that it is engraved inside every case. If you will take the trouble to examine the case you will then know exactly what you are buying, just the same as you know a gold coin issued by the United States Mine. The subject is worth investigating by all who buy watches.

The Summer Outing.

At this season, when her city friends are all taking their vacation, the farmer's wife, who must toil almost constantly, is apt, if ever, to bewail her lot. This is especially true if in addition to her regular work of the busy season is added that of opening her doors to uninvited guests. While her hospitality is unbounded, she must learn that she has rights which the exacting town people are bound to respect.

If they are willing to put up with the regular fare and help in the light duties of the house enough to make amends for the extra work, all goes well. But if they expect to have the hostess turn her time and manner of serving her meals upside down to suit their customs, it is certainly no breach of courtesy for her to inform them when her meals are served and to expect them to conform to her schedule, as she would expect to do if in their homes.

But while a change of scene is always preferable, the woman who must stay at home should still not be deprived of her vacation. If the family are a unit in the matter, some very delightful times may be had without the sacrifice of much in either time or money. There are popular resorts near many homes; that is, within easy driving distance; and there are secluded retreats quite as acceptable oftentimes. Get near the water, if possible. It has a cooling, reviving influence upon the human plant. You may not care to fish or to swim or to row, but the fresh air alwayss about the water will surely prove bracing.

The people who get the most good out of these outings of a day are not those who spend the day before in preparation of an elegant spread and then possibly the day following it in recovering from the feast. The simple picnic dinner of sandwiches, fruit and coffee or lemonade, with cheese, pickles or any relishes at hand, will give much better results. Salads of so many kinds can be easily prepared, and are quite in keeping with the outing plan.

There is more in the spirit than in the place. One party can have an ideal picnic under the maple bordering the small stream, with only the birds, flowers and fishes as companions, while another will find the most popular resort exceedingly dull. There are times when we enjoy the crowd, yet for pure rest the congenial gathering of a few in some favored spot is best.

If you cannot drive a few miles into a neighborhood, you can at least have the little picnic under the trees in your own corn field or orchard. It is a pleasure to get away from the work for a little while, even if you are not entirely out of hearing of it, and there is this advantage in the home rest—if a sudden shower comes up you are not at the mercy of the elements, neither have you a nice little sum tied up in canvas.

No two families will find the methods of the other exactly adapted to their own life. But the resourceful woman is sure to find some means of getting an outing. If there are berries to be picked, make it a jollification instead of a bit of drudgery. Make up your mind to take time for some of the fun, even if you do not get quite so many berries. The little folks especially like the variety, and if two or more congenial families can once or twice during the season unite the plan will prove doubly pleasant; or a new book or magazine may serve for entertainment. Even the family sewing is lighter work when done under the trees. But resolve to let some of the outings be pure rest periods, even if the clothes must in part be worn without ironing. Creases in the face are worse than those in clothing. And if there is a will, there is sure to be some way for a little outing, even though there is not a penny which can be appropriated toward it.—Bessie L. Putnam.

$1 Worth of Mayr's Wonderful Stomach Treatment FREE

It is a positive remedy for all Stomach, Liver and Intestinal Trouble, Gastritis, Indigestion, Dyspepsia, Pressure of Gas around the Heart, Sour Stomach, Distress After Eating, Nervousness, Dizziness, Fainting Spells, Constipation, Congested and Torpid Liver, Yellow Jaundice, Sick Headache and Gall Stones.

The above ailments are mainly caused by the clogging of the intestinal tract with **mucoid and catarrhal accretions**, backing up poisonous fluids into the stomach, and otherwise deranging the digestive system. I want every sufferer of any of these diseases to test this wonderful treatment. **You are not asked to take this treatment for a week or two** before you will feel its great benefits—**only one dose is usually required.** I say emphatically it is a positive, permanent remedy and I will prove it to you if you will allow me to. I will send the complete $1.00 treatment to sufferers absolutely **Free** so you can try it in your own home at my expense.

The most eminent specialists declare that 75 per cent of the people who suffer from Stomach Trouble are suffering from **Gall Stones.** I firmly believe that this remedy is the only one in the world that will cure this disease. Sufferers of Stomach and Liver troubles and **Gall Stones** should not hesitate a moment, but send for this **Free** treatment at once. I would be pleased to send you the names of people who state they have been cured of various Stomach ailments and speaking the highest praise of this medicine. Just fill out the Coupon below—let me send you this wonderful treatment together with highly interesting literature, testimonials, etc. Don't suffer with agonizing pains—don't permit a dangerous surgical operation, which gives only temporary relief, when this medicine will permanently help you.

Making Whitewash.

Slake in boiling water one-half bushel of lime. Strain so as to remove all sediment. Add two pounds of sulphate of zinc, one pound common salt and one-half pound whiting, thoroughly dissolved. Mix to proper consistency with skim milk and apply hot. If white is not desired, add enough coloring matter to produce the desired shade. This makes a cheap, attractive wash.

Whitewash For All Indoor Purposes.

To one-half bushel unslaked lime add sufficient boiling water to slake it and cover it to keep in the steam. Mix together one peck of salt, previously dissolved in warm water, two pounds of glue dissolved in three quarts of water, six ounces of bichromate of potash and one-half pound of whiting. Add these to the lime, stir well, strain and apply hot, either with a brush or a spray pump. Add water to thin the mixture so as not to clog the nozzle. A bushel of lime makes thirty gallons of whitewash. Light coats frequently applied are better than heavy ones. While still wet, a light coat may seem to have failed in its object, but when dry it becomes beautifully white.

Disinfectants For Stalls, Gutters, Etc.

No. 1.—Four pounds powdered bluestone (sulphate of copper), four pounds of fresh lime, forty gallons of water. Use as a spray.

No. 2.—Whitewash walls, ceilings, etc., with an ordinary lime wash to which has been added a quarter of a pound of chloride of lime to the gallon.

No Benefit, No Pay.

You ought to try a 25-day trial treatment of Bodi-Tone on its no benefit, no pay plan. This plan is fully explained in the large Bodi-Tone advertisement on the last page in this issue. If you have not yet tried Bodi-Tone you can get a dollar box on trial, without a penny in advance, simply by writing for it. Read the offer.

On Monday, July 3d, at Chicago, forty-eight head of 1,559-pound native beef steers sold at $6.90 per 100 pounds.

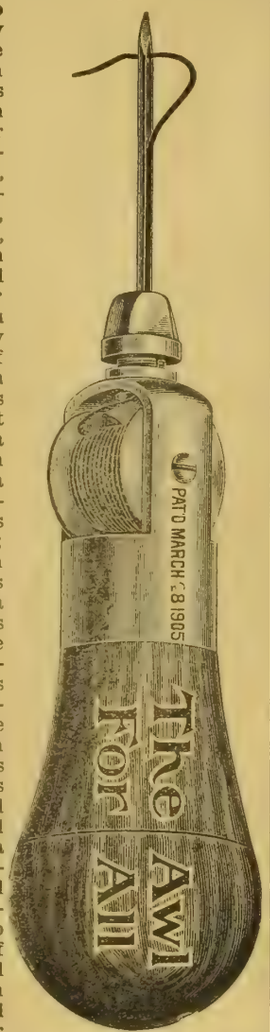
A CHEAP SHEEP DIP AND FRUIT TREE SPRAY

An increasingly large number of stock raisers and fruit growers throughout the country are learning that a most effective and very cheap germicide solution can easily and quickly be prepared by mixing a can of Merry War Lye with fifteen gallons of water. This solution is equally effective when used as a sheep dip and for treating sheep foot disease or for spraying fruit trees, shrubs and vegetables. In the former case, it quickly and thoroughly kills all lice and ticks on the sheep, cleans the wool, makes shearing easy and produces a soft, silky fleece. As a fruit tree spray it instantly destroys all pernicious insect life without the slightest injury to the leaves and buds. When applied to the trunks of fruit trees with a whitewash brush it destroys borers and other worms and insects, cleans the bark of scales and makes the trunk smooth. Fruit growers also say that the solution is very beneficial to the soil and does much to stimulate the growth of plants and trees.

THE SEWING AWL.

A Most Useful Premium For Subscribers to The National Farmer and Stock Grower.

A farm on which there is not a sewing awl is in difficulties when work is most pressing. It is surprising how useful this little implement is. It is the Myers Famous Lock Stitch Sewing Awl. It is the only sewing awl made with a groove running the full length of the needle and has what is known as a diamond point. In order to sew leather or any heavy, thick material without breaking or cutting the thread it requires a needle with the groove running the full length of the needle. You might just as well have no groove in the needle as to have it only part of the way. With the Myers Awl you can sew old or new harness, saddles, carpets, canvas, tents, rugs, quilts, shoes, grain bags, and many other things. You can use any kind of thread in the Myers Awl, and it makes a lock stitch same as a sewing machine. It is very simple; a woman can use it as well as a man. It is one of the most practical devices ever invented. They are put up with two needles—one is straight and one curved—with a small screw-driver and wrench combined; also a reel of waxed thread with each awl ready for use. Every teamster and farmer should own a Myers Lock Stitch Sewing Awl, as there is use for one in almost every household. The Myers Awl is nicely finished, the metal parts are nickel-plated, the needles and wrench are kept in the hollow handle, which has a screw top.



Anyone who will send One Dollar cash to pay in advance for two-years' subscription to The National Farmer and Stock Grower can select one of Myers' Lock Stitch Sewing Awls, which we will send by mail, postage paid, as a free premium. Address, HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.

Amateur Millinery.

If a girl wishes to save money on her clothes and at the same time be well dressed there is no better or more interesting way in which she can do it than to make her own hats, the most expensive and at the same time the most perishable feature of a woman's wardrobe. Professional milliners may turn aside from this article, for it is written by an amateur pure and simple, but who has had such pleasing results from her attempts that she wishes to pass on her little knowledge.

For the girl inexperienced in this line, it seems the best plan to buy a wire shape in preference to making the shape. It is hard to tell whether or not an uncovered shape is becoming, but this difficulty can be overcome if the saleslady is at all obliging by telling her that you would like to try on a similar shape that has been trimmed, because you wish to make your own hat. Having selected the shape (and start with rather a simple one), buy your braid. To begin on, take a rather soft braid of medium width. The salesgirl will tell you about the amount required for the shape selected.

Before putting on the braid, cover the wire frame with crinoline or any thin material This is not essential, however, as a good-looking hat can be made by placing the braid right upon the wire; but it is easier to put the braid on if the frame is first covered. Have a pan of water on hand when putting on the braid. As you work, dampen the braid by dipping the fingers in the water and running them along the braid. Keep it dampened for about a yard ahead of your work. This makes the braid pliable, so that it is much easier to work with and it sets better to the wire shape when the hat is finished. Begin at the bottom of the frame and work toward the top. This makes it possible to always gather the slight fullness of the braid under the next row above and so gives a smooth finish, besides giving such a construction to the frame that there are no grooves in which dust and water can settle. Having covered the wire frame, next apply the trimming. The mistake that most amateur trimmers make is, that they insist upon giving a stiff appearance to their trimming. If you have bows of ribbon (and that is the ideal trimming for a girl who does much riding about the country) have them in great, soft loops that look as though they had made themselves. Use plenty of ribbon in the bows. If flowers are used, don't mass them in one stiff little bunch to the left front, but scatter them about in some natural way. Last of all, put in the lining, for which there is nothing better than a soft silk of black or white. This can be easily removed and washed frequently. This is something to be considered, as there is every reason why the hat lining should be frequently washed. If a bandeau is used to make the hat sit higher on the head, this is put in after the lining.—Janet Thomas Van Osdel.

Lawyers on Top.

Senator William Pierson Fiero, of Catskill, N. Y., was seated with others about the enormous fireplace in Keeler's Hotel, Albany, N. Y., on a cold night, when he told this story:

"I remember, thirty years go, when I was a lawyer, there were about fifteen or eighteen of us—all lawyers—seated about a fireplace much like this. It was a raw, wet night. A bedraggled stranger, wet to the hide, came in, tried to get accommodations and was told there was not a room left. The nearest other place was a mile away. Shivering, the stranger looked at the fire, but we formed such a solid line about it that he could not get near it. Finally one of the lawyers, in a spirit of frivolity, turned to him and said:

"'My friend, are you a traveler?'

"'I am, sir. I have been all over the world.'

"'You don't say so! Been in Germany, Egypt, Japan and all the countries in Africa and Asia?'

"'All of them—been everywhere.'

"'Ever been in hell.'

"'Oh, yes; been there twice.'

"'How do you find things there?'

"'Oh, much the same as here—lawyers all next to the fire!'"—New York Herald.

Cooling as an Icicle
If you want to think of crisp winter weather and sparkling frost; if you want to forget the heat and the dust and the thirst, for real, cool comfort, drink
Coca-Cola
As sparkling, wholesome and refreshing as a spring house icicle. So next time you're hot or tired or thirsty, if you're anywhere near a place that sells Coca-Cola, go in and give yourself a real treat.

Arkansas Farm Statistics.

The state of Arkansas has 214,275 farms averaging 81 acres per farm, against 178,694 farms averaging 93 acres ten years ago. The increase is 20 per cent.

The total value of farm land and buildings was given in 1910 as $308,129,000, as against $135,182,000 in 1900, an increase of $172,947,000, or 128 per cent.

The total value of all farm land alone was reported in 1910 as $245,137,000, as compared with $105,107,000 in 1900, a gain of $140,030,000, or 133 per cent.

The total value of all farm buildings alone was given in 1910 as $62,992,000, as against $30,075,000 in 1900, an increase of $32,917,000, or 109 per cent.

The farms are enumerated as follows: 36,079 that are 19 acres or less; 74,863 farms ranging from 20 to 49 acres; 45,333 farms 50 to 99 acre; 39,319 farms 100 to 174 acres; 17,131 farms 175 to 499 acres; 1,157 farms 500 to 999 acres; and 393 farms that are 1,000 acres and over.

Where Our Wool is Raised.

The principal domestic sources of the 321,000,000 pounds of wool produced in the United States in 1910 were: Wyoming, 36,000,000 pounds; Montana, 33,666,666 pounds; New Mexico, 19,200,000 pounds; Idaho, 19,000,000 pounds; Ohio, 17,000,000 pounds; Oregon, 14,500,000 pounds; Utah, 14,000,000 pounds; California, 13,333,333 pounds; and Michigan, 11,500,000 pounds; though practically all the remaining states are represented with totals ranging downward from 9,000,000 pounds produced in Colorado to less than 40,000 pounds produced in Delaware and Rhode Island, respectively.

The Important Thing.

We can understand the ease with which a fool and his money are parted, but what puzzles us is how the fool got the money to part with. —Cleveland Plain Dealer.

Hammond's Handy Atlas of the World.

This great Atlas contains 107 pages, 6x8 inches, is printed in colors and is bound in a durable red-cloth cover. It contains seventy full-page maps of every state and territory, with new railroads and towns. Every country in the world is shown by maps of the latest plates. We use this Atlas as a subscription premium. For fifty (50) cents paid in advance we will send one copy of **Hammond's Handy Atlas** post free by mail and credit one-year's subscription to The National Farmer and Stock Grower. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Sulphur in Soils is Being Depleted.

The sulphur of our soils is being rapidly depleted, according to the investigations of Prof. E. B. Hart and W. H. Peterson, of the Agricultural Experiment Station of the University of Wisconsin, as recently published in research bulletin No. 14 on "Sulphur Requirements of Farm Crops."

Sulphur has been considered relatively unimportant, as compared with phosphorus and nitrogen content of our soils. Tests made by Prof. Hart and Mr. Peterson, however, show that low results were due to the analytical methods employed by the early investigators, and according to more accurate determinations the sulphur content of our soils is of great importance.

Continuous cropping in connection with insufficient fertilization annually results in a heavy loss of sulphur. Combined with the losses of sulphur through drainage and the low original sulphur content of the soils it appears that this loss cannot be compensated by the sulphur obtained from the atmosphere. The surface eight inches of the normal soil contains only enough sulphur trioxide for about 100 normal crops of barley. The fact that the subsoil also has a low sulphur content shows that the upward movement of capillary water cannot bring much sulphur to the upper level. In a word, it is necessary to apply fertilizers containing sulphur to maintain the crop yields of such soils.

Superior crop results often attend the use of acid phosphate; the present investigations indicate that some of these improvements are due to the additional sulphate supplied in this form of fertilizer. The use of gypsum with its important content of sulphur has often added fertility and increased crop yields of soils which otherwise would have been materially reduced in their productive capacity. Sulphates in fertilizers have been used for many years, and the present tests establish the great benefits resulting from their use, and should impress their importance upon the farmer.

Under systems of live stock farming, when the crops and purchased feeds are fed and the manure is saved, the sulphur will find its way back to the land; but whether, even then, the losses by drainage and in the practical handling of manure must not be met by additional applications of sulphates, are questions yet to be solved. In systems of grain farming it appears that some form of sulphate should be used systematically in the fertilizer treatment of the soil, for the purpose of maintaining therein a permanent supply of sulphur.

The conclusions derived from these recent experiments show that the sulphur content of a number of our common farm products as determined has been much too low, and that much more sulphur trioxide is removed by crops from the soil than was previously supposed. In fact, soils cropped continuously for half a century with infrequent applications of manure have lost as high as 40 per cent. of their original sulphur content.

On the other hand, where farm manure has been regularly applied the sulphur content has been maintained and even increased. In brief, the gist of this investigation emphasizes the fact that for permanent and increased production of farm crops such systems of fertilization must be practiced as will not only supply to the soil nitrogen, phosphorus and potash, but also will add a sufficient quantity of sulphur to meet the losses sustained by cropping and drainage. Excellent fertilizers for such purposes include farm manures, trade fertilizers, such as ammonium sulphate, super-phosphate and sulphide of potassium, and gypsum or calcium sulphate.

Apple Notes.

Where are the men that twenty years ago were warning the people against setting out so many winter apple trees? The overproduction prophesied has not materialized.

The demand of the world for the winter apple has grown faster than the supply and bids fair to continue to grow. Every nation in the world wants the winter apple.

Nations that formerly could not hope to eat apples now have them, because the refrigerating service on steamers has developed so that apples can be carried to the tropics and through the tropics without spoiling.

The tropics cannot grow apples any more than the temperate zones can grow bananas. The tropical world calls for the apple and is willing to pay for it.

Oranges sell on Chicago stands at from ten cents to sixty cents a dozen. Apples sell on the same stands now at from thirty to sixty cents a dozen. A medium-sized apple costs five cents. A five-cent orange is much larger than a five-cent apple, which goes to prove that apples are the most costly fruit now on our markets, even in a country that is the greatest apple-growing country in the world.

The winter apple is the easiest fruit to keep of all. It can be held in cold storage for months, and even in cellars can be kept till midwinter. This makes it possible to unload the crop gradually instead of forcing it onto the market in a mass, to the detriment of the prices.

Plant more good varieties of winter apples. Every farmer that has a rocky acre can afford to put it into winter apples, if he lives in the cool part of the country. Apples will thrive on some land that is hard to use for anything else. White boulder clay is one of the best soils for it, and it often does beautifully on land that is so rocky that it is difficult to cultivate.

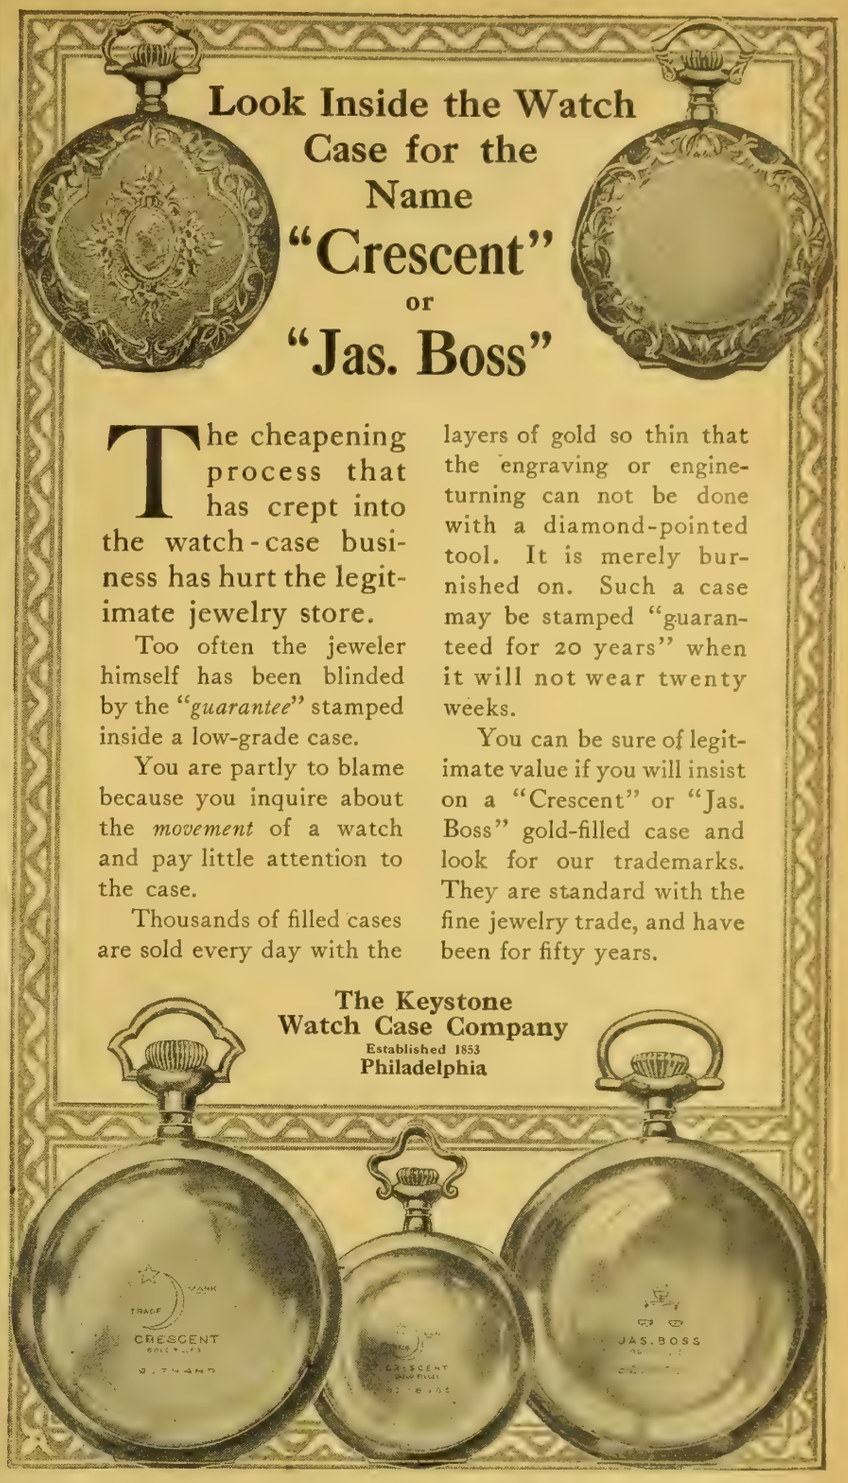
Then, too, the apple tree is at home on the hill top and the hillside, where cultivation is made difficult by the slope of the land. Its roots keep the soil from sliding, and if the soil is rich the tree does not object to a thin sod under it, which will further prevent erosion.

Remember that apple trees need fertility, and the hilltops and hillsides are often deficient in fertility, as they have been washed by the rains of centuries. See that all the elements of fertility are gotten into the soil. A dollar's worth of fertility will mean many dollars' worth of apples when the harvests begin.

Utilize the hiltops that are now bare of anything. There are also hilltops bearing useless scrub growths. Cut it away and put in the apple tree. Remember that the nations are looking to such countries as the United States and Canada for more apples than have ever been grown here.

Especially in the Northern States, in which the rainfall is good, there is no reason why more apples should not be grown. But avoid the short-keeping varieties, known as summer and fall apples, unless there is a ready near-by market, for a glut of these apples means certain loss.

Under right conditions of marketing, a sure sale awaits all winter apples when grown in sufficient quantities to be economically shipped.



Look Inside the Watch Case for the Name
"Crescent"
or
"Jas. Boss"
The cheapening process that has crept into the watch-case business has hurt the legitimate jewelry store.
Too often the jeweler himself has been blinded by the "guarantee" stamped inside a low-grade case.
You are partly to blame because you inquire about the movement of a watch and pay little attention to the case.
Thousands of filled cases are sold every day with the layers of gold so thin that the engraving or engine-turning can not be done with a diamond-pointed tool. It is merely burnished on. Such a case may be stamped "guaranteed for 20 years" when it will not wear twenty weeks.
You can be sure of legitimate value if you will insist on a "Crescent" or "Jas. Boss" gold-filled case and look for our trademarks. They are standard with the fine jewelry trade, and have been for fifty years.
The Keystone Watch Case Company
Established 1853
Philadelphia
CRESCENT
JAS. BOSS

All Seeds in Season.

The A. W. Schisler Grain Company, 708 and 710 North Fourth street, St. Louis, Mo., will send a catalogue of vegetable, flower, field and garden seeds to any of our readers who will write for it. It is called the Golden Arrow Seed Catalogue. This firm will furnish estimates promptly for all field seeds in any quantity.

Consolation.

With a sigh she laid down the magazine article upon Daniel O'Connell. "The day of great men," she said, "is gone forever."

"But the day of beautiful women is not," he responded.

She smiled and blushed. "I was only joking," she explained hurriedly. —Western Christian Advocate.

Beauty That All Can Have.

Once upon a time, not so very many years ago, there was a girl who had a very big heart and a very little pocketbook. It was the season of giving, and the girl wanted to give something to everybody, not merely her friends and acquaintances, but everyone she came in contact with in any way. She was walking down a crowded street one day, and as she walked she watched the faces of those she passed and she was much impressed with the number of gloomy, discontented faces she saw. Then she cried: "I know that I can give to everyone. It is a smiling face. That will be my gift to the world. So long as I am in it all of my fellow-creatures will be cheered by looking at my face."

Now, this girl was not beautiful, nor even pretty, before she made that resolve; but as she went about trying to cheer others with her own cheerful face there came a real beauty into her face that made her friends say: "How Mary has bloomed out! She used to be almost a homely girl, and now there is an attraction about her that no one can resist!" And to the people who knew her best she became known as Mary Sunshine.

Some years ago I was walking with a woman much older than myself in experience. A boy ten or twelve years old passed us, and as he passed he threw a smile that lighted up his homely features as a sudden burst of sunshine gladdens a dark day. The woman stopped and gazed after the boy as she said: "What a beautiful face!" Out of my inexperience with the real things of life I cried: "Why, he's a very homely boy. I do not see how you can call his face beautiful." And the woman replied: "A radiating smile like that would make the ugliest features in the world beautiful. It comes from a heart of good will toward all."

Through the years that smiling child's face has been with us. No merely pretty face could have made so lasting an impression as did the face with the beautiful smile.

Perhaps not so poetical but most eminently practical is another kind of beauty that could and should belong to everyone. It is the beauty of cleanliness—the cleanliness that comes from a pure life, a body kept clean, inside and out, clean teeth, clean hair, clean clothes. The features may be poorly proportioned, the clothes may be old-fashioned, but let the person be thoroughly clean and the attraction will be there. A twenty-five-cent sailor hat set upon a head crowned with hair fluffy from cleanliness is a far more attractive sight than a picture hat covered with willow plumes placed upon a head covered with "rats" and puffs, all perhaps in need of a shampoo. Let the girl who wears the cheap little sailor not look upon the owner of the expensive hat with envy, for there is a beauty about her own clean, naturally-arranged hair and simple headgear that the wearer of the willow plumes knows nothing of.

Far too many of our girls place the stress of good appearance upon costly clothes. They must have their heavily-plumed and beflowered hats, their embroidered and lace-trimmed waists, their beribboned underwear, their silk hose and velvet pumps. And these things take up so much of their time that they are many times forced to neglect the essentials of beauty, and the daily bath is unknown. A delicate subject? Perhaps. But notice a crowd of young girls and women at any general assembly where a mixed crowd gathers. Isn't there an apparently painful attempt to attract attention by means of clothes? And in many cases are not the most showily-dressed the ones most careless about the essentials?

While on this subject of cleanliness, may we make a statement of a fact of which most of the negligent are ignorant? The body of a human being each twenty-four hours throws off waste matter to the extent of two pints in the ferm of invisible perspiration. This does not mean the perspiration that dampens the clothes and runs down the face. When the body perspires to that extent the amount of waste matter is much greater than a quart. In cold or warm weather there is about the same quantity of invisible perspiration. Do not such facts make the daily bath seem a necessity?—Janet Thomas Van Osdel.

The Gypsy and Brown-tail Moths.

A new cry of warning has been sounded to the farmers and fruit growers throughout the United States, the importance of heeding which everyone who has lived in New England will thoroughly appreciate. In a recent importation of nursery stock from France it was found, after the mischief was done, that it was infested with the gypsy and brown-tail moth. That the dissemination of this pest is large is all that is definitely known. It may come to light in your own locality at any time.

Massachusetts has spent many thousands of dollars in fighting these pests within the last few years, and there seems to be a chance to spend many more before they are rid of them. The greatest hope of success centers in the importation of parasitic and other enemies which are known to keep them within bounds in the old world. Attempts thus far have been only in a measure successful, and while it is believed that the problem will ultimately be solved along this line, scientists decline to make any estimate as to how soon this end will be accomplished. The main thing now is to profit by the experience of Massachusetts, the victim of a single egg nest wafted from the open window of a Harvard professor, who was experimenting, and be on the watch for the enemy and ready to snuff out before it has had time to establish itself in our own locality.

The gypsy moth winters in the egg state, and the caterpillar hatches early in May, feeding upon almost any tree or shrub, evergreen or deciduous, but having a special liking for fruit trees, the oak, willow and elm. It is about three inches long when full grown, dark brown, the back being marked with yellow. Along the back are five pairs of blue spots followed by six pairs of red ones. These spots vary in intensity of color, growing darker with age.

In a couple of months this all-devouring caterpillar is transformed into a cocoon, and the moth emerges in July or August. The male is brownish yellow, about an inch and a half wide between wing tips, and a good flier. Its mate is nearly white, sometimes spotted with black and so clumsy that it cannot fly at all—about the only good thing which can be said of it save that it only rears one brood in a year. Its offspring consist of 500 eggs, encased in a mass of hair from the body. This is oval in shape, an inch and a half long and half as wide. It may be found on tree trunks, on the sides of buildings or in many waste places. As the larvae feed mostly by night and hide through the day, the practice of binding burlap bands around tree trunks is partially successful in trapping them beneath the fold. But the most effective method is hunting out the cocoon in autumn and winter.

The brown-tail, though a more recent comer, seems equally persistent and destructive. It, too, has a special liking for the fruit trees, but when these have been devastated it attacks those of the forest with equal avidity. The moth is pure white, save that the female has a conspicuous tuft of brown hair at the tip of the abdomen, hence the name.

In July the eggs are laid in masses on the under side of the leaves. They are brown and also covered with hair, but the masses are much smaller than those of the gypsy moth. They hatch in August, and the larvae are about one-quarter grown by the end of the season, when they gather into the web tent which has sheltered them nightly thus far, close up the holes of exit and pass the winter. It will be readily seen that a most efficient campaign is carried on in discovering these webs and destroying them. But, as said before, it is much easier to fight them out before they have taken the fortress.—Bessie L. Putnam.

The farmers of the United States are very well satisfied with farm implements made in the United States.

SisterWoman!

READ MY FREE OFFER

My Mission is to make sick women well, and I want to send you, your daughter, your sister, your mother, or any ailing friend, a full 50-cent box of Balm of Figs Compound absolutely free. It is a remedy for the treatment of woman's ailments, and I want to tell you all about it—just how to use it yourself—right at home without any inconvenience—and the best of it is that it will not in the least interfere with your work or pleasure. Balm of Figs Compound is a remedy that has made sick women well and weak women strong, and I can prove it—let me prove it to you, and I will gladly do it, for I have never heard of anything that has, according to the abundance of testimonials at hand, so quickly and surely cured women's ailments. No internal dosing necessary—it is a local treatment, yet it has to its credit some of the most extraordinary cures on record. Therefore I want to place it in the hands of every woman suffering with any form of female weakness or diseases so common to women.

This 50c box of Balm of Figs Compound will not cost you one cent

I will send it to you absolutely free, to prove to you its splendid qualities, and then if you wish to continue further, it will cost you only a few cents a week. I do not believe there is another remedy equal to Balm of Figs Compound, and I am willing to prove my faith by sending out these 50-cent boxes free. So, dear reader, irrespective of your past experience, write to me at once — today — and I will send you the treatment entirely free by return mail, and if you so desire, I can readily refer you to many, who can personally testify to the great and lasting cures that have resulted from the use of this remedy. But after all, the very best test of anything is a personal trial of it, and I know a 50-cent box of Balm of Figs Comcound will convince you of its merits. Nothing is so convincing as the actual test of the article itself. Will you give Balm of Figs Compound this test? Write to me today, and remember I will gladly send you a 50-cent box of this remedy absolutely free. Address,

Sailor-style Collar.

No. 587.—Design for embroidering a fancy collar in sailor style. The price of the pattern is 10 cents.

Please send all orders for these embroidery patterns to the **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Ask Your Neighbor.

Many of your neighbors have used Bodi-Tone on its 25-day-trial-plan, for thousands in every state of the Union have tested it in this way. Ask them what they know about it; ask them how it cures. Read the trial offer on the last page of this issue.

Good Summer Cosmetics.

If buttermilk can be obtained, there is no cosmetic equal to it, as it whitens the skin and helps to keep the freckles away. Bathe with it both before and after exposure to the sun, letting it dry on the skin, and wash the face and hands with it before retiring. Let it remain on all night and tan will soon disappear.

Tansy leaves soaked over night in buttermilk will remove freckles; also the juice of green grapes and all such lotions should be applied with a piece of soft linen and allowed to dry on.

There is nothing better for sunburn or blistering than thick, sweet cream. This should be applied at night and washed off in the morning with good, pure soap and then rinsed and dried with soft, old linen.

An excellent lotion to use for tan or sunburn is made with two ounces of good cologne, one ounce of spirits of camphor and half an ounce of tincture of benzoin. Mix well and use a little in the water when bathing the face and neck.

A cucumber wash for the face to keep the skin soft and white is made by extracting the juice of cucumbers by slicing them, peel, and all into enough cold, soft water to cover them, and allowing them to simmer slowly until they are perfectly soft, then strain through thin muslin, and to every pint of the juice add four ounces of alcohol.

Another lotion that is said to be fine for the complexion is made by grating horseradish in sweet milk and allowing it to stand for twenty-four hours before using; and spirits of camphor poured on sliced, fresh horseradish will remove pimples from the face.

To prevent tan and sunburn, rub your face, neck and hands with a simple cream, wipe off the surplus cream and powder gently with borated talcum powder, and Mennen's Talcum Powder is the safest and best to use, as this powder is entirely free from any irritating properties, and this simple powder is much better for the skin than any of the regular face powders, as many of them contain chemicals which are poisonous to the skin. Prepare the face with the cream and powder before going out in the sun or wind, then wear a thin veil, and never wear white or black, but green, red and reddish browns are good colors, as they lessen the effect of strong light on the skin.—Martha.

$1.00 a month
Buys this Machine

30 days free trial

We will sell you a high-grade, drop-head, Sew Easy Sewing Machine for $1.00 a month. We guarantee each machine for 25 years. We ship direct from the factory. We do not sell to stores and we have no agents. We can save you some money. You get the machine at once and use it while you are paying for it and it only costs you about 3 cents a day. We have many special features in our machine such as short needles which don't break easily. Our shuttles hold half again as much thread as the old spring tension shuttle. We can't tell all the good points in this advertisement, and we couldn't afford to send you a machine on the small dollar a month plan unless we gave big value and low prices. We want you to write us today, saying: "Please send me circulars and full particulars about your 'dollar a month' Sewing Machine offer." Write Today. Address

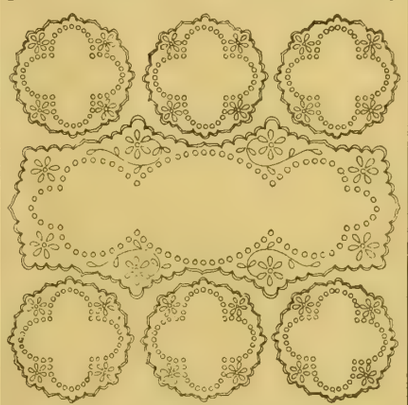
UNIVERSAL EMBROIDERY SET.

A Subscription Premium in Connection With the Universal Magazine.

The most beautiful of all trays and doilies are those which display a great deal of eyelet work; there is nothing more attractive on the dining room table than white linens embroidered in open work through which the polished wood may show.

The pretty Universal Embroidery Set illustrated below shows a dainty pattern that should be carried wholly



in eyelets, both ovals and rounds. This set was made especially for us and consists of one large tray, size 8x17 inches; six doilies to match, size 5½x5½ inches, all stamped on fine white imported linen.

Send us Thirty Cents and we will send you this dainty set for a short time only, absolutely safe delivery guaranteed, and the Universal Magazine for one year. The Universal Magazine is a nice, thirty-two-page, three-column magazine, issued monthly. It contains illustrated reading matter of interest to all the family. There are nice stories, historical sketches, selected poetry, a splendid line of patterns and has a number of original household articles. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

New Apples on the Market.

On the opening day of July, at St. Louis, the market for new apples was depressed and weak, also unfavorably affected by hot weather, which restricts the demand, as well as on account of the poor average quality of current offerings. Small and inferior fruit in baskets, small packages, crates and other irregular packages, especially hard to sell, while large, smooth, hand-picked apples in barrels, although comparatively scarce, meet slow sale. Lots in barrels at $1.25 to $3.00 in extremes of quality—topped for smooth large, hand-picked only. Illinois melon baskets, 20 to 35c.; two-third bushel boxes at 25 to 50c.—mainly up to 75 and 80c. for choice hand-picked, and bushel baskets at $1.00. Home-grown sold at 25 to 90c. per bushel loose, as in quality. Sales: Fifty half-bushel baskets at 25c.; seventeen boxes (two-third bushel) transparent at 80c.; thirty three bushel baskets do. at $1.00; fifteen melon baskets Illinois at 35c.; 110 baskets at 22c.

Farm College Graduates.

Sixty-six men have graduated from the Animal Husbandry Department of the Iowa State College during the years 1910 and 1911. They are engaged in the following lines of work: Farming, 52; college instructors, 8; agricultural journalism work, 3; teachers of agriculture in high schools, 2; dairy test work, 1.

Vegetables on the Market.

At St. Louis, opening market of July, new potatoes were selling from farmers' wagons at $1.40 to $1.60 per bushel; home-grown red onions at 65 to 90 cents a bushel; home-grown cabbage at 20 to 40 cents a bushel.

There are 1,100,00 more women than men in England.

Don't Put Paper On Your Pantry Shelves

It's a nuisance and a bother—doesn't look tidy, and quickly tears and soils—dust and grime slip underneath it. It isn't waterproof; every time you wash the wood, you must replace the paper, and you must leave your pots and pans hanging around for half an hour until the wood dries.

Coat Your Shelves With

JAP-A-LAC

Made in 18 colors and Natural (Clear)
Renews everything from cellar to garret

And Make Them Sanitary and Wholesome and Attractive

Drop in at your local store and order a 20c can of White Jap-a-lac. You need no experience to use it. Any woman can apply it. It brushes readily and flows evenly and dries out quickly, leaving a fine, high, permanent gloss like the glaze on a china plate.

It wears for years without replacing. It won't discolor; you can wash it every day without affecting its finish. A damp cloth will remove any dust or stains.

Do the same thing with the top of your kitchen table and tear off that strip of dingy, smelly oilcloth. The oilcloth costs more than Jap-a-lac, and isn't nearly as good. It won't last one fourth as long, and you know, can't be kept really clean from the moment it begins to crack. Remember there is a different kind of Jap-a-lac for every kind of use.

There's a Jap-a-lac with which you can bring back that new look to your floors. It's as elastic as a coat of rubber. Won't crack or whiten, and keeps its glistening beautiful polish after months of scrubbing.

You simply can't keep house without Jap-a-lac

If you want to know of the hundreds of things for which you can use it send for our FREE Book which tells you ten times as much as this advertisement has room to discuss. When you buy Jap-a-lac, be sure that you get it. Jap-a-lac is a trade marked name. There's only one sort, and it's made by The Glidden Varnish Company. There is no substitute. Write today for the FREE Book telling of the many wonderful things you can do in a few minutes' spare time with a little bit of Jap-a-lac. There is at least one Jap-a-lac dealer in every town. Write to-day to

VICTORY FOR COCA-COLA CO.

Favorable Ruling in Its Favor by United States Federal Court.

The result of the hearing was a complete victory for the company. On practically every point on which the company asked a favorable ruling it was right and the points excepted, the government withdrew. Those who have heard the evidence in the case were prepared for the result, since the government failed, as the court concludes, to show that the beverage was injurious, that it had any deleterious effect whatever upon health, or that it had any habit-forming qualities that might ultimately lead to the impairment of either physical or mental powers. The decision puts at rest what has appeared to many to be a causeless complaint and draws attention to the necessity for some sort of restraint on the Pure Food Bureau in its overzeal in attacking established businesses.

The Coca-Cola people, as well as the government, have been put to an enormous expense in testing a question which, it would seem, should never have been entertained. In the present widely divergent opinions of chemical experts upon the effects of certain ingredients of beverage compounds, it would seem to the lay mind not only to be folly, but a rank injustice, to haul men before the courts upon a purely empiric opinion of a single interested individual—Dr. Wiley. All of the investigation might easily have been made in the government laboratories and the opinions of eminent doctors and chemists obtained before bringing suit, in which case it is fair to infer the government would have been saved a large sum of money and the Coca-Cola Company the enormous expense and trouble the useless litigation has occasioned. It would seem that an official chemical bureau ought to know that a certain beverage, food preparation or other commodity coming under government supervision is unquestionably injurious and harmful before invoking a judicial hearing. Men may differ among each other on matters affecting their personal rights and interests, but the government ought to be sure of its ground, especially when business of large importance is put in jeopardy, on a charge about which there should not be any issue.—Chattanooga Times.

Fortunes in Little Things.

The big things of the farm receive most attention. The big things are the grass crop, in meadow and pasture, corn crop, the wheat crop and live stock of various kinds, with of course oats and potatoes making up the long list of things to which many farms are chiefly devoted.

But there are many small crops, like small fruits, truck of various kinds, and poultry and bees, which really frequently yield good fortunes to the men that have become expert in managing them.

Poultry raising has given many a man a competence on a small farm. It is true that failures in poultry raising are more numerous than the glittering successes, but that is so in many other lines of business. Most of the big successes in poultry raising have been made on farms and the facts have not been advertised. Here and there are to be found farmers that have many hundreds each of fowls and who have a regular set of customers that are supplied with eggs and other poultry products.

Bee-keeping has been a source of larger income here and there to men that had grown old in the business. The writer remembers one old farmer that lived among the mountains of an Eastern State. His rocky farm produced fair crops, but his great revenue came from his bees. His fields were so high up in the air that they were above the fogs that hung along the coasts and his bees worked when bees in better localities kept in the hives waiting for the fogs to go away. The rocky farm of that man was notably profitable for this reason and his income was more than enough for all uses.

Small fruit plantations have yielded good incomes to thousands of people who had the patience to look after them as they should be looked after. A strawberry is a little thing, but some of the growers have attained such success with them that their berry fields are masses of red in the strawberry season. Some individual farmers have taken from their fields in a single season more value in dollars than their farms originally cost.

Yet the writer has never heard of one of the successes being obtained by novices, who generally expect to turn things upside down the first year or two. In fact, because of failure to do so, most people drop anything they may be doing, and this is one cause of the long list of failures to be found in any one line of effort. It is the tenacious person that usually wins out in the end.

The beauty about the small things is, that they may be engaged in with very little capital at the start, which is not true of the large lines of agricultural effort. A little land and a few dollars give sufficient basis for embarking in any one of the lines of agricultural effort mentioned. If it comes, so much the better, but let expensive mistakes be expected. This will soften the blow when they do come. But beyond the mistakes and the losses lies success to many of those that persist in seeking it.

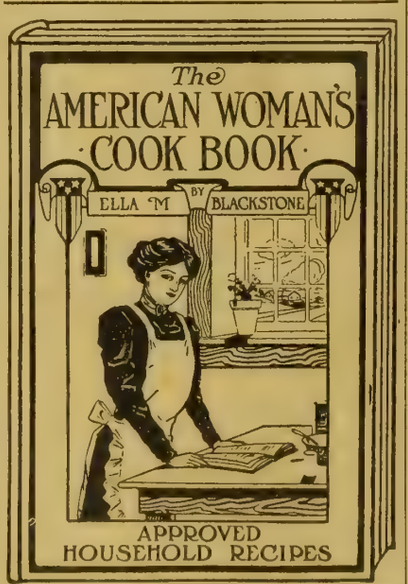
THE BEST COOK BOOK.

The American Woman's Cook Book.

This is a splendidly-bound book that weighs nearly two pounds. There are three hundred and eighty-four pages of approved household recipes, including many excellent dishes never before presented in a Cook Book.

The American Woman's Cook Book is by Ella M. Blackstone, who is famous for clearing the road for the student of domestic science by giving the reasons for everything. It is easy to learn from her when



everything having a bearing on the subject is explained so clearly.

The book includes chapters devoted to foods for each month; time required to digest different articles of food; menus for all occasions; table etiquette; kitchen don'ts; kitchen equipment, and useful hints and recipes for the home in general; specially-drawn articles upon various subjects, such as soups, fish, poultry, beef, veal, mutton, pork, salads, vegetables, and all classes of dishes, besides beverages, candies, pickles and preserves, ice creams and ices; also ruled pages for new recipes to be preserved.

The thorough alphabetical index is a wonderful help to all subjects. A good book is known by its index, which in this case is eighteen pages, three columns to the page.

The publisher's price for single copies of the American Woman's Cook Book is $1.50 per copy and 15 cents postage, but we have contracted for such a large number we have obtained the benefit of a reduced rate. Therefore we will send one copy of the American Woman's Cook Book, postage paid, for One Dollar, and include one-year's subscription to The National Farmer and Stock Grower. Address, **THE HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Ropp's Commercial Calculator.

This is a standard book, and a revised, enlarged and improved edition. There are millions in use. **Ropp's Commercial Calculator** is especially valuable to farmers. By its regular use many hard problems become easy. It will prevent mistakes, relieve the mind, save labor, time and money, and do your figuring

Stock Buyer—I'll lose money on the hogs at $4.52½ unless the market improves by tomorrow. The weight is 3895 lbs. Here is your check for $166.25.

Farmer—There surely is a mistake somewhere. Ropp's New Calculator makes it $176.25. (p. 58.)

S. B. (after figuring it over carefully)—Correct. Here is a $10 bill with your check. Pardon my mistake.

in the twinkling of an eye. As handy as a watch, always ready and reliable. Anyone who will send 50 cents for one-year's subscription to this paper, The National Farmer and Stock Grower, can select one copy of **Ropp's Commercial Calculator** as a free premium. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

PROF. SAMUELS ORIGINATES PECULIAR METHOD OF TREATMENT

HIS PHENOMENAL SUCCESS CAUSES ENMITY OF DOCTORS

ARRESTED MANY TIMES

But Acquitted by Juries and Judges and Permitted to Continue in a Work That He Alone Can Do, as He Is the Only Man in the World Using His System—Patients Make Startling Statements of His Successful Method of Treating Consumption, Bright's Disease, Kidney Trouble, Blindness, Fits, Catarrh, Heart Disease, Cataracts, Nervous Prostration, Dropsy, Hay Fever and Many Other Diseases That Baffle the Skill of the Ordinary Physician.

WICHITA, Kas.—The almost miraculous cure of hopeless invalids made by Professor Samuels, of Wichita, Kas., have been of such a startling character that they have aroused wide-spread wonder, admiration and curiosity. Time and again he has taken cases pronounced hopelessly incurable by the medical profession and restored the patients to health in a most phenomenal manner.

There is considerable mystery attached to Professor Samuels' method of accomplishing these marvels, and it is known that he does not use the drastic drugs and medicines that doctors depend upon. And it is a matter of proof that with the system this discovery gives him, he has made the blind see and the lame walk. He has revived the flickering spark of life to bodies on the very verge of the grave, and restored to health men and women given up to die by doctors and specialists.

Professor Samuels came into note several years ago by his almost miraculous cure of "Blind Joe," of Topeka, Kas., who was well known in that city, having sold peanuts and popcorn on the streets there for years. He had been blind for ten years, and had exhausted all the means in his power to be cured, but had given up in despair until he fell into the hands of Professor Samuels, who effected a cure.

Professor Samuels has been arrested many times for practicing his system without having a diploma. On being interviewed a few days ago relative to his many arrests, Professor Samuels said:

"Yes, I have been arrested many times for practicing without a license, but in no case have I been convicted. Naturally, the medical profession are jealous of my success, and are fighting me most of the time, but how are they going to convict me? Do you suppose any jury, when my patients come into court, as they did at Alva, Okla., Newkirk, Okla., Ponca City, Okla., and other towns, and tell how they have been cured of all manner of trouble, do you suppose for a minute that any jury hearing these people and seeing with their own eyes what has been accomplished, is going to convict me? My trial at Alva was before a very able judge, Jesse J. Dunn, who is now Chief Justice of the state of Oklahoma; after hearing the evidence for and against me I was acquitted. At Newkirk I was tried before Judge Hausley, a very able judge. Judge Brown, a noted lawyer, was the prosecuting attorney, and fought the case very hard, but I was acquitted. These persecutions were brought because I have no license. Being the originator and only practitioner of my system of healing, how am I to have a diploma? I can't issue it to myself, and the medical fraternity, trotting along in the same harness for half a century, too blind to accept my discovery, which accomplishes actual results, make it impossible for me to procure a license as a representative of any of the recognized schools. So what am I to do but to proceed in my own way and accomplish results that astound humanity?

The professor here showed a report from the court records showing the proof of his assertion that the court had not convicted him.

Professor Samuels is a remarkable man. Bright, alert, progressive, and although 60, he is straight and active and gives one the impression that he is much younger. He talks with such an earnest conviction and enthusiasm of his work that the listener must believe him and believe in his work.

"What is the nature of your treatment?" was the next question.

"That is a secret that has taken many years of my life to accomplish. I can only say that my results are obtained treating diseases by dropping a colorless liquid, which I prepare, into the eye. Strange as it may seem, so-called incurable cases of consumption, Bright's disease, dropsy, epileptic fits, nervous prostration are treated in this apparently miraculous way. My system is based absolutely on scientific principles. The eye is the window of the soul. I have evolved a system of treating other bodily ills based on the relation of the eye to the system as a whole. This may seem strange, but here are the proofs."

Thereupon the professor placed before his interviewer his "Message of Facts," affidavits and letters in great numbers, many of them from responsible and well-known people, all bearing on his statements.

The case of Mr. C. C. Miller, residing near Hutchinson, Kas., who for years had suffered untold agony from hemorrhage of the kidneys and various complications of that dire malady, is another example of the almost miraculous results of Professor Samuels' strange treatment. Mr. Miller in his testimonial states that he had tried every remedy suggested by his medical advisers without obtaining relief, and at last, hearing of Professor Samuels' wonderful cures, decided to take his treatment. At that time he was in a deplorably enfeebled and emaciated condition, weighing only 118 pounds, and was almost without hope. Six months after beginning the treatment he was absolutely restored to health, weighed 155 pounds, and has had no recurrence of his trouble. Mr. Miller has lived in the vicinity of Hutchinson since 1877, is a man of high integrity, and his endorsement of Professor Samuels' method of cure should be regarded as the strongest kind of proof of its merit and reliability. In fact, the greater number of the professor's patients are of a class whose testimony cannot be discounted, and perhaps this has been one of the main reasons why his fame has spread so rapidly and brought so many of the afflicted to his office for treatment.

Mr. George Hartman, living at 211 North Meridian street, Wichita, Kas., in his testimonial states he had what some physicians pronounced Bright's disease and others called it diabetes. Various doctors — among them his family physician—had given him up to die. He was so weak he could hardly walk. About this time he heard of Professor Samuels and placed himself in Professor Samuels' care, and showed change for the better in a few weeks. He states that at the end of ten months he felt just as well as he ever did, and claims he is absolutely cured and has never had a recurrence of the trouble.

Mrs. J. T. Williamson, who resides at 200 B street West, Hutchinson, Kas., in her testimonial states she was almost on the verge of the grave with consumption and nervous trouble, and that for nearly twenty-two years she was seriously afflicted with St. Vitus' dance in addition to tuberculosis. She states that a leading physician had pronounced her incurable, and that she would die and be buried with the falling of the leaves in autumn. As a last resort, she turned to Professor Samuels, and after starting his treatment she says she had only one hemorrhage of the lungs, and began to improve. In a short time, she states, she was able to do her own work, and that she recently had her lungs examined by a doctor, who pronounced them absolutely sound and well.

Mrs. H. J. Burroughs, living at Collins, Ia., and who in her testimonial said she had a serious case of heart trouble, in a recent letter to Professor Samuels states: "I have not taken a drop of medicine since I began your treatment. Before that I had to take from one to four heart tablets a day. I had dizzy, blind spells, and my heart did not beat regularly at all, but just flutter. Now it beats regularly and does not bother me a bit. It tell everyone I talk with of your treatment and what it has done for me."

Mr. C. W. Neel, living at Broken Arrow, Okla., in his testimonial says he had a very bad case of rheumatism. Writing Professor Samuels in a recent letter he states as follows: "Thank you, Professor, ten thousand times for your assistance in curing me of that awful rheumatism. I am still hard at work and feeling fine."

Miss Daisy Hubbard, who lives at Alva, Okla., in a recent letter wrote: "For fifteen years I have been subject to epilepsy, and have received treatment from several noted doctors and have failed to receive permanent good." As a last resort she began treatment from Professor Samuels, and now in her testimonial says she has no symptoms of the disease.

Mrs. Louisa Lockhart, living at Washington, Kas., in her testimonial says she had a very bad case of kidney and bladder trouble. She had reached the point where her kidneys and bladder were in an awful condition. In a recent letter to Professor Samuels she states: "After taking your treatment two weeks I was able to do my own housework, which I had not done for months. I took the treatment one month and now I am well in every respect, thanks to your wonderful treatment."

"Is it necessary for your patients to come to see you to be treated?" was asked. "No, my treatment can be sent by mail. Many of my patients come to see me, but it is not always necessary. My treatment is sent to hundreds, and, in fact, I am as successful in treating that way as though the patients were right here. To people from a distance who write me, an information blank is sent to fill out. In this way I am enabled to send them the treatment with full directions for its use."

"I should think with your ability to cure you would be in a position to demand big money from your patients," remarked the interviewer. "No, I do not do that now. My charges, when the patients used to call on me in person, used to be pretty high. I am getting old, and I feel that it is my duty in my last years to place my treatment in the hands of the poor as well as the rich. I believe that I owe a duty to mankind, and that as many people as possible, no matter what race or nationality, nor where located, should be benefited by my life's work. On this account, I have reduced my charges so they are within reach of all.

"My greatest aim in life from now on will be to relieve the ills of humanity, and when death shall claim me, I have arranged so that my secret will not die with me, but will be known, so that men in all ages to come will reap the reward of my life's work."

Everyone who is sick, no matter what their troubles may be, should write Professor Samuels, room 110, Samuels Bldg., Wichita, Kas., for his "Message of Facts," and they will find something in it of interest to them.

The Geese Were Talking.

A farmer hired Kerrigan, an Irishman, to attend to his stock farm. In the evening he asked Kerrigan if he had fed the stock and what he had given to the geese.

Kerrigan—"Two bales of hay,sir."

Farmer—"What? Two bales of hay to the geese to eat?"

Kerrigan—"Yes, sir."

Farmer—"And did they eat it?"

Kerrigan—"No, they did not; but they were all talking about it when I left."—Jack Ryan, in Post-Dispatch.

The Awful Stilly Nights.

Mrs. Suburban—"But why must you leave us, Mary? Don't you like it out here?"

Servant—"Well, ma'am! It's all right days, but nights it's awful. I have to pull the bedclothes over my head and ears to shut out the dead silence."

Squaring the Account.

"Just think! That lady doctor who died last year owed her dressmaker 20,000 marks."

"Well, what happened?"

"Her husband couldn't pay, so he married the dressmaker." — Fliegende Blaetter.

The poetry which is published in The National Farmer and Stock Grower from month to month is alone well worth the subscription price of the paper.

MAY MANTON PATTERNS.

Very Elegant Pattern Service, With Full Instructions For Ordering and Making.

This is the very best pattern service, and we are very much pleased to obtain it for our friends and patrons. Each pattern is new and original. Please address all pattern orders to **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

FREE TO YOU—MY SISTER

Free to You and Every Sister Suffering from Woman's Ailments.

I am a woman.
I know woman's sufferings.
I have found the cure.
I will mail, free of any charge, my home treatment with full instructions to any sufferer from woman's ailments. I want to tell all women about this cure—you, my reader, for yourself, your daughter, your mother, or your sister. I want to tell you how to cure yourselves at home without the help of a doctor. Men cannot understand women's sufferings. What we women know from experience, we know better than any doctor. I know that my home treatment is a safe and sure cure for Leucorrhoea or Whitish discharges, Ulceration, Displacement or Falling of the Womb, Profuse, Scanty or Painful Periods, Uterine or Ovarian Tumors or Growths; also pains in the head, back and bowels, bearing down feelings, nervousnnss, creeping feeling up the spine, melancholy, desire to cry, hot flashes, weariness, kidney and bladder troubles where caused by weaknesses peculiar to our sex.

I want to send you a complete ten day's treatment entirely free to prove to you that you can cure yourself at home, easily, quickly and surely. Remember, that it will cost you nothing to give the treatment a complete trial; and if you should wish to continue, it will cost you only about 12 cents a week, or less than two cents a day. It will not interfere with your work or occupation. Just send me your name and address, tell me how you suffer if you wish, and I will send you the treatment for your case, entirely free, in plain wrapper, by return mail. I will also send you free of cost, my book—"WOMAN'S OWN MEDICAL ADVISER" with explanatory illustrations showing why women suffer, and how they can easily cure themselves at home. Every woman should have it, and learn to think for herself. Then when the doctor says—"You must have an operation," you can decide for yourself. Thousands of women have cured themselves with my home remedy. It cures all, old or young. To Mothers of Daughters, I will explain a simple home treatment which speedily and effectually cures Leucorrhoea, Green Sickness and Painful or Irregular Menstruation in Young Ladies. Plumpness and health always results from its use.

Wherever you live, I can refer you to ladies of your own locality who know and will gladly tell any sufferer that this Home Treatment really cures all women's diseases, and makes women well, strong, plump and robust. Just send me your address, and the free ten day's treatment is yours, also the book. Write today, as you may not see this offer again. Address

Treatment of Roses.

The general idea is that roses don't need any treatment in summer, except to cut the rose blooms as needed, or let them bud and bloom and fall, so far contributing their share to our pleasureable enjoyment; yes, and, of course, weed round them sometimes, and if it should be very dry, gives them a little water, and if they are ever-bloomers, expect them to just go on blooming. Don't the catalogues say, when new ones are introduced, they will bloom continuously? Why do people generally form and hold such ideas? Because they have never taken the trouble to study the rose. They love roses and deservedly give them the first place, but they don't know anything about them beyond admiring their beauty and enjoying their fragrance. While the family of roses was represented by and confined to those that bloomed only once a year, it did not matter so long as they were pruned in winter, in the South, and in early spring in the North, but it is different with the monthlies, or so-called ever-blooming. The question naturally is, "Why do you prune roses?" To take out all dead and worn-out wood, also such blind shoots as are not needed for shaping or foliage purposes; also to shorten such stems or laterals as have bloomed and have from six to twelve, or even twenty, undeveloped buds, as the sap rushes to the extreme ends of these sprays or stems, leaving the lower buds undeveloped and giving the bush a straggling appearance.

The roses of which I am writing have all their blooms on new wood; that is, wood of each new growth. It will be seen, then, that if these stems or laterals are left to themselves they will have a series of new growths at each extreme end, leaving the bush unshapely and compelling the sap to travel a long distance for no good purpose. As there are some of the hybrid perpetuals and hybrid teas that have their blooms only on the ends of long sprays, let them so bloom before being cut back.

In answering why these roses should be cut back or pruned every time they bloom, be it monthly or longer, I think I have at once taught how to prune, and if this were properly attended to, there would be scarcely any winter pruning needed. I had perhaps better say that there is one branch of the rose family that should not be pruned in this way; that is the Austrian Briar, of which the old yellow Harrison Yellow and Persian Yellow are the only ones known among us here. These bloom only once a year and have their blooms on the year-old wood, so you see pruning as previously mentioned would cut all the bloom wood away. Best let them alone, except to take out dead or worn-out wood, and thin out a little.

Roses grown for cut-flower purposes require special treatment, but I am not writing to give information about cut-flower roses. I am very desirous that our people should learn how to treat roses, especially our lady friends, who generally have most to do in rose cultivation for the home. Some of these prunings can be used for making young roses.—William Lomas, in Chicago Drovers' Journal.

Safety During Thunder Storm.

The Colorado Experiment Station gives the following directions for personal safety during severe storms:

"Do not stand under trees, near wire fences, in doorways, or near cattle, chimneys or fire places, and never use the telephone during electrical storms."

Lightning strike is not, as a rule, fatal. If a person is struck by lightning, do not give up hope, but stimulate respiration and circulation, keep the body warm, rub the limbs rapidly, give water, wine or hot coffee and send for a physician.

The best way to prevent being struck by lightning is to see that the house and outbuildings are all protected by reliable lightning rods properly grounded, then go into the house or the barn and wait in safety until the storm is over.

95 cents

Post Paid

Guaranteed 5 Years

To advertise our business, make new friends and introduce our great catalogue of Elgin Watches we will send this elegant watch to any address by mail post paid for ONLY 95 CENTS. Regular gentleman's size, open face, full nickel silver plated plain polished case, Arabic dial, lever escapement, stem wind and stem set, a perfect timekeeper and fully guaranteed for 5 years. In addition to the watch, and without any extra charge whatever we send five Midge Certificates worth one dollar each when used as part payment on purchases from our catalogue. Send 95c today as this advertisement may not appear again. **R. E. CHALMERS & CO., 356 Dearborn St., CHICAGO**

Stomach and Lung Troubles

Rheumatism, Kidney and Liver Troubles

Weak Circulation and General Debility Have Been Cured By Magnetic Shields

In Hundreds of Cases After All Other Treatment Had Failed.

We Prove It To You

By the Words of Those Who Say They Have Been Cured With Magnetic Shields

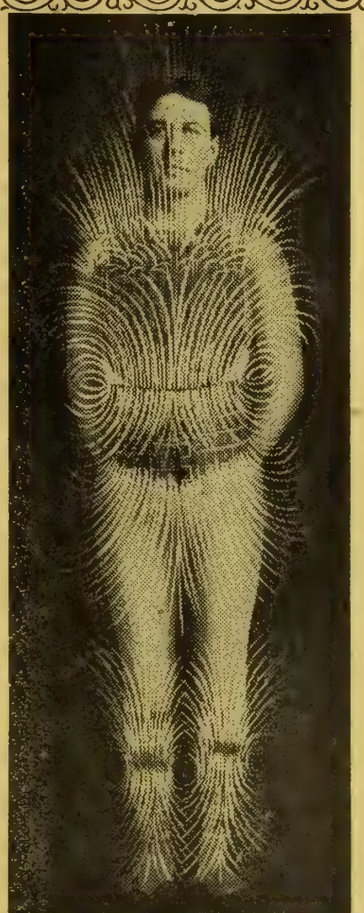
All we wish is an opportunity to show you the evidence, and after you have seen what wonderful work has been accomplished by Magnetic Shields, **YOU ARE TO BE YOUR OWN JUDGE** as to whether or not you want to use Magnetism in your own case, the same as others have. We do not urge anyone to buy Magnetic Shields; we simply give you the facts, and after considering the facts you follow your own inclination. It is your duty to investigate. It will cost you nothing to get the facts, and you will obtain much valuable information, free of charge, upon the subject of Magnetism, if you send statement of your case.

You Have Everything To Gain

By a careful, thorough investigation, for Magnetic Shields have done all we claim for them and a great deal more, or we certainly would not ask you to make an investigation and use the result of that investigation as the basis from which to judge of the merit of Magnetic Shields as a curative agent.

We Make Shields For Every Part of the Body For the Treatment of Every Form of Disease

The accompanying cut shows how Magnetism is radiated from the Lung Shield, Belt and Lower Leggins into all the vital organs, as well as lower extremities, giving new life and activity to the circulation from head to foot, thus strengthening all the vital organs and large nerve centers and assisting nature in the work of eliminating diseased conditions by reason of the better circulation of blood that is established as soon as the Shields are applied. This set of shields contains over eight hundred powerful Magnetic Storage Batteries, that are guaranteed to hold their power and will never have to be recharged.



Read the Truth

More Forcibly Expressed in These Letters Than Any Statements We Could Make

"GOD BLESS DR. THACHER!" PARALYSIS OF LOWER HALF OF BODY OF SIXTEEN YEARS' STANDING

THACHER MAGNETIC SHIELD CO., CHICAGO, ILL.

Dear Sirs: It would take a large amount of space to give a history of my case from start to finish, but for the sake of suffering humanity I will give a few words to help along, if possible, the great work you are doing for the afflicted. In 1883 I was taken with malarial fever of typhoid form, causing complete muscular paralysis. By the aid of the best medical skill in the East, I became, after several years, able to sit up and use my arms, but my lower limbs remained paralyzed until after I put on the Magnetic Shields in 1899, sixteen years afterward. My case is a noted one in New York State, and all the medical fraternity decided I would never be able to walk again. Dr. C. I. Thacher said I could and would walk again, and he was right and all the rest were wrong. It is needless to say that I had spent money freely all these years without receiving results, until I found the Magnetic Shields. We who have been restored by its wonderful power begin to realize the great work being accomplished by Dr. Thacher, and we would be unjust to our Creator and to our fellow-beings, as well as being very ungrateful, if we did not use all our efforts and powers in spreading the grand truth, bringing greatest joy and hope to the chronic invalid, deliverance from disaster, transition from the old life to the new. I am one of the thousands who, with all my heart, can say fervently: "God bless Thacher and his great work." All personal letters, inclosing stamp for reply, will be promptly answered for those wishing minute data of my case. Yours truly, CLARENCE D. SMITH, R. F. D. No. 6, Rome, N. Y.

SERIOUS COMPLICATION OF LUNG, STOMACH AND KIDNEY TROUBLE. A MARVELOUS CHICAGO RECOVERY

DR. THACHER:

Dear Sir: It gives me great pleasure to testify to the perfect cure I have gained by using your wonderful Shields. After suffering fifteen years with stomach troubles, although doctoring the greater part of the time, I kept getting worse until I was the victim of a severe complication of stomach and kidney trouble, which a year and a half ago all seemed to go to my lungs. Had dreadful pains, lost my appetite, could not sleep, became so very weak I could hardly walk across the floor, and not able to do my work. At times when my pains were not so severe I would try to read, but could not for more than five minutes at a time, as I was very nervous. My family and friends thought I could not live another month. I was getting tired of taking medicine. Nothing helped me. I happened to see your advertisement in the paper, which read: "Magnetism Cures Without Medicine." I thought "While there is life there is hope." So just one year ago today I put on your wonderful Magnetic Vest, Leggins and Insoles. The result was a miracle, for in two days I felt relieved; in a week very much better; in three weeks entirely cured.

Words cannot express how thankful I am to you for your kind advice; also for the treatment, to which I owe my life. May you live long for suffering humanity's sake. May your great and sure cure be known a great deal better than it is today.

Yours respectfully,
MRS. O. RAY, 2316 Ridgeway St., Chicago, Ill.

Complicated Case of Piles and Stomach Trouble Restored to Youthful Vigor at Age of 64

Dr. Thacher, Chicago, Ill.

Dear Dr. Thacher:—It is now eleven years since I first made my acquaintance with the Magnetic Shields. I was then a physical wreck from indigestion and piles, which made life a burden to my existence. I had suffered with a weak stomach from my boyhood, and in the army I contracted the piles and other complicated conditions which disabled me from active work. One day I called at a house and for the first time learned of the Magnetic Shields. The book, "Plain Road to Health," had been sent to those people and I got it and read it. I recognized and felt the truth of your statements in that valuable work, and concluded that I would send for a Belt and Leggins. I soon felt a new impetus of life and general improvement. My piles left me in three days and I never had them since. I recovered my health perfectly, and am now in my sixty-fourth year, and I am as sound and active as I was at twenty. I wear the Shields every winter and I am always free from colds, grip, etc. I never have any "tired feeling" and "under the weather," as the majority of people tell about their feeling. I have no aches and pains because the Magnetic vibration of the Shields has re-established perfect circulation of my blood in every fiber of my body; hence my prefect vigor of youth at the advanced age of sixty-four years.

I desire to have this statement published that it may go out for the benefit of humanity. I shall gladly answer anyone wishing to know more of my case and the nature of this statement.

I am yours with love and gratitude,
N. AEBISCHER, Wausau, Wis.

We have hundreds of letters like the above, stating what marvelous results have been obtained in cases that were considered incurable in many instances. Do not be discouraged. Do not give up hope, even if you have been told your trouble could not be cured, as Nature's methods are wonderful and many cases are restored where medicine has failed to give beneficial results, as shown by the indisputable proof that we will supply you. Investigate our claims, for it is a duty that you owe yourself. All that we ask is for you to write us and send a complete description of your case and let us prove to you what has been done in some cases.

We will send you FREE OF CHARGE our new book, "A PLAIN ROAD TO HEALTH," by C. I. Thacher, M. D., and will advise you just what application of Magnetism will be required for your case. Write us fully to-day and we will take the same careful pains to advise you as if you called at the office and saw us in person.

WARM FEET A pair of FOOT BATTERIES, the very smallest shield we make, worn in the shoes, will produce warm feet and convince the most doubting skeptic of the curative value of Magnetism. They are good for Rheumatism, Cramps, Sore Feet, and all irregularities in the feet. $1.00 a pair, or 3 pair for $2.00. Send size of shoe when ordering FOOT BATTERIES. Write to-day and let us assist you all we can by Free Advice.

THACHER MAGNETIC SHIELD CO., Inc., Suite 272, 169 Wabash Avenue, CHICAGO, ILL.

Simpson-Eddystone Fast Hazel Brown Prints

are brown cotton dress-goods that are "worth making up."

These calicoes have the most beautiful shade of brown printed absolutely fast on well-woven cloth of enduring quality—the result of 68 years' skill and experience. They are absolutely tub-proof, sun-proof, and perspiration-proof. The designs are new and particularly attractive.

Show this advertisement to your dealer when you order, and don't accept substitutes. If not in your dealer's stock write us his name and address. We'll help him supply you.

SELECTED POETRY.

IN MORGAN'S CAMP.

Our merry troop had stopped a while
Beneath the greenwood trees.
Our sun-browned faces grateful caught
The balmy morning breeze.
In grotesque costumes, grotesque men,
We paused to rest one day.
Our purpose firm, our motive stern,
Yet threw we care away,
For Morgan's men were cavaliers,
With soldiers' hearts and bold,
And not excelled in chivalry
By any knights of old.
They loved the pipe, they loved the bowl,
The dance and jolly song,
The soldier's will, the sportsman's way,
Were theirs, and ever strong
Their fancy for fair maidens,
The gun, the horse, the chase;
To-day we stopped at Bowling Green,
All bent upon a race.

Crit Edmunds rode a Vandal mare,
Inbred through great True Blue;
And Capt. Trigg in Betty Bolt
Was on a Vandal, too.
These mares were colored deep dark bay,
Both of the royal blood,
Both sprung from rich Arabic stock
And bred at Bedford's stud.
The fame of these two thoroughbreds
Had spread throughout the clan,
That they might run for the lives of kings
Was known to every man
In Morgan's camp. In many a fight,
In many a quick retreat,
They'd shown the Yankee cavalry
The power of lightning feet.
But others rode on royal backs,
On royal necks held rein
And gave to Trigg and Edmunds
A challenge, strain for strain.

Cal Cheatham rode a great brown horse,
Bred down in Tennessee,
A Priam of the Harding stock,
Reared at old Gamma's knee.
His height was fully sixteen hands,
His name was Tinkle Bell.
With strength and sturdy heart and will,
His speed no man could tell.
But many wagers could be found,
That he could best the mares.
Cal Cheatham was both cool and keen,
Ne'er taken unawares.
He covered all the cash that came
To say of his big pet:
"You cannot beat the Vandal queens,
Cal Cheatham, this I bet!"
But many men were backing him,
As sure as men could be,
No thoroughbred in Morgan's band
Could beat old Tennessee.

Jim Buckner's horse was stout and tall,
A gelding, flea-bit grey,
With him he'd kept the pace of Rings
For many a night and day.
Men noticed not this scrawny steed,
Smooth-coated, homely, thin.
Jim Buckner chuckled to himself,
Resolved the race to win.
Jim's grey-green eyes and frecked face,
Big feet and yellow hair,
Helped make him and Bill Barlow
A much derided pair.
Bill's sire was great Grey Eagle,
His dam of Wagner stock,
And Buckner's claim for Billy
Seemed solid as a rock.
But the boys would guy Jim Buckner
And smile upon his grey,
And when he talked of racing, said:
"Oh! that's Jim Buckner's way."

They called poor Billy Barlow
A peach, a guy, a honey;
They smiled at thought of such a nag
E'er racing for the money.
But Billy's legs were long and strong,
His flanks had little hair,
And any judge of horse-flesh saw
That Billy's blood was rare.
His nostrils red, and large and thin,
His big eyes clear and bright,
For long foray, to go and stay,
This horse was built just right.
Jim Buckner chuckled to himself,
And grinned while others smiled,
Good-natured as a seraph
And docile as a child.
When they poked fun at Billy,
Jim Buckner only smiled:
"Bill's grandam was a Wagner,
His dam a thoroughbred!"

But now the race was ready called,
And all the troop was out
To see the two miles settled
Which long they'd talked about.
The mares were steady favorites,
With the odds on Bettie Bolt;
But many staked their shekels
On Cal Cheatham's Gamma colt.
Crit Edmunds was a horseman rare,
The first to take the track,
While Capt. Trigg and his bay mare
Were close behind his back.
Cal Cheatham on his great brown horse
Came next, majestic rider!
The Priam colt, then Bettie Bolt,
Her sister close beside her,
Swept down the stretch, a trio grand,
None finer in Kentucky;
The man who picked the winner here
Was simply mighty lucky.

The word to start was almost called,
When back to left and right
The crowd made way for one more pair.
Jim Buckner! What a sight!
Jim's legs hung loose at Billy's sides,
Bill's eyes showed all their white.
In Billy's ragged, tangled mane
A witch had rode all night.
No coat, no spurs, no whip, no style,
Jim Buckner sported now.
"A sorry-looking outfit this, good friends,"
I do avow.
"A foolish pair of guys," they said,
"To enter sport of kings."
And yet that day, as it turned out,
Bill Barlow sure had wings.
None viewed these two in earnest,
The boys joked them and jeered,
But when the mares and stallion passed
The regiment all cheered.

"Appearances deceive, you know,
And good horse sense is rare,
And horses run in any shape,"
Jim Buckner did declare.
"Bill's ugly, that I know," quoth he,
"His beauty I can't boast,
But when it comes to running,
He's swifter than a ghost."
Jim's curly locks shone in the sun,
As he jogged down the track
And took position in the ruck,
Just at Crit Edmunds' back.
And now, they're off! At steady pace,
A gallop, nothing more.
One blanket, as they passed the post,
Might cover up the four.
But Bettie Bolt soon took the lead,
Her sister at her neck,
And at their heels the Priam colt
Cal Cheatham held in check.

While in the rear wide open-mouthed
Bill Barlow leaped and reared,
And as the lordly three drew off
The crowd good-natured cheered.
See how they come! The Vandals first!
The mares seem running fast;
Now Bettie Bolt is running some.
She flies! Gods! Can she last?
No! No! Old Tennessee is surging up,
He's passed the little mare;
He's nose and nose with Bettie Bolt.
Oh! what a noble pair!
"It's ten to one! The Priam wins!"
Somebody shouts out loud.
"Just look! The grey is coming up;"
A lull falls o'er the crowd.
It's everybody's race right now,
As down the stretch they fly,
Men hold their breath. In fever heat
Excitement now runs high.

The little mare has lost her stride,
And Bettie can't go faster;
That princely fellow Cheatham,
His brown colt lifted past her.
The Priam never slackened pace,
Ne'er faltered on his pins,
And all the crowd were shouting:
"He wins! Yes! Priam wins!"
But reckon not without your host!
It was a killing pace,
And, after all, Bill Barlow
Was certain in the race.
Look at the grey! He's gaining now!
He's coming! He's a winner!
It's nip and tuck! It's nose and nose!
He wins as I'm a sinner!
Jim's old hat, both whip and spur,
He used it. Oh! 'twas funny.
The boys had jeered till they were hoarse
And Jim had all their money.

From that day on men doffed their caps
To Jim's flea-bitten grey,
Jim Buckner smiled acknowledgments,
Bill Barlow went his way;
The great two-miler's tale was told
At bivouac and camp.
He oft took lead in wild foray,
Advance and wearing tramp,
Pursuing or retreating, it was
All the same to Bill.
He'd get there first, sure winning out
At brave Jim Buckner's will.
And time flew by. The grand old grey,
The regimental pride,
Was pointed out where'er he went,
Distinguished far and wide.
Alas! The soldiers wept one day!
Ah! sad but truthful story!
A minie bullet struck old Bill.
Thus ended all his glory.

—Charles P. Curd.

THE PREACHER AND THE HORSE.

A preacher once wanted to buy a horse,
And, being a man of considerable force,
He thought it all over and made up his mind
That he knew to a dot what he wanted to find.
He sought the advice of some plain-looking men
Who knew all about the good horses, and when
He happened to find them together one day,
In language like this he proceeded to say:
"I must have a horse that can keep a swift pace,
For my son delights in a spirited race.
And he must be quiet and easy to guide,
So my wife can drive him when she wants a ride.
He must be a strong horse, on wagon or plow,
And he must keep easy, for I don't know how
I can furnish much feed, and I am very sure
I will not drive a horse that is scraggy and poor.
He must be a young horse, so he will improve;
Yet thoroughly trained so he knows every move
A good horse should make. As for price, I can pay
About sixty dollars, without much delay."

When he was through speaking, a plain man looked cross
And said: "Why, you blamed fool, there ain't no such hoss."
My friend, let me tell you, the plain man was right
When he answered the preacher in words true and trite:
The lesson he taught with such plainness and force
Is as true of a man as it is of a horse—
If you look for perfection in others you'll find
They never can fully come up to your mind;
Why, they will despise you, as sure as you live,
If you try to get more than you're willing to give.

—Rev. R. H. Shaftoe.

I GOT TO FACE MOTHER TO-DAY.

I got to face mother to-day, for a fact!
I got to face mother to-day!
And jist how I'll dare to, an' how she will act,
Is more than a mortal can say!
But I got to face her—I got to! and so
Here's a' old father clean at the end of his row!

And Pink an' Wade's gone to the farm fer her now—
An' I'm keepin' house fer 'em here—
Their purty new house—and—all paid fer! But how
Am I goin' to meet her and clear
Up my actchully heppin' 'em both to elope?
('Cause mother wuz set—and wuz no other hope.)

I don't think it's Wade she's so biased ag'in,
But his bizness—a railroadin' man
'At runs a switch engine, day out and day in,
And's got to make hay while he can—
It's a dangerous job, I'll admit—but see what
A fine furnished home 'at he's already got!

And Pink—w'y, the girl wuz jist pinin' away—
So what could her old father do
When he found her, hid-like, in a loose load of hay,
But jist to drive on clean into
The alge of the city, where—singular thing!
Wade switched us away to the 'squire, I jing!

Now—a-leavin' me here—they've driv off, with a cheer,
On their weddin' trip—which is to drive
Straight home and tell mother—and toll her back here
And surrender me, dead or alive.
So, I'm waitin' here—not so blame' overly gay
As I wuz—'cause I got to face mother to-day!

—James Whitcomb Riley, in The Reader.

KATY DID.

When I was strolling through the gloam
I glimpsed a maiden fair.
"Oh, mistress, may I see you home?
You need protecting care."
She dropped her eyes in sweet demur;
Said she: "We've never met.
I can't allow it, gallant sir,"
But yet—but yet—but yet;
Katy did! Katy did! Katy did, did, did!
Katy said she couldn't, but she did, did, did!

The stars were peeping 'midst the blue,
But none save them descried.
Just broad enough the path for two
If closely side by side,
My arm in half a circle lay
Her waist within its ken;
Said she: "I never walk this way."
And then—and then—and then:
Katy did! Katy did! Katy did, did, did!
Katy said she didn't, but she did, did, did!

Her cheeks with blushes wooed me oft
As slow we onward paced.
Her mouth was like a cherry soft,
Inviting one to taste.
I deftly stopped. She cried: "Alack!
All kissing, pray, forego."
Said she: "I must not kiss you back,"
But oh!—but oh!—but oh!
Katy did! Katy did! Katy did, did, did!
Katy said she wouldn't, but she did, did, did!

—Edwin L. Sabin.

OUR FLAG. COLE BROS. FRANKLIN LIGHTNING ROD.

C B F R

SPLENDID SUBSCRIPTION PREMIUM.

Beautify Your Home With This Popular Stencil Outfit.

Stenciling has long been a popular form of home decoration and is to-day used more extensively than ever. Ladies are particularly apt at this work, and anyone can produce beautiful effects. From every standpoint stenciling is a very fascinating art of extreme usefulness. You can make the most artistic pillow tops, curtains, portieres, centers, etc., in colors for yourself or for sale, without having any knowledge of painting, by using this up-to-date outfit. In fact, stenciling is so simple with this outfit that a child ten years old can do it.

This outfit is just the thing for beginners. It consists of six cut stencils on special oil board, six cups

of water colors (something new, that will not spread, but dries instantly), two bristle stencil brushes, four thumb tacks, also full and explicit directions for mixing colors and using stencils.

Our Subscription Proposition.

Send us Fifty Cents by postoffice money order and we will send you the Universal Magazine for two years and you can select the Popular Stencil Outfit as a free premium.

The Universal Magazine is a nice, bright, cheerful, illustrated monthly magazine of thirty-two pages, three columns to the page, containing home reading, stories, fashions, patterns and poetry—a splendid publication for the money. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

BELINDA'S GARDEN.

Belinda had a garden fair,
Laid out to suit her fancy,
With magic blossoms blooming there—
The strangest necromancy.

The largest flowers were, of course, in beds;
In cradles were the smallest;
The larkspur had the highest heads,
Because they were the tallest.

And all the larks that on them grew
Kept up a wondrous singing;
The trumpet-vine its trumpets blew,
The bluebells kept a-ringing.

In perfect time the four-o'clocks
Held up their open faces,
And on the heads of brilliant cocks
The cockscomb bloomed in spaces.

To take her tea Belinda sat
Upon a satin pillow,
Where here and there a pussy-cat
Grew on a pussy-willow.

Gay slippers on her feet were worn,
The lady slipper bore them;
The corn flower yielded ears of corn
So large she had to store them.

To give her butter, fresh as dew,
The buttercups were handy,
And on the candytuft there grew
The best of sugar candy.

The honeysuckle on the spot
Supplied her well with honey.
Now, with such flowers as these, was not
Belinda's garden funny?
—Farmers' Advocate.

LITTLE BROWN HANDS.

They drive home the cows from the pasture,
Up through the long shady lane,
Where the quail whistles loud in the wheat fields
That are yellow with ripening grain.
They find, in the thick waving grasses
Where the scarlet-lipped strawberry grows,
They gather the earliest snowdrops,
And the first crimson buds of the rose.

They toss the new hay in the meadow;
They gather the elder-bloom white;
They find where the dusky grapes purple
In the soft-tinted October light;
They know where the apples hang ripest,
And are sweeter than Italy's wines;
They know where the fruit hangs the thickest
On the long, thorny blackberry vines.

They gather the delicate seaweeds,
And build tiny castles of sand;
They pick up the beautiful sea shells—
Fairy barks that have drifted to land.
They wave from the tall, rocking tree tops,
Where the oriole's hammock nest swings;
And at night-time are folded in slumber
By a song that a fond mother sings.

Those who toil bravely are strongest;
The humble and poor become great;
And so from these brown-handed children
Shall grow mighty rulers of state.
The pen of the author and statesman—
The noble and wise of the land—
The sword, and the chisel, and palette,
Shall be held in the little brown hand.
—Mary H. Krout.

A ROSE FROM CORINTH.

Just a rose from the field of Corinth,
Where the sweet magnolias grow,
Where the jessamine clings to the cypress
And the pink oleanders blow;
But it brings to my mind a picture
Of the hills with their wonderful grace
As they bask 'neath the turquoise skies
Of that dear old familiar place.

Just a rose from the field of Corinth,
But it speaks of a day that's dead,
When the serried hosts in battle met
And the streams with blood ran red,
When the pines on the high bluffs trembled
To the roar of the shot and shell,
When the bravest soldiers of this fair land
Rallied, and charged, and fell!

Just a rose from the field of Corinth—
It grew by a blasted tree
That stood in the path of a canister,
And waved its proud crest free;
It bears in its fragrant bosom
A message of peace and cheer—
An emblem of love and affection
That shall grow from year to year.

Just a rose from the field of Corinth,
But it fills my eyes yith tears
When I think of the hearts yet shadowed
That have waited for years and years
For those who went down in the battle
In a cause they believed was right;
They'll answer again in the roll-call
On the fields by the river of light.

Just a rose from the field of Corinth,
Where all is at peace once more,
With the gentle sunshine streaming
The hills and the woodlands o'er;
And it pleads for a peace still broader
In the land that we love so well,
But we cherish the names of the heroes
That at Corinth fought and fell.
—Clyde Edwin Tuck.

AN ODE TO THE HEN.

Poets in all lands and ages
That the thought of man engages,
Since the early days of Homer and a thousand years before,
Have delighted oft in springing
Odes on birds that do the singing,
Birds that sail the briny ocean or that roost along the shore.

I have read since early childhood
Of the birds that haunt the wildwood,
And I've heard their mellow voices when the earth by spring is warmed;
But no music I can tackle
Is so pleasing as the cackle
Of the barn-yard hen whose duty has been patiently performed.

To become a great musician
Is no barn-yard beauty's mission,
As with fortitude becoming in her daily task she pegs;
Here to cackle when she's able
And supply the Christian's table
With the tempting fries in autumn and the early scrambled eggs.

There is dignity of bearing
When she goes out for an airing
Where the early melons nestle among vines that seem to squirm;
When she hikes with self-reliance,
Bidding all the world defiance,
To the garden in the morning to procure the early worm.

Much I love the wild bird's matin
And its plumage soft as satin,
And the meadow larks and robins are to me a keen delight;
And I used to lie enraptured,
With my senses fairly captured,
When the whip-poor-wills were singing in the middle of the night.

How the songbirds in the wildwood
Now remind me of my childhood,
And, as idle years affect me, do I love them more and more;
I delight to see and hear them,
And am happiest when near them,
But the home-grown hen of commerce is the bird that I adore.
—A. L. Bixby, in New York Farmer.

THE CHILD'S PRAYER.

Before I lay me down
Upon my couch so white,
I kneel to ask Thee, Lord,
To keep me through the night.

To ask Thee to protect me
In this erring world so wide;
If I should die to-night
To take me to Thy side.

Oh, lead me in the path
Of righteousness, from sin,
And I will follow lowly
My heavenly crown to win.

Thy goodness and Thy mercy
Are cherished in my heart;
From covetousness and evil
Oh, Lord, may I depart.

But this I ask of Thee,
Whom I worship and I love,
May I walk in Thy peace
Until I meet Thee above?
—New Orleans Picayune.

REAL LIFE.

It was back in old Missoury,
In a peaceful farming vale,
And the folks were plunged in trouble—
Hushed the music of the flail.
There a villain held a mortgage
On the dear old farm house roof;
Much he loved the widow's daughter
And betrayed the cloven hoof.

But, alas! there was no hero
To arrive with manly grace,
And with ringing cries of "Dastard!"
Fling the gold into his face.
Yet the villain paled and faltered,
While he muttered: "Foiled again!"
For his ear had caught the cackle
Of the mortgage-lifting hen.
—McLandsburgh Wilson.

THE FARMER AND HIS WIFE.

The farmer sows his crop,
And his good wife sews his clothes;
The farmer darns the weather,
And his good wife darns his hose.
The farmer pitches in the hay,
But should he cross her whim,
His good wife lays aside her work
And pitches into him.
—Judge.

As They Measure in Jersey.

"The wilds of New Jersey," said Frank Malone, "reward the explorer well. If they who sojourn at Atlantic City or Long Branch would but penetrate into the wilds, they would see and hear many interesting things.

"Take, for example, the measurement of distance. I once asked the keeper of the general store in a New Jersey village choked with sand how far it was to Skeeter swamp.

" 'Skeeter swamp?' said the storekeeper. 'Well, I should say Skeeter swamp was 'bout two whoops from here—or mebbe two whoops and a holler.'

"I asked a man in Skeeter swamp how far Flytown was. The man shifted his quid to the left cheek and replied:

" 'Flytown, stranger, is about three chaws to the south—unless y're a fast chawer. Then I'd say it was about three chaws and a half.' "—St. Paul Dispatch.

Uneeda Biscuit
Clean Food
It is an incentive to hunger to see Uneeda Biscuit made.
All materials are of the finest quality—clean, nutritious. The dough is mixed in spotless trays in a spotless bakery. Rolled thin; baked in wonderful ovens scientifically heated to give just the right crispness; then packed into the moisture-proof packages that keep them fresh, crisp and clean till eaten.
Never sold in bulk

In the moisture-proof package
NATIONAL BISCUIT COMPANY

Taft's Tight Trousers.

When President Taft was seven years old his mother bought him a pair of short duck trousers. The first time they were washed they shrank badly. The boy was fat, but his mother wedged him into the trousers against his protest. He went out to play, but in a few minutes returned.

"Mamma," he said, "I can't wear these pants; they are too tight. Why, mamma, they are tighter than my skin."

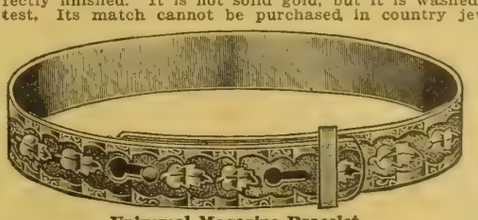
"Oh, no; they're not, Billy," replied his mother. "Nothing could be tighter than your skin."

"Well, all the same, these pants are. I can sit down in my skin, but I can't in these pants."—Knoxville Sentinel.

The first Texas bale of cotton of the crop of 1911 was received at Galveston from San Benito on June 10th. It was shipped by officers of the San Benito Land and Water Company, in Cameron county, on the St. Louis, Brownsville and Mexico Railroad. Last year the first Texas bale reached the market on June 22d.

The Universal Magazine Bracelet.

This is all the rage. And Adjustable Bracelet. The most elegant design and perfectly finished. It is not solid gold, but it is washed and plated and will stand the acid test. Its match cannot be purchased in country jewelry stores for any price. It is a duplicate of the latest Parisian creation made expressly for the purpose of using it as a subscription 'premium to the **Universal Magazine**. The **Universal Magazine** is a nice, bright, cheerful, illustrated monthly magazine of thirty-two pages, three columns to the page, containing home reading, stories, fashions, patterns and poetry—a splendid publication for the money. To anyone who will send us a money order for 50 cents we will send the **Universal Magazine** for two years, and we will send one elegant **Universal Magazine Bracelet**, postage free, as a subscription premium. Money returned if not satisfied. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**



Universal Magazine Bracelet.

WHY DON'T YOU?

Why don't you send for it and give it a chance to show you what it is, a chance to prove to you how good it is, a chance to prove what it can do for you? Why don't you cut out the coupon, fill in your name and address, and send it to us? That is all it takes. It will come to you by next post, ready for you to try, ready to do its work for you, everything prepaid. It is no bother to send for it, no bother to use it, to try it. Why don't you do it? You don't need to fill out any tiresome blanks, don't need to name a long list of symptoms, don't need to answer any questions, don't need to send any money. It is yours to try, simply for the asking. Why don't you? We don't care where you are, what your nationality, sex, religion or politics may be. We care only to know that you are sick, that you need Bodi-Tone, that you will try it. That is all. We are glad to send it to you without a penny, glad to take all the risk, glad to stand all the expense of the trial. It makes no difference what trouble you have, we are willing to take our chances on Bodi-Tone helping you in the same efficient way it has helped thousands afflicted with all manner of troubles. Why don't you send for it when you have all to win and nothing to lose? Why don't you sit down and do it now? Why don't you take this chance for health? Why don't you try it and learn how it cures?

Bodi-Tone

does just what its name means—*cures disease by toning all the body*, and we want you to try a box at our risk and see what it will do for *your* body. Bodi-Tone is a small, round tablet, that is taken three times every day. Each box contains seventy-five of these tablets, enough for twenty-five days' use, and we send you the full box without a penny in advance, so that you can try it and learn what it is, so you can learn how it works in the body, how it *cures stubborn diseases* by helping nature to tone every organ of the body. Tone is a little word, but it means a great deal, everything in health. When all the organs are doing their part, when each is acting in a perfectly natural and healthy manner, when the energy, strength and power of resistance to disease are all at a natural point, then the body is in proper tone. When disease has attacked any part, the tone of the entire physical body should be raised to the highest possible point, to make all the body help in the cure. This is the power which underlies all of Bodi-Tone's great work for the sick, this is the power it offers you to help you get new health and strength.

Not a Secret

Bodi-Tone is not a patent medicine, for its ingredients are not a secret. It contains Iron Phosphate, Gentian, Lithia, Chinese Rhubarb, Peruvian Bark, Nux Vomica, Oregon Grape Root, Cascara, Capsicum, Sarsaparilla and Golden Seal. Such ingredients guarantee its merit.

When you use Bodi-Tone you know just what you are using, know it is good and safe and know you are taking the kind of medicine to provide real help for the body. It is a pure remedy that satisfies the most exacting. It contains no narcotics or habit-forming drugs, nothing that your own family doctor will not endorse and say is a good thing. It does not depend on killing pain with cocaine, opium, morphine, or other dangerous drugs. It does not excite the body with alcohol, but it tones the body and cures its disorders with remedies Nature intended to tone and cure the body when that power was given them. Thus, Iron gives life and energy to the blood, Sarsaparilla drives out its impurities, Phosphate and Nux Vomica create new nerve energy and force, Lithia aids in the Kidneys, Gentian does invaluable work for the Stomach and Digestive forces, Chinese Rhubarb and Oregon Grape Root promote vigorous Liver activity, Peruvian Bark raises the tone of the entire system, Golden Seal soothes the inflamed membrane and checks Catarrhal discharges, Cascara gives the Bowels new life in a natural way, and Capsicum makes all more valuable by bettering their quick absorption into the blood. *A remarkable combination that does wonderful work for health.*

All for Health

Each one of these valuable ingredients in Bodi-Tone adds a needed element from nature to the body. Each has work to do and does it well. They are used because of this ability. We claim no credit for discovering the ingredients in Bodi-Tone, each of which has its own well-deserved place in the medical books of most of the civilized world. We simply claim the credit for the successful formula which we invented, for the way in which these valuable ingredients are combined, for the proportions used, for the curative force which thousands have found in Bodi-Tone, for the cures which make it different from other remedies. The curative forces which Bodi-Tone ably uses are the forces which have always existed in nature for the restoration of the body's health. Many are regularly prescribed in some form by the medical profession for various diseases and irregular conditions, being used either separately or in combinations with such drugs as each doctor may favor, for there are wide differences of opinion among the doctors of various schools. The *exact combination used in Bodi-Tone* is what gives it the power that makes possible the remarkable cures experienced by Bodi-Tone users, cures which prove the difference between Bodi-Tone and common remedies. That is why we want to send you a box on trial, for we know you will find it different and superior.

You Need It

If you are tired of ceaseless doctor bills and wearied of continual dosing without results, *you need Bodi-Tone right now.* If your local doctor has done you no aeal good, if you have given him a chance to do what he can and the ordinary medicinal combinations he used have failed, give this modern, scientific combination of special remedies a chance to show and prove what it can do for you. Its greatest triumphs have been among men and women with chronic ailments who had tried physicians and specialists at home and elsewhere without lasting benefit, and for this reason all chronic sufferers are invited to *try it at our risk.*

Bodi-Tone offers its valuable services to you right now, right from this page, if you are sick, if you need medicinal help, if your bodily organs are not acting as they should, if your body is not in right and natural tone. That is what Bodi-Tone is for—to restore health, vigor, vitality and strength by restoring tone to the body.

If there is anything wrong with your Kidneys, Bodi-Tone helps to restore tone to the Kidneys, helps to set them right. If there is anything wrong with your Stomach, Bodi-Tone helps to tone the Stomach, helps to set the wrong right. If there is anything wrong with your Nerves, your Blood, your Liver, your Bowels or your General System, the health-making ingredients in Bodi-Tone go right to work and keep on working day after day, exerting always a definite action that produces curative results of the kind sufferers appreciate. If you have Rheumatism, Bodi-Tone helps to eliminate the Uric Acid from the system while it restores tone to the Kidneys, Stomach and Blood, thereby preventing a continuance of Rheumatic poison and putting new activity into muscles, nerves and joints. Bodi-Tone should be used by all women suffering from any Female Ailment, for its toning properties have been found especially valuable in such ailments. Bodi-Tone should be used by all persons whose bodies are not up to the full maximum of natural vigor, strength and vitality, for its purpose is to restore the body to its highest plane by making health in every bodily function.

We Risk All

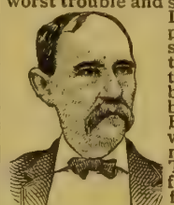
Why delay another day, when a trial of this proven medicine is yours for the asking. Why keep on suffering, when by clipping the coupon, filling in your name and address and mailing it to us, you can get a twenty-five days' treatment of this great remedy which has restored thousands to health. It just costs a stamp, and you don't pay a penny unless it benefits you. You take no chances, for the value and curative powers of Bodi-Tone have been amply proven by two years of glorious cures. It has been tested in thousands of cases, covering ailments in both sexes, at all ages.

Persons suffering from Rheumatism, Stomach trouble, Kidney, Liver and Bladder Ailments, Uric Acid Diseases, Female Troubles, Bowel, Blood and Skin Affections, Dropsy, Piles, Catarrh, Anaemia, Sleeplessness, LaGrippe, Pains, General Weakness and Nervous Breakdown, have tested Bodi-Tone and fully proven its great remedial value in such disorders.

Their experiences have proven beyond a shadow of doubt how the Bodi-Tone plan of *toning all the body* is a right plan that helps to *cure* these and other disorders, that it is *a real aid to nature.* Many who have for years been in poor health and have tried most all of the prominent medicines, have found that *one single box of Bodi-Tone* did more good than *all* the others combined. Others who had suffered for many months, and many for years, trying many doctors and specialists, found their first real benefit in Bodi-Tone, after all else had failed and hope was almost gone. It goes to the root in the body and cures because its work is rational and thorough, the only kind that makes cures permanent. Bodi-Tone makes the body right, with its maximum strength, vigor and vitality, which it may not have possessed for years previous, even when in fair health. Bodi-Tone works what seems a miracle by *putting tone where tone was needed.* Send the coupon and try a box.

BAD CATARRH CURED AT SIXTY-NINE YEARS.

ROYAL, ARK.—I suffered for years with Stomach Trouble, Indigestion and Catarrh of the Bladder, as a result of Malarial Fever. For the past eight years my worst trouble and suffering has been with my Bladder.



I had great difficulty at times in passing water, there being a painful smarting and burning, and at other times I would have difficulty in retaining it. My condition finally had become very serious, as slime and blood were passing, and I feared that Brights Disease had set in. I tried various remedies and doctors with no benefit until I read about Bodi-Tone in one of my papers and sent for a one dollar box. The results from this box were so satisfacory I ordered more Bodi-Tone and kept right on using it. I have now used three boxes, and with such great benefit that the Bladder trouble has entirely ceased. I am also much better in other ways. I am sixty-nine years old, and consider Bodi-Tone a remarkable medicine to do such good work for me at my age and in my serious condition. H. E. EVARTS.

HAD DROPSY, RHEUMATISM AND HEART TROUBLE.

OSCEOLA, IOWA.—Bodi-Tone has done everything for me. I had Dropsy, Heart Trouble, Rheumatism and Kidney Trouble. I would bloat very badly and feel very uncomfortable all of the time. I had spent so much money in doctoring that I had become discouraged, for I had been in poor health for many years. I learned of Bodi-Tone and decided to take it. Now I cannot speak too highly of it. I took it for a number of months and feel better in every way. My Rheumatism is gone, I do not become bloated as formerly and I can walk good and attend to my duties. It is a wonderful medicine for the sick, and every person who is troubled in any way ought to try it. MRS. MYRA CARTER.

Cured of Rheumatism and Stomach Trouble.

FAYETTE, MO.—Bodi-Tone has done for me what all other medicines failed to do. It has cured me of Rheumatism, which I have had for five years, and a Stomach trouble which had made me miserable for years. I feel like an altogether different person. J. WAYLAND

Trial Coupon

Clipped from National Farmer and Stock Grower

Bodi-Tone Company,
Hoyne and North Ave., Chicago, Ill.

I have read your offer of a dollar box of Bodi-Tone on 25 days' trial, and ask you to send me a box by return mail, postpaid. I will give it a fair trial and will send you $1.00 promptly when I am sure it has benefited me. If it does not help me I will not pay one penny and will owe you nothing. Neither I nor any member of my family have ever before used Bodi-Tone.

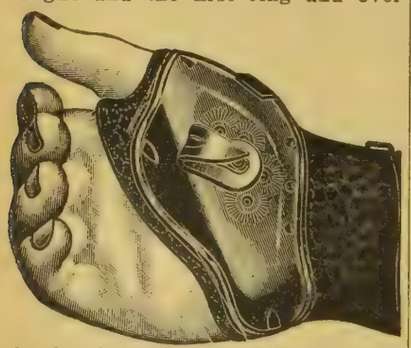
5 Cents a Copy. Published Monthly by The Hale Publishing Co. 50 Cents a Year.

and Stock GROWER

Favorite Corn Husker.

Clark's Corn King with its new self-shedding hook. The spear point enters the husks easily. The slant bend turns the husks for shredding, and the rounded, curved and beveled edges throw out the husks and prevent clogging. As this is the most approved husker on the market, we have selected it as a seasonable subscription premium. The hook sets at any angle; two positions for a thumb hook and five positions as a palm hook. Opening and closing the small end of the plate makes the adjustment perfect for any width of hand and prevents chafing. The strap passes through the leather tongue and the first ring and over



the hand to the opposite ring and back through the first ring. Be sure and have the strap enter the ring from the outer side. It brings the pulling strap underneath, forms the sinch draw and gives you the full benefit of the sinch-lock, which is the same as a half-hitch. The strap then passes to the last ring and then to the buckle; the half-hitch forms one fastening and the buckle holds the end of the strap. We will send The National Farmer and Stock Grower for one year and Clark's Corn King Husker for 50 cents. The Husker is a free premium. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Poor Results From Manure.

A La Porte county, Indiana, correspondent writes: "I have a small pasture which was manured very heavy last winter. The grass on it does not seem as good as it is on a field which has not been manured for three years. How do you acoount for it?"

It is likely that the manure was applied to this field so late that not much of its goodness has become available. Heavy applications of manure need more moisture than we have had this summer to bring it into a condition where it would benefit the ground and the growing crop. The lack of moisture really puts heavily-manured ground into worse condition than if no manure had been applied at all. So the poor condition of a heavily-manured pasture is not to be wondered at. Of course, the manure is not lost, for its effect will be seen in the crop next year.

A heavy application of manure upon a thin meadow or pasture, without following it up with heavy reseeding, is not a good practice. The richness of manure makes conditions favorable for the growth of weeds; so, if the ground is not fully occupied by grass roots, weed seeds germinate, and these thrive to the detriment of the grass. One wonders where all these weeds come from, and often a field is more weedy following a heavy application of manure than it ever was before.

It is a mistake to apply manure to meadows or pastures during late winter or early spring. I should apply it in the fall, so that it will get the benefit of the fall rains, and then the melting snow or spring rains will help break it up and the goodness will sink into the ground, when it is easily available. A heavy application of manure upon this grass land should be balanced with heavy reseeding, and this reseeding should be followed up for two years at least.

Many practice manuring grass land very lighty, upon the theory that this produces a thriftier growth of grass and it does not stimulate weeds so aggressively. But whatever practice is followed in manuring, the object should be to get the ground fully occupied with grass, and this calls for frequent reseeding. No amount of manure will revive dead grass roots. The thing to do is to make the conditions of the ground favorable for the growth of grass and then get it filled with grass as quickly as possible.—L. C. Brown.

Scattering Straw on Meadows.

A Starke county, Indiana, correspondent asks me if it will pay to scatter straw upon a meadow.

Putting straw back onto the land is a good thing, providing the straw is evenly distributed. Clover is clipped and the clippings are left as a mulch about the roots. This is considered a good thing, in that it not only enriches the ground, but the mulch affords an efficient winter protection for the grass roots. Straw serves the same purpose, but of course it is not as valuable as clover stems and leaves. There is another feature about the scattering of straw which should commend the practice. The light mulch helps to soften up the ground and in this way helps retain moisture.

It is quite a common practice all over Northern Indiana to scatter straw upon fields, and about the only difficulty is in getting it scattered thin enough. Last fall I observed some farmers in Starke county putting straw upon corn ground. That was not a good thing to do, and, as might have been expected, that straw has given no end of trouble this season. If straw is put upon ground which is to be plowed, it should be applied as early in the season as possible. This conservation of straw is a good thing, and the important thing is to scatter it so it will not interfere with other crops.—L. C. Brown.

MAP OF YOUR OWN STATE FREE.

Revised Series Indexed Pocket Map and Shippers' Guide Now Ready For All States and Territories and Containing the New Census.

These Maps are issued as supplements to The National Farmer and Stock Grower. They are on fine stiff paper, double strength; are 22x26 inches; printed in colors. They are folded to pocket size, 4x6½ inches, and contain full and complete information concerning all steam railroads, including all new lines built during the previous year, are shown—all proposed extensions are indicated. All stations and junctions are clearly marked.

All electric roads, including all new lines built during the previous year, are shown in red.

All new countries, boundary lines and changes in surveys are given. All new postoffices and express offices, thousands of which are established each year, are entered.

Population statistics, based on the latest federal census, are given for every city and village. By an index every postoffice can be found instantly.

Send us Fifty Cents to pay for one-year's subscription to The National Farmer and Stock Grower and you can select as a free supplement one of these Maps with booklets, which will be sent free, postpaid, safe delivery guaranteed. You can select any state, New York or California, Maine or California, Texas or Missouri. This offer holds good during the dull summer months to liven up business. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Mechanical Irrigation.

The International Harvester Company has issued an illustrated pamphlet entitled "Mechanical Irrigation." It is very interesting, showing both ancient and modern irrigation systems, also the different up-to-date methods of irrigation by flowing, flooding, seepage and sprinkling. Then there are thirty different illustrations of irrigation plants under different conditions, with engines of different sizes. At the end of the pamphlet the tabulations give complete information for the practical study of irrigation on the farm; for instance: "Power required to raise water; capacity of cylinder pumps; irrigation quantity tables; friction of water in pipes, etc." To obtain a free copy of this pamphlet address International Harvester Company, Chicago, Ill.

Endurance of the Horse.

From Geneva, Switzerland, July 15th, it was reported that Captain Paun, of the Roumanian Army, who is riding across Europe from Bucharest to Paris, to which capital he has been dispatched on a special mission, arrived recently at Lausanne. He rides the same horse, while a second young horse carries the luggage. All were in the best condition after crossing the Tyrolese Mountains, St. Gothard, the Furka passes and the great Scheidegg. The highest altitudes reached were between 7,000 and 8,000 feet, where deep snow and occasional snow storms retarded the journey. It took Captain Paun forty days to reach Lausanne, whence he departed after a short rest for Paris. The distance between the two capitals in a beeline is 1,300 miles.

English Formulas For Making Cements.

A.—Plaster of Paris mixed with water and a cold solution of alum is a good cement for stoneware, sets slowly and becomes quite hard.

B.—A lime cement for connecting water pipes, baths, etc., is made by mixing two-thirds fine brick dust, two-thirds unslaked lime and two-thirds hammer-slag together, and afterwards stirring up with lye or hot oil to a stiff dough.

C.—For closing the joints of stoves and boilers a useful cement can be made by mixing two parts fine coal ashes with one part common salt. Add sufficient water to form a paste and apply immediately.

Iron Cements.—Take twenty-four pounds iron filings or borings, four ounces sal ammoniac and two ounces of sulphur. The filings are rapidly oxidized and the escape of carbonic acid increases the volume of the cement and completely fills the crevices.

Take fifteen parts iron filings, five parts clay and one part salt; add vinegar and stir to form a magma. Will stand heat.

Thinking of Sacrifice Sales.

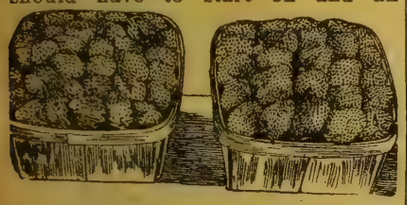
Mrs. Bargandy (at ball game)—"Dear me! What a miserable little hit that is! He ought to be ashamed of himself."

Bargandy (excitedly)—"Why, you marble-top, that's a sacrifice!"

Mrs. Bargandy—"O-o-oh! And is that why so many players rush to it?"

The Strawberry Culturist.

This is a handy little jewel of a book. It is by Andrew S. Fuller, one of the greatest horticulturists. It contains all the necessary information to enable everybody to raise their own strawberries. It is fully illustrated; bound in flexible cloth; is 5x7 inches. The strawberry crop is equal to all the other small fruit crops combined. This little book contains that which a beginner should have to start on and an



expert needs to rely on. We will send a copy of the Strawberry Culturist post free by mail and The National Farmer and Stock Grower for one year for Sixty Cents. This is a splendid opportunity to get a good book for the cost of postage. An average crop of strawberries is 1,701 quarts to the acre. Address, **THE HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

More Fruit Trees.

A large percentage of farms do not grow the fruit used in the family. They have the apple orchard, with possibly a few stray trees of other varieties; but when fruit-canning time comes, a bushel of fruit is bought here and another there, perhaps with the self-consoling words that it is cheaper than to raise it.

This may seem true of almost anything consumed on the farm. And yet, where would the owner be at the end of the year by applying the rule generally? Besides, if a bushel of strawberries is purchased, we think the allowance a fairly liberal one; but if they are raised, several bushels will be consumed, and the family the better off for the variety.

Almost everyone considers peaches a luxury; and yet it is strange how few grow their own fruit. Even though you do not happen to be in the fruit belt, where growing them for market is profitable, if your neighbors can raise enough for family use, you ought to be able to do as well.

A large majority of the trees which furnish for home use came from seed. The feminine side of the house is usually the one to thank, too. What if the crop is not a sure one every year, when the trees can be raised so as to cost only the space occupied—her time being a factor omitted—a woman sees possibilities in planting the peach pit.

Some of the finest peaches in cultivation have come from seed. Of course, the trees do not as a rule produce the same fruit as the ancestral tree; but even here we note the advantage in pedigree. The extra fine peach stone is more apt to produce choice fruit than the dull fruit. And even when you buy budded trees, they are sometimes disappointing.

The largest peaches that we ever saw outside of the professional ranks came from a seed. It was one of the Crawford's Early; but, unlike the parent, it was a very late peach, ripening about the time the snow fell; but it was much larger than any Crawford's Early, and with the rich yellow flesh, which is a favorite for canning. As a rule, seedling fruit trees do not pay; but it does pay to grow your own peaches in this way.

Select seeds only from the choicest fruit. Put them in a bag and place out doors during the winter, where they will freeze enough to split the stones. Plant in spring. In a year or two they are ready to transplant, and in a few years you have a profitable bearing orchard. If some of the fruit proves of little value, remove the trees and replace with something better. While the objection is made that peach trees are short-lived, on the other hand they mature quickly.

Plum trees are equally desirable, and almost as easily grown. Unless you have a good outlet for them, guard against stocking up too heavily. A few trees will suffice for family use, selecting varieties which mature at different seasons, when they can be sprayed thoroughly, thus insuring a good crop.

Pears should also be included in this list. But do not attempt to grow them from seed, for a puckery or tasteless pear is about as worthless a fruit as can be found. Select standard sorts and deal with a reliable nurseryman. Pear trees may seem expensive, yet when we stop to consider, a good one pays for itself many times over, and the fruit of even one year is enough to make things even to the buyer.

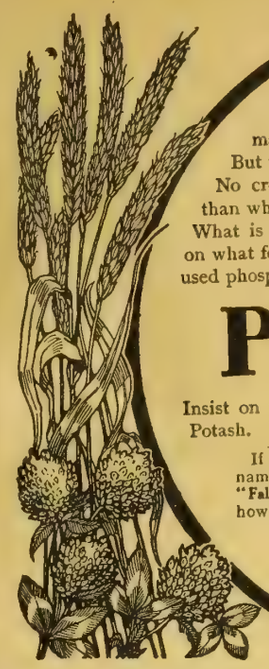
Cherries are delicious, and easily grown, insuring a crop before any fruit but the strawberry is ready. But do not think that one or two trees will suffice. You do not wish to quarrel with your best friends, the birds, and they are bound to take their toll for the insects they have destroyed. Plant enough for the birds, too. You will then be glad to see them enjoy the feast with you.—Bessie L. Putnam.

Sow Late Crops.

Keep sowing. With seared pastures and scant meadows and poor straw, the forage situation is the big August problem. Hungarian, amber cane, turnips and cowpeas may still be sown. Barley will come on and make fall feed. Vetches, crimson clover and fall rye will help some late in the fall. And then corn will take the place of other forage, if it is handled properly. The man who has a silo need not worry very much over short hay crops. The situation is so critical now that it will not do to take further chances. Save the straw, and by all means get ready to save the corn fodder. It is now time for quick and decisive work.—L. C. Brown.

The Lumber Trust.

A few years ago mention was made of the fact that a number of firms had engaged in the business of selling lumber, mill work and house-construction material direct to farmers on the basis of quick sales and small profits. Some of the firms that we have advertised were the Chicago House Wrecking Co., Montgomery Ward & Co., Sears, Roebuck & Co., and Gordon-Van Tine Co., all first-class, honorable houses that have done much good in placing the house and barn construction material on the market as they did. That is what is usually called mail order business, and the wholesale and retail lumber companies, organized in what is now called a trust, appear to have been determined that farmers should not have the benefit of buying direct from the mail order houses. The trust thereupon instituted a boycott against a number of firms, and said trust is charged with doing some very dirty work. As we anticipated and hoped for, fourteen secretaries of different lumber associations are now under indictment for conspiracy, and we will await the outcome with confidence that justice will be done. In the meantime, although the boycotted firms have had many a battle to fight against all kinds of persecutions, they are still doing business direct with farmers and are determined to do so to the end.



Wheat and Clover

Many farmers stick to wheat raising mainly because clover follows it in the rotation. But why not get the best possible out of both crops? No crop returns better profit for the right fertilizer than wheat.

What is the right fertilizer? That depends on the soil and on what fertilizer you have used on it. The longer you have used phosphate the sooner it will pay you to balance it with

POTASH

Insist on your wheat fertilizer containing 6 to 8 per cent. of Potash. **Potash Pays** on both wheat and clover.

If your dealer does not carry Potash, write us for prices, naming quantity needed, and ask for our free books, "**Fall Fertilizers**" and "**Home Mixing.**" They will show you how to save money and increase profits.

The Sheep Census.

The sheep census of the year 1900 was taken on June 1st after lambing and the sheep census of 1900 was taken April 1st during lambing. In the year 1910 the total was 51,638,590 head on farms and ranches in the United States, made up of 29,707,000 ewes, 7,148,366 rams and wethers, 2,614,946 unclassified, and a half lamb crop amounting to 12,168,278 head, against a total in the year 1900 of 61,503,713 head of sheep and lambs, consisting of 31,857,652 ewes, 7,995,315 rams and wethers, 825 unclassified, and a full lamb crop of 21,650,746 head. Had both enumerations been taken on the same date the total figures for 1900 and 1910 would not be far apart.

In ten years the number of farms and ranches raising sheep decreased from 763,518 in 1900 to 608,363 in 1910. In the North Atlantic division the decrease was 48,907 farms; in the South Atlantic division the decrease was 30,146 farms; in the South Central division the decrease was 44,440 farms; and in the North Central division the decrease was 32,240 farms. In the Western division, mostly ranch country, there was a small increase of 578 sheep-raising farms. The total decrease in ten years was 155,155 farms that abandoned sheep raising, and the remarkable feature is that there was no actual decrease in the total of mature sheep in the country.

One fact worthy of notice is shown by market reports and not by the census. At Chicago, St. Louis, Kansas City and Omaha, in the year 1900, 6,102,255 sheep and lambs were sold; and in the year 1910, at the same four markets, 10,790,959 sheep and lambs were sold. Formerly sheep were kept longer, but there is quicker action now by the breeding of younger stock, earlier maturity and the enlarged marketing of lambs.

BALED HAY PAYS BEST.

Our readers have probably noticed the advertisements of the Collins Plow Company, of Quincy, Ill., advertising their "Eli" Baling Presses. These advertisements are of interest to every farmer who raises hay to any extent at all, for they tell about "Eli" Baling Presses and they invite you to write for the "Eli" Baling Press Book, which tells all of the facts about these excellent hay presses, and this book also tells you all the reasons why you should bale your hay, whether you feed it or sell it.

Baled hay is actually worth 25 to 30 per cent. more than loose hay, whether you keep it on the farm or whether you ship it. Baled hay takes up much less room, is much easier handled and preserves the nutritious qualities of the hay in better shape than loose hay. If you stack your hay you know how much is wasted by sun, wind and rain. This waste often amounts to 20 per cent. Then, again, loose hay must always be sold near home. It cannot be shipped to a distance, and the local dealer knows this and pays you his price. Baled hay can be shipped anywhere at any time. You can hold it in your barn for top prices and sell where you get the highest price. There are so many advantages of baling your hay and it is so easily done that there is absolutely no reason why an "Eli" Baling Press will not pay you a big dividend. You can do custom baling for your neighbors or rent your press at a good profit. Why not get the facts anyway? Write to the Collins Plow Company at 2014 Hampshire street, Quincy, Ill., for their new big book, which will surely interest you. A postal request will do, and it may be the means of your making a lot of extra profit from your hay crop over what you made last year. Write the postal now.

Belgium, in Europe, is stated to have increased the wheat crop fourteen bushels, barley nineteen bushels, oats twenty-two bushels and potatoes seventy-five bushels per acre by a system of agricultural education.

Dried Fruit at St. Louis.

Late in July, new evaporated apples were beginning to arrive. The market was bare of stock and a large demand to be supplied. Surely a great inducement for farmers to save and cure all available fruit. Light sales reported as follows: Evaporated ring apples from 9½c. for poor to 12½c. for prime; peelings at 3c.; chops at 5c.; sun-dried apples worth 6 and 7c., and sun-dried peaches at 6 and 6½c. Sales: Fifteen and ten sacks rather poor evaporated rings at 10c.; three do. at 10¼c.; twelve sacks chops (mixed with pears) at 3c.; six sacks chops at at 4c.; peelings at 3c.

St. Louis Root Quotations.

Country shipments of roots for sale on the St. Louis market, late in July. Quote by the pound: Golden Seal at $2.85; Lady Slipper, 15c.; Seneca, 32c.; Pink, 18c.; Black, 6c.; May Apple, 3½c.; Snake, 22c.; Kansas Black Snake (Echinacea) 12c.; do. Oklahoma, 8c.; and Missouri not wanted; Angelica, 5c.; Wahoo—Bark of root, 20c.; bark of tree, 4c.; Blood, 4½c.; Blueflag, 5c.; Sassafras—Bark of root, 5c.; Wild Ginger, 8c.; Spikenard, 3c.; Skullcap, 7c.; Ginseng—Wild, $5.50 to $5.75, and cultivated $5.25 to $5.50.

Some Principles of Weed Control.

[By B. O. Longyear, Colorado Agricultural College, Fort Collins.]

Weeds may be roughly divided into two classes: Those which grow and spread entirely from seed, and those which, in addition to this, propagate by means of perennial roots or underground stems. The first class is made up largely of annuals, plants which start from seed, produce flowers and ripen seeds the same season, after which the whole parent plant dies. The pigweeds, tumbleweeds, marsh elder, wild sunflower and mild mustard are examples of such weeds. They are best controlled by rooting them up when young, as in hoeing, cultivating, pulling by hand, and, in some cases, by chemical sprays. To prevent their going to seed is the principal thing.

In the second class are found the poverty weed, iron weed, Canada thistle and field morning glory. Such plants, when once established, are very persistent and constitute our worst weed pests. When cut off or pulled up, new sprouts soon appear from the underground parts, while cultivation in the ordinary way often serves to scatter pieces of the plant to other parts of the field, where they may take root. The only remedy consists in digging out and removing every part of the plant, in choking it out by means of some stronger growing crop plant, such as alfalfa, or by starving the underground parts of the plant. The last method is accomplished most frequently by careful and constant hand hoeing and pulling, on small areas, supplemented by thorough cultivation on large areas. To be effective this method requires that every sprout which comes above the surface be cut off, or pulled, or otherwise destroyed.

The food of such plants is manufactured in the leaves that come to the light, hence if every sprout is cut off before the leaves have time to get to work, it is merely a question of one or two seasons until the underground parts are no longer able to put up new sprouts.

Anything that kills the foliage will also accomplish the same thing. Unfortunately, most of these plants are not greatly injured by chemicals other than those that are poisonous also to animal life.

Turning the infested area into a sheep or hog pasture for two or three years, especially if the animals are somewhat crowded, has been found effective in some cases, such as land infested with the field morning glory.

In any case, persistent, thorough work is necessary to success in eradicating weed pests of this character, and the best time to begin is just as soon as the weed is discovered and before it covers large areas.

Corn Market Situation.

There is no depressing Canadian influence in the corn market. It may be that wheat growing will decrease in the United States in consequence of the Canadian invasion, but corn will not decrease. On July 31st, at St. Louis, cash corn sold at 65 cents early in the day and at 64 cents a bushel later. These are the highest closing cash prices for corn at St. Louis since last July.

At Chicago the July option, which closed last November at 47⅞ cents, was closed out at 62⅛ cents a bushel, a difference of 14¼ cents a bushel. The September option, which closed February 28th at 49½ cents, was quoted at 63¾ cents at the close of business, July 31st. The December option, which on November 30th was closed at 44¼ cents, was closed on July 31st at 61½ cents.

In reviewing these grain markets on the last day of each month we endeavor to make a clear statement of facts. We are reminded of a wool merchant in Boston who was bright and clever to all appearances and yet he was so often on the wrong side of the market that he failed in business. He was not satisfied to leave the market without an explanation, and he went to a Hebrew trader who was quite successful and asked him to explain matters. "Oh," said the Jewish trader, "that is easy; you are always trying to find out how the market ought to be; I am trying to find out how it is." The traders who buy and sell grain do not wait upon anybody else; they act on the minute and upon the facts that they have in possession; they study the weather and crop conditions, and they study human nature and the time it requires to remove grain from one point to another; they study money matters and keep posted to the minute, yet the best of them make mistakes. One thing they respect, and that is the quotation. On July 31st, at the close of the market, No. 2 corn for delivery on May 31st next year, was quoted at 63¾ cents a bushel. It means that the average opinion of the entire Board of Trade at the close of the market July 31st was that ten months hence corn will still be worth 63¾ cents a bushel for delivery on the Chicago market.

What we now need is a City Life Commission to report upon the way the people in the cities are living. There is very much more poverty, ignorance and incapacity in the cities than in the country. The country boys can make a living, no matter where they land, and that is more than can truthfully be said of boys of city raising.

Australia is prospering under the protective-tariff system. That, however, is no reason why we should admit Australian wools into the United States free of duty.

Many of the very best farmers had to start on wild land and chop the farms out of the wilderness. The only way to judge results is to form a good idea of the beginning.

Missouri Melon Crop.

Estimates based upon railroad and express returns indicate that in the year 1910 the state of Missouri produced 7,878,000 watermelons of the dark-green variety, each filled to the overflowing with rich, red meat and as sweet and tasty as nature can make them.

At an average wholesale price of 11 cents each, this crop was worth $860,580 to the growers. With a crop of cantaloupes for the same year worth $350,000, it means $1,126,580 worth of melons were grown in Missouri in 1910. Labor Commissioner Austin W. Biggs, in a Red Book bulletin, gives the information.

So favorable is the climate and the soil of Missouri for watermelons that about ninety counties produce them, but the majority produce only enough for home consumption. More would be raised if farmers knew there is a market for all they can ship out.

The banner watermelon section is in the southeast, not many miles below Cape Girardeau. Scott, Mississippi and Dunklin counties in 1910 marketed 3,742,200 melons, which sold for $411,642. With 500,000 melons coming from other counties in the same vicinity, this leaves about 3,636,000 for the remainder of the state.

Farmers all along the Mississippi, Missouri, Gasconade, Osage and other streams with rich, sandy bottom lands, have melon patches which help to produce the remaining millions.

Missouri watermelons are rushed to St. Louis, Chicago, Kansas City, Topeka, Indianapolis, St. Paul, Milwaukee, Minneapolis and other large Northern commercial centers, and are sold there for from 15 to 40 cents each.

Scott county marketed 1,823 cars, each car averaging 25,000 pounds, which makes the total weight, with some scattering smaller shipments added, 45,927,177 pounds. Blodgett, a small community, sent out 725 car-loads, and Morley 363 car-loads. Diehlstadt is credited with 158 car-loads; Benton, 215; Oran, 18; Sikeston, 135; McMullen, 78; and Brooks Junction, 97 car-loads.

In cantaloupes Morley shipped out 36 cars, weighing a total of 900,000 pounds. Dunklin county, besides being Missouri's banner cotton center, also has a reputation for its watermelons and cantaloupes. To advertise this end of the state and its resources, in 1910, many car-loads of melons were sent out gratis to different portions of Missouri. Attorney C. P. Hawkins, of Kennett, who has several times represented this county in the State Legislature, sent two car-loads to Jefferson City with his complimtnts.

The watermelon center of Dunklin county is around Clarkton, which town in 1910 shipped 337 car-loads, weighing 8,425,000 pounds. Frisbee shipped out 90 car-loads; Kennett, 20; Gibson, 27; Holcomb, 77; Malden, 137; and Phillips, 50.

Many car-loads of cantaloupes, all iced and ready for the market, went out from Dunklin county during last summer. The Clarkton returns indicate that twenty cars, each loaded to the brim, were shipped from there alone.

Oliver Chilled Plow Company.

During the month of July a contract was let to erect a six-story concrete building at Broadway and Warren street for the Oliver Chilled Plow Company, of South Bend, Ind. The contractor is a South Bend company. The St. Louis branch of the company recently sold the building at Twenty-second street and Scott avenue, which it has occupied for a number of years, and will join the group of agricultural implement houses which have located on North Broadway within the last few years. The new building is to be completed about January 1.

Figuring on Sheep.

From Ogden, Utah, July 29th, it was reported that W. C. Barnes, representing President Taft and the Tariff Board in checking up the information gathered by special agents of the government on wool and sheep industries, arrived in Ogden that morning, after visiting four of the largest sheep states of the West.

In a statement that day he says the data obtained proves that sheep can be raised, wool clipped and marketed and lambs disposed of at a cost of $1.50 a head, the annual revenue from which with wool at 13 cents, totals $3.31, leaving a profit of $1.81 a head. His figures follow:

Cost a head to raise sheep, all expenses incident to grazing, herding, shearing, dipping, lambing, freight on wool and mutton, interest on money invested, etc., $1.50.

Average clip of wool, per head, 7 pounds, at an average of 13 cents per pound, delivered, 91 cents.

Average price of lambs, $3.00; average increase being figured at about 80 per cent., placed on market, $2.40.

Total receipts, $3.31.

Total net receipts, per head, $1.81.

Mr. Barnes says that there may be a slight variation by states in the cost of raising sheep, and in marketable value as to the wool clip, lambs and mutton, but that the figures show the average in the territory over which he has traveled. He suggests that the cost of raising sheep might be reduced considerably by better business methods.

(Note by the Editor.—The farmer who owns and raises sheep for the purpose of earning an honest living produces meat and clothing for the people. Whenever the government passes laws to injure such an industry Congress destroys that which it cannot restore. Sheep raisers are not obliged to raise sheep, and it is easier to dispose of a flock than to start another one. A discouraged sheep raiser ought not to be expected to have more patriotism than a Congressman.

Oats and Horses.

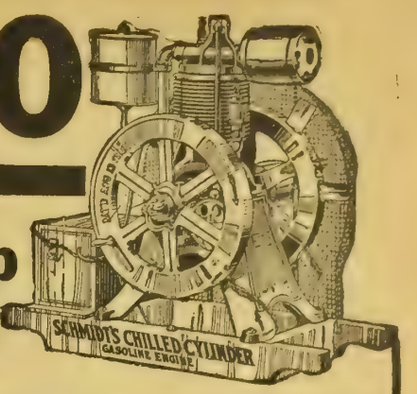
The oat crop ranks third in importance among cereals in the United States.

The weight of oats varies greatly. For illustration I may state that it is often found that a bushel measure full of Southern oats may weigh only twenty or twenty-five pounds, while our Western oats weigh more, as a rule, than the legal thirty-two pounds designated by the laws of the various states as constituting a bushel. It is estimated that the hull constitutes about 24 to 48 per cent. of the entire weight of the grain.

As to feeding value, we find that the oat grain contains a higher proportion of digestible protein (muscle-building material) than does corn or wheat, while the other extract (fat-forming materials) exceeds that of wheat and nearly equals that of corn. This grain in itself contains a well-balanced ration for the horse. The mettle shown by horses fed on oats has caused some people to believe that this grain contains a stimulating principle. Some chemists and experimenters claim to have isolated from the grain a stimulating principle which has been called Avinine.

New oats will soon be on the market for feed. Old oats are usually so called after they have gone through the sweat. There is a change which takes place in this sweating process, because of which old oats may be fed without fear of danger to the digestion of the horse. Not so with new oats. Care must be taken in feeding new oats, or oats, in other words, that have not gone through the sweat. New oats are not fit to feed hard-working horses. They loosen the bowels of the horses, soften the horses, make them sweat easily, and in general put them out of condition. Often colic results. —B. F. Kaupp, Pathologist, Colorado Agricultural College.

$7.50



And You Keep This Great Engine

Yes, sir, that's right—you keep this engine for $7.50, a wonderful gasoline engine offer, an offer without a parallel. We ship you Schmidt's Chilled Cylinder Gasoline Engine on your simple request without an order or any promise from you. You use the engine 10 entire days, use it all you want to. Then if you don't want it, send it back at our expense. If you do wish to keep it, pay us **only $7.50 and the rest in the easiest monthly payments. We send you the engine free,** to prove that it is the greatest **air cooled** 3 horse power engine on earth. It is the only engine with the marvelous, powerful **chilled cylinder.** The only engine for farm use with a **spark retarder.** The new type gasoline engine that has revolutionized the gasoline engine industry. The only engine good enough to send out on **actual free trial** without a cent down in any way.

Ten Days' Trial FREE

This is the first genuine free trial ever offered on gasoline engines for farm and shop use. We want you to see that women and children can run this engine. Use the engine to run any machinery you have—the pump—separator—washing machine—corn sheller—grinder—anything. Engine is ready to run when you get it. We will send you prepaid our sensational offer and our very useful book "How to Use Power" free.

Long Time to Pay

If you like this engine after trying it out for ten whole days you can keep it and take long time to pay for it on **easy monthly payments,** or after using it free for ten days, just send it back at our expense.

Makes Woman's Work Light and Easy

5 Years Guarantee Schmidt's Chilled Cylinder Gasoline Engine is absolutely guaranteed for 5 years in every piece and part. The biggest bank in Iowa backs our $1,000 challenge offer.

How to Use Power To all who will write promptly we will send our useful book "How to Use Power" free. Send us your name and address today.

Schmidt Bros. Co. Engine Works, Dept. 313 X, **Davenport, Iowa**

"Put It in the Sermon."

"Dr. J. H. Jowett believes it is the minister's, not the congregation's, fault if the church doesn't go."

The speaker, a member of the Fifth Avenue Presbyterian Church in New York, smiled and continued:

"Dr. Jowett once told me that he sided with an old lady who always went to sleep during the sermon time.

"'Why don't you take snuff during the sermon?' the minister said to her. 'That will keep you awake.'

"'Why don't you put the snuff in your sermon, sir?' retorted the old lady.'"—Pittsburg Gazette-Times.

How He Escaped.

"I understand," said the special correspondent to the long, lank, bewhiskered native of Adams county, Ohio, "that you are the only man in your section who was not indicted for accepting a bribe for his vote at the last election."

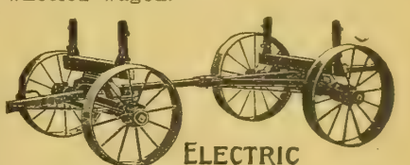
"That's right, sir," replied the native.

"Would you object to telling me your reasons for not taking a bribe? You see, you being the only man who didn't sell his vote, anything you have to say will be—"

"I didn't know a thing about 'em buyin' votes. I was up in Logan county visitin' my sick son an' missed the election."—Chicago Post.

The Low Handy Wagon.

With the coming on of fall work the advantages of the low-down handy wagon become more and more apparent. No one who has ever used one of the low wagons, or has ever seen them in use, can fail to see the disadvantages the man works under who still uses the old-style high-wheeled wagon.



In advocating the use of low wagons, the mind naturally turns to the Electric Handy Wagon. So many of these wagons have been sold that they are becoming a familiar sight in the country. They are so well built, are so strong and their lasting qualities are so great that we are fully persuaded one should be found on every farm. For full particulars write to Electric Wheel Company, Box 40, Quincy, Ill.

The Rock Island Lines in the past eleven months have operated agricultural trains in ten states. These trains have covered 10,640 miles, have been operated eighty working days and on them have been held 682 meetings with a total attendance of 172,893.

The Indiana State Fair opens at Indianapolis, September 4th, and the Nebraska State Fair opens on same date at Lincoln.

KANSAS CITY VETERINARY COLLEGE

Thorough and complete course. Great Demand for Graduates as Practitioners, Teachers, Investigators, Sanitary Officers, Army Veterinarians, U. S. Inspectors. Catalog and other information sent on application.
DR. S. STEWART, Secretary, **1312 East 15th Street, Kansas City, Mo.**

Younger Nursery Stock.

It is very interesting to observe the change which has been taking place in reference to the age of nursery stock used in orchard planting. Twenty-five years ago a three-year apple formed the demand which ruled widely and generally. The same age ruled in the case of the pear and the plum. With the peach two-year-old trees were set, but with the others the tendency was all towards the older grades.

During the past ten years, as orcharding has become more distinctly commercial, a decided change has taken place, and the three-year-old tree is the marked exception, while the one-year-old tree in the stone fruits and the pear is the ruling demand. This is partly due to the fact that nurserymen now grow better trees than they formerly did, they being larger at one year old than they were formerly at two years old. Then again, it has been learned that there is little gained in using the larger stock. The orchardist is taking a larger share in the heading of his trees and to this end he begins their training at an earlier age. This practice is sometimes carried to an extreme, as in the case of using June buds in planting peaches, but on the whole the tendency is making for progress in fruit growing.—National Nurseryman.

Thinning Apples.

[By R. S. Herrick, Field Horticulturist, Colorado Agricultural College, Fort Collins.]

It is time that trees that are heavily loaded with fruit were thinned. There are several reasons for thinning, the following being the principal ones: First, maintaining the vigor of the trees; second, securing annual crops instead of alternate; third, to be able to produce fruit of maximum size, color and quality.

For thinning purposes, apples may be divided in two classes, viz.:

Those, such as the Winesap and Missouri Pippin, which, when the tree is loaded, do not attain sufficient size for the better grade of pack; and those like the Ben Davis type, which generally attain sufficient size, but often so weaken the vitality of the tree as to cause it to become a "shy bearer" the next year. With proper pruning and thinning these difficulties can be overcome to a large extent. We believe that props have no place in the orchard and are only a sign of very poor orchard management.

Study each tree individually and thin so that at picking time the tree will hold up well under a load of uniform, good-sized apples. Apples of the Winesap type should be thinned to a distance of from nine to ten inches. Fruit of a larger growing type could be left a little closer.

In thinning, take off all terminal apples on long, slender branches and break all doubles. Take off all wormy apples and all those that are much smaller than the average. Take off all limb-bruised or badly frost-marked apples, and also those that are likely to become limb-bruised as they grow in size. Leave the apples in singles and in such a position that they can have the best chance to grow in size, color and uniformity, and be as free as possible from blemish.

Imports and Exports.

Dutiable imports decreased fifty-two millions of dollars and imports free of duty increased twenty-seven millions of dollars. That is the import statement comparing the year ending June 30th, 1911, with the year ending June 30th, 1910. Our excess of exports during the year ending June 30th, 1910, was only $520,000,000 over the imports, and that is no sign of prosperity; in five of the years previous exports were larger, and as far back as 1898 our exports exceeded imports by $615,000,000. The balance of trade will soon be against us, and our representatives and Senators in Congress will be responsible for it.

The American Royal.

The Thirteenth Annual American Royal Live Stock Show will be held at the Kansas City Stock Yards, October 9th to 14th, 1911, in the American Royal Pavilion and in new buildings now being erected. The Horse Show, for several years a big feature, will be held five nights, beginning Monday, October 9th.

The Illinois Legislature appropriated $20,000 to the Agricultural College to purchase forty acres of land to establish a poultry plant. A committee, consisting of Geo. A.Heyl, D. T. Heimlich, H. C. Wilhits, Col. C. F. Mills and John L. Waddell, was named by the association as an Advisory Committee.

THREE-YEAR SUBSCRIPTIONS.

Orders For The National Farmer and Stock Grower Solicited.

Kindly Sign the Blank Form Below and Become a Regular Subscriber.

We desire to invite attention to our three-year subscription proposition. We hope to obtain one hundred thousand additional subscriptions during the present year to continue for three years. It is practically a trial subscription and payable at the end of the first year. The subscription can be stopped at any time by paying for the period the paper is taken. This method of taking subscriptions is the invention of Uncle Piper, our subscription editor, who has guaranteed that every one of them will be paid when they are due. The subscription price of this paper is $1.00 for three years, and the bill for the subscription is sent to the subscriber at the end of the first year. When the bill goes out Uncle Piper slips in a list of handy premiums for the subscriber to select one from, providing he pays the bill promptly, and the general result is that the bill is soon paid. When it comes to getting subscriptions from intelligent, high-class farmers, Uncle Piper is at the head of the class.

Uncle Piper.

SUBSCRIPTION BLANK.

To the Hale Publishing Co., 3550 Vista Ave., St. Louis, Mo.:

Gentlemen: — You are hereby authorized to enter my name as a subscriber to The National Farmer and Stock Grower for three years. At the end of the first year I will pay One Dollar for the three-year period. This order is given with the understanding that I am at liberty to stop the paper at any time by paying the subscription to that date.

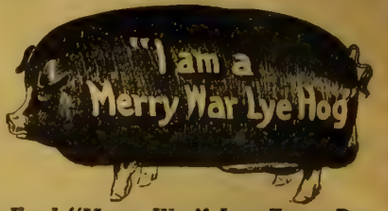
No Sick, Scrawny, Runty Hogs When Merry War Lye Is Fed

Every farmer knows that if he can keep his hogs on their feed and free from worms he need not worry about his pork profits.

Thousands of farmers all over the country have learned by experience that MERRY WAR LYE is the best and cheapest hog conditioner in the world. It makes sick hogs well and thin hogs fat.



How Adam Schultz of McLouth, Kansas Conditioned His Herd—

"Before I began feeding MERRY WAR LYE my hogs did not eat as they should and they looked rough. Sometimes some of them would not eat at all, and some would eat a little and then go off and lay down; but after I had fed MERRY WAR LYE about eight or ten days, I could see a marked improvement in my herd. They began to all come out at meal time and take a hold as they should to eat, and they now look sleek and thrifty. I consider MERRY WAR LYE the best remedy I have ever used, and the cheapest. I have spent a good deal of money at times, but I never got the results from any of the so-called Hog Cholera and Worm Cure remedies as I have from MERRY WAR LYE."

Not An Expense

MERRY WAR LYE is not an expense. It is an investment that yields an actual profit, because it not only prevents hog losses from Cholera, Worms, etc., but also puts on many pounds of good healthy flesh and fat.

Feed "Merry War" Lye Every Day

The best thing you can possibly do to insure your pork profits is to feed MERRY WAR LYE EVERY DAY, just as regularly as you would the ordinary ration of swill or dry feed. Try it today. It will make your hogs fat quicker than anything else.

IMPORTANT WARNING!

Don't infer that ordinary, or regular lye can be used as a hog remedy.

MERRY WAR LYE is prepared ESPECIALLY as a hog remedy and it is the only lye that is guaranteed to be absolutely safe to feed to hogs.

Save These Directions

Follow these directions carefully: Mix one tablespoonful MERRY WAR LYE with slop for 10 hogs, or ½ can with barrel of swill. Stir well and feed night and morning. If your hogs are on a dry feed ration, mix ½ can MERRY WAR LYE to each barrel drinking water.

At All Leading Dealers

Most dealers handle MERRY WAR LYE. If yours can't supply you, write us, stating your dealers' names, and we will see that you are supplied and will also send you, free, a valuable booklet on, "HOW TO GET THE BIGGEST PROFITS FROM HOG RAISING."

MERRY WAR POWDERED LYE comes in 10c cans, full case of 4 dozen cans for $4.80, at Grocers', Druggists' and Feed Dealers'. There are no substitutes.

E. Myers Lye Co., Dept. 22 St. Louis, Mo.

Rice as a Summer Food.

We do not, as a people, appreciate rice as a food, especially as a summer food. It is nourishing but not heating. It more than takes the place of potatoes, supplying more nutriment and less heat than they do. And rice can be used in such a variety of ways. If any woman reader has been cooking it just one way she may be interested in trying some of these recipes:

Breakfast Cereal.—Have ready boiling water in a large kettle; add to this the desired amount of rice and a seasoning of salt. Cover tightly and boil for twenty minutes, then strain off the water, place back the rice on the flame for a moment and toss it about with a fork. If rightly done, each grain of rice should be separate from the others and yet be soft and well done. Serve this cereal with butter and sugar or cream and sugar.

Tomato Rice.—Cook the rice the same as above, but when finished add to it tomatoes (about one-half the quantity of the rice) that have been stewed for a few minutes and seasoned generously with butter, salt and a dash of red pepper; stir all together and cook for several minutes. It is good served hot or cold.

Creole Rice.—Slice several good-sized onions and fry in lard; heat two tablespoons of butter and brown in it one tablespoon of flour; stir rice, which has been cooked as for the cereal, into the pan containing the browned flour, add the onions and a Spanish pepper that has been cooked and chopped; or, if the pepper is not convenient, add a cupful of tomato seasoned with red pepper.

Rice Pudding.—To one quart of rich milk add one cup of rice, one beaten egg, one-half cup of sugar, one-half teaspoon of salt and a seasoning of cinnamon; place this in the oven and bake for four or five hours. The rice will become so dissolved in the milk as to make a creamy, custard-like pudding. — Janet Thomas Van Osdel.

Clever Roping Contest.

From Muskogee, Okla., on July 17th, it was reported that Thomas L. Greer, of El Paso, Tex., won the top prize in the Oklahoma Roping Contest by roping and tying a steer in :29 2-5 seconds, making the best average for three-days' roping. Geo. W. Weir, of Kermit, Tex., was second; and Joe Gardner, of Sierra Blanco, third. Fifty cowboys participated in the contest.

Grass seeds are selling very high because of the scarcity.

In ten years the state of Texas has increased the number of farms from 352,190 to 416,377, which is a gain of 64,187 farms.

Sure Cure and Preventive

FRAZIER'S SID STEMPER CURE

For Distemper, Epizootic, Influenza, Pink-eye, Catarrhal Fever, Coughs and Colds. One bottle of **FRAZIER'S DISTEMPER CURE**, a guaranteed cure, or your money back. This is a liquid, given on the tongue. Absolutely safe for Mares in foal, Stallions, Colts and all others at any age or under any condition. $1.00 bottle holds three times as much medicine as the 50c. size bottle. All drug stores sell **FRAZIER'S**, or prepaid direct. On request, we will mail our 32-page horse booklet free.

81 **BINKLEY MEDICAL CO., Dept. H, Nappanee, Ind.**

Keep Posted on Seeding Conditions.

Everything changes, and this certainly includes farming operations. Even people change every seven years. The man who thinks he is able to run his farm the same old way his father and grandfather conducted it is sure to come out the small end of the horn. The time was, when the soil was rich, that seed scattered broadcast over the surface of the soil would grow and produce fair crops. But improved methods have materially increased the yields per acre, as well as the quality of the grain. The Kentucky Grain Drill, manufactured by The American Seeding-Machine Co., Incorporated, Richmond, Ind., has proved its merits for the best possible work in all sections of the country. Among the many styles and sizes of Kentucky Drills, there can be had a machine that will successfully sow all kinds and sizes of seeds or handle all brands of artificial fertilizers—a drill that is absolutely and unreservedly guaranteed. It is a light-draft drill, simple, durable and positive in its work. Puts the seed in at an even depth—no bunching, choking or skimming. Send to the manufacturers for a Kentucky catalogue. Call on your local implement dealer and insist on seeing the Kentucky Drill.

Home Mixing of Fertilizers.

By writing to the German Kali Works, Continental Building, Baltimore, Md., any farmer can obtain a booklet entitled "Home Mixing of Fertilizers and How to Do It." This is a very interesting publication, and every one of our readers can learn something from it. The whole story is told so clearly that it does not require an interpreter. The book includes a table giving the composition of all farm manures and commercial fertilizers, with formulas adapted to all crops and the amount of fertilizer ingredients taken from the soil by all farm crops. Send for it without delay. See advertisement on page 3.

Emergency Information.

Why Pastures Fail.—Many pastures fail in midsummer because they are not made right. Too few grasses and clovers are employed in the mixture. In many sections, particularly in the Central West, timothy is the only grass used. This should be supplemented with clovers that mature earlier and again come on later in the season than timothy. Some of the other grasses with different habits of growth and seasons of maturing should also be used in the mixture, thus securing with the clover not only more pasture but a far better quality of pasture.

Pasture Mixtures. — Instead of seeding timothy alone the following mixture is suggested, per acre: Timothy, ten pounds; red clover, eight pounds; alsike, two pounds; orchard grass, four pounds; Italian rye grass, five pounds; English rye, four pounds; meadow fescue, four pounds. Such a mixture will give a heavier hay crop and hay of better quality than timothy alone, and when left as pasture will afford a much greater quantity of forage throughout the growing season, besides being earlier. Kentucky blue grass will usually come into the pasture of its own accord, but can be hastened by seeding about five pounds with the mixture mentioned above. If the grasses mentioned above are not available, then a mixture of twelve pounds of timothy, eight pounds of common red clover, four pounds of mammoth clover and four pounds of alsike may be seeded.

The grasses should be seeded in the fall with the winter grain and the clovers in early spring when the frost goes out, or both may be seeded together with the spring grain. If a grass-seed attachment to the grain drill is not available, the seed may be mixed in the proper proportions with the grain in the grain box and allowed to run down the grain tube with the grain.

The timothy and clover will be available for hay the first year after the grain is cut. By the third year a good permanent sod will be secured that, if properly cared for, will improve with age. Such pastures will not produce much feed during periods of intensive drouth, but if they have been properly cared for will begin to grow again as soon as rains come. To avoid as much as possible the injury from drouth, it is essential that pastures be not grazed too closely. There should be a good green cover or "grass mulch" in order to protect the roots from the hot sun. Such a pasture will remain green longer during dry weather and will begin to grow as soon as the drouth is broken, thus shortening the period of bare pastures.

However, provision should always be made to supplement the pastures at this season by planting summer forage to tide over.

Supplementary and Summer Pastures.—An excellent plan in providing against shortage of pastures is to grow each year some of the supplementary crops, such as rye, millet, cowpeas, rape or sorghum, mentioned above to be used during the dry season. An excellent annual pasture can be made by seeding together in spring one and one-half bushels of oats, thirty pounds of sorghum and ten pounds of mammoth or common red clover. The oats are ready for pasture in late spring and early summer, the sorghum comes on at its best in the hot midsummer, while the clover gives some fall pasture.

Disking Stubble Ground.

Disking stubble ground as soon as possible after the grain is taken off is a good start for an easy-working field next season. Many good farmers do not favor July disking, claiming that it is extra work without giving any material advantage. But let us see. This early July or August disking prevents baking. It stirs up weed seeds and gives them favorable conditions for growth. Two or three inches of disked surface act as a mulch and tends to soften up the soil for later plowing. This is a new practice with Illinois farmers, but I have observed that early disked fields plowed better in the fall and such ground was in much better mechanical condition the next spring than stubble ground which had been left undisturbed until along in September or October.—L. C. Brown.

Feeding or Plowing Under Clover.

A correspondent states that he has a fairly good crop of clover, grown primarily for turning under, but on account of short feed he would like to feed it, and asks which will be the most profitable.

By all means feed the crop and return to the ground the manure. Clover hay is worth right now around fifteen dollars a ton, practically twice as much as its real manurial value, so that the only question of profit between feeding or plowing under is whether one has stock to feed, so that the greatest possible amount of manure may be returned to the soil. By the time the clover is cut for hay there will be several tons of root growth per acre. This will be a benefit to the soil, and, together with the value of the hay crop, will give a pretty fair return for the ground and clover seed.—L. C. Brown.

The Howard Watch

When the jeweler shows you a HOWARD Watch—note the printed ticket affixed to the box. It states the *standard price* of that watch.

More than 37,000 jewelers sell HOWARD Watches—and the price of each grade is *uniform everywhere.*

That means that you and every other HOWARD purchaser owns the finest practical watch in the world on the same favorable terms.

It means the fullest possible service from the jeweler—his attention and advice as an expert in watches, not as a shrewd bargainer over the splitting of a half-dollar.

A HOWARD Watch is always worth what you pay for it.

Several months ago the demand for the higher-priced HOWARDS became so great that we had to discontinue the making of the models at $35 and $37.50.

The lowest-priced HOWARD that we are making now comes at $40. It is a 17-jewel *double roller* cased in Crescent or Boss gold-filled. The 23-jewel HOWARD in a 14K solid gold case sells at $150—there are several grades in between these prices.

Find the HOWARD jeweler in your town. When a man makes a permanent investment like the purchase of a HOWARD Watch he naturally wants to *see* what he is buying—he wants to get the dealer's expert advice. The HOWARD Watch is sold only by legitimate jewelers—and not every jeweler can sell you a HOWARD. The jeweler who can is a representative merchant—a good man to know.

Send us your name on a postal card and we will send you—FREE—our pamphlet—THE STORY OF EDWARD HOWARD AND THE FIRST AMERICAN WATCH. It is a chapter of History that every man and boy in this country should read.

E. HOWARD WATCH WORKS

Dept. No. 122, Boston, Mass.

When to Sow Cover Crops.

A Jasper county, Illinois, correspondent asks when is the best time to sow a cover crop in an orchard, and he wants to know how rye will do.

The benefit of a cover crop is in proportion to the growth or bulk made before the crop is killed down. Hence it is best to sow as early as possible, providing, of course, there is sufficient moisture in the ground to start the seed. Rye is sometimes used as a cover crop in orchards, but any of the legumes is so much better that I would not consider rye. If clover will not do well in Jasper county, I should sow winter vetch. Cowpeas will make a tolerably good growth during the fall and probably crimson clover would do well in this particular region. Any of these crops will produce material much more valuable than rye for plowing under, and, besides that, make an efficient winter cover.—L. C. Brown.

Office of Publication, 3550 Vista avenue, St. Louis, Mo. Bell Phone: Grand 400.

Our Industrial Policy.

The National Farmer and Stock Grower is in favor of the United States collecting a reasonable range of customs duties upon all foreign farm products and on all manufactured goods admitted into the country, said duties to be applied to the support of the national government.

Every farmer in the United States is taxed by his county and state and he pays indirect taxation for the support of the federal government. We believe that the advantage of the markets of the United States belongs to the citizens of the United States, and that all foreign farm productions should pay a duty at the front door as the goods are admitted. By collecting these customs duties the government receives support and the farmer has a very moderate degree of what is called protection. In times of scarcity foreign farm productions can come in on a fair basis, and in times of abundance the country thrives without them.

We believe the farmer as a producer outranks all other people; the manufacturer is next; but without the farmers' products the manufacturer would shut his doors. Legislation against the farming interest is the height of folly. It will cause more poverty in the cities than most people imagine. The non-producing, so-called consumers in cities will be the first to find it out.

Our Weather Predictions.

We have decided to publish weather predictions one month in advance. The September forecasts are published in August, commencing on page 26, and by keeping the paper on hand our readers will be able to start off with the weather on the first of each month.

There are several scientists investigating weather conditions with more or less success, mostly less, and after several-years' study of the results we have decided to use the forecasts of Prof. W. Wadsworth Marsh. His predictions were used exclusively for many years by one of the great Cincinnati papers, but hereafter The National Farmer and Stock Grower will receive his forecasts regularly, and, as stated, publish them one month in advance.

The September forecasts indicate a busy month in weather, and some of the expected developments may be startling, yet the month of September is usually an active month in this department, and if there is anything coming to us it is well to prepare for it as best we can.

How Senators Voted on the Reciprocity Bill.

Against (Republicans.) — Borah Idaho; Bourne, Oregon; Bristow, Kansas; Burnham, New Hampshire; Curtis, Kansas; Cummins, Iowa; Clapp, Minnesota; Clark, Wyoming; Crawford, South Dakota; Dixon, Montana; Gronna, North Dakota; Gamble, South Dakota; Heyburn, Idaho; Kenyon, Iowa; La Follette, Wisconsin; Lippit, Rhode Island; Lorimer, Illinois; McCumber, North Dakota; Nelson, Minnesota; Oliver, Pennsylvania; Page, Vermont; Smith, Michigan; Smoot, Utah; Warren, Wyoming—24.

Against (Democrats.) — Bailey, Texas; Clarke, Arkansas; Simmons, North Carolina—3.

For (Republicans.)—Bradley, Kentucky; Brandegee, Connecticut; Briggs, New Jersey; Brown, Nebraska; Burton, Ohio; Crane, Massachusetts; Cullom, Illinois; Guggenheim, Colorado; Jones, Washington; McLean, Connecticut; Nixon, Nevada; Poindexter, Washington; Penrose, Pennsylvania; Perkins, California; Richardson, Delaware; Root, New York; Stephenson, Wisconsin; Townsend, Michigan; Works, California; Wetmore, Rhode Island—20.

For (Democrats.)—Bacon, Georgia; Bankhead, Alabama; Bryan, Florida; Fletcher, Florida; Chamberlain, Oregon; Chilton, West Virginia; Culberson, Texas; Davis, Arkansas; Foster, Louisiana; Gore, Oklahoma; Hitchcock, Nebraska; Johnson, Maine; Johnston, Alabama; Kern, Indiana; Martin, Virginia; Martine, New Jersey; Meyers, Montana; Newlands, Nevada; O'Gorman, New York; Overman, North Carolina; Owen, Oklahoma; Paynter, Kentucky; Pomerene, Ohio; Reed, Missouri; Shively, Indiana; Swanson, Virginia; Stone, Missouri; Smith, Maryland; Smith, South Carolina; Taylor, Tennessee; Watson, West Virginia; Williams, Mississippi—32.

Absent.—Dupont, Delaware; Frye, Maine; Gallinger, New Hampshire; Lea, Tennessee; Percy, Mississippi; Rayner, Maryland; Tillman, South Carolina—7.

Paired With Absentees.—Dillingham, Vermont; Sutherland, Utah; Thornton, Louisiana—3.

There are two Senate vacancies —Georgia (due to the resignation of Senator Terrell) and Colorado.

Released From Obligation.

On Saturday, July 22d, 1911, the United States farmer was released from all obligation to other people. Formerly the home market belonged to the home farmer, and his market was protected from the invasion of foreign supplies unless from the foreign supplies was collected a reasonable import duty. The farmer was therefore under obligation to feed his own people. On July 22d a law was enacted by the National Legislature which calls upon the people of Canada to feed the people of the United States. This law was passed for the express purpose of reducing the price of the United States farmers' products, and it was made a law before the farmers of the United States had received substantial benefits of the duties previously imposed and before the farmers had failed in their obligation. Furthermore, the treaty, which was specially designed to reduce the price of the United States farmers' products, was also specially designed to hold up prices of these products after manufactured conditions. It therefore doubly discriminates against the farmer. If therefore in the future the farm products of the United States decrease instead of increase, the farmer cannot be held responsible, because he has been released from all obligation.

What Congress is Doing.

Congress is legislating against our bread, meat and clothing-producing industries and doing more damage in one session than a dozen Congresses can restore. Some day the cry will go up: "Where is our wheat to make our bread? Where are our sheep that used to furnish wool and mutton?" The answer will be: "Your wheat is in Canada. Your wool is in Australia, and your meat is in Argentine." Another cry will go up: "Where is the money?" The answer will be: "It is on the ocean, going to foreign countries, just as it goes out now from England." The theory that the United States can thrive by buying most of our food and clothing necessities from foreign countries is foolish in the extreme, no matter if it is the basis of legislation at Washington.

Two Profit Earners
This 1½ H. P. Waterloo Boy Farm Pump Engine is the simplest, lightest, strongest gasoline engine for its size and rating in the world. It is geared up directly to the pump by a strong double back gear. This cuts out all belting and makes it Simple, Powerful and Economical. You can disconnect it in an instant and belt it up to any other farm machine, from cream separator or washing machine to corn sheller or light dynamo.
Waterloo Boy FARM PUMP Engine
is a general utility engine and will prove the steadiest worker on the farm. It is so simple and convenient that a woman or boy can run it. Starts easy in coldest weather. It's a real "Waterloo Boy" with all the superiority that has made this name famous. For Efficiency and Service the year round, it has everything else on the market badly beaten and It Undersells All Competitors.
5 Year Guarantee
Buttercup Cream Separator
Is a big money-maker because it saves all the golden dollars out of the cream—it skims down to 1-100 of 1% of the butter fat. It's a standard, tried and tested machine with a clean "make good" record. Built low down, with heavy steady frame and big bowl. Light running, sanitary and easy to clean. Will last a life time.
These machines are the product of experience and "knowing how" and are backed up by an 18 year record of square dealing and making good. They are good machines to trust.
Let us tell you the whole story about them. Write today for catalogs.
Waterloo Gasoline Engine Company
228 West 3rd Ave Waterloo Iowa

THE BEST MAGAZINES

Also Farm Papers, Periodical Publications, All Offered at Club Rates by Club Numbers.

SUBSCRIPTION DEPARTMENT.

The publishers of the Universal Magazine will receive and forward subscriptions to any publication in the United States. We take pleasure in doing so, thereby keeping our patrons in touch with the best literature. Our prices are absolutely the lowest. We do not solicit single subscriptions, although we will take them. We prefer our patrons to take advantage of the club rates as shown by class numbers.

Make Up Your Own Clubs.

All clubs are made up with class numbers. This is the simplest method of subscribing for publications through a subscription agency. You thereby obtain the lowest rate that is possible. The most wasteful method of buying papers is to buy them one at a time. For instance, the Saturday Evening Post is 5 cents a copy 52 times a year, which amounts to $2.60, and the subscription rate is $1.50, a saving of $1.10, or 22 copies out of 52. This agency is unable to make any reduction on the Saturday Evening Post, yet we use it as an example of economy in subscription work.

Class Numbers of Publications.

In looking over the class numbers of publications, please remember that from these numbers you obtain the clubbing price. Orders for single publications have nothing to do with class numbers. When you club several publications together you obtain the class rate. All you have to do is to add the class numbers of the papers you desire to subscribe for together, multiply by 5 cents and remit the amount.

CLUBBING EXAMPLE.

Class Number.	(For One Year.)	Regular Price.
20	Metropolitan	$1.50
16	Delineator	1.00
22	World To-Day	1.50
58	Totals	$4.00

The class number total, 58, multiplied by 5 cents is $2.90, and the regular price of the three papers is $4.00. The class price makes a saving of $1.10. Try your hand at it.

AGRICULTURAL PAPERS.

Class Number.			Full Price.	Our Price.
18	American Agriculturist	W.	$1.00	$1.00
17	American Bee Journal	M.	1.00	1.00
16	American Cultivator	W.	1.00	80
7	American Farmer	M.	40	35
19	American Thresherman	M.	1.00	85
23	Breeders' Gazette	W.	1.75	1.75

(THE BREEDERS' GAZETTE is also called the American Stock Farm. It is a great publication, sometimes the first-named of all weekly farm papers. Being in Class 23, it is very cheap in club combinations.)

15	Colman's Rural World	W.	1.00	75
16	Connecticut Farmer	W.	1.00	85
23	Country Gentleman	W.	1.50	1.50
65	Country Life in America	S.M.	4.00	4.00
6	Farm and Home	S.M.	50	50

(FARM AND HOME is a remarkable semi-monthly publication at a low price, but it is very instructive and valuable. We recommend that it be included in every club.)

17	Farm and Ranch	W.	1.00	1.00
9	Farm and Fireside	S.M.	50	50
9	Farm Home	M.	50	45
17	Farm Journal, five years	M.	1.00	90
5	Farm News	M.	25	25
5	Farm Progress	S.M.	$0.25	$0.25
20	Farmers' Home Journal	W.	1.00	1.00
18	Farmers' Review	W.	1.00	90
9	Farmer's Voice	S.M.	50	45
15	Fruit Grower (St. Joe)	M.	1.00	75
7	Fruitman and Gardener	M.	50	40
22	Garden Magazine	M.	1.50	1.50
8	Green's Fruit Grower	M.	50	40
18	Hoard's Dairyman	W.	1.00	90
8	Home and Farm	S.M.	50	45

(HOME AND FARM, of Louisville, Ky., is published semi-monthly and is a standard publication for Southern farmers. Added to any clubbing list it will cost but little and will surely please the subscriber.)

12	Indiana Farmer	W.	60	60
17	Inland Farmer	W.	1.00	85
16	Iowa Homestead	W.	1.00	85
15	Irrigation Age	M.	1.00	90
8	Journal of Agriculture	W.	50	45
15	Kansas Farmer	W.	1.00	85
30	Kentucky Stock Farm	W.	2.00	2.00
8	Kimball's Dairy Farmer	S.M.	50	40
18	Michigan Farmer	W.	1.00	90

Class Number.		Full Price.	Our Price.
8	Mo. and Kansas Farmer	M.	$0.50	$0.50
5	National Farmer and Stock Grower	M.	50	40

(THE NATIONAL FARMER AND STOCK GROWER is a splendid monthly publication, four columns to the page, 32 pages. It can be used at small expense to the advantage of all who are engaged in farming and stock raising. It is equally valuable in any state.)

18	New England Homestead	W.	1.00	1.00
13	Ohio Farmer	W.	75	75
7	Oklahoma Farm Journal	S.M.	50	40
18	Orange Judd Farmer	W.	1.00	1.00
35	Pacific Rural Press	W.	2.00	1.80
17	Practical Farmer	W.	1.00	90
36	Rocky Mountain Husbandman	W.	2.00	2.00
16	Rural Californian	M.	1.00	90
8	Rural Farmer	M.	50	50
7	Rural Life	M.	50	40
20	Rural New Yorker	W.	1.00	1.00
16	Southern Cultivator	S.M.	1.00	85
9	Southern Planter	M.	50	50
9	Southern Ruralist	S.M.	50	50
50	Suburban Life	M.	3.00	3.00
17	Tribune Farmer (N. Y.)	W.	1.00	1.00
18	TwentiethCenturyFarmer	W.	1.00	1.00
18	Wallace's Farmer	W.	1.00	1.00
13	Wisconsin Agriculturist	W.	75	75
15	Wisconsin Farmer	W.	1.00	90

ENGINEERING AND MECHANICAL.

33	Am. Carpenter & Builder	M.	$2.00	$1.75
34	Am. Engineer & R.R. Jour.	M.	2.00	1.75
20	American Machinist	M.	1.00	1.00
77	American Machinist	W.	4.00	3.85
17	Blacksmith & Wheelw't.	M.	1.00	1.00
19	Building Age	M.	1.00	1.00
28	Cement Age	M.	1.50	1.40
37	Clay Worker	M.	2.00	1.85
28	Electric Journal	M.	1.50	1.40
57	Electric Railway Journal	W.	3.00	3.00
20	Electrical Age	M.	1.00	1.00
24	Electrician and Mechanic	M.	1.50	1.50
19	Engineering Review	M.	1.00	95
16	Gas Engine Magazine	M.	1.00	85
15	Gas Power	M.	1.00	80
34	Horseless Age	W.	2.00	1.75
14	Industrial Magazine	M.	1.00	85
37	Metal Worker	W.	2.00	2.00
16	Modern Electrics	M.	1.00	90
15	Modern Machinery	M.	1.00	90
9	Modern Methods	M.	50	50
22	Photo Era	M.	1.50	1.50
15	Popular Electricity	M.	1.00	1.00
28	Popular Mechanics	M.	1.50	1.50
58	Popular Science Magazine	M.	3.00	2.90
16	Practical Engineer	M.	1.00	1.00
45	Scientific American (new)	W.	3.00	2.75

(THE SCIENTIFIC AMERICAN has been for many years the foremost engineering and mechanical educator in the United States. In Class 45, in clubs of not less than three publications, it is brought within the bargain list.)

15	Stenographer	M.	1.00	90
22	Technical World Magazine	M.	1.50	1.50
52	Telephony	W.	3.00	3.00
18	Wood Worker	M.	1.00	90

FRUIT, NUTS AND VEGETABLES.

8	American Fruit and Nut Journal	M.	$0.50	$0.50
37	California Fruit Grower	W.	2.00	1.85
15	Fruit Grower (St. Joe)	M.	1.00	75
18	Fruitman's Guide	M.	1.00	90
18	Fruit Trade Journal	W.	1.00	90
7	Fruitman and Gardener	M.	50	40
8	Green's Fruit Grower	M.	50	46
8	Nut Grower	M.	50	50

35	Saddle and Horse Show Chronicle	W.	2.00	1.90
68	Sports of the Times	W.	$4.00	$3.50
37	Thoroughbred Record	W.	2.00	1.90
34	Western Horseman	W.	$2.00	$1.75

MONTHLY MAGAZINES.

27	Adventure	M.	$1.50	$1.40
22	Ainslee's Magazine	M.	1.80	1.50
22	American Magazine	M.	$1.50	$1.50
20	American Suburbs	M.	1.50	1.50
20	Argosy	M.	1.00	1.00
77	Atlantic Monthly	M.	4.00	4.00
16	Black Cat	M.	1.00	90
27	Blue Book	M.	1.50	1.50
48	Bookman	M.	2.50	2.50
20	Cavalier	M.	1.00	1.00
77	Century Magazine	M.	4.00	3.85
20	Columbian Magazine	M.	1.50	1.25
16	Cooking Club Magazine	M.	1.00	90
17	Cosmopolitan	M.	1.00	1.00
45	Current Literature	M.	3.00	2.50
22	Everybody's Magazine	M.	1.50	1.50
45	Forum	M.	2.50	2.50
35	Fra Magazine	M.	2.00	2.00
22	Hampton's Magazine	M.	1.50	1.50
20	Harper's Bazaar	M.	1.25	1.25

(HARPER'S BAZAAR is a stand-by. It solves every programme in life for the American woman. It is the chosen magazine of the best and most thoughtful class of women in this country.)

70	Harper's Magazine	M.	$4.00	$4.00
17	Human Life	M.	1.00	1.00
16	Judge's Library	M.	$1.00	$1.00
8	The Ladies' World	M.	50	50

(THE LADIES' WORLD, published at 50 cents a year, is a miracle of beauty, elegance and utility. It is ornamental, instructive, with colored covers.

35	Lippincott's Magazine	M.	2.50	2.25
22	McClure's Magazine	M.	1.50	1.25
20	Metropolitan Magazine	M.	1.50	1.25
20	Munsey's Magazine	M.	1.00	1.00
22	National Magazine	M.	1.50	1.25
28	New England Magazine	M.	1.50	1.50
70	North American Review	M.	4.00	4.00
28	Out West Magazine	M.	1.50	1.50
25	Overland Monthly	M.	1.50	1.25
20	Pacific Monthly	M.	1.50	1.25
22	Pearson's Magazine	M.	1.50	1.25
17	Philistine	M.	1.00	90
18	Pickings From Puck	M.	1.00	1.00
16	Pictorial Review	M.	1.00	90
16	Progress Magazine	M.	1.00	90
16	Railroad Men's Magazine	M.	1.00	90
27	Red Book	M.	1.50	1.40
40	Review of Reviews	M.	3.00	3.00

(REVIEW OF REVIEWS keeps the busy man and woman fully informed on the work of the world and condenses the matter into readable shape. It is a time-saver and probably the most valuable of all publications classed as magazines. We have it in Class 40, but it cannot be included in any class where the class total is less than 60.)

20	Scrap Book	M.	1.00	1.00
57	Scribner's Magazine	M.	3.00	3.00
25	Short Stories	M.	1.50	1.35
16	Sis Hopkins' Magazine	M.	1.00	90
40	Smart Set	M.	3.00	2.50
22	Smith's Magazine	M.	1.50	1.40
28	Strand Magazine	M.	1.50	1.50
19	Success Magazine	M.	1.00	1.00
22	Sunset Magazine	M.	1.50	1.25
22	Taylor-Trotwood Magazine	M.	1.50	1.25
22	Technical World	M.	1.50	1.25
22	Travel Magazine	M.	1.50	1.25
15	Uncle Remus Magazine	M.	1.00	90

(UNCLE REMUS MAGAZINE is a delightful publication, especially for the South. It has some of the most attractive stories and instructive articles in print. In Class No. 15 is a low-price magazine, but that does not detract from the high quality of the publication.)

15	Vegetarian Magazine	M.	1.00	85
15	Watson's Magazine	M.	1.00	80
34	Wide World Magazine	M.	1.20	1.20
22	World To-day	M.	1.50	1.40
40	World's Work	M.	3.00	2.50
22	Young's Magazine	M.	1.50	1.35

MUSIC AND DRAMATICAL.

65	Bill Board	W.	$4.00	$3.75
18	Choir Herald	M.	90	90
18	Choir Leader	M.	90	90
69	Dramatic Mirror	W.	4.00	3.50
69	Dramatic News	W.	4.00	3.50
22	Etude	W.	1.50	1.50

(THE ETUDE, for music lovers, contains each month twelve pieces of new music, with instructions and interesting reading for pianists, violinists, organists, children and clubs.)

18	Metronome	M.	1.00	90
32	Music Trade Review	M.	$2.00	$1.60
34	Musical America	W.	2.00	1.75
90	Musical Courier	W.	5.00	5.00
17	Musical Observer	M.	1.00	1.00
22	Musician	M.	1.50	1.50
65	New York Clipper	W.	4.00	3.50
29	Organist	B.M.	1.50	1.50
67	Standard and Vanity Fair	W.	4.00	3.40
60	Theatre Magazine	M.	3.50	3.25
24	Violinist	M.	1.50	1.35
9	Violin World	M.	50	45

POULTRY AND PET STOCK PAPERS.

8	American Poultry Advocate	M.	$0.50	$0.45
8	American Poultry Journal	M.	50	45
17	Cat Journal	M.	1.00	85
18	Dogdom	M.	1.00	90
8	Dog Fancier	M.	50	40
9	Farm Poultry	S.M.	50	45
8	Inland Poultry Journal	M.	50	45
9	Pet Stock Magazine	M.	50	45
16	Poultry	M.	1.00	90
8	Poultry Keeper	M.	50	45
8	Poultry Success	M.	50	45
8	Poultry World	M.	50	45
7	Reliable Poultry Journal	M.	50	40

(RELIABLE POULTRY JOURNAL is a wonderful monthly publication. It is here for club raisers in Class 7. There is no equal to it in all the poultry books that are advertised at fancy prices.)

7	Standard, The	M.	$0.50	$0.40

SPORTING AND RECREATION.

16	Amateur Sportsman	M.	$1.00	$0.90
80	American Field	W.	4.00	4.00
45	Am. Homes and Gardens	M.	3.00	2.75
35	American Sportsman	W.	2.00	1.75
50	Automobile	W.	3.00	2.75
35	Automobile Topics	W.	2.00	2.00
25	Baseball Magazine	M.	1.50	1.35
50	Bit and Spur	M.	3.00	3.00
65	Clipper, New York	W.	4.00	3.50
65	Country Life in America	S.M.	4.00	4.00

(COUNTRY LIFE IN AMERICA is issued twice a month and is the most beautiful and costly periodical issued in the United States. It appeals to every artistic instinct without detracting in the least from the productive possibilities of every acre of ground.)

30	Field and Fancy	W.	2.00	1.60
22	Field and Stream	M.	1.50	1.50
16	Fly	M.	1.00	1.00
45	Forest and Stream	W.	3.00	3.00

The Reciprocity Treaty.

The National Farmer and Stock Grower was opposed to the reciprocity treaty with Canada and did all that was reasonable, fair and consistent against it. As it now stands, all that is necessary to put the treaty into effect is for it to be ratified by the Canadians.

In Canada the people can get a vote upon almost any important question. The new Canadian Parliament will meet October 11th, but action on the treaty is expected to take place late in that month. It may be taken for granted that the Canadians will be glad of the chance to accept the treaty; it is to the Canadians "like picking up money in the street." It gives the Canadian farmer free entry for his products into the United States. The dominant party in Canada is in favor of the treaty and the election will be a mere routine.

It was reported from Kenton, O., on July 16th, that Peter Bohem, 45, a farmer, was struck by lightning and instantly killed, while riding on a load of hay near Dola, northwest of Kenton. Henry Bohem and Christopher Burger, who were riding with him, were knocked from the hay by the shock.

Liberal Use of Fertilizers.

The wise farmer will use fertilizers liberally if he can figure out a profit from the application. The unwise farmer will not use them, even if he can figure a profit from so doing.

Here is an astonishing fact: That many men, after having fully recognized the value of fertilizer using, still continue to scratch over half-fertile land, which they farm often at no appreciable profit.

To-day, more than ever before, we have a vast fund of information on the value of fertilizers. Almost every phase of agriculture has been investigated as to its relations to the various kinds of fertilizers that are available. The books are full of the experiments, and the various governments are constantly sending out new bulletins telling what results can be obtained.

It is certain that if the liberal use of fertilizers were not a paying process the campaign of education in favor of them would long ago have died out. The fact that the education is continued from decade to decade and from century to century proves of itself that the matter is one of vital interest to the farmer and to the food-consuming world at large.

This thought must be kept to the front: It costs just as much to till an acre of land that is not fertilized as one that is fertilized. Probably it is safe to say that it costs far more to till an acre of non-fertilized, little-productive land than it does an acre of productive land.

With the poor acre there is a constant battle with weeds due to the fact that weeds take possession of waste places. Where the crop is luxuriant the weeds are kept down to a point where a little cultivation at the right time finishes them. Also the land is kept from baking and the soil bacteria are always working in the process of elaborating plant food.

The writer has seen the wonderful effect of fertilizers again and again. He has in mind one very highly-fertilized piece of land that was this past spring put into several kinds of garden truck. Now, when the hot weather is daily wilting many fields, this highly-fertilized acre is a mass of green and does not show signs of deterioration. The roots of the plants have struck deep and are evidently in a stratum of moist soil that is supplying them with all the moisture they need. This is always the effect of high fertilization. Drouth-resisting plants are the deep-rooting plants, and plants do not strike deep on soil that is deficient in plant food.

If one sets down to figure it, the cost of fertilizer per acre is small. With almost all kinds of fertilizers the effect is to be seen for years after. Even nitrogenous fertilizers, the most elusive of all, because based on nitrogen, will last astonishingly in the soil.

Four years ago the writer gave one plat a very heavy application of nitrogen. He did not expect to see its effect after the first year; but even this year the results are notable because of the ranker growth of the foliage of plants on that plat and by the darker, richer green in color.

The Scope of Agricultural Education.

We are only at the beginning of agricultural education. The few things we try to learn to-day are but a handful of the things we shall learn. The science of agriculture expands on every side. The more we learn about it the more there is to learn.

Agricultural education is like a globe that is constantly growing. The larger it becomes the greater the surface on which things may grow, and, as there is no limit to the increase in size, so there is no limit to the plants of knowledge that may grow on it.

So the farmer that attempts to educate himself in all the phases of his profession is entering on an endless task, but a task that has its own compensations and its own pleasures.

There is nothing more godlike than creating things and learning to create. The more the human being grows in intelligence the more does he learn to create. After a time the creating of things becomes a passion, and he enters on a course of constantly creating new things. His farm takes on new forms. The unsightly things disappear and in their place come the elements of beauty. He creates a new color on the old house. He creates new orchards where the old and decaying ones used to be. He creates new barns, new fences, and even new utensils. Little by little he creates new and better ways of doing things, and wonders why he never thought of the improved ways before.

The farmer who educates himself in all the branches of agriculture will find himself facing in many directions, but this many-sided effort makes him a greater man and endues him with new powers.

One line of this education is in the study of the soil, its varying texture, as to sand, clay, lime, humus and water content. The chemistry of this alone is a matter that will require long study, and the knowledge of its chemistry will make easier and cheaper the process of fertilization or refertilization. The quality of capillary attraction will in itself engage long attention.

The study of crops is a stupendous one. Even the varieties of the same crop have different characteristics, and to learn even these is often to learn the secret of success. Many a man grows the wrong crop on his particular soil and is the loser by so doing. The stupid man continues to grow the wrong crop and becomes poor.

The study of live stock is one that ramifies through the whole world. Many farmers raise live stock without knowing much about live stock. This is evidenced in a hundred ways and results in the reduction or the dissipating of profits. To get stock raising down to a mathematical certainty is to eliminate from it the unprofitable methods and to retain the profitable things. Errors are costly, and the constantly repetition of costly errors brings many a farmer to ruin and many a good old farm into disrepute.

The matter of the sale of crops is a branch of agricultural education that must receive more attention from the farmer in the coming time. To-day the farmers for the most part are selling their products blindly and at a great loss to themselves. The prices the farmers receive and the prices the consumers pay have very little relation. The study of this branch includes the study of co-operative selling in all its parts.

And, in addition, there is the study of household affairs; the study of politics, which is by right a part of agricultural education, and the study of the community life. The latter includes the roads and the schools.

Agricultural education is the broadest education in the world.

Another Great Cheese.

The National Dairy Show is going to have another mammoth cheese on exhibition at the coming show to be held in Chicago at the International Live Stock Amphitheater, October 26th to November 4th, 1911. This time it is going to be the "greatest ever." The cheese exhibited at the last Dairy Show weighed over 4,000 pounds and was the largest cheddar cheese ever made. This year's cheese will weigh over 10,000 pounds and will take sixty-five tons of milk and cream from 6,500 cows milked by 1,350 men. Eighteen expert cheese makers and twenty-five assistants will be employed in the construction af the cheese, which will be transported to Chicago in a specially-constructed refrigerator occupying an entire flat car.

The entry comes from Mr. N. Simon, of Wisconsin, who also made the big cheese last year. It is not built alone for exhibition purposes, but will be of the finest commercial quality. The world's greatest cheese will undoubtedly attract wide-spread attention, and every means will be adopted by the officials of the National Dairy Show for exhibiting it in the most attractive manner.

High Price For Timothy Seed.

At St. Louis, Mo., on Saturday, July 22d, nine bags of timothy seed were sold at wholesale at the enormous price of $15.48 per 100 pounds. The drouth is responsible for the high prices. The seed sold at $3.50 to $4.00 per 100 pounds a year ago. This particular consignment of timothy seed was shipped by F. J. Taylor & Co., of Creston, Iowa, consigned to the Eaton-McClelland Commission Company, and bought by the Schisler-Corneli Seed Company.

Stirred Up the Neighborhood.

"Our whole neighborhood has been stirred up," said the farmer.

The editor of the country weekly seized his pen. "Tell me about it," he said. "What we want is news. What stirred it up?"

"The plow," said the farmer.—Ex.

The First Step In Scientific Farming Is An I H C Manure Spreader

YOU will never get the most out of your soil, until it is properly fertilized. And it will never be properly fertilized until you use a good manure spreader, because the use of a spreader will enable you to overcome the practice of spreading on one acre what should be used on two. Why delay the profits that are rightfully yours? Why not look into this manure spreader proposition at once? Learn the many reasons why thousands of other progressive farmers are having such great success with I H C Manure Spreaders.

When you examine one of these spreaders, note the extreme simplicity and great strength of the working parts; note that the beater driving gear is held in a single casting, thus there is no binding nor cutting of parts caused by the gearing springing out of alignment. Notice the roller bearing support for the apron which reduces the draft of the machine; operate the convenient levers; notice how quickly and easily the feed changing device can be shifted, and the wide range of adjustment.

Corn King Cloverleaf Kemp 20th Century

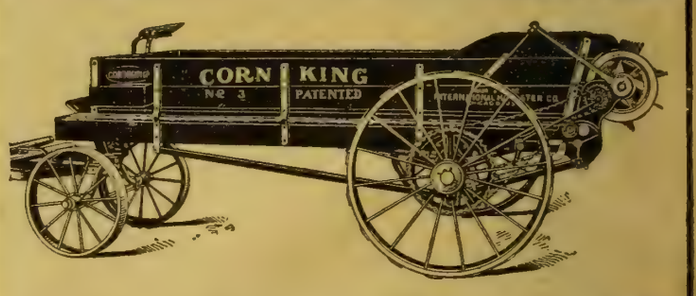
Each of these famous I H C Spreaders is simple, strong, and durable in every part. Each is instantly adjustable to spread light or heavy as your judgment tells you is best for the soil. Whether you have a large or small farm, or whether you want a spreader for orchard use—there is an I H C that will suit your requirements.

Why not see the I H C local dealer at once? Let him tell you why I H C Spreaders are so remarkably successful. Get catalogues from him, or, if you prefer, write direct for any information you desire.

I H C Service Bureau

The Bureau is a clearing house of agricultural data. It aims to learn the best ways of doing things on the farm, and then distribute the information. Your individual experience may help others. Send your problems to the I H C Service Bureau.

INTERNATIONAL HARVESTER COMPANY OF AMERICA
(Incorporated)
Chicago U S A



Best Holstein Records.

From the official report of Malcolm H. Gardner, of Delavan, Wis., Superintendent of Advanced Registry of Holstein-Friesian Cattle: "During the last fiscal year 4,476 animals, of which nearly one-half were heifers, produced within a period of seven consecutive days 1,793,762 pounds of milk, containing 62,937.259 pounds of butter-fat, thus showing an average of 3.51 per cent. The average production for each animal was 400.8 pounds of milk, containing 14.061 pounds of butter-fat, equivalent to 57.3 pounds or 27¼ quarts of milk per day, and 16.4 pounds of the best commercial butter per week. The mark set is so high that doubt may arise in some minds as to whether it is possible to better it; but up to the present time there has been no halt in the upward march of our records, and in my estimation we have not as yet reached the highest results obtainable."

Big Retail Milk Margins.

It will finally be necessary for milk producers to organize themselves for the purpose of selling their own product direct to the consumers. There is usually fourteen to sixteen cents a gallon margin between the price of the milk in the shipping can at the railway depot and the price of the milk sold by the pint and the half pint to the family consumer in the city. The milk sold to the hotels and restaurants being handled on a wholesale basis, does not carry so large a cash margin; but even if it is sold for a less price per gallon than the retail consumer pays, it is fully 50 per cent. over the cost price paid to the country shipper.

The matter of entering into the business of city milk distribution and sale is not an easy proposition. The large companies already in the business are well fortified and are satisfied to let prices be uniform without an agreement, so that they violate no law; but if a new distributing outfit invades the field, they buy the milk away from its shippers at temporarily advanced prices and leave the new competing concern to do business with empty wagons or reduced supplies. The temporary high prices paid to the farmer always get the milk away from the new competitor, and usually the new outfit goes broke. Some well-established plants known to be in difficulties either by want of sufficient capital or on account of internal troubles, are hastened out of business by the same process.

The only instances where success attends a new milk and cream distributer in a big city is where the supply is of superior quality, and, being owned by the distributer, cannot be taken away; and in this case the usual method is to buy out the entire concern, and making a contract for future supply at a fair price sends the new distributer back to his farm and leaving the city milk distribution where it was before. Large distributers are also insuring their supplies and making themselves independent of promiscuous shipments by establishing dump stations, where they receive, pasteurize and reduce the temperature and finally deliver milk at the city depot in better condition than the farmers' consignments arrive. All this has its effect to perpetuate the business of milk concentration and distribution, very much as it now stands. And we are free to admit that the conditions might be worse, providing the farmers could get together and sell their product as a unit. This, however, they usually fail to do, and in instances where they have contracted to deliver their product at a stated price the government has stepped in with the Sherman Anti-trust law, saying that it cannot be done; nothing, therefore, for the milk-producing farmers except to take in their own hands the organization of distributing companies, to take stock therein and to consign their milk and cream for sale just as they would and do to a co-operative creamery. In other words, co-operative creameries will have to be organized in large cities by farmers for the sale of butter, cheese, eggs, milk, cream, ice cream, buttermilk and all the forms by which dairy and creamery products are sold in cities.

Electric Power in Creamery.

We are using electricity for lighting and power in the Peterboro Creamery for the first time this season, writes A. Juby, of Peterboro county, Ontario, in Farm and Dairy. Electricity is most advantageous for lighting. In the short days of winter, particularly, electric light is very handy.

Electric power is more convenient and cheaper than is steam. Of course we will use the steam for heating, but it is not necessary to keep up pressure for churning. When we were using steam for both heating and power our coal bill for the year was $300. One hundred pays the coal bill now. The electric power costs us $100, which means a saving of $100 on the whole cost of power and heating. The light costs $1.00 a month extra.

Electricity is always ready to do the work for you. At any minute of the day it is just a case of turning on the current and going ahead, and it is far cleaner than a steam engine. The small dynamo takes up practically no room and there is no coal dust in connection with it. We use our five horse power dynamo to run the machinery of both our creamery and ice cream plant and it does the work just as easy or easier than did our eight horse power steam engine.

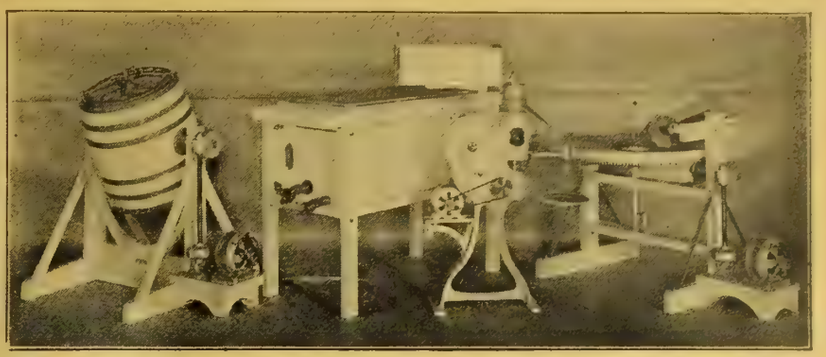
Butter Scores in Wisconsin.

The highest average score for butter examined at the University of Wisconsin, reached in the month of July during the past three years, has just been reported. For the eighty-five exhibits the average score was 92.52. The average water content was 13.66 per cent., the highest being 15.9, while seven samples had a water content of over 15. The lowest water content was 11.4. The average salt content was 2.48 per cent., the highest 4.7 per cent., and the lowest 1 per cent. In the milk class there were four exhibits with an average score of 95. In the milk and cream class there were 26 exhibits with an average score of 92.7, and in the cream class forty-one exhibits with an average score of 91.8.

Dairy and Creamery.

At the recent Buttermakers' Contest held at the Pennsylvania State College, forty-two tubs were on exhibit, and only fifteen failed to score 90 or better. The highest three scores were made by O. D. Mott, Edinburg, Pa., 94; W. L. Huntington, Burlington, Pa., 93; and E. S. Swope, Campbelltown, Pa., 93. These are creamery exhibits.

At Chicago, on July 26th, an organization called the American Dairy Cattle Congress, was completed. It grows out of the National Dairy Show. The officers are: President, C. W. Wood, Worcester, Mass.; Vice-President, J. J. Richardson, Davenport, Ia.; Treasurer, R. B. Swift, Libertyville, Ill.; Secretary, Charles F. Mills, Springfield, Ill.



A Dairy Equipment to be Proud Of.

There is little doubt if any better dairy equipment could be found anywhere in the world than this Vermont Farm Machine Company outfit, manufactured at Bellows Falls, Vt. At least, that is the opinion of Mr. Chas. S. Mellen, President of the N. Y. N. H. and H. R. R., who has installed the above complete outfit in his private dairy at his farm in Sturbridge, Mass.

This United States Separator, Surprise Barrel Churn and V. F. M. Butter Worker are all individual electric motor driven machines. No overhead wiring is seen in the room, as the wires are all under the cement floor. The cream ripening vat and all the other equipment is white enamel painted and all metal parts nickel plate. It is a most beautiful outfit and one which the wealthiest country estate owner would be proud to own.

These same machines, finished in natural wood, can be purchased at a very reasonable price and are within the means of every dairyman making butter on the farm.

By mentioning this paper, the Vermont Farm Machine Company will send you Catalog No. 125 to your address, fully explaining and illustrating their complete line.

Avoid Infection in Wounds.

Annually many deaths are caused by infection of wounds, and this is true both of the human race and the animals. Civilization has begun to lessen the number of deaths from this cause, and this is done by preventing the infection of wounds.

In the past many colts have been lost from the prevalence of deadly diseases, which were produced by germs entering the wounds about the severed navel cord. Now it is common to treat this part of the animal with a disinfectant as soon as born, thus shutting off the avenue by which the germs get into the circulatory system. There are various lotions for this purpose, and these may be learned by writing to any Experiment Station.

Every wound of an animal should be treated with some of the antiseptic solutions that are obtainable at the drug stores. A little wound may be as dangerous as a big wound, as far as the danger from infection is concerned. A pin prick has made way for the entrance of a deadly germ.

The rusty nail is often a most deadly weapon. When it penetrates the flesh of any animal or any person it often carries the germs of serious diseases, among them the germs of tetanus (or lockjaw). Whenever an animal or person is wounded by a rusty nail the wound should be washed out as much as possible by germ-killing washes such as druggists will be able to name.

The writer once lived near a boy who lost his life from stepping on a rusty nail. It resulted in lockjaw. A few years ago a young woman visited a United States revenue cutter anchored in Chicago harbor. As the girl leaped lightly down the ladder by which she had entered the vessel she struck a rusty nail, which went through the thin sole of one of her stylish shoes. A little wound was made, but was not thought serious; therefore, was not treated. The result was a case of lockjaw that resulted fatally, but which could have easily been prevented by the application to the wound of five cents' worth of any one of the antiseptic solutions so easily obtainable.

Every home, and especially every farm home, should keep constantly on hand washes recommended by the family physician or others that know, for the purpose of disinfecting wounds.

It was not so long ago that physicians, many of them, were very careless in the use of instruments in opening boils or performing other light surgical operations. The result was many infections that were often destructive of health and even of life. Now, the best physicians sterilize every instrument used in a surgical operation and also wash their hands in antiseptic solutions.

Often we find unskilled people doing such small surgical operations as lancing boils and using common needles and pins for the operation. The practice is a dangerous one, as it may cause infection. But needles, pins and other instruments used for such purposes should be dipped in antiseptic solutions before being used, or, if nothing else is available, dipping in boiling water should be resorted to. This will at least lessen the danger of wound infection.

Shoo-Fly THE ANIMALS FRIEND

Keeps flies and all insects and pests off animals — in barn or pasture—longer than any imitation. Used and endorsed since 1885 by leading dairymen and farmers.

$1 worth saves $20.00 in milk and flesh on each cow in a single season. Cures sores, stops itching and prevents infection. Nothing better for galls. Kills lice and mites in poultry houses.

SEND $1, if your dealer can't supply you, **for enough Shoo-Fly to protect 200 cows, and our 3-tube gravity sprayer without extra charge.** *Money back if not satisfactory.* Write for Booklet, free. Special terms to agents.

Shoo-Fly Mfg. Co., Dept. 28, 1310 N. 10th St., Philada.

Editor knows from experience that Shoo-Fly is O. K.

DAISY FLY KILLER placed anywhere, attracts and kills all flies. Neat, clean, ornamental, convenient, cheap. Lasts all season. Made of metal, cannot spill or tip over; will not soil or injure anything. Guaranteed effective. Of all dealers, or sent prepaid for 20 cents.

HAROLD SOMERS,

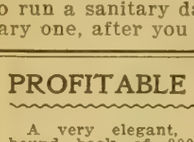
708 and 710 N. Fourth St., ST. LOUIS, MO.

In his own interest the dairy farmer should study to produce a sanitary product. It is just as easy to run a sanitary dairy as an unsanitary one, after you get used to it.

PROFITABLE DAIRYING.

A very elegant, illustrated, cloth-bound book of 200 pages is called **Profitable Dairying.** It is all good, satisfactory reading matter relating to the successful management of the dairy business under all circumstances, including the management of the cows and construction of the barn. We have discovered this book lately and we find that there is a better demand for it than for all other dairy books combined. For one dollar we will send **The National Farmer and Stock Grower** for two years and we will send the book, **Profitable Dairying,** as a premium. Address,



HALE PUBLISHING CO.,

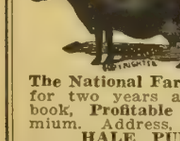
SPRAGUE'S Fly Bouncer



drives away flies, mosquitos and insects. No pest can live where this magic liquid is used. Heavy lasting, harmless, healing. Cows feed quietly all day and give one-third more milk. SPECIAL OFFER: if your dealer does not handle Fly Bouncer send $1 for a large sample and special sprayer. Particulars free. Write to-day.

W.B. McCloud & Co., 327 W. Kinzie St. Chicago

Hon. Willet M. Hays, Assistant Secretary of Agriculture, Washington, D. C., is preparing two articles on "Country Life" for the Saturday Evening Post in which he advocates the concentration of all effort in each county to include crop improvement.

Garton & Cooper Seed Company is moving its main plant to Sugar Grove, a few miles out of Chicago on the "Q." They are establishing Experiment Stations in Iowa, Minnesota, Indiana and Illinois, and, with a view to finding a remedy, are making a study of the cause of weak straw in oats. They claim to have a solution of the difficulty.

National Dairy Show Notes.

The Executive Committee of the National Creamery Buttermakers' Association held a meeting at the office of the Secretary, late in July, for the purpose of deciding on the location and date of holding their next annual convention. The committee voted unanimously to accept the proposition of the National Dairy Show Association and the convention will be held in Chicago, November 1st, 2d and 3d.

The Executive Committe, after considering the overtures of neighboring cities, chose Chicago for their annual convention principally because the National Dairy Show will be in progress at that time.

The organization represents a membership in excess of six thousand, with an annual production of nine hundred million pounds of butter, the cash value of which exceeds two hundred million dollars.

The Executive Committee, consisting of A. C. Schultz, President. Plattville, Wis.; F. Eldredge, Vice-President, Breckenridge, Mich.; H. E. Forrester, Lake Mills, Ia.; Thor Moe, Winthrop, Minn.; were all present except Vice-President Eldredge, who is still confined to his bed as the result of a serious accident some weeks ago.

Wisconsin Grade Guernsey Breaks World's Record.

The world's record for milk and butter-fat production in one year has just been broken by Bessie, a grade Guernsey of the herd of R. W. Rowlands, Waukesha, Wis. Her record performance in three-year-old form was a production of 12,195 pounds of milk, average test 5.41 per cent., containing 1,755 pounds of milk solids and 659.3 pounds of butter-fat. The credit or handicap allowed due to her age increased the actual butter-fat production to 777.9 pounds.

Beauty, a four-year-old grade Guernsey in the same herd, made the best record in the Wisconsin dairy cow competition for March. Her month's test totaled 1,558.4 pounds of milk, containing 221.6 pounds of milk solids and 76.05 pounds of butter-fat. The credit allowed her increased this butter-fat production to 89.739 pounds.

Hay Sales at St. Louis.

The following is a report of the hay sold at St. Louis and East St. Louis on the last day of July: Sales on the St. Louis Side: New hay—One car clover-mixed at $16; three do. at $16.50; seven do. at $17; one do. at $17.50; part car do. at $18. Timothy—One car No. 2 at $16; one do. at $16.50; two good do. at $18; one do. at $18.50; two No. 1 at $19; two do. at $20; two do. at 21. Old timothy—Part car No. 2 at $18. Prairie—Two cars slough grass at $10; part car no-grade at $12; one car Missouri at 14; one car No. 2 at $17; one car good No. 2 at $18.50; one car No. 1 at $19.50; one car do. at $20. Alfalfa—One car No. 2 at $16.50; No. 1 quotable at $19 to $20; choice at $20 to $21.50. On East Side: New—One car part clover-mixed at $17.50 and part No. 1 timothy at $20. Timothy—One car warm at $14; one car do. at $14.50; one car No. 2 at $16.50, delivered to St. Louis; one car do. at $17, delivered; one car No. 1 at $19; two cars do. at $20; one car do. at $21; one car good do. at $21.50, delivered to St. Louis. Old—One car clover-mixed at $17. Timothy—One car No. 1 at $20; one car do. at $21. Clover—Two cars No. 1 new at $17, delivered to St. Louis.

Cash Grain at St. Louis.

The cash market is the sale of carload lots shown by samples on the Merchants' Exchange. The grain is graded, but inside of the grade classification there are points in quality. These cash sales indicate better than any other way the difference in quality of the grain offered for sale.

The following quotations represent the St. Louis market of July 31st, 1911:

Sample wheat in bulk on track: No. 2 red at 84¾ to 86c; No. 3 red at 83 to 84c.; No. 4 red at 78 to 81c.; No. 2 hard—Yellow, 88 to 91c.; dark, 90 to 92c.; Turkey, 95 to 96c.; No. 3 hard at 85 to 88c., nominal; No. 4 hard at 78 to 81c., nominal.

Sample corn on track: No. 2 corn—Early, 65c.; late, 64c.; No. 3 corn, 63c.; No. 4 corn, 62½c.; No. 2 yellow, 64½ to 65c., early; 64c. sellers late; No. 3 yellow, 63 to 63½c.; No. 4 yellow, 62c.; No. 2 white, 66½ to 67½c.; No. 3 white, 63c.; No. 4 white, 62½ to 63c.

Sample oats on track: No. 2 white, 39 to 39½c.; Standard, 38½ to 39c.—couple cars 39¼ to 39½c.; No. 3 white, 38 to 38½c.—car 39c.; No. 4 white, 37½c.; No. 2 oats, 38c. local; 38½c. destination; No. 3 oats, 37½c., nominal; No. 4 oats, 37c.

On a Third of an Acre.

The Sacramento Valley Monthly gives an example of what can be done by intensive methods on a small piece of rich ground in California. Mr. H. M. Wyatt, of Los Molinos, Tehama county, is past fifty years of age, but is thrifty and energetic. About four years ago he purchased two city lots, making his holding 100 by 140 feet. This is equivalent to about a third of an acre. On part of this lot Mr. Wyatt built a small house for himself and wife, occupying about 28 by 30 feet, and a barn and chicken house covering about 30 by 30 feet of his lot. The rest he brought under intense cultivation.

He utilizes every inch of ground not occupied by buildings. His vegetable garden is 18 by 30 feet. In this he raises lettuce, onions, peas, beets, etc. The remainder of the ground is planted to trees and berries. He has nine cherry, seven orange, twenty-six apple, six pear and nine peach trees, fifty-five grape vines, sixty loganberry bushes, fifty-five dueberry bushes and sixteen rows, 140 feet long, of strawberries. His live stock consists of a horse, two cows, nine pigs, sixty chickens and six turkeys. In one year his cash returns on his live stock were as follows: Milk and butter, $150; eggs and chickens, $200; hogs, $170. He pastured his cows on the county road, and his chickens and hogs were fed largely from the household scraps and waste. In May, 1910, he sold 650 boxes of strawberries. His trees and vines just came into bearing last year, and, although he realized some profit from them, he did not keep account of the amount. This year he expects a large profit from the vineyard and orchard portions of his farm.

Mr. Wyatt supports a family. The high cost of living has not bothered him, as his garden has furnished the household with nearly all the food necessary for the table the entire year round. Besides this, he has started a bank account. Mr. Wyatt was contemplating purchasing more land, but after mature deliberation concluded that his third of an acre gives him all the work that a man of his age cares to undertake and affords a comfortable and independent living.

Mr. Wyatt's experience is given to demonstrate the yielding capacity of the soil of the Sacramento Valley. Home-seekers locating in California on small farms are sure of success provided they are not lacking in industry and intelligence.

The Best Veterinary College.

Attention is specially invited to the advertisement of the Kansas City Veterinary College on page 5. This is the institution that has done more than any other towards establishing competent veterinarians in the farming country. If you contemplate becoming a veterinarian or know of someone else who desires to educate himself in this useful profession, write or have him write to Sesco Stewart, Secretary of the College, 1312 East 13th street, Kansas City, Mo., for the 1911-12 catalogue and any other information that may be desired. Fall term commences September 11, when examination for admission will be held.

FARM AND RANCH LANDS.

ARKANSAS.—Farm of 640 acres, Arkansas river bottom land, all very fertile; 500 acres in cultivation; rents for $7.00 acre, cash; some clover and alfalfa; one nice dwelling house; twenty tenant houses, etc. Can sell at $20,000. A great bargain. **P. O. Box 11, Little Rock, Ark.**

ARKANSAS.—For Sale by Owner: 168 acres in heart of fruit belt of Arkansas. Under fence. 40 acres nine-year-old apple trees, best varieties. 35 acres woodland. 12 acres pasture. Rest in cultivation. Good four-room house; necessary outhouses. **J. N. Greene,** R. F. D. 1, Summers, Ark.

FREE Literature will be sent to anyone interested in the wonderful Sacramento Valley, the richest valley in the world. Unlimited opportunities. Thousands of acres available at right prices. The place for the man wanting a home in the finest climate on earth. No lands for sale; organized to give reliable information. Sacramento Valley Development Ass'n, SACRAMENTO. **California**

THE FINEST FARM

In Southern Illinois, located east of Marion, county seat of Williamson county. 540 acres, all in cultivation and grass, excepting 40 acres virgin hardwood timber; fenced and cross-fenced; six-room dwelling, two large barns, outbuildings; finely watered. Splendid stock and grain farm. Coal of finest quality under entire farm.

Owner lives in St. Louis; cannot give farm any personal attention. He is anxious to sell. Terms, $5,000 cash; balance mortgage on land.

ALFRED RICKETTS REALTY CO.,
608 Chestnut Street, St. Louis, Mo.

ILLINOIS.—A good Illinois farm, 162 acres, near Crab Orchard, Williamson county, Illinois. Rolling land; every acre cleared and tillable; good, productive land. Good six-room house; large granite barn; granaries, etc. We can make especially attractive price on this farm. Easy terms. Write for full information. **Alfred Ricketts Realty Co.,** Leathe Building, St. Louis, Mo.

I BRING BUYERS AND SELLERS TOGETHER. If you want to buy, sell or exchange a farm or business, write me. Established 1881. **FRANK P. CLEVELAND, 7910 Adams Express Building, Chicago, Ill.**

To Buy, Sell or Exchange Property address **Northwestern Business Agency, Minneapolis, Minn.**

FARMS WANTED! We have direct buyers. Don't pay commissions. Write describing property, naming lowest price. We help buyers locate desirable property FREE. **American Investment Association, 55 Palace Bldg., Minneapolis, Minn.**

MISSISSIPPI.—Eight hundred acres of land in Mississippi for sale for $5,000. Payments half cash and balance reasonable time at 6 per cent. This land is situated in Tishomingo county, and consists of a square section, 640 acres, and 160 acres adjoining, being 800 acres in a solid body. The land commences a little over a mile east of the station of Holcut, on the Birmingham Branch of the Illinois Central Railway, about twenty miles south of Corinth. This land was cut over a long time ago; is as good soil as any in Northern Mississippi. It consists of ridges, hills and valleys, and every inch is available when cleared for cultivation. Wells can be dug anywhere. This land is in a good farm settlement and will make a fortune for any first-class farmer who can handle it himself, or it will support forty families of vegetable growers. Address the owner, **Philip H. Hale,** 3550 Vista avenue, St. Louis, Mo.

50,000 MEN WANTED
In Western Canada

200 Million Bushels Wheat to be harvested

Harvest Help in Great Demand

Reports from the Provinces of Manitoba, Saskatchewan and Alberta (Western Canada) indicate one of the best crops ever raised on the continent. To harvest this crop will require at least 50,000 harvesters.

Low Rates will be given On All Canadian Roads

Excursions are run daily and full particulars will be given on application to the following authorized Canadian Government Agent. The rates are made to apply to all who wish to take advantage of them for the purpose of inspecting the grain fields of Western Canada, and the wonderful opportunities there offered for those who wish to invest, and also those who wish to take up actual farm life. Apply at once to

The Wheat Market Situation.

Probably as good a way as any to explain the wheat market situation is a comparison of the quotations for May wheat options on July 31st of different years. The July 31st quotation for May 31st delivery is ten months before the final delivery of the goods.

July 31, 1909, May, 1910, option, $1.05⅛.

July 31, 1910, May, 1911, option, $1.08⅜.

July 31, 1911, May, 1912, option, 98 cents.

There is not a solitary reason of any kind that we know of that would indicate lower prices for wheat except the influence of expected large supplies from Canada before next May. It really ought to be and may yet be a higher market.

On July 31st, at St. Louis, cash wheat was selling at 84¾ to 86 cents a bushel. Last year, on same date, cash wheat was selling at $1.02 to $1.05 a bushel; and two years ago, on same date, cash wheat was selling at St. Louis at $1.08 to $1.19 per bushel.

Now comes the Chicago trading in wheat on July 31st. The July option was closed out at 87½ cents. Last October July wheat was quoted at 94¾ cents a bushel and fluctuated downward to the close. On June 30th the September quotation was 89⅞ cents, and it closed at the same figure on July 31st. The December wheat quotation was 92¼ cents on June 30th, and was quoted on July 31st, at the close, at 93⅝ cents. This little advance in value is the only bright spot in the market. Wheat is not selling at a fair price, so far as farmers are concerned.

The next option to be closed is September, and for the reason that an abundance of the new crop is available it is not usually the highest quotation of the year.

In closing this review, which is written July 31st, after the close of the market, we quote from a Chicago report:

"The large stock here and the fear of reciprocity being adopted by Canada are the underlying features of weakness. It was noticeable that on all the bulges wheat came out freely from the leading bull houses. There was selling by Barlett-Frazier, Colvin, Barrett, Clement-Curtis and Chapin. Armour bought December on the break, and Logan & Bryan, and the local crowd generally, were buyers of September early."

The Oats Market Situation.

The oats market can be reviewed with very few words and not many figures. On July 31st cash oats were selling at St. Louis at 39 to 39½ cents a bushel, about 5 cents less than a month ago. At Chicago the July option was closed out at 38½ cents, or 4½ cents' decline in a month. Here endeth the historical part of the review.

On July 31st the September oats option was quoted at 40⅜ cents; the December option at 43¼ cents, and the next May option at 46 cents. There is the whole story. Oats were plentiful and cheap; the supply is now being exhausted. Canadian oats coming in later free of duty is now a consideration, but our 1911 crop is short, therefore the May option for 1912 delivery is 5 cents higher than a year ago. Two big crops in succession raised by the farmers of the United States depressed their market, and the light crop will probably bring the farmer as much money as either.

Read about the Mitchell Automobiles advertised on page 4.

Don't Put Your Money

and labor into a bunch of Cattle, Hogs or Sheep and then "lose out" in the SELLING. That's the important part. An extra 5 or 10 cents, or more, per cwt. obtained through

GOOD SALESMANSHIP

means increased profit to you. The best service costs you no more than the poorest. Therefore

Prophet Not on the Job.

Dr. Harvey Wiley, head of the Bureau of Chemistry at Washington, who has won much militant fame in the pure-food imbroglios, is an ardent and old-school Republican. Also he is a bosom friend of Willis Moore, Chief of the Weather Bureau. Last November they sat side by side in the Cosmos Club listening to the election returns that told of a Democratic landslide. The news at first ran bad for the doctor, then it changed and ran worse. But through it all he sat perfectly impassive and imperturbable.

At length there came in with the midnight a peculiarly disheartening dispatch from a one-time powerful Republican stronghold.

As the worthy doctor rose in disgust he turned to his companion, the Chief of the Weather Bureau, and witheringly said: "Willis, I wish you had predicted this."—Philadelphia Ledger.

Cement Workers' Handbook.

This book is designed to teach anybody how to work with cement; how to mix mortars of all kinds for all concrete purposes; how to make building blocks; how to build walls, floors, ceilings, walks, joists, cisterns, troughs, tanks, etc. It gives estimates of the cost of all kinds of mortars and concretes and all methods of house construction. It is a cloth-bound book of 100 pages and covers more than fifty most important subjects on cement and its uses and construction. This is a diamond of a book for wide-awake farmers. The price of the book alone is 50 cents.

For 60 cents we will credit one-year's subscription to The National Farmer and Stock Grower and send a copy of the Cement Workers' Handbook. Address, HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.

CONCRETE CISTERNS ON TOP OF GROUND.

Provide Concrete Houses With City Conveniences.

An abundance of soft water is a great aid in solving the labor problem of housekeeping. With the general use of concrete there has developed a new style of cistern which further lightens the work of the housewife. This new concrete cistern is built on top of the ground, and, by direct pressure, forces the water through pipes into the house and does away with the work and exposure of pumping and carrying water. The piping of the water allows the cistern to be located to the best advantage. Since the roof water from outbuildings is free from soot and other impurities, many persons prefer to build the cistern at the barn, granary or corn crib. The cistern shown in the illustration is placed on a three-foot terrace in the rear of the house. The carrying of water is thus reduced to the mere matter of turning a faucet in the kitchen.

The Forms and Foundation.

To illustrate the general method of construction, consider a cistern eight by eight feet square in the clear and eight feet high, with six-inch side walls and floor and four-inch roof. Such a cistern holds 121 barrels of water.

The first step in building a cistern is to have all materials on hand before beginning the work. Make the forms or molds of one-inch siding on two by four-inch studding spaced two feet. Remember that the siding always goes next to the concrete. Since the floor is six inches and the roof four inches thick, have the studs for the outside form not less than eight feet ten inches in length. The uprights for the inside form must be exactly eight feet long. As the pressure of the concrete will tend to hold the siding in place, tack it lightly to the studding. Board up the outside form only to height of three feet, so as to make easier the handling of the concrete and the placing of the reinforcing rods. Build each side separately in order that the entire form may be quickly erected. See that the forms are joined in such a way as to make their removal an easy matter when surrounded by the solid concrete.

From the side of the cistern strip off the sod and other foreign matter. Do not disturb the solid ground. Three to four feet below ground level (depending upon the depth of freezing), lay a two-inch house supply pipe and have the cistern end fitted with a pipe connection, set at the concrete floor level and one foot from the cistern wall. Carefully imbed the pipe in concrete to the first joint beyond the cistern wall. Thoroughly tamp back the earth removed, so that there can be no settlement underneath the cistern floor. Lay out the cistern nine by nine feet, out to out. Within these lines dig the foundation trenches one foot wide and three feet deep.

Mixing and Placing the Concrete.

With the forms ready and the foundation trenches dug, begin mixing the concrete. Proportion the concrete one part Portland cement to two parts sand to four parts crushed rock. Four parts of clean bank-run gravel may be used instead of the sand and stone. In measuring the materials, do not guess or count shovelfuls. Measure exact by means of a bottomless box, and count one bag of cement equal to one cubic foot. Mix the concrete mushy wet and fill the trenches to a level with the under side of the cistern floor.

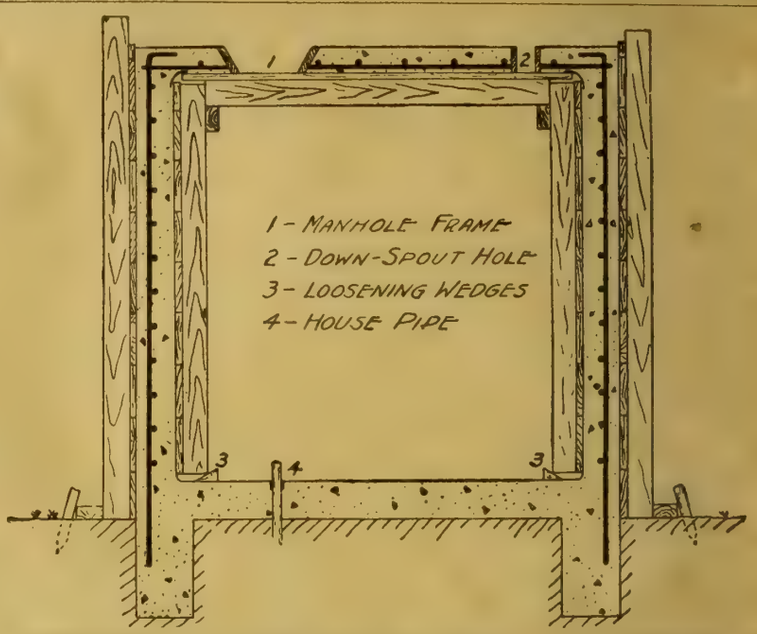
To take care of the water pressure, reinforcing rods must be run in both directions through the concrete wall. For this purpose use three-eighths-inch rods ten feet long. While the concrete in the foundation walls is yet soft, set the vertical rods in it (spaced eight inches) to the depth of one foot. Carefully place these rods so as to bring them within one inch of the outside of the cistern walls.

Next in order is the concrete floor. Make it six inches thick and tamp the concrete well. See that it overlaps the inside of the foundation wall and that the top of the pipe connection is at the floor level. Finish the surface with a steel trowel.

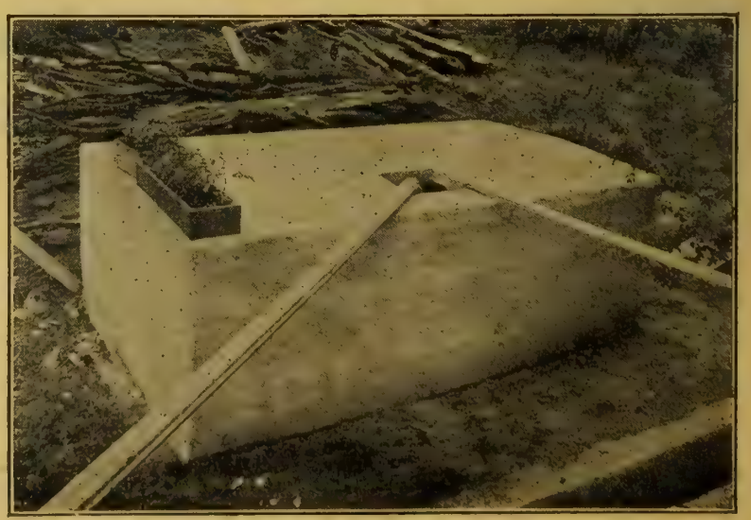
After the floor has hardened for three or four hours, erect the inside form. To aid in taking down these forms, place removable wedges between the ends of the studs and the floor. Before setting up the outside form, fasten the first four horizontal rods to the vertical reinforcing by means of small wire. These rods are spaced eight inches apart. The ends must be bent and spliced around the corners of the cistern. Set the outside form and begin building the concrete side walls. Use the concrete mushy wet and work it down next to the wall form with a wooden paddle. Place it in eight-inch layers carried around the entire cistern. See that exactly one inch of concrete is between the steel reinforcing and the outside form. As the work progresses, add the necessary boards of the outside form and the lengthwise reinforcing rods. Do not stop placing concrete until the walls are finished.

The Concrete Roof.

While the four-inch concrete roof is hardening, a temporary wooden platform is needed to support it. Build this platform of one-inch boards nailed lightly to two by four-inch joists. Let these joists rest on two by four-inch stringers nailed to the studding of the inside form at a distance of four inches below their tops, so that when the stringers are loosened the platform will come down. To keep the mushy concrete from wasting, place heavy paper or thin cloth at the edges of the platform. For providing a manhole opening, take one-inch boards five inches wide and build a bottomless frame four inches deep, two feet square at the top and eighteen inches square at the bottom—outside measurements; or have the tinsmith make a round bottomless dish-pan of the same dimensions at the top and bottom. Grease the manhole frame and set it on the platform where the opening is desired. For the down spout from the roof, make an opening by similar use of a round wooden plug or a short section of



CROSS-SECTION OF CISTERN BUILT ON TOP OF GROUND, SHOWING FORMS AND REINFORCING.



A FARM CISTERN BUILT ON A THREE-FOOT TERRACE.

drain tile or sewer pipe, which may be left in the roof.

Over the entire platform spread one inch of concrete. Quickly place the reinforcing of three-eighths-inch steel rods running in both directions (criss-cross) and spaced one foot apart. Bend the ends to a hook-shape and fasten them to the rods in the side walls. Immediately tamp in the remaining three inches of concrete. Increase the thickness to 3½ inches at the center, so as to shed the roof water. Finish the surface with a steel trowel. If the tin manhole frame is to be used, grease it, set it in place and build the cover along with the rest of the roof. Reinforce the cover with short lengths of rods laid criss-cross and within one inch of the bottom. As lifting rings, use two halves of an old bridle bit or two hitching post rings, the ends provided with knobs of twisted wire or with nuts and large washers for holding the bolts firmly in the concrete. If the wooden manhole form is used, carefully remove it after five hours. After three days build the manhole cover the same as for the tin form, with this exception—place greased paper around the edges to prevent the new concrete from sticking to that of the platform. When the cistern roof is three weeks old, lift off the manhole cover and saw an opening in the wooden platform. Descend, loosen the wedges under the studs and the stringers supporting the platform, remove the forms and pass them out through the opening. To keep the settlings out of the house pipe, screw a four-inch length of pipe into the joint coupling. Furthermore, the down spout should be provided with a cut-off, so that the first flow from the roof of the building may be kept out of the cistern. The cistern may be used for water storage after it is one month old.

Below is given the bill of materials and a liberal estimate of their cost. By consulting local dealers, it may be found that the cost of the cistern can be reduced.

Materials Required.

Crushed rock, twelve cubic yards, at $1.10	$13.20
Sand, six cubic yards at $1.00.	6.00
Portland cement, twenty-one barrels, at $2.50	52.50
Reinforcement (112 rods—⅝ inch by 10 inches) 420 pounds, at $0.02¼	9.45
	$81.15

If ornamental features are desired, moldings or tile decorations may be used. The point to bear in mind is, that an inexpensive cistern located on top of the ground provides the country house with the conveniences of a costly city water works.

COMMERCIAL FERTILIZERS.

Low, Medium and High-grade, With Relative Cost of Same.

In Farmers' Bulletin No. 457, issued by the United States Department of Agriculture, under the supervision of Prof. A. C. True, we get the facts derived from analyses of 127 brands of fertilizers sold in the market, together with the estimate of value to the farmer.

Low-grade Fertilizers.

The low-grade fertilizers averaged 1.13 per cent. nitrogen, 8.28 per cent. available phosphoric acid and 2.50 per cent. potash. The total plant food was 11.9 pounds per 100 pounds, the balance being filler; the average selling price was $24.50 per ton; the average Experiment Station valuation of the same was $16.85 per ton, showing $7.65 per ton loss to any farmer who bought a ton of this class.

Still Lower Grades.

The investigators evidently did not get down to the real, straight out-and-out low grades, such as the Planters' Champion—1 per cent. nitrogen, 10 per cent. phosphoric acid and 1 per cent. potash; also the Ever Ready—no ammonia, 10 per cent. phosphoric acid and 2 per cent. potash; also the General Lee Cotton Grower—2 per cent. nitrogen, 11 per cent. phosphoric acid and 1 per cent. potash. These have been sold to such an extent that the cultivated soils cropped regularly are impoverished for want of nitrogen and potash and are stuffed with phosphoric acid.

Medium-grade Fertilizers.

The medium-grade fertilizers averaged 2.32 per cent. nitrogen, 8.72 per cent. phosphoric acid and 3.66 per cent. potash. The plant food is 14.4 pounds per 100 pounds, the balance being filler; the average selling price was $30.00, against $24.84 valuation, a loss to the farmer of $5.16 on each ton.

High-grade Fertilizers.

The high-grade fertilizers averaged 4 per cent. nitrogen, 7 per cent. phosphoric acid and 10 per cent. potash; the total plant food was 21.0 pounds per 100 pounds, the balance being filler; the average selling price was $36.50 per ton, the estimated valuation being $32.70, showing the farmer's loss to be only $3.80 for each ton purchased.

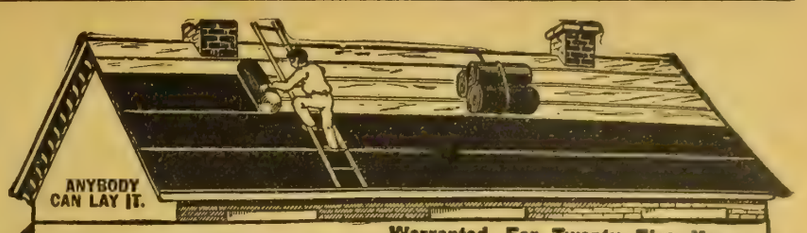
Every fertilizer carries filler that necessarily goes with it, nearly the same as the cob, husk and stalk constitute the filler to the ear of corn; but low-grade fertilizers as shown are 88.1 pounds out of the 100 filler; the medium grades were 85 pounds filler and the high grades were 79 pounds filler to the 100 pounds in the sack.

The bulletin has much more to say on the subject and concludes as follows: "It thus appears plain that not only are low-grade fertilizers more expensive as regards first cost of plant food, but they are much more costly to handle per unit of plant food supplied than the high-grade fertilizers, on account of the larger amount of worthless filler which they contain. If low-grade fertilizers are to be used, it is much more economical to buy the unmixed materials."

Meat High Priced in Paris.

Special reports from Paris, France, indicate that, generally speaking, all meat costs now as much alive as it did not long ago on the butcher's counter. Beef is quoted at about 39 cents the kilogram of two pounds and an eighth; veal at 52 cents; mutton at 50 cents, and pork at 41 cents, which are about double the prices of ten years back. The Syndicate of the Halles has sent a circular to stock breeders and large dealers, and the answers to the questions contained are instructive.

The reason of the increase appears to be the large and regular purchases of stock by German, Italian and Spanish agents in the provinces. The brokers representing foreign houses buy up cattle and sheep at such high figures that the temptation is too great for the farmers to withstand; and the Germans also buy large quantities of dead pork directly from the breeders without it ever coming onto the market. One correspondent writes: "Cattle will be scarce this year, and more so next, for the breeders have sold almost all they could;" and another says: "At some of the Fairs of Courtenay and Montargis there are now 50 cows where there used to be 100. Many buyers choose specially cows about to calve."



Rubber Roofing

Warranted For Twenty-Five Years.
FREIGHT PAID To Any Station East of Rocky Mountains, except Texas, Okla., Colo., N. D., S. D., Wyo., Mont., N. M., La., Ga., Ala., Miss. and Fla., on all orders of three rolls or more. Special Prices to these States on request.

The Inexpensive Life.

They tell of an official at Washington, known by his friends to be a rather "close" man, who has many a passage at arms with his wife, all by reason of that very "closeness."

One one occasion a friend had the misfortune to enter just as the pair were ending an argument touching some question of household expenditure. He was just in time to hear the husband say:

"See here, Marie, you cannot hoodwink me in these matters. Do you think that I have lived all these years for nothing?"

"I shouldn't be at all surprised," was the wifely repartee.—Exchange.

Must Walk While He Talks.

Senator Martine, of New Jersey, who at present is highly entertaining the Senate by his impromptu speeches in which the procedure of the Senate, ordinarily respected, is thrown to the winds, walks as he orates. Usually a Senator addressing the Senate or an interrupting Senator stands by a seat at best, moving but little from it in the excitement of his inspiration. But Martine cannot maintain himself thus. He must walk rapidly and for some distance as he talks, much after the manner when he used to "cradle" his New Jersey farm, as he says. So Martine is a circus to see as well as to listen to when he feels he must enlighten some Senator who professes to know more about farming than he.

And he accepts the fun with good grace.

"Why do you walk so?" Senator Bailey asked him.

"I cannot help it," replied Martine. "My tongue and legs move at the same time. Some reflex action somewhere. I have been reproved for this on the stump by an Irishman. Finding me at it as I am he shouted:

" 'Say, are you walking or are you talking? If you are walking, then walk; if you are talking, then talk. We can't hear you when you walk, and we cannot see you when you talk. Quit one or both.

"But here I am. I have never been cured."—Boston Advertiser.

Where Do the Papers Get It?

Until recently there was an aged elevator man who operated one of the lifts in the House wing of the Capitol. Most of his passengers were either Representatives or newspaper correspondents. The old man got to know all of the correspondents very well and always had a cheerful greeting for them. It was often noticed, too, that he seemed to be greatly interested in their conversation.

One afternoon, as three of them stepped out of the elevator, Sereno Payne, of New York, stepped in. As the car went down the old elevator man turned and said:

"Mr. Payne, I can't understand about those newspaper men. They puzzle me."

"What's the trouble with them?" asked Mr. Payne.

"Well, Mr. Payne, every day they ride in this car one feller will turn to another and say: 'What do you know to-day?' And the other feller will answer: ' Not a — thing. What do you know?' Then the first feller will answer: 'Nothing.' And yet, Mr. Payne, the papers are just full of news every day. It beats me where they get it."

"It beats me, too," said Mr. Payne. Washington Correspondence Brooklyn Eagle.

CORN HARVESTER

Has Given Universal Satisfaction in Every State in the Union.

A most practical corn harvester is made by the New Process Manufacturing Company, of Salina, Kansas. It will do almost anything that a corn binder will do and costs only a fraction as much. With it a man can cut and shock from four to six arces a day, and it is so simple in construction and operation that a boy can run it. It has been sold in every state in the Union and has given universal satisfaction. It will pay for itself in less than one season, and is so compact and well made that it will last for years.

If you will write them, mentioning this paper, they will send you full particulars.

YOU $5 TO $10 A DAY

EVEN if you never sold a dollar's worth of goods in your life, make $5 to $10 a day—selling our made-to-order suits and pants.

This Is Your Chance To Make Money.

We sell suits from $3 to $10 less than other houses, give better tailoring, make better fitting clothes, with absolute guarantee. You can undersell others; no work to take orders for us. You can not fail—our line is the only line where you can give satisfaction or money refunded. It is a snap to sell Regal Tailoring.

BIG MONEY—EASY WORK.

We start you Free. Send for samples now. We will tell you our capital and experience—you need money—we will instruct you and you can commence making money at once. Send us your name and address now and an outfit larger than all others with newest samples, large fashion plate, tape measure and everything necessary will be sent you FREE.

You Can Get Your Own Clothes At Inside Price to advertise us. We want one agent in each town to take orders for our famous tailoring. If you are interested show it to your friends—it is too good a thing to miss. The biggest chance to make money.

We Prepay Express Charges

NATIONAL STOCK YARDS, ILL.

Struck by Lightning.

On page 30 there appears the advertisement of the Franklin Lightning Rod, which has stood the test for sixty-two years. This is a standard rod and by addressing the inventor and manufacturers you can keep away from worthless imitations. Struck by lightning is now the common heading in country newspapers, a calamity which can be prevented if ordinary precautions are taken.

Recent Feather Quotations.

Recent sales of feathers consigned to the St. Louis market indicate the following prices: Prime white live goose at 63c.; prime gray do. at 44c.; old white, 36 to 38c.; x grade, 27 to 31c.; xx, 15 to 18c.; xxx, 7 to 10c.; xxxx, 3c.; tare, 10 per cent. on small sacks and 3 per cent. on large. Duck — White, 41c.; dark, 30c. Chicken—Prime, dry-picked body, 4c.; wet, damp and quill-mixed, 2c. Turkey—Wing, tail and pointers mixed, 19c.; body, 8 to 9c.

MILK FEVER OUTFITS, Dehorners, Teat Syphons, Slitters, Dilators, Etc. Received Only Award World's Fairs, Chicago, St. Louis. Write for Illustrated Catalogue.

Horses For the Army.

The Quartermaster-General has taken final steps to breed horses for the United States Army instead of buying them from the horse-raising farmers and stockmen. Captain C. H. Conrad, Jr., of the Cavalry, is to have charge of the establishment just being set up at Front Royal, Va., and will get to work at once. Let us hope that the United States Army will be able to sell enough surplus colts, fillies and mares so as to materially reduce the usual appropriations for the army. It is estimated by the editor of The National Farmer and Stock Grower that all army horses the Quartermaster-General will breed and raise to be fit for service will cost two thousand dollars per head and eight years will be required to produce enough horses to mount a troop of cavalry. The German government stud farms breed and raise cavalry horses at a cost of $500 per head, and we feel assured the United States Army starting out with liberal appropriations will multiply the German cost by four. Whenever the United States Army needs horses, and needs them bad, the time-honored custom of paying cash for them will be followed. The farmers of the United States can furnish all the horses the United States Army will need in time of war.

The army breeding establishment should now engage in farming, so that the young stock and the breeding animals can pay their way by field work. Depending solely upon the sale of five-year-old geldings will not make a horse farm rich, but the army appropriations come easy and will very probably go easy. Our estimate of cost is most likely to be too high than too low.

Great Increase in the Horse and Mule Business.

Mr. T. H. Holland, of Holland, Nugent & Maxwell Bros., horse and mule commission firm at the St.Louis National Stock Yards, again invites attention to the increased business at the St. Louis market. Total receipts for seven months, 101,264 horses and mules, an increase of 37,649 head over same period last year. The receipts are 26,117 head greater than the business done at Chicago, the nearest competitor. Said Mr. Holland: "I attribute the growth of this market to the ability to sell any and all kinds of horses; to its being the natural concentration point for mules and the most economical center of assembly and distribution for horses and mules in the country. When a dealer buys horses here he comes back again, and the same is true of the shipper. It is a good market that satisfies both buyer and seller." Horse and mule dealers should communicate with this firm when they need market information.

A First-class Commission House.

In consigning live stock for sale at the St. Louis National Stock Yards, remember the Evans-Montague Live Stock Commission Company. It is a successful firm, highly competent and persevering in the interest of their customers. The Evans-Montague Commission Company solicit consignments of cattle, hogs and sheep for sale on the market, and desire stockmen to take notice that the company has special buyers who select and buy stock and feeding cattle for their customers. S. T. (Tom) Boothe, who has been on the market for fifteen years, is native cattle salesman. Colonel James H. Campbell, the veteran, has recently joined this house as Vice-President, in charge of the Southern cattle department. His presence adds strength to the organization. The firm is equally well equipped to sell hogs and sheep. Stockmen requiring market information should address Evans-Montague Commission Company, Box 68, National Stock Yards, Illinois.

The New York Herald says: "Bishop Cox, a registered trotting stallion, by Potosi, son of Pistachio, whose dam was the dam of Maud S., 2:08¾, is said to be the largest standard-bred horse on record. He stands 17.1½ hands high and weighs 1,730 pounds. He is owned in Montana."

Topped the Chicago Cattle Market.

An understanding of the value of top grades of cattle can be had by reference to the sale on Wednesday, July 19th, of a load of cattle by Clay, Robinson & Co. for Earl Reed, of Fremont, Ind., a load of well-bred mixed grade Shorthorn and Hereford beeves, averaging 1,388 pounds, at $7.00, topping the market 10 cents per 100 pounds that day, there being no other cattle above $6.90. The price was also the top for the week and up to then as high as paid since April. Mr. Reed said that before he left home his neighbors told him he could not reasonably expect to top the market with this load of cattle, and naturally he was very highly gratified at the outcome, especially as he is a new feeder, having never fed cattle until last year.

Western Range Horse Sales.

The range horse sales at the St. Louis National Stock Yards continue to be successful. On Thursday, July 27th, about 1,100 head were sold. This was the fourth sale of the season. These horses arrived on Tuesday; a day was required to classify them, and they were all sold by Thursday afternoon. These sales are well attended by farmers and dealers, and all the offerings will probably come back to the market for sale again at a profit in the domestic sale ring. August sale dates are Thursday, 10th and 24th, and the first sale in September will be on Thursday, the 7th. These sales are conducted by Campbell & Reid and the Western Sale Stables Company at the St.Louis National Stock Yards.

Must We Import Wheat?

The Money Market Review, in its report on commercial conditions, has this to say in regard to the Nitrate of Soda situation:

"The consumption in Europe and in Egypt is progressive, but it does not progress by leaps and bounds, as will probably happen, and in the near future in the United States.

"The production of wheat in the United States does not increase on a par with the population, and, unless a prompt change takes place, this country, until now a great exporter of wheat, will see itself soon converted into an importer.

"The principal reason is that they have allowed the soil to become impoverished, without restoring to it what the crops have removed from it.

"It is imperative to modify this state of affairs, without waiting longer, and everything leads to the belief that this modification is about to be realized. Intensive cultivation will soon be an imperative necessity in the United States, and it will take but a few years for the quantities of Nitrate of Soda demanded by the United States to be limited only by the production of it."

The Auto-Fedan Hay Press is advertised on page 4. A fine illustrated catalogue is issued.

HORSE AND MULE SALESMEN.

HOLLAND, NUGENT & MAXWELL BROTHERS.

NATIONAL STOCK YARDS,
EAST ST. LOUIS, ILLINOIS.

HORSE AUCTIONS EVERY MONDAY AND TUESDAY.

Native Cattle Sales.

At St. Louis, on August 1st, a load of forty-six head 1,267-pound choice steers sold at $7.00 per 100 pounds. These were Panhandle, Texas-raised Herefords, fed and finished in Boone county, Missouri, by R. L. Wilhite. This represents the top of the St. Louis cattle market so far this season.

W.F. YOUNG, P.D.F., 106 Temple St., Springfield, Mass.

Great Draft Horses.

Trumans' Pioneer Stud Farm, Bushnell, Ill., write as follows under date:

"We had a visit this week from our old customer, Mr. Harry Broadbent, of Henry county, Illinois, and we sold him the imported grey Shire colt, Carlton Greyling, that stood well up in his class at the last International. He is three years old, standing on the best of feet and joints and of extraordinary quality. He was assisted in his selection by Dr. White, son of the late Mr. Hugh White, who was one of the leading importers in his day. This is the second imported Shire stallion that we have sold Mr. Broadbent this season, and his last purchase will be shown at the Henry County Fair this fall, all going well."

"Our last importation is doing first-class. We expect to make our usual exhibit of Shire and Percheron horses at the Iowa State Fair the latter part of next month, and shall be very pleased to see all our old customers and friends there."

St. Louis Hog Prices.

On August 1st, at the St. Louis National Stock Yards, a choice load of 196-pound hogs sold at $7.40 per 100 pounds, which was the top of the market, and the bulk of the hogs sold at $7.15 to $7.30. The good hogs that went to the shippers and butchers, that had a little weight to them, brought $7.30 and better, while good lights, less than 160 pounds, sold at $7.00 to $7.30; fair grades, $6.00 to $6.85; best pigs, $5.00 to $6.25; and the poorer grades at $4.75 to $5.50. Roughs sold largely at $6.00 to $6.75. Some of the real rough ones went at $5.50 to $6.00.

Sheep Sales at St. Louis.

At the St. Louis National Stock Yards, August 1st, the best fat lambs went at $6.25 to $6.75 per 100 pounds, with but few going over $6.50, while fair to medium grade lambs sold at $4.75 to $6.00; and the culls sold at $2.00 to $3.75, most of them at $3.00 to $3.50. These cull lambs were very hard to sell, as none of the buyers wanted them at any price. Very few sheep sold for more than $3.50 per 100 pounds, and quite a number of plain, heavy ewes went at $3.25. Some choice breeding ewes brought $3.65 to $4.00. Thin sheep were poor sellers, as there was but little demand for them. Best stocker grades sold at $2.25 to $3.00, and old, common ewes, $1.00 to $2.00. Bucks sold at $2.25 to $2.50 per 100 pounds.

Bring Up That Rich Farm Beneath Your Land!

"The Spalding Deep Tilling Machine makes a perfect seed bed that cannot be procured with any other machine or combination of machines on earth today. I have renewed my farm and have today the best crop of wheat in this neighborhood, and I believe the best crop of wheat ever grown here."

(Signed) P. B. CRANE, Long Lake, Minn.

DEEP TILLAGE is one of the livest subjects of the day with progressive farmers. Since the Spalding Deep Tilling Machine has completely solved the problem, you hear deep tillage everywhere. You will soon *see* it everywhere.

Bring up your brand new farm from the virgin subsoil! Conserve the priceless moisture! You can now *do* it. The old-fashioned expensive methods that didn't do the work, are now a thing of the past. The Spalding Deep Tilling Machine makes deep tilling easy, and brings it within reach of every farmer. It opens up a new treasure of farm profits—for there is such a treasure under every farm. We want you to know all about this remarkable deep tiller—

The Spalding Deep Tilling Machine

It has now been in successful use *for three years* by leading farmers in all parts of the country. We want you to know *how thoroughly* it pulverizes the soil—properly prepares the seed bed *12 to 16 inches* or *more*—doubles and even triples crops in many cases—protects you against drought by conserving the moisture—cuts the roots and covers the weeds and brush so deep they won't come to life again.

L. E. Holden writes: "My experience is that by underdraining and the use of the Spalding Deep Tilling Machine, and by proper selection of seeds and fertilization, *we have increased the products of Good Hold Farm three-fold.*"

The Spalding Deep Tilling Machine alone pulverizes the soil deep enough to bring up the virgin subsoil with all the big crops and big profits it holds for you. No plow or combination of plowing and subsoiling has ever been able to do this.

Spalding Deep Tilling Machine tilling 13 inches deep and thoroughly pulverizing the soil—bringing up "new farm" and preparing a real seed bed. Note the clean cut, deep furrow without any furrow slice. Send or Free Catalog.

The Spalding Deep Tilling Machine positively pulverizes the soil to a depth of 12 to 16 inches or more, so that it *conserves the moisture for months.* It prevents the ruin of land by erosion. Hundreds of thousands of acres are being saved by the Spalding Deep Tilling Machine because it puts the land in condition to *absorb* and *hold* the moisture and thus stops flooding and the forming of gullies.

The Spalding Deep Tilling Machine saves time. It saves labor. It makes unnecessary a large amount of harrow work, disking, dragging, etc. But best of all, it gives you the *properly* prepared seed bed that raises the bumper crops.

Investigate. Write to us for free books today.

Agricultural Expert's Opinion

Long Lake, Minn., June 17, 1911.

Spalding Department, Gale Mfg. Co.

I give you herewith my experience in eradicating quack grass. I took a field that was badly infected with quack grass and plowed it in August, 1910, with a Spalding Deep Tilling Machine. In about two weeks I double-disked it thoroughly. I gave it three such diskings during the fall. This spring I harrowed it and seeded it to wheat. *Not a spear of quack grass can be found on the field today.*

The prospects now are for 30 bushels to the acre. The Spalding Machine will save 50 per cent of the labor in eradicating quack grass. The Spalding Deep Tilling Machine makes a perfect seed bed that cannot be procured with any other machine or combination of machines on earth today.

(Signed) P. B. CRANE.

WESTERN

RANGE HORSE SALES.

Horse raisers are advised that sales are being conducted by

Campbell & Reid and Western Sale Stables Co.,

NATIONAL STOCK YARDS, ILL.,
As usual, during the season of 1911. The Sixth Sale will be held on

Thursday, August 24,

And every two weeks thereafter until the close of the season. The Seventh Sale will be held on

Thursday, September 7

We will be glad to hear from Ranchmen having Horses for sale, also from buyers who wish to have splendid Horses to finish up for the domestic sale ring.

Please address
J. J. SEARCY, Sale Manager,
NATIONAL STOCK YARDS, ILL.

A Crop Expert on Corn.

Expert Crop Reporter Snow, of Chicago, issued a report on August 1st. In his bulletin he places the condition of the corn on August 1st at 70.1, compared with 82.4 on July 1. The figures indicate a yield of 2,650,000,000 bushels, against 3,125,713,000 last year. The same report makes winter wheat yield 458,000,000 bushels, compared with 464,000,000 a year ago, and spring wheat 215,000,000 bushels, against 231,399,000 a year ago. Oats he gives at 760,000,000, as against 1,126,765,000 bushels in 1910.

Clay, Robinson & Co. at St. Louis.

One of the most remarkable records of modern business achievement is the success of Clay, Robinson & Co. at the St. Louis live stock market. Clay, Robinson & Co. are salesmen and buyers of cattle, hogs and sheep in the interest of their customers. They are well established at ten different markets. This firm entered the St. Louis market a little over two years ago and started at the bottom of the list of commission firms. Since then, although the list is a long one, they have now reached the second place in the volume of business done. The St. Louis market is famous for active, reliable, skillful live stock commission firms, and Clay, Robinson & Co.'s record is all the more remarkable for that reason. See page 13 of this paper.

Vissering, the Breeder.

Mr. J. P. Vissering, lately of Godfrey, Ill., has purchased the fine property corner of Evergreen and College avenues, Upper Alton, Ill. He has lately sold his stock farm, but having raised high-class Aberdeen-Angus cattle and the big-type Poland-China hog for a lifetime, he has put into the hands of (what are known to him to be) careful breeders a number of his best stock to raise on shares for him. Of these he will, in the future, sell the produce, and, being in the business, he has formed what is known as a Live Stock Exchange for all breeds of registered cattle and hogs.

Our St. Louis Mule Market.

Extract from circular letter dated August 1st by Holland, Nugent & Maxwell Bros. at St. Louis National Stock Yards: "Now our mule market is all right on strong work mules. They need not be so awful fat, sugar mules and miners, and top-notch cotton mules. We have heard no complaint from our salesmen on these classes of mules. The in-between, inferior class of mules, under-age and leggy are not wanted at the present time, and should be left in the country."

Trumans' Pioneer Stud Farm have purchased another great Shire mare in England and her dam is the noted mare Field Buttercup. She was purchased from the famous Billingborough Stud Farm and will arrive for the International Live Stock Exposition, where she will help to form an interesting exhibit.

A bill to reduce the price of cotton goods has passed the Senate.

Poultry and Farm Paper Club.

We are often asked which is the best poultry paper in the United States, and the answer is **The Reliable Poultry Journal.** There are other excellent poultry papers, but the one we take home to read and one the family is determined to read is **The Reliable Poultry Journal.** We have made arrangements whereby we can send The National Farmer and Stock Grower and **The Reliable Poultry Journal,** both papers, one year, for fifty cents. This is a bargain that is good now, but this advertisement may not appear again. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Condemnation of Eggs.

During the middle week in July it was reported that upon the St. Louis market 38,903 dozen eggs were condemned by the State Food Inspector. To form an idea of what this amounts to it is only necessary to say that it represents 45 per cent. of the receipts. It was the hot weather that played havoc with the eggs, and much of the destroyed stock was from the more remote country districts, where poor transportation facilities permitted the eggs to spoil before they reached their destination.

Most of these eggs had been placed on the market by speculators, the farmer had been paid his little old 10 to 12 cents a dozen, and the eggs reached St. Louis two to three weeks after the first egg was collected. In cold weather nearly all these eggs would have arrived safely, fit to be sold to consumers, but during the intense heat the method resulted in disaster.

Farmers in every section have to organize egg-selling clubs, filling up cases and ship the eggs themselves. If the settlement is some distance from a railroad they will have to organize to drive in and put the cases on the cars direct to market. Every egg produced in Missouri ought to be kept in a cool place directly it is gathered and placed on the table of the consumer in less than ten days. The close inspection of eggs offered for sale in the large cities will cause farmers to attend to their own egg shipments.

KEROSENE EMULSION.

How to Make It and How to Use It—Statements of Fact Sustained By Reasons Therefor.

[By S. Arthur Johnson, Colorado Agricultural College, Fort Collins.]

One of the oldest and most serviceable of insecticides is kerosene emulsion. An emulsion, in this case, is a mixture of those proverbially unmixable substances, oil and water. To accomplish this a third substance, called an emulsifier, is needed. For ordinary work as an insecticide soap is used as an emulsifier. In some cases, where a large quantity of the mixture is needed, other emulsifiers are used.

Commonly the emulsion is made in the form of a stock solution, which is afterward diluted to the strength required for the application.

The formula for the stock solution is as follows:

Kerosene	2 gallons.
Soap	¾ pound.
Water	2 gallons.

Thoroughly dissolve the soap in two gallons of boiling water. Remove the water from the stove and while it is still hot add the kerosene. To make the emulsion it is necessary to stir the mixture very thoroughly. If one has a bucket pump, this is easily done by removing the nozzle from the hose and pumping the fluid back upon itself until the whole mass becomes a rich, creamy mixture. The stirring should continue till all the oil is emulsified, which will probably be in from five to ten minutes. The progress of emulsification can be tested by watching to see whether any free oil rises to the surface when the emulsion is allowed to stand for a moment. Touch the edge of a piece of paper lightly to the surface of the liquid. If free oil is there it will quickly run into the paper and its presence may be discovered by the application of a lighted match.

If the oil does not emulsify readily, it may be necessary to put the mixture back on the stove and warm it more. If this is done, great care must be taken that the substance does not boil over. If it does, the kerosene may become ignited and a dangerous fire result.

Both the water and the soap in the above formula are in excess of the quantities which are often given in formulas. The reasons for this are that the excess of water makes the resulting mixture warmer and aids the process of emulsification and the excess of soap tends to overcome the alkali which is often found in the waters of dry countries.

The stock solution will often keep for a considerable period, but it is better to make and use it immediately, because the oil is apt to separate from the water if it stands long. When it is found that the mixture has separated, it may be warmed and reagitated until the emulsion is restored.

Of course, smaller quantities of emulsion may be made by preserving the proper proportions of the ingredients. A cupful may be made in a bowl and stirred with an egg beater.

When the stock solution is made it is ready to be diluted and applied. Pure kerosene is very dangerous to plant life, and emulsions are dangerous in less degree. It is necessary that one should know something about the susceptibility of the plant. For growing plants it is seldom safe to use the emulsion stronger than one part of kerosene to sixteen of water. Many plants will not stand it quite so strong. To make this strength from the above solution, since the stock is half kerosene, one should add one gallon of the stock solution to seven of water. For winter work, when trees are dormant, the emulsion used is much stronger.

Only clear water which is free from much alkali or dirt should be used. Both of these substances have a tendency to make the oil come to the top, so that a part of the application is too strong and the rest too weak.

This is a contact insecticide and may be applied directly to the bodies of the insects one wishes to kill.

The Missouri State Fair is planning to have one of the largest and best poultry shows ever held at any State Fair in the Central West. They are offering $3.00 for first prize, $2.00 for second prize and $1.00 for third prize on all varieties of poultry, and are charging no entry fee whatever, besides offering liberal special prizes. The Missouri State Fair opens September 20th and continues to October 6th. Entries close September 20th, and you should write at once for premium list and entry blanks of the Missouri State Fair. Address, John T. Stinson, Secretary, Sedalia, Mo.

I Guarantee to Cure ECZEMA TO STAY CURED!

DR. J. E. CANNADA
THE DOCTOR WH
TREATS NOTHING
BUT ECZEMA.

It is also called SALT RHEUM, SCALD HEAD, TETTER, ITCH, WEEPING SKIN, MILK CRUST, PRURITUS—these are different names, but all mean one thing—ECZEMA.

I prove every word that I have said—I give to every sufferer

A FREE TRIAL

Just to show you that you need my treatment. It is yours for the asking. If you have been to other Doctors, if you have taken patent medicine, and used lotions and salves till you are disgusted, write to me—I will send you ABSOLUTELY FREE OF CHARGE, A TRIAL TREATMENT. There are no strings to this statement. There is not one cent to pay—not a penny accepted. I know what my trial treatment will do; I know that it will convince you more than anything else on earth that you need my treatment.

Don't Miss This Chance for a Cure

If you are SUFFERING FROM ECZEMA you can only be cured one way—REMOVE THE CAUSE. What is the cause? ACID IN THE BLOOD. How do you remove it? By cleansing the blood of the ACID.

My treatment is soothing—relieves the dreadful itching at once and cures the disease quickly. You don't have to take treatment for months and months. ONLY ONE CASE IN TEN needs the second treatment—ONE IN FIFTY needs the third—think of that!

What Eczema Is

Eczema is a disease of the blood and affects all parts of the body—the face, lips, ears, hands, feet, genital organ, etc.

SYMPTOMS.—Yellowish red eruption; the pimples or patches may swell and the itching is so great the person will scratch the top off, then they bleed and dark scales form; there is an oozing of matter. In some the skin cracks and bleeds. Itching is terrible; a person suffering will scratch till they bleed. Scales form on parts of the body, where the clothing comes in contact.

Ten Years Guarantee

I positively Guarantee that every case cured by me will stay cured 10 YEARS! It must be good or it could not be sold this way.

Strong as Rock of Gibraltar

I am a graduate from two leading medical schools. I am the holder of a GOLD MEDAL taken in Competitive Examination. Does this not show that I am fully qualified? I will send you my book, showing endorsements of business men of all classes. Also testimonials and pictures from cured patients everywhere. Some of them may be YOUR NEIGHBORS.

MY BOOK

Is the most complete book ever sent out. I explain every form of the disease plainly and fully. I show pictures of many severe cases, which are extremely interesting. I send you names of thousands who have been cured and are grateful.

DR. J. E. CANNADAY
969 Park Square,
Sedalia, Mo.

Reliable Beyond Question

This is a statement from the bank of my home town, where I have done business for years.

THE CITIZENS' NATIONAL BANK OF SEDALIA
SEDALIA, MO.

February 11th, 1908.

TO WHOM IT MAY CONCERN:

This certifies that Dr. Cannaday's patients, from all over the United States, have been placing their money in this bank while they tried his treatment on eczema. In all this time we have been called upon but five times to return the patients money.

One died before the treatment was shipped; two did not get the treatment as it was lost in transit; one paid cash for the treatment three days later after getting her money; and one was not satisfied.

50,000 EXTRA MEN NEEDED TO HARVEST WESTERN CANADA'S CROP.

Will Take 160,000 Altogether to Take Care of Yield of Prairie Provinces.

162,000 farm hands will be required this year to harvest the grain crops of Manitoba, Saskatchewan and Alberta. Of this number the local help will provide about 112,000, which will leave about 50,000 extra farm hands. There is, therefore, a great demand for this class of labor in all parts of Western Canada. In order to meet the requirements it has been arranged to grant very low railway rates from all Boundary points reached by Canadian railways.

This will give to intending harvest laborers a splendid opportunity to look over the magnificent wheat fields of Western Canada and the best evidence that can be secured of the splendid character of that country from the farmer's standpoint. There will be at least 200,000,000 bushels of wheat harvested this year and it is expected that the yield will run from 15 to 25 bushels per acre. Many farmers will net, as a result of their labors, as much as $8.00 to $10.00 per acre and many will deposit as profits as much as $8,000 to $10,000.

The wide publicity given to the excellent crop that is being raised in Central Alberta and Southern Alberta, Central Saskatchewan and Southern Saskatchewan, and also in Manitoba, wil increase the price of land in these three provinces from $3.00 to $5.00 per acre, and the man who was fortunate enough to secure lands at from $12.00 to $20.00 per acre will have reason for gratification that he exercised sufficient forethought to invest, while the man who was fortunate enough to secure a homestead of 160 acres free will also have a greater reason to feel pleased.

Notwithstanding the great addition to the acreage this year over last and the large crop that will be ready for harvest, there is no reason to become alarmed that the harvest will not be reaped successfully. There will be a great demand for these low rates during the next couple of months; be sure to make your application to any Canadian Goverment Agent at as early a date as possible. Harvesting will commence about the 25th of July and continue for five or six weeks, when threshing will begin, and there will be plenty of work until November.

Former Chief of the St. Louis Police Force E. P. Creecy owns a Missouri farm on the Gasconade river. He recently suffered a loss estimated at $1,000 when lightning destroyed his barn. The building was fired by the bolt and a large stock of hay and corn were destroyed. The barn was not insured or protected by a lightning rod.

The Ohio State Fair opens at Columbus on August 28th.

SALESMEN WANTED

Trained Salesmen earn from $1,200.00 to $10,000.00 a year and expenses. Hundreds of good positions now open. No experience needed to get one of them. We will assist you to secure a position where you can get Practical Experience as a Salesman and earn a good salary while you are learning. Write today for full particulars, list of good positions we now have open and testimonials from hundreds of men recently placed in good positions.

Clover Seeding Lost.

The clover and grass seed sown this spring in wheat, rye and other grain has been parched up and killed, either wholly or in part, on thousands of fields in the Central, Western and Northern States. This is a serious situation and calls for prompt attention. If the clover is not replanted it means no clover hay next season, and the planting of some substitute crop for hay next spring at considerably increased expense will probably be necessary. Not only that, but the failure of the clover crop means the loss of the green manuring crop in the rotation and a disarrangement of the whole farm plan of crop rotation. The situation should be met at once. Every piece of new seeding should be examined, and, if it has been burned up, steps taken to replant it at once.

One of the best ways known to get a stand of clover is to disk the stubble field as soon as the grain is off, allowing the disk to run about three inches deep and working the stubble into the soil. The disking and cross disking should be sufficient to clear it of weeds and grass and put the top three inches of soil in fine tilth. Keep the ground cultivated until the first soaking rain, then sow about ten pounds of clover seed mixed with six to eight pounds of timothy per acre and harrow the seed in. A still better way than harrowing is to sow the grass seed with a grain drill, letting the seed run down the grain tubes from the grass seed box and covering the seed from one to one and one-half inches deep.

By sowing clover and grass seed alone in this manner, without a nurse crop, it makes much more rapid and vigorous growth than when sown with grain. By disking the land also a much better seed bed is made than could be obtained by plowing, since when ground is plowed in dry weather it breaks up lumpy and lies up loose and is very difficult to work down into a compact seed bed, such as is essential for the best results with clover and grass seed. In addition, the grain stubble worked into the top soil by disking seems to form a top mulch especially beneficial to clover.

This method of seeding clover is becoming quite general in some of the Middle Eastern States, where farmers over large sections are giving up the practice of spring seeding with grain because of frequent failure to catch, and seeding alone after the grain is cut instead. By this method clover and grass seed may be sown in the Central and Western States as late as September and still make a good stand that will not winter kill; but in the extreme Northern States the seeding should not be made later than August 15th.

To summarize, grass seedings in spring grain have been burned out on thousands of farms. Replant now by disking the stubble about three inches deep and sowing clover and grass seed alone without a nurse crop by August 15th.

Best Watch in the World.

One hundred and eighty of the leading railroads have adopted the Howard Watch as the standard of excellence. It is because the Howard Watch has no actual competitor. There is an interesting story about this watch which our patrons will take pleasure in reading. Just write a postal card to Dept. 122, Howard Watch Works, Boston, Mass., and ask for the story of The First American Watch. See page 7 and read about the best watch in the world.

Extraordinary Announcement: THE BOOK OF LIVE STOCK CHAMPIONS. EDITION OF 1911.

To Contain True to Life Pictures Reproduced From Photographs Taken in the Principal Show Rings of the American Continent by the Greatest Animal Artists.

ONE THOUSAND CHAMPIONS

Winners in the Annual Live Stock Contests at State and National Fairs and Expositions.

THIS is the Fourth Edition of the most valuable book ever published in the interest of high-class stock raising.

The pictures in The Book of Live Stock Champions are of famous animals. There are sweepstakes and championship winners at State, National and International Fairs and Expositions. These include individual awards in breeders' competitions, also herds with prize-ring honors; the beef cattle include grand champion steers and car-loads; the dairy cattle include record makers and large producers of milk and butter; the horses include thoroughbred, trotting, coach, draft, hunters, ponies, jack stock, etc. Every breed of hogs, sheep and goats will be represented by the best in every breed.

There is not a second-class animal or inferior picture in the book. Every animal is a record-maker, record-breaker, famous sire, mother of champions, or winner in the prize ring.

ISSUED AS A SOUVENIR SUPPLEMENT.

The Book of Live Stock Champions is published as a Souvenir Supplement to The National Farmer and Stock Grower, issued monthly at St. Louis, Mo., a nice, clean, general farm publication, full of practical, interesting and instructive information. It contains good reading for all the family. It is very useful to general farmers, vegetable and fruit growers, and especially so to cattle, hog and sheep raisers and feeders, horse and mule raisers and dealers, and it contains more good poultry facts than most of the poultry papers. There are thirty-two pages, four columns to the page.

Special Inducements to Paid-in-Advance Subscribers---To Old Friends and Patrons.

It is worth something for a publisher to know how many books to print and bind. We therefore offer the first ten thousand copies of this edition at One Dollar per copy, including a two-year subscription to The National Farmer and Stock Grower. The first ten thousand copies will be handsomely printed and elegantly bound in red cloth, with gilt title. This is an extraordinary offer. After publication the cloth-bound copies will cost Two Dollars a copy without the subscription.

HERE IS A SUBSCRIPTION BLANK.

Hale Publishing Co., 3550 Vista Ave., St. Louis, Mo.:

Gentlemen:—Herewith please find One Dollar to pay for two-years' subscription to The National Farmer and Stock Grower, for which please give me credit. You will please send me as a Souvenir Supplement, post free, safe delivery guaranteed, one copy of The Book of Live Stock Champions, cloth-bound edition of 1911, immediately after publication.

Write for descriptive pamphlet.
T. C. KIMBER, Breeder,
P. O., Pilot Knob, Mo.

MILL CREEK STOCK FARM,

The home of the noted Starlight family of Jacks and Jennets for the past thirty-five years, is located seven miles southeast of Nashville, Tenn., on the N. C. & St. L. R. R., at Asylum Station, and has on hand at all times a nice lot of Jacks and Jennets, all of the best blood, from six months to six years old, for sale at reasonable prices. Write for catalogue. Also Jersey Cattle.

THOS. H. EZELL, Prop.,
(son and successor to the late H. C. Ezell)
Nashville, Tenn., Sta. B, R. F. D. No. 7.

Book of Champions.

We are actively engaged in preparing the new edition of the Book of Live Stock Champions for publication.

We have published several editions of this valuable book and intend to make the new edition far superior to all others.

We already have illustrations of seven hundred different champions, and in each case the picture occupies a half page in the book. We are now gathering the remaining three hundred pictures.

Each illustration is a special demitone engraving from a photograph taken from life. No drawings or fancy pictures appear in the book.

First and second-prize winners are not eligible unless they have also won championship prizes. It is a Book of Live Stock Champions, not simply a book of ordinary prize winners.

Champions of the beef cattle breeds are admitted by their show-ring honors. We have enough pictures of beef cattle champions to make a book by themselves.

Dairy cattle are admitted by show-ring honors, also by officially tested dairy records. We have the finest selection of dairy cattle in the world.

Draft horses are admitted on show-ring records. Trotters and pacers are admitted on track records or as noted sires. We have all the famous horses, going back thirty years.

Thoroughbred horses are admitted on account of track honors or as sire or dam of champions. Saddle horses and ponies are admitted as championship winners.

Jacks and jennets, also mules, are admitted on show-ring or market honors.

Hogs, sheep and Angora goats are admitted as winners of sweepstakes prizes in State, National or International Fairs.

Numbers of famous car-loads of cattle, hogs and sheep which have won show-ring and market honors will be published in the book.

Every live stock champion is entitled to entry providing a first-class photograph can be obtained. We do not intend to disfigure the book with poor pictures. It is better to leave out the poor pictures than to apologize for an inferior book.

We do not charge the owner for publication of his animal, but we do ask his co-operation in furnishing first-class photographs and the records of said animals.

An advertisement of the Book of Live Stock Champions appears on page 19. This class of book should be ordered before publication, so as to receive the copy fresh from the binder. The subscriber who pays in advance will get the cloth-bound edition with gilt title, also The National Farmer and Stock Grower for two years, all for one dollar. After publication the price of this cloth-bound edition will be advanced.

Address all communications concerning the Book of Live Stock Champions to **PHILIP H. HALE, 3550 Vista Ave., St. Louis, Mo.**

Of Interest to Horse Owners.

We want to call the attention of our readers to a little book, "A Treatise on the Horse and His Diseases." Every reader of our paper can own it free of charge, and it is a good reference book to consult when most needed. It is published by the Dr. B. J. Kendall Co., Enosburg Falls, Vermont, the makers of the famous Kendall's Spavin Cure. See page 17.

Blooded Stock Notes.

Mr. W. A. Hinkle, R. F. D. 7, Decatur, Ill., is one of our regular advertising patrons whenever he has Chester White pigs for sale. His stock is fully up to representations and his circular describes his method of raising them. See breeders' cards on this page.

Mr. S. Y. Burks, of Bolivar, Mo., is a splendid breeder of Poland-Chinas and of English Berkshires. His farm is in Polk county, on the Frisco Line, north of Springfield. He has good shipping facilities.

A fine Morgan stallion can be obtained at a reasonable price by addressing Judge W. W. Henderson, Security Building, St. Louis, Mo. The horse is at Bridgeton, St. Louis county, Mo., and in addition to being pure-bred and registered is one of the handsomest horses in the state of Missouri.

Attention is invited to the card of Mr. T. C. Kimber, breeder of pure-bred Large Yorkshire swine, who has a fine orop of pigs for sale on his farm at Pilot Knob, Mo. See his card on this page.

A very good article upon the subject of breeding draft mares will be found on page 29. It is by Mr. W. S. Corsa, of Whitehall, Ill, owner of one of the best live stock breeding establishments in the United States.

READ THIS OFFER!

I want a suitable name for my new magazine—44-page book with Forecasts of weather, short stories, formulas, receipts, etc. **A pair of FINE PEARL OPERA GLASSES and WATCH** will be given the one sending most suitable name. Send 25c. in coin and name you suggest. Offer open until October 31st, 1911.
W. W. MARSH, Winton Place, Cincinnati, O.

AGENTS.

We want a good, reliable agent in every county to handle our new Aluminum Kitchenware. None better; costs less; big commission; permanent position; excellent opportunities for advancement. This is an unusual chance for reliable, steady, experienced men or women agents. Reference required. Address, **SALES MANAGER, Suite 26 F, 1810 Wilson Ave., Chicago, Ill.**

AN EFFECTIVE AND ECONOMICAL FRUIT TREE SPRAY

No intelligent orchardist today questions the advisability of spraying his fruit trees as it is a generally accepted fact that in no other way can sound, perfectly formed and developed fruit be assured. The question of selecting the most effective spraying mixture with which to do this important work is, however, often a difficult one to decide. In the opinion of many fruit growers the best and cheapest spray mixture is made by mixing Merry War Lye with water in the proportion of one can to fifteen gallons water. This solution has sufficient strength to kill all insect pests without the slightest injury to foliage or buds. The same solution is fully as effective for destroying borers in fruit trees by washing the trunk thoroughly, applying with a white wash brush. It kills the worms and insects instantly, removes all scale and leaves the tree trunks in a smooth, healthy condition. This mixture has the further advantage of enriching the soil around the roots of trees and shrubs, thus stimulating their growth.

As a sheep dip and remedy for treating foot disease of sheep Merry War Lye has also been found to be remarkably effective, the solution for these purposes being in about the same proportion of one can of "Merry War" to fifteen gallons of water.

An up-to-date outfit on the road to the harvest field.

FROM REAPING HOOK TO BINDER

A Harvest Carnival With a Display of Ancient and Modern Methods of Gathering the Wheat Crop.

[By Edwin L. Barker, of the I. C. H Service Bureau.]

A great day was Saturday, July 8th. It was a day in which the interests of children, parents, grandparents and great-grandparents were strangely intermingled. It was a day filled with pleasure and historical and educational values—a vivid, striking contrast of the time that was with the time that is. It marked the advance from much labor and little gain to less labor and more gain for the farmer. It is at a Harvest Carnival such as this that we of the present are given a bittersweet taste of the past, and are set to counting our many blessings.

It was fitting that such a carnival should have been staged near DeKalb, in Illinois, for it was here that C. W. Marsh wrought the Marsh Harvester, the link between the self-rake reaper and the modern binder. Mr. Marsh was present, hale and hearty at the age of seventy-seven. The manufacture of the Marsh Harvester caught the interest of William Deering, whose capital and energy later were to assist in the evolution of the Deering machines and a perfect binder twine.

The idea of the carnival belongs to Henry O. Whitmore and T. L. Oakland, two pioneer Illinois farmers who live midway between De Kalb and Sycamore.

The event smacked somewhat of an Old Settlers' Meeting. All visitors under sixty were regarded as children. What does a man of fifty know of the world's progress in the methods of harvesting? Nothing. He is a child—an infant. When one of these youngsters would try his hand at swinging a cradle, the crowd would yell: "Look out! Don't cut your leg off!" And occasionally the warning came just in time.

The oldest and one of the best cradlers has just slipped over into his ninety-second year. If some of his friends had not stopped him, this cradle expert—"Uncle Billy" Allen they called him—would have cradled the entire acre of wheat, that he might put on record every one of his ninety odd years as a year of youth, and also, that though long idle, he had not lost the art of cradling.

Believe me or not, cradling is an art—soon to be numbered among the lost arts. We are not sorry to lose this art, since we have a better way —even "Uncle Billy" said so—but it is good to resurrect it now and then, if for no other reason than to remind us of the words that were truer then than now: "Man shall earn his bread in the sweat of his face."

Many varieties of cradles were brought from their hiding places to be used at the Whitmore and Oakland farms; and their names came with them—"Morgan," "Grapevine" and "Turkeyswing."

First came the reaping hook. After watching it cut a few sheaves of wheat one ceased to wonder that the cradle was once hailed as a great invention. One of McCormick's first reapers, which required a man to walk alongside of it and rake off the grain, could not be obtained. Had one of these reapers been there, it is doubtful if anyone present would have understood the trick of raking. The next reaper, with a seat for the raker, also was absent.

The first machine to enter the field was an old Champion self-rake reaper. Then followed the Marsh Harvester, which carried the grain up to a table, where two men stood and did the binding with wisps of straw caught from the bundles. These men were targets for many comments. Their hands did not work as swifty as in days agone, and frequently the driver had to pull the horses to a halt to give the binders a chance to catch up.

Finally a modern McCormick Binder took up the work. As it quickly cut, bound and tossed the sheaves to the shockers a cheer went up from the crowd, and Old Glory, hanging near, caught the spirit and the sudden stiff breeze and waved in triumph.

The flail was an interesting implement, and what, perhaps, was more interesting, was the different ways different farmers used it. Many who tried and failed complained that something was wrong with the flail. It was too long, or too short, or this, or that, or the other. There was nothing the matter with the men. Oh, no. The singer is never off key or out of time. No, no—it's always the piano or accompanist. To understand just how far progress has traveled on the farm, see a flail and a threshing machine standing side by side.

Farmers from different parts of the state had sent in a lot of old, odd relics of the agricultural past. The collection included rakes made of wood, a pitchfork so small that it might have been a giant's table fork, candle molds, lanterns, a foot warmer such as our forebears carried to church on cold days, and an ancient spinning wheel, with which an old lady spun wool.

Oh, but wait. I had almost forgotten the old dinner horn. Small as it is, it emphasized the fact that each generation is an adept in the arts and practices peculiar to that generation. No more; no less. Not one of the youngish, husky, big-lunged men could get more than a joke of a sound out of the dinner horn. It was not until an old man raised his head and placed the horn to his lips that a great blast went echoing across the distant fields. And then he laughed! "Why, it's easy. The women blew these horns when I was young." Then with a note of reminiscence in his voice: "We used to think it was the sweetest music we ever heard."

All the old things we like to remember as belonging to the harvest time were there—all save the little brown jug and the "Swizzle." Don't you know what "Swizzle" is? Then you're not as old as I thought you were. Why, man, "Swizzle" was the stuff that was in the jug. Now, if you don't know what "Swizzle" is, go ask your grandfather.

It was suggested—and we pass the suggestion along—that other farmers in other sections pull off similar carnivals. They recall pleasant memories to the older folks and whet the appreciation of the younger.

It requires an old, experienced hand to sharpen and swing the cradle.

The Chicago International.

Don't forget that the International Live Stock Exposition will open at Chicago on December 2d and close on December 9th. This is the clearing house of all the great shows.

$1 Worth of Mayr's Wonderful Stomach Treatment FREE

It is a positive remedy for all Stomach, Liver and Intestinal Trouble, Gastritis, Indigestion, Dyspepsia, Pressure of Gas around the Heart, Sour Stomach, Distress After Eating, Nervousness, Dizziness, Fainting Spells, Constipation, Congested and Torpid Liver, Yellow Jaundice, Sick Headache and Gall Stones.

The above ailments are mainly caused by the clogging of the intestinal tract with **mucoid and catarrhal accretions**, backing up poisonous fluids into the stomach, and otherwise deranging the digestive system. I want every sufferer of any of these diseases to test this wonderful treatment. **You are not asked to take this treatment for a week or two** before you will feel its great benefits—**only one dose is usually required.** I say emphatically it is a positive, permanent remedy and I will prove it to you if you will allow me to. I will send the complete $1.00 treatment to sufferers absolutely **Free** so you can try it in your own home at my expense.

The most eminent specialists declare that 75 per cent of the people who suffer from Stomach Trouble are suffering from **Gall Stones.** I firmly believe that this remedy is the only one in the world that will cure this disease. Sufferers of Stomach and Liver troubles and **Gall Stones** should not hesitate a moment, but send for this **Free** treatment at once. I would be pleased to send you the names of people who state they have been cured of various Stomach ailments and speaking the highest praise of this medicine. Just fill out the Coupon below—let me send you this wonderful treatment together with highly interesting literature, testimonials, etc. Don't suffer with agonizing pains—don't permit a dangerous surgical operation, which gives only temporary relief, when this medicine will permanently help you.

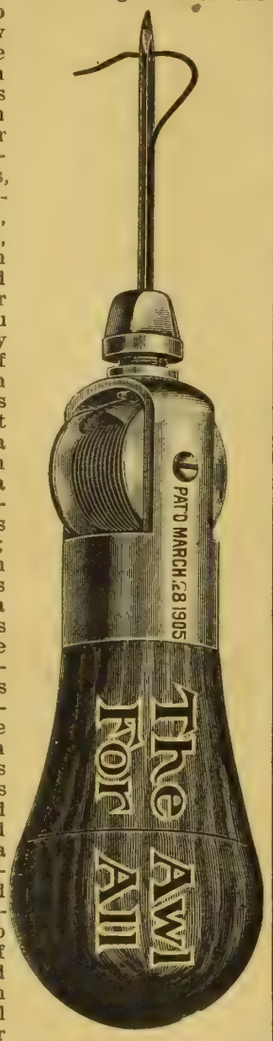
THE SEWING AWL.

A Most Useful Premium For Subscribers to The National Farmer and Stock Grower.

A farm on which there is not a sewing awl is in difficulties when work is most pressing. It is surprising how useful this little implement is. It is the Myers Famous Lock Stitch Sewing Awl. It is the only sewing awl made with a groove running the full length of the needle and has what is known as a diamond point. In order to sew leather or any heavy, thick material without breaking or cutting the thread it requires a needle with the groove running the full length of the needle. You might just as well have no groove in the needle as to have it only part of the way. With the Myers Awl you can sew old or new harness, saddles, carpets, canvas, tents, rugs, quilts, shoes, grain bags, and many other things. You can use any kind of thread in the Myers Awl, and it makes a lock stitch same as a sewing machine. It is very simple; a woman can use it as well as a man. It is one of the most practical devices ever invented. They are put up with two needles—one is straight and one curved—with a small screw-driver and wrench combined; also a reel of waxed thread with each awl ready for use. Every teamster and farmer should own a Myers Lock Stitch Sewing Awl, as there is use for one in almost every household. The Myers Awl is nicely finished, the metal parts are nickel-plated, the needles and wrench are kept in the hollow handle, which has a screw top.



Anyone who will send One Dollar cash to pay in advance for two-years' subscription to The National Farmer and Stock Grower can select one of Myers' Lock Stitch Sewing Awls, which we will send by mail, postage paid, as a free premium. Address, HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.

Eating An Apple.

"Do you know what you're eating?" said the doctor to the girl.

"An apple, of course."

"You are eating," said the doctor, "albumen, sugar, gum, malic acid, gallic acid, fiber, water and phosphorus."

"I hope those things are good. They sound alarming."

"Nothing could be better. You ate, I observed, rather too much meat at dinner. The malic acid of apples neutralizes the excess of chalky matter caused by too much meat, and thereby helps to keep you young. Apples are good for your complexion. Their acids drive out the noxious matter which cause skin eruptions. They are good for your brain, which those same noxious matters, if retained, render sluggish. Moreover, the acid of the apples diminish the acidity of the stomach that comes with some forms of indigestion. The phosphorus, of which apples contain a larger percentage than any other fruit or vegetable, renews the essential nervous matter of the brain and spinal column. Oh, the ancients were not wrong when they esteemed the apple the food of the gods—the magic renewer of youth to which the gods resorted when they felt themselves growing old and feeble. I think I'll have an apple," concluded the doctor.—New York Tribune.

Less Concern About Horses and More For the Wife.

"A man's work is from sun to sun, but a woman's work is never done." This is especially true on the farm, where a multitude of duties seem to await the good housewife, duties that are often trying and too often unappreciated by the "men folks."

We have in mind just now the extreme sorrow of the farmer who had just lost his wife and who emphatically stated that he would rather have lost two of his best horses. We doubt not that he might have saved the wife and lost the horses had he reversed their treatment.

Perhaps the majority of men are merely thoughtless in this respect and don't appreciate that the good wife on the farm is overburdened just because she doesn't complain. The less she complains the more concerned "her lord" should be about her welfare. Patience is a virtue peculiar to women and particularly farmer's wives. Why misuse it?

Even the man who has sentiment in his makeup but who has a generally keen business eye often shows mighty poor judgment by wearing out this human machine, which is his greatest asset.

We know and you know of farmers' wives who raise turkeys, chickens and ducks and make dairy butter the year round and who don't have even a bit of money they can call their own. The magnanimity of their husbands is nicely exemplified by the story of the man who sold his wife's ducks and spent the money for material with which she was expected to make him his winter supply of shirts.

Often one of the most irksome duties of the housewife is making dairy butter and preparing it for market. The modern creamery was instituted to relieve the farmer's wife of this burden.—Blue Valley Bulletin.

Steel Roof Protects Buildings From Fire.

Fire protection on the farm has just been exhaustively investigated by one of the largest manufacturers of roofing with results of great importance to every farmer and builder.

The investigation was conducted by the Edwards Mfg. Co., of Cincinnati, manufacturer of the well-known Edwards' "Reo" Steel Shingles.

Many actual instances were given where the spread of fire was prevented by nothing else than the steel shingles on neighboring buildings. Without these shingles the buildings would surely have caught fire from the sparks and flying fragments.

Farmers also bear out the Edwards Mfg. Co.'s strong assurance that "Reo" Steel Shingles are equally efficient protection against lightning. The company guarantees every roof sold against damage by lightning and backs its guaranty by a $10,000.00 bond.

Anyone can lay the Edwards' Reo Steel Shingles with hammer and nails. They come in stamped sheets of Bessemer steel, eight to twelve feet long, width twenty-four inches, either painted or galvanized.

Readers are invited to write for new free catalogue. Send the dimensions of buildings. The address is The Edwards Mfg. Co., 857 Lock street, Cincinnati, Ohio.

A Glass of Liquid Winter
You can take a little trip into the winter anytime you're hot, tired and thirsty. The very next time you're near a place that sells Coca-Cola, go in and spend 5c for this trip ticket into December—a glass or bottle of
Coca-Cola
The most delightfully cooling and refreshing beverage you ever tickled your palate with. Remember this for the hot days this summer, when the roads are dusty and the sun beats down.

A Dust Outfit.

For protection against the dust when taking long rides over dusty country roads there is nothing better than a long coat of some light, washable material; linen, crash or pongee serves the purpose admirably. There are reasons why pongee is preferable, as it makes a coat dressy encugh to wear any place and it is so easily washed and ironed. Fifteen yards of twenty-seven-inch material will make a coat about fifty-four inches long in a medium size. It may be unlined except for a small strip of butcher's linen used as a facing down the fronts and widening out across the shoulder so as to be joined in the arm seam. This piece of linen will give just the required amount of body to the coat. Frogs or washable buttons are best to use for the fastening. A further dust protection is a white or light tan chiffon veil about a yard and one-half long. This will cover the hat and can be brought down around the hair, keeping it from blowing and free from dust. Get a good quality of chiffon and it will wash like muslin.—Janet Thomas Van Osdel

The first home-grown cantaloupes from the American Bottoms, west of Edwardsville, Ill., were marketed at St. Louis, July 14th, by Charles Hess, of Poag, one of the large melon growers of the county. The consignment of five baskets of seventy-five melons were purchased by J. E. Tunnell. The wholesale price was a little above five cents each.

The Iowa State Fair opens at Des Moines on August 28th.

Hammond's Handy Atlas of the World.

This great Atlas contains 107 pages, 6x8 inches, is printed in colors and is bound in a durable red-cloth cover. It contains seventy full-page maps of every state and territory, with new railroads and towns. Every country in the world is shown by maps of the latest plates. We use this Atlas as a subscription premium. For fifty (50) cents paid in advance we will send one copy of **Hammond's Handy Atlas** post free by mail and credit one-year's subscription to The National Farmer and Stock Grower. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Our Friends and Enemies, the Weeds.

Under the general name of weeds we classify all the plants of herbaceous growth that we have not yet learned to utilize. Weeds are simply plants of unknown utility. Many of them will in the future be developed and brought into the service of man.

All of our present economic plants were once weeds. That was in the days when men lived by hunting and fishing, and had not yet learned to make use of any of these so-called weeds. But gradually during the long centuries a number of plants that were weeds have been brought into a civilized condition and improved for the use of man. The improvement of such weeds as gave us wheat, flax, oats, rye and rice, was so long ago that it is beyond the written records of men. But some of the other plants have come from weeddom during the recent centuries. Celery, potatoes, tomatoes, are among the rich gifts that have come from the kingdom of weeds since man began to write records of his doings.

What would be the status of man to-day without the prizes we have captured from the weeds? It was said that the introduction of the potato into Europe was a blessing to the masses of the poor who had need of a carbonaceous food that could be cheaply produced. Celery, first eaten by a hungry prisoner, is a recent acquisition from the weeds, but is now found on the tables of kings as well as on the tables of the poor.

And what should we do without lettuce, one of the most recent plants to be subjugated? It has grown more and more in favor, till now thousands of men are growing it, summer and winter, and every home demands it, twelve months in the year.

Weeds are both our enemies and our friends. They cover the ground and keep it moist when it is not in use for crops. This is really a very great service. The moist soil in the shade of the weeds harbors the millions of soil bacteria that are busy elaborating plant food elements so that the new crop may feed with avidity on a generous supply of nutrients. A hard, unprotected soil is rather losing than gaining in fertility, because the sun and the heat are making use of the voluble soil elements.

The roots of weeds frequently plow deep and permeate the soil with innumerable channels. The roots decay and in the channels left vacant the air finds its way downward to greater depths and other services are rendered. A weed-covered field is far better for immediate use than one that has been baking in the sun for weeks because of lack of verdure.

Not long ago a farmer wanted to put in an additional bean crop. He did not wish to take the time to plow up sod, leave it to rot and then plant beans in the usual manner. He had a piece of very rich ground that was covered with weeds. The workers went over it with hoes, skimmed off the weeds at the surface and drilled in the beans without plowing. The ground was friable, because it had been in the shelter of the weeds. The beans are doing well, but near them is a piece of sun-baked soil that was rejected by the farmer when he wanted to plant in this way.

Highway Tree Growing.

At the present time the growing of trees along the highways is left to the individual property owners whose holdings front on the highways.

The right to all of the highways rests in the public, and the public has the right to enter into the planting of trees along highways if it desires to do so. Doubtless the time will come when the public through its properly-elected officials will have a regular method of procedure.

This has been done in some parts of the United States, especially in the large cities. The city of Washington does not leave to the chance of individual taste the matter of highway tree planting. A most active body of men has the matter in charge with the result that Washington is glorious with trees.

We should have our country highways made beautiful with trees, and under the management of the Highway Commissioners. The attempt has been made in some places to turn the roads and streets over to the local Park Boards, but this involves the ownership of franchises and is not the desirable way to arrive at the solution of the tree-planting question.

We should move toward this general and systematic method of tree planting, but in the meantime we must educate as much as possible the general public, who are at present the ones doing this work.

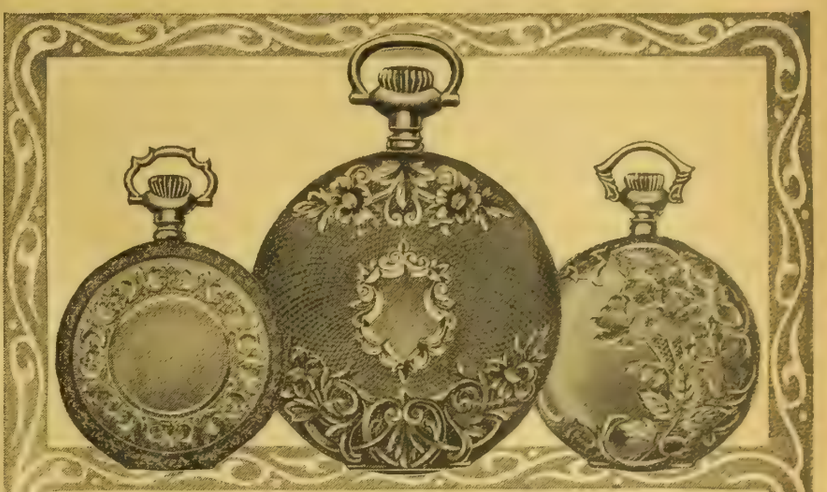
The first caution to be given is not to plant trees too close together. Ordinary trees, such as the oak, the walnut, the maple, should not be closer than 100 feet on the country highway. In the cities the distance is reduced to fifty feet, but in the open country 100 feet is more desirable.

It is hard to resist the temptation to plant close, because for many years the trees are small and the results meager, while if closer planted they will begin to make a showing in a very few years. The common practice is to yield to this temptation and ignore the advice of the landscape gardeners to plant at liberal distances apart. The people that do so are simply sacrificing the future to the present.

Trees planted far apart grow into beautiful shapes and take on increased grandeur as the years go by. Some of them become remarkable for size and beauty. This does not occur when many trees are planted close together. Each checks the growth of the other, and most of them become lop-sided.

The early years of highway tree growing should be sacrificed to the later years, for the later years will constitute a much longer period than the early years. Moreover, the trees that grow by themselves make more rapid growth than those growing close together, and this in large part makes up for the loss of abundant shade trees in the early years. The isolated tree has more sunshine to help it, more moisture at its roots, and more plant food.

The man that grows the isolated tree will rejoice, if he lives long enough, to behold its greatness.



Gold-Filled Watch Cases That Are Dependable

YOUR representative jeweler will show you a wide range of *styles* in "Crescent" and "Jas. Boss" Gold Filled Watch Cases.

His stock is selected from more than *three thousand* exclusive designs, in all sizes for ladies' and men's watches.

Beautiful engraved patterns—Engine-Turned effects—and exquisitely finished Plain Polished cases.

While you are examining the cases note the *depth of the engraving*. There is your plain proof of the thickness of the gold on the "Crescent" and "Jas. Boss" goods—which means a lifetime of wear and service.

A cheapened gold-filled watch case can never be engraved deeply—because the engraving tool cuts through the thin film of gold and exposes the composition metal underneath.

Yet you will find such trashy cases stamped "guaranteed for 20 years"—and there is no way that you as the purchaser can be protected against these meaningless "guarantees."

Except this—insist on getting a "Crescent" or a "Jas. Boss" case, so that you can be *sure* that the *values* are right.

You will know these cases by the trademarks illustrated on this page. These marks are standard with the fine jewelry trade and have been for fifty years.

Look Out For Argentina.

Two years ago the tariff was taken off hides after the tariff bill had passed, and that same tariff law also reduced the duty on fresh meats from 2 cents a pound to 1½ cents a pound. This decrease in duty was the forerunner of the reduction of all duties on farm products. Look out now for the agitation to admit Argentine beef and mutton into the New York market free of duty. It is coming soon.

Packers at Portland, Ore.

The great meat packing firm of Schwarzschild & Sulsberger, of Chicago, will construct a first-class plant at Portland, Ore., and join Swift & Company in concentrating the Pacific coast live stock business at that city. So far Swift & Company have owned the stock yards there, and now it is reported that Schwarzschild & Sulsberger acquire a 25 per cent. interest in the Union Stock Yards of Portland. There is considerable room for railroad development before there will be a great live stock market, unless the Columbia river trade takes a hand in building up the market.

Too Old or Too Young.

Boss—"Mr. Jones, you have sold more neckties than any clerk I have ever had. How do you do it?"

Clerk—"When a young man selects a tie I say: 'That's too young for you.' When an old man picks one I say: 'That's too old for you.' They both bite."—Exchange.

There are 10,777 farms or ranches in Texas which contain upward of 1,000 acres each.

Cleaning White Goods.

White waists and dresses are so extensively worn that they come in for renovation oftener than any other, and there are few women who cannot learn to launder these garments beautifully if they are willing to take the trouble. If spots of mildew are found on white goods, wet the cloth in soft water and then rub on plenty of soap and salt and hang on the line in the air for a few days. For grass stains, saturate with molasses, rub it in well, then wash in warm water; and to remove the dark-brown stains that are often found on white goods that have been put away for a long time, scrape some yellow laundry soap over the spots, then cover the soap with equal parts of salt and starch and place in the sun.

If a white garment has turned yellow from age or careless laundering, wash it clean, then put in an earthen jar or granite pan and cover with some buttermilk, and no harm is done if it is allowed to remain in the milk for three or four days.

A good bluing for white goods is made by dissolving one ounce of pulverized Prussian blue and half an ounce of oxalic acid in one quart of water, and this will not spot; and white goods should always be hung in the hot sun to dry, as the strong sunlight helps to whiten and bleach them.

When white clothes are put to soak over night in warm, soft water, they will not require so much rubbing, and anything that saves rubbing saves the clothes as well as time and strength.

The best way to clean fine white waists, dainty handkerchiefs, nice collars and jabots is to dissolve enough borax soap chips in hot water to make a nice lather, then put in the articles and cover with warm water, and let them soak for an hour or two, and there is nothing better than these Twenty Mule Team Soap Chips for washing all kinds of white goods. These chips soften the water and the articles are made a beautiful clear white with very little rubbing, and all sheer articles should be cleaned by lifting up and down and pressing and squeezing between the hands; and to give the fine white waists just the right degree of stiffness, wash, rinse and dry them, then dissolve a tablespoonful of borax in a quart of warm water, put the garments through this water, roll up closely and iron dry and it will look as dainty and fresh as a new waist.—M. A. T.

Reporter Almost a Senator.

Harry M. Williams came pretty close to being elected United States Senator from Louisiana, and the other candidates in the race were Edward Douglass White, Don Caffery and Newton C. Blanchard.

This is the way it happened: The Louisiana Legislature was in session in July, 1892. Murphy J. Foster, the present United States Senator, was then Governor, and a bitter fight was being made on the Louisiana State Lottery and Samuel D. McEnery. Henry Williams was covering the Legislature for the New Orleans New Delta, a newspaper that passed out of existence many years ago. In the course of his labors Williams had written an extended marriage notice about a legislator named Boggs. It was Boggs' fourth marriage, and Williams had handled it in a way that pleased the victim.

The day came when complimentary votes were being cast for favorite sons who wanted to go to the Senate and had no show of winning.

Roll call started. Boggs' name was reached.

"Here is where I can do the right thing," Boggs reasoned, and he shouted: "I vote for Harry M. Williams."

In addition he got busy with his fellow-members and buttonholed them right and left.

"Vote for Williams," he pleaded, rushing into every corner of the assembly room. And nearly everybody did.

The roll clerk had reached the letter R, or maybe it was S. Then the leaders were thrown into a panic.

"Good Lord," they said. "Here they are electing a Senator that we never dreamed of." So they rushed to everybody whose names began with R, S, T, U, V, W, and so forth, and spiked Williams' chances. He missed being elected by seven votes.

Missing election in this high office, Williams went chasing off in one of the parishes where a mob was bent on lynching a prisoner, and there he came near enjoying the distinction of being lynched for saving the prisoner from the mob.

Kosciusko's Horse.

There is a story told of a precise old gentleman, who, having purchased a pony for driving, was annoyed by the animal stopping at every public house which he passed in his drives. The pony gave a sure indication of the habits of its former owner. The horse of Kosciusko, the celebrated Polish General, appears to have had a different training.

When the Polish leader was living in exile in Switzerland, he wished to send a few bottles of choice wine to a clergyman who dwelt at Solothurn, and, having reason to think that his own servant would pilfer some of it, if he were sent with it, he intrusted it to a young man named Jelteur, lending him his own horse on which to perform the journey.

Young Jelteur set out with the basket of bottles, and was cantering along the road, when a poor man approached, and, pulling off his hat, asked for alms. The horse immediately came to a full stop, and refused to move for either coaxing or threats. This was awkward for the honest Jelteur, who had no money, and the horse seemed to be waiting for something; but a bright idea struck him; he plunged his hand into his empty pocket, and, pretending to take out some money, made a motion as if putting it in the poor man's hat, which he had no sooner done than the animal trotted on again. After going on for some distance, another beggar made his appearance and pulled off his hat, and the horse again stood still; but this time Jelteur was prepared for the occasion, and, pretending to put money in the man's hat, the animal went on his way quite satisfied; but it may well be doubted if the beggars were as well satisfied with this form of charity as the horse was!

The wine was duly delivered to the clergyman, and Jelteur, having encountered during the journey several mendicants, all of whom he induced the horse to pass by, appearing to give them something, returned to Kosciusko and told him he would never ride his horse again unless he also lent him his purse.

"Why so?" asked Kosciusko. And then the young man, much to the General's amusement, narrated the incidents of the journey, and how he was obliged to pretend to give something to the poor beggars in order to satisfy the horse.—Exchange.

His Thoughtful Wife.

"I hate to boast," said a Cleveland lawyer, "but my wife is one of the most economical women in the world. The other day she told me she needed a new suit. I said she ought to have it, by all means, but asked her not to spend a big bunch of money without letting me know about it. Well, the next day she said: "The tailor said he couldn't make that suit for less than $150. I thought it was too much, but told him to go ahead.'

" 'Well, I suppose it is all right,' I said, 'but why didn't you consult me first?'

" 'Why, dearie, I didn't want to spend car fare for two visits.'

"I tell you, it's these little economies that count, eh?"—Cleveland Press.

Bad Combination.

Rambo—"I have a pair of glasses at home that make me see double."

Baldwin—"Yes; I've seen you using them. One is a beer mug and the other is a whisky tumbler."—Chicago Tribune.

AMERICAN BEAUTY ROSE PICTURE FREE.

This illustration very indefinitely represents a most beautiful and delightful premium picture—a reproduction of a masterpiece. This magnificent picture is in the richest of color. It is 16x20 inches. It is finished equal to an oil painting. It will adorn and beautify any room in which it may be placed. If it is neatly framed it will be "a thing of beauty and a joy forever." Without framing it will last for several years. The illustration gives no idea of the size and beauty of the picture. We are using the AMERICAN BEAUTY ROSE PICTURE for the purpose of introducing The National Farmer and Stock Grower into new homes. Anyone who will send us Twenty-five Cents for a six-months' subscription to The National Farmer and Stock Grower can select the AMERICAN BEAUTY ROSE PICTURE as a free supplement. Address, HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.

SisterWoman!

READ MY FREE OFFER

My Mission is to make sick women well, and I want to send you, your daughter, your sister, your mother, or any ailing friend, a full 50-cent box of Balm of Figs Compound absolutely free. It is a remedy for the treatment of woman's ailments, and I want to tell you all about it—just how to use it yourself—right at home without any inconvenience—and the best of it is that it will not in the least interfere with your work or pleasure. Balm of Figs Compound is a remedy that has made sick women well and weak women strong, and I can prove it—let me prove it to you, and I will gladly do it, for I have never heard of anything that has, according to the abundance of testimonials at hand, so quickly and surely cured women's ailments. No internal dosing necessary—it is a local treatment, yet it has to its credit some of the most extraordinary cures on record. Therefore I want to place it in the hands of every woman suffering with any form of female weakness or disease so common to women.

This 50c box of Balm of Figs Compound will not cost you one cent

I will send it to you absolutely free, to prove to you its splendid qualities, and then if you wish to continue further, it will cost you only a few cents a week. I do not believe there is another remedy equal to Balm of Figs Compound, and I am willing to prove my faith by sending out these 50-cent boxes free. So, dear reader, irrespective of your past experience, write to me at once—today—and I will send you the treatment entirely free by return mail, and if you so desire, I can readily refer you to many, who can personally testify to the great and lasting cures that have resulted from the use of this remedy. But after all, the very best test of anything is a personal trial of it, and I know a 50-cent box of Balm of Figs Comcound will convince you of its merits. Nothing is so convincing as the actual test of the article itself. Will you give Balm of Figs Compound this test? Write to me today, and remember I will gladly send you a 50-cent box of this remedy absolutely free. Address,

MRS. HARRIET M. RICHARDS, Box O 228, JOLIET, ILLINOIS

THE UNIVERSAL MAGAZINE

Is a nice, bright, cheerful, illustrated monthly magazine of thirty-two pages, three columns to the page, containing home reading, stories, fashions, patterns and poetry—a splendid publication for the money. To anyone who will send us a money order for twenty-five cents to pay for one-year's subscription to the Universal Magazine we will send a splendid prize packet of **FIFTY ELEGANT ASSORTED POST CARDS**, or a packet of **FIFTY MASTER PAINTING POST CARDS**, or a packet of **FIFTY ROUND THE WORLD POST CARDS**. Make your selection of Post Cards. The paper is worth the money. The cards are worth twice the money. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

MAY MANTON EMBROIDERY.

These paper patterns require only a hot iron to insure a perfect transfer on cloth. The way to do it is to lay the material to be stamped on a padded ironing board or table, place the pattern over it with the printed side down and press over the entire surface of the paper with a hot iron, when a perfect outline will result. Please order by embroidery number.

Lovely Spray Designs.

No. 593.—Design for embroidering sprays of maiden-hair fern. The price of the pattern is 10 cents.

Four Yards of Edging.

No. 590.—Design for a scalloped edge or border. The scallops are one and one-fourth inches in width, three-fourths of an inch in depth. Four yards and four corners are given. The price of the pattern is 10 cents.

Collar and Cuff Set.

Please send all orders for these embroidery patterns to the **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

A Garrison of One.

A French grenadier, in a war with the Austrians, was put in charge of a small fort commanding a narrow gorge, up which only two of the enemy could climb at a time.

When the defenders of the fort heard that the enemy were near, being few in number, they deserted, and left the brave grenadier.

But he felt that he could not give up the place without a struggle, so he barred the doors, raised the drawbridge and loaded all the muskets left behind by his comrades.

Early in the morning, with great labor, the enemy brought up a gun from the valley, and laid it on the fort.

But the grenadier made such good use of his loaded muskets that the men in charge of the gun could not hold their position, and were compelled to retire, and he kept them at bay all day long.

At evening the herald came again to demand the surrender of the fort, or the garrison should be starved out.

The grenadier asked for a night for consideration, and in the morning expressed the willingness of the garrison to surrender if they might "go out with all the honors of war."

This, after some demur, was agreed to, and presently the Austrian army below saw a single soldier descending the height with a whole sheaf of muskets on his shoulder, with which he marched through their lines, and then threw them down.

"Where is the garrison?" asked the Austrian commander, astonished.

"I am the garrison," replied the brave man; and they were so delighted with his plucky resistance that the troops saluted him and called him the "First Grenadier of France."—Exchange.

$1.00 a month
Buys this Machine

30 days free trial

We will sell you a high-grade, drop-head, Sew Easy Sewing Machine for $1.00 a month. We guarantee each machine for 25 years. We ship direct from the factory. We do not sell to stores and we have no agents. We can save you some money. You get the machine at once and use it while you are paying for it and it only costs you about 3 cents a day. We have many special features in our machine such as short needles which don't break easily. Our shuttles hold half again as much thread as the old spring tension shuttle. We can't tell all the good points in this advertisement, and we couldn't afford to send you a machine on the small dollar a month plan unless we gave big value and low prices. We want you to write us today, saying: "Please send me circulars and full particulars about your 'dollar a month' Sewing Machine offer." Write Today. Address

SHEFFIELD MFG. CO., Dept. 142 1421 Olive Street, St. Louis, Mo.

Pete's Wrong Impression.

Mayor Gaynor, of New York, was talking about a famous robbery case wherein a criminal had been convicted by means of the Bertillon system of finger-prints alone.

"It reminds me," said the Mayor, "of a story about a parson. This parson had a fine orchard, and one summer, just when the Bertillon system first came out, the orchard was robbed. The only clew left was the robber's finger-print on an overripe peach. The parson had a photographic enlargement of the finger-print made. Then, with this enlargement under his arm, he accosted in the Main street the man whom he suspected of the theft.

"'Pete,' he said, "somebody robbed my orchard last night.'

"Pete took his pipe from his mouth. He gulped nervously. 'Is that so, sir?' he said.

"'Yes, Pete, that's so,' said the parson; 'but the thief left his mark behind, and I shall easily trace him.'

"'Yes, sir?' said Pete, huskily, and he cleared his throat.

"'Yes. Do you see this, Pete?' And the preacher held before the man's eyes the huge enlargement of the finger-print.

"Pete, beholding the photograph, made a gesture of despair.

"'I see there hain't no use denyin' wot I done,' he said. 'Ye got the bulge on me, parson. I pinched yer fruit, and no mistake. But I certainly would like to know, though, where ye got that there impression of my corduroy pants!'"—Philadelphia Bulletin.

Practical Arithmetic.

Mental arithmetic on a melting day—and while the cool river gleamed tantalizingly from the school room window! No wonder that small minds grew confused under the strain, and small calculators calculated with even smaller success.

"Now, boys," said the jovial dominie, who was himself aching for a swim, "here's your last problem for to-day. See if any of you can get it right: Suppose I have a piece of beefsteak."

The boys supposed it obediently.

"And suppose I cut it into sixteen parts. What would you call those pieces?"

"Sixteenths," piped a dozen voices.

"Right!" exclaimed the dominie. "And suppose each of these pieces were cut again into four pieces, what would they be?"

A dead, awful silence reigned, while the small brains worked desperately. Suddenly a hand was held up and one of the lightning calculators cried:

"Hash!"

Appropriate Styles.

"That elocutionist believes in dressing the part for any recitation."

"How do you mean?"

"Why, when she read the story about the sailors deserted on the lonely island, she wore a costume of maroon, and at her lecture on Celtic wit her dress was trimmed with Irish point."—Exchange.

HAIR GROWN ON BALD HEADS.

A Maine man who was bald eighteen years has been surprised and delighted by the very speedy growth of new hair all over the large bald spot. A man living at Falls Creek who had tried every remedy that he could buy to stop dandruff and falling hair, has at last found the right method. These two cases are examples of legions which prove the efficacy of the new Koskott Method. This is something different from the usual rank and file of hair preparations and is succeeding in a great many cases after all others have failed. A very interesting book has been published. It clearly explains the cause of dandruff, loss of hair, grayness, etc., and how these disorders of the scalp and hair may be overcome by a perfectly safe, inexpensive home treatment. Those who are bald, or who know they are becoming so, can take fresh courage. To obtain the book without any cost, it is only necessary to write to Koskott Laboratory, 1269 Broadway, 515 B, New York, N. Y., requesting that their treatment shall be sent postpaid, free, as here mentioned.

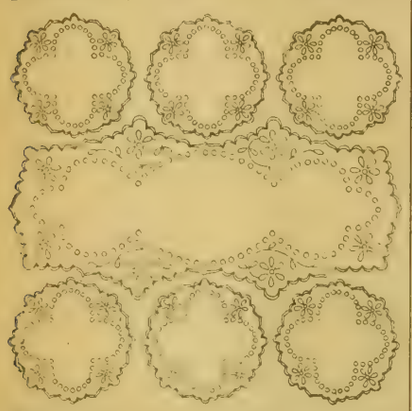
UNIVERASL EMBROIDERY SET.

A Subscription Premium in Connection With the Universal Magazine.

The most beautiful of all trays and doilies are those which display a great deal of eyelet work; there is nothing more attractive on the dining room table than white linens embroidered in open work through which the polished wood may show.

The pretty Universal Embroidery Set illustrated below shows a dainty pattern that should be carried wholly in eyelets, both ovals and rounds. This set was made especially for us and consists of one large tray, size 8x17 inches; six doilies to match, size 5½x5½ inches, all stamped on fine white imported linen.

Send us Thirty Cents and we will send you this dainty set for a short time only, absolutely safe delivery guaranteed, and the Universal



Magazine for one year. The Universal Magazine is a nice, thirty-two-page, three-column magazine, issued monthly. It contains illustrated reading matter of interest to all the family. There are nice stories, historical sketches, selected poetry, a splendid line of patterns, and has a number of original household articles. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Rest Through Reading.

Fortunate is the mother who has a good voice for singing. Doubly so if to this she can add the variation of good reading occasionally, for in this she may herself gain new thoughts and inspirations. There are few who cannot, if they will, cultivate the voice sufficiently to sing the lullaby; still fewer who cannot, if they so determine, spend a quiet hour daily with the gems of the best writers.

Take, for instance, "In Wink-away Land," by Eugene Field, written about little ones by one who loved them. For the twilight hours the story of Lady Button-Eyes soothes to sleep. The opening stanza is as follows:

"When the busy day is done
And my weary little one
Rocketh gently to and fro;
When the night winds softly blow
And the cricklets in the glen
Chirp and chirp and chirp again;
When upon the haunted green
Fairies dance around their queen—
Then from yonder misty skies
Cometh Lady Button-Eyes."

If there are crickets about your own hearth, show one to the child and teach it how they sing.

There are few selections which the child will comprehend in their entirety; few juvenile ones which will not be appreciated in part. We all recall how the Mother Goose rhymes entertained, though they were often destitute of real ideas. The rhyme and rhythm of the real poet will leave a permanent impress for good upon the child mind, while to the mother they will bring new hopes, new joys. The rest hour will be made one for the enlargement of the soul.—Bessie L. Putnam.

The House Fern.

A few hints about caring for the house fern may be acceptable to the many persons who love the beautiful plants but have been unsuccessful in the growing of them. The Boston and Pierson ferns are the ones with which we have had a successful experience. We thought we were keeping them very well watered when we gave them a cup of water a day. This is enough for the daily portion we learned from a florist, provided we give our plants once a week a thorough wetting by holding them under a running stream of water and letting the water soak the soil from top to bottom and then drain off before the plant is returned to the jardiniere. Let this operation really be a bath for the plant; see that the leaves are well sprayed with the water, so that all dust is removed. This opens the breathing pores of the plant and as well removes any parasites that may be inclined to seek a livelihood therefrom. Another help is to set the fern out in showers. The fresh rain water does wonders in the way of keeping the plant in thrifty condition. After very warm days, try setting the ferns out during the night to catch the dew. This will keep the leaves from becoming yellow.

The fern should be kept in a wide pot well filled with earth, which should be renewed about once a year. If a small stone or a piece of brick is placed in the jardiniere and the flower pot set upon this, good drainage will be given the soil in the pot. This little device also allows the sunlight to reach the base of the leaves, as it raises the flower pot up so that its top is on a level with or a trifle higher than the top of the jardiniere. Many persons have a mistaken idea about the amount of sunlight that the fern needs and keep their plants in a north window. A florist tells us that the Boston Sword and the Pierson ferns should be placed in the sunniest window in the house during the winter; while in the summer, when the heat is intense, they should be placed in a well-lighted but not too sunny window.—Janet Thomas Van Osdel.

THE BEST COOK BOOK.

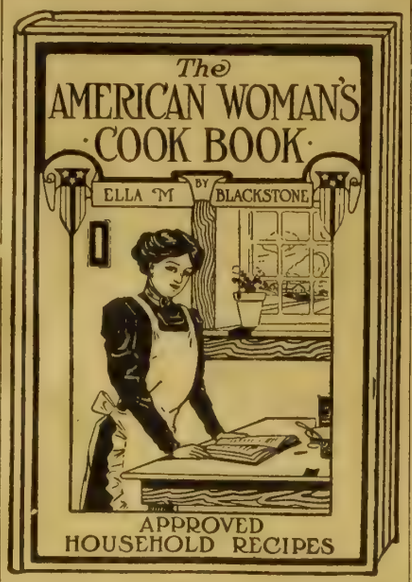
The American Woman's Cook Book.

This is a splendidly-bound book that weighs nearly two pounds. There are three hundred and eighty-four pages of approved household recipes, including many excellent dishes never before presented in a Cook Book.

The American Woman's Cook Book is by Ella M. Blackstone, who is famous for clearing the road for the student of domestic science by giving the reasons for everything. It is easy to learn from her when everything having a bearing on the subject is explained so clearly.

The book includes chapters devoted to foods for each month; time required to digest different articles of food; menus for all occasions; table etiquette; kitchen don'ts; kitchen equipment, and useful hints and recipes for the home in general; specially-drawn articles upon various subjects, such as soups, fish, poultry, beef, veal, mutton, pork, salads, vegetables, and all classes of dishes, besides beverages, candies, pickles and preserves, ice creams and ices; also ruled pages for new recipes to be preserved.

The thorough alphabetical index is a wonderful help to all subjects. A good book is known by its index,



which in this case is eighteen pages, three columns to the page.

The publisher's price for single copies of the American Woman's Cook Book is $1.50 per copy and 15 cents postage, but we have contracted for such a large number we have obtained the benefit of a reduced rate. Therefore we will send one copy of the American Woman's Cook Book, postage paid, for One Dollar, and include one-year's subscription to The National Farmer and Stock Grower. Address, **THE HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Ropp's Commercial Calculator.

This is a standard book, and a revised, enlarged and improved edition. There are millions in use. **Ropp's Commercial Calculator** is especially valuable to farmers. By its regular use many hard problems become easy. It will prevent mistakes, relieve the mind, save labor, time and money, and do your figuring in the twinkling of an eye. As handy as a watch, always ready and reliable. Anyone who will send 50 cents for one-year's subscription to this paper, The National Farmer and Stock Grower, can select one copy of **Ropp's Commercial Calculator** as a free premium. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

The Grain Dealer Surprised.

Farmer—Isn't No. 2 Corn worth more than 35c?
Grain Dealer—That is really the market price today, but I will make it 35½c. (Load weighs 2720 lbs.)
Farmer, opening Calculator—Amounts to $17.24; had on 48 bushels and 57 hundredths. (Page 13.)
G. D.—Well, I declare! Whose lightning Calculator is that?
F.—Why, Ropp's of course—the New improved edition. It comes handy indeed, couldn't get along without it.

NEW TREATISE ON TUBERCULOSIS

By FREEMAN HALL, M. D.
Author's Edition to be Distributed Free

Dr. Hall's latest work on Tuberculosis, the author's edition of which is to be distributed free, comprehends in a single volume of two hundred pages, the Diagnosis, Treatment and Cure of Consumption (more properly known as Tuberculosis,) and explains in simple language the relation of Catarrh, Bronchitis, Asthma and other throat and lung troubles to Consumption, with instructions how they may be recognized and successfully treated at home.

As the book is an elaborate and expensive work, beautifully illustrated with colored plates, handsomely bound in cloth, embellished with gold, but a single copy can be sent you free.

Address request for one free copy to the Yonkerman Co., 214 Shakespeare Building, Kalamazoo, Michigan.

Extra copies one dollar each.

Got His Answer.

Mrs. Nagleigh—"I suppose you are satisfied now that you made a mistake when you married me?"

Nagleigh—"I made a mistake all right, but I'm not satisfied."—Boston Transcript.

WEATHER FORECASTS

For the Month of September, 1911, by the Famous Prognosticator, Prof. W. Wadsworth Marsh.

[Copyrighted, 1910, by W. W. Marsh.]

September will bring changeable temperatures, cool to warm waves, early frost and damaging, cyclonic winds, at times heavy rain storms.

Hurricane winds over the Great Lakes, Atlantic Ocean, Gulf of Mexico and the coast, the Ohio Valley getting its share of the heavy rains and damaging winds.

Between 1st and 3d.—Storm, rain followed by cool wave north of Lake Superior region, with frost around and north of Lake Superior.

Changeable temperatures, storms, rain, hail and wind over the Ohio Valley and Tennessee, followed by light frost. Cyclonic wind, hail and rain over Ohio, Indiana, Kentucky, West Virginia, Pennsylvania and water sheds of the Ohio, followed by cool wave and light frost.

Storm, heavy rain, hail and high cyclonic wind at Pittsburg, Pa., and along the Ohio river and tributaries, followed by cool wave and light frost.

Storm, high cyclonic wind and quite heavy rainfall from Hinton, Va., to Nashville, Tenn., followed by cool wave.

Storm, quite heavy rain, warm to cool, with high winds over the Kanawha Valley.

General storm and changeable temperatures, wind and rain, followed by cool wave and frost, from the lakes to Texas, and rain and wind followed by cool wave and frost, central in the immediate Northwest, the storm, rain and frost belt extending from the North Atlantic coast over the Ohio Valley and then westward to Colorado and New Mexico, and rain followed by cool wave and frost from Lake Erie across the Ohio Valley to Texas.

Killing frost following the rain storm in many places in the West and Northwest.

High gales along the island coast and Northern New Brunswick.

Changeable temperatures, rain and wind storm covering the Upper Mississippi and Missouri Valleys, followed by cool wave and frost. This storm will cross these valleys, and the cool wave and frost following the

storm will cause some damage to late corn.

Storm Over the South.

High, cyclonic wind and heavy rainfall over the Gulf of Mexico and along the entire Gulf coast, covering the entire Gulf States. This storm will be quite severe along the coast of Florida and at Mobile and that section of Alabama. A cool wave with prospect of light frost will follow the storm. These same conditions will exist over the Carolinas and Virginias and their coasts.

Storm, rain and wind, changeable temperatures over the lake region; quite severe gales over Lakes Erie and Michigan.

Rain and wind followed by sudden drop in temperatures over Illinois, Michigan, Wisconsin, Minnesota, heavy frost following the storm at Milwaukee, St. Paul, Duluth,Chicago, Buffalo, Sault Ste. Marie, Marquette, and frost following the storm at Cleveland, Detroit, Grand Haven, Grand Rapids and over Northern and Northwestern Ohio.

Violent winds, rain storms at Charleston, W. Va., Charlotte, and that section of West Virginia.

High gale and quite severe storm along the North Atlantic coast and ocean and changeable temperatures.

Storm, rain and wind followed by cool wave and frost covering the New England and Atlantic States and cities of the East.

Storm, rain, followed by sudden drop in temperatures, cool wave and heavy frost over the Dakotas, Montana, Wyoming, and killing frost and snow in sections of Colorado.

Rain, followed by cool wave and frost, along the Rocky Mountain slope.

Rain, followed by cool wave, at Eastport, Me., Father Point, Que., Montreal, Que., Northfield, Vt. Rain at Yuma, Ariz., Tonopah and Winnemucca, Nev., Tatoosh, Wash., Portland, Ore., Phoenix, Ariz., Red Bluff, Cal., Seattle, Sacramento, San Francisco, Los Angeles, San Luis Obispo, Nome, Alaska, Honolulu, H. I.

Rain, followed by cool wave, at LaSalle, Ill., Calgary, Alberta, White River, Ont., Moorhead, Minn., Williston, N. D., Devil's Lake, N. D., Qu Appelle, Sask., Spokane, Wash.

4th to 6th.—Between these dates generally fair weather will prevail in most sections of the country.

Quite heavy frost, causing some damage to truck, corn and tobacco crops in Michigan and Wisconsin.

Frost in Minnesota and throughout the Northwestern States, causing some damage to corn crops and damaging flax crops north of Central Iowa. Regular cool, fall weather will prevail throughout the Northwest. Frost is likely through Kentucky. Tobacco should be protected.

General, cool, autumn weather, with frost in Iowa, Missouri, Kansas, Nebraska, Dakotas, Illinois, Northern Indiana, Northern and Northwestern Ohio and lake region, over New England and Northern and Western Pennsylvania, Northern New York and sections of the East and along the Rocky Mountain slope.

7th to 9th.—A general storm of wind and rain will cross the country, affecting every state in the Union.

11th to 17th.—The most violent storms of the season will prevail between these dates.

The Atlantic Ocean, Great Lakes and Gulf of Mexico will experience heavy, damaging gales and much rainfall.

Tropical storms, hurricanes and heavy rains will cause much damage along the entire Gulf coast and along the entire Atlantic coast, from New Orleans to Maine.

Hurricane winds and heavy rains, causing damage to property, washouts, etc., covering the states of Mississippi, Georgia, Alabama, Arkansas, Illinois, Louisiana, Florida, Texas, Carolinas, Virginias, Tennessee, Ohio Valley, Ohio, Indiana, Kentucky, West Virginia, Pennsylvania, Alleghany region, and over the tributaries of the Ohio, water sheds of the Ohio; heavy rainfall throughout the states mentioned, causing swelling streams, and the cyclonic winds causing property loss; frost 18th and 19th, except the South, the Virginias and Carolinas.

Thunder storms in Nevada and California, Sacramento and San Francisco. Rain at Spokane and Walla Walla, Wash.

Storm, cyclonic winds and quite heavy rains covering the entire East, affecting the cities of Boston, New York, N. Y., Baltimore, Philadelphia and Scranton, Pa., Washington, D. C., and the New England States and coasts; heavy rains and wind over New Jersey and coast, and heavy gales, heavy rains over the North Atlantic coast, damaging along the Nova Scotia and Newfoundland coasts.

High gales over Lakes Erie, Superior, Ontario and Michigan and region. Cyclonic storms and heavy rainfall at Milwaukee, St. Paul, Duluth, Chicago, Sault Ste. Marie, Buffalo, Marquette, Toledo, Detroit, Grand Haven and Grand Rapids, covering greater portion of Michigan, Wisconsin, Illinois and Minnesota, followed by frost on the 18th, 19th and 20th.

Cyclonic winds and heavy rainfall in Kansas, Missouri, Nebraska, Iowa, and covering the Upper Mississippi and Missouri Valleys, and from St. Louis to St. Paul, Minn., and over the Missouri Valley, from the Dakotas to Arkansas, followed by frost on the 18th, 19th and 20th.

Severe storms, heavy rain in the extreme Southwest, beyond the Rio Grande river, with heavy rains in the country between the Neuces and Rio Grande rivers, and near San Antonio, Tex., causing damage to property.

Storms, rain and wind over the Northwest, followed by frost on the 18th and 19th.

Storms, rain and wind from Iowa to the Atlantic coast and from Boston to the Carolinas.

Storm, rain and wind over the Dakotas, Montana and Wyoming, followed by colder weather and heavy frost, probably snow, on the 18th and 19th.

Rain, quite heavy along the Rocky Mountain slope at Helena and Havre, Mont., Santa Fe, Aline, El Paso, Huron, S. D., Cheyenne, Denver, North Platte, Pueblo, Rapid City, Lander, and storm, wind and quite heavy rain followed by frost over greater sections of the slope, 19th and 20th.

Storms over the West, rain and wind from Minnesota to Texas, followed by frost, on the 18th and 19th.

Rain at Amarillo, Tex., Red Bluff, Cal., Lewiston, Idaho, Baker City, Ore., Pocatello, Idaho, Spokane, Wash., Bentonville, Ark., Boise, Idaho, Reno, Nev., Salt Lake City, Utah, Northhead, Wash., Seattle, Wash., Roseburg, Ore., Tonopah, Nev., Del Rio, Tex.; rain at Modena, Utah, North Platte, Qu Appelle, Bismarck, Williston, N. D., Kalispelle, Mont., Yellowstone Park, followed by frost on the 18th and 19th.

Hurricane over the West Indies; quite severe at Turks Island.

Hurricane, severe storm at Lisbon, along the Portuguese coast.

Hurricane over the Bahama Islands, Kingston, and the islands of Bermuda. Rain at Nome, Alaska, and Honolulu, H. I.

20th to 25th. — Between these dates equinoctial storms. More severe storms will occur both in the United States and foreign countries and coasts. Hurricane winds and tropical storms, heavy rainfall with high winds, will again damage the South, covering the entire Gulf coast and states. All sections of the South being seriously affected by storms, wind, rain and water, much damage along the entire Gulf coast and cities, with violent storms on the Gulf of Mexico; much damage done by wind and water at Mobile, Ala., and the Louisiana and Mississippi Gulf coast. These storms of heavy rain and wind will move along the Atlantic coast from the Gulf of Mexico to Maine, covering the North Atlantic coast and the East, affecting the states of New York, Maryland, New Jersey, New England, with high gales and rough seas on the Atlantic; the storm severe on the coasts of Nova Scotia and Newfoundland, and damaging wind and rains in the cities of New York, Washington, D. C., Philadelphia and Scranton, Pa., and the East.

Storms, heavy rains and high winds over Western Kentucky and over the country east of the Mississippi river, extending southward to the Gulf of Mexico; the winds high and rains quite heavy, overspreading the Ohio Valley and river districts and mountain regions, the Upper Mississippi and Lower Missouri Valleys.

Wind and rain storm from the Atlantic slope as far west as the Rocky Mountains, with rain over the North Pacific States.

Storm, rain and wind covering Ohio, Indiana, Kentucky, Illinois, Michigan, Wisconsin, Minnesota, Dakotas, Wyoming, the entire lake region, with high gales on the Great Lakes.

Heavy rain and wind storms in Kansas, Nebraska, and heavy rains in Eastern Nebraska. Storms across Manitoba.

Rain and wind storms over Iowa and Missouri, the storm area covering a belt extending from Lake Superior southward to the Lower Rio Grande Valley.

Storms, rain and wind over the Middle Mississippi Valley, extending eastward across Tennessee, the Carolinas, Virginias and coasts.

Rain at Denver, Colo., Flagstaff, Father Point, Que., LaSalle, Pueblo, Colo., Tatoosh, Wash., Elkins, W.Va., Spokane, Wash., Lewiston, Idaho, Montreal, Que., Seattle, Wash., Yellowstone Park, Northhead, Wash., Portland, Ore., Pocatello, Idaho.

Storm at Devil's Lake, N. D.; rain at Durango, Cal., Madison, Wis., Minnesota, Manitoba, Roswell, N. M., Williston, N. D., Winnipeg, Bentonville, Ark., Miles City, Mont., White River, Ont.

26th and 27th.—Generally fair, and frosty weather may be expected.

28th to 30th. — Between these dates cool wave.

Storm over South Dakota and the entire region, between the Mississippi river and the Rocky Mountains, the temperature near freezing, with frost and snow over the Rocky Mountain region.

Rain and wind followed by frost over the Middle Atlantic and New England States and along the New England coast.

Storm over the Lake Superior region, covering greater portion of that region, followed by heavy frost.

Rain in the Upper Mississippi and Missouri Valleys, followed by frost.

Frosty weather following the rain over the Alleghany region.

Rain followed by heavy, killing frost over the Northern Rocky Mountain slope as far eastward as Minnesota and Iowa.

Gale over Lake Michigan and rain followed by heavy, killing frost through the lake region and the Northwest.

Rain followed by frost over the Ohio Valley and sections of Tennessee, Iowa, Missouri, Nebraska, Kansas; and rain followed by heavy frost over Wisconsin, Michigan, Illinois, Minnesota; and rain along the North Atlantic coast, frost following the rain over the East, the North Atlantic and New England States. Rain over the Carolinas and Virginias.

Frost following the rain over Ohio, Indiana, Kentucky and Pennsylvania, the frost quite heavy in western and northern sections of these states.

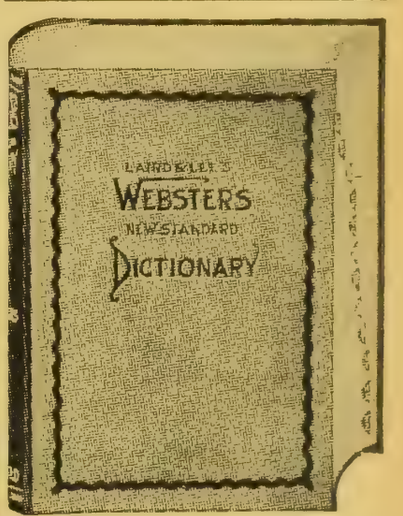
Frost and snow over Colorado, Wyoming and Montana.

PROF. W. WADSWORTH MARSH.

WEBSTER'S DICTIONARY.

The Most Compact, Useful, Handy Book Ever Issued by the American Press.

This is Laird & Lee's Webster's New Standard Dictionary of the English Language, a wonderful book, 756 pages in all, 840 illustrations, substantially bound, gilt title, red edges, patent thumb index. Special edition for office and general use on farms, estates, ranches, etc.; massive but handy; contains ten encyclopedic features, supplement of new words, dictionaries of biography, geography, musical terms, Biblical, classical, historical and mythological names, foreign phrases. English



word-building, rules in orthography, current abbreviations, metric system with conversion tables; weighs twenty-eight ounces. Our offer to you: Send us One Dollar and we will send you The National Farmer and Stock Grower for two years and we will also send you, postage paid, safe delivery guaranteed, one copy of this great Webster's Dictionary. We also agree to refund money and pay return postage to anyone who is not satisfied with the bargain. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

The Standard Watch Case.

In buying a watch, be sure to obtain the Keystone Watch Case. In order to understand this subject, see page 23. It is easy to obtain the benefit of the guarantee, for the reason that it is engraved inside every case. If you will take the trouble to examine the case you will then know exactly what you are buying, just the same as you know a gold coin issued by the United States Mint. The subject is worth investigating by all who buy watches.

MAY MANTON PATTERNS.

Very Elegant Pattern Service, With Full Instructions For Ordering and Making.

This is the very best pattern service and we are very much pleased to obtain it for our friends and patrons. Each pattern is new and original. In this edition we present for consideration thirty-three seasonable patterns absolutely up-to-date, with directions for ordering and quantity of material required.

PRETTY MODELS.

No. 6909.—One-piece Blouse For Misses and Small Women. Fourteen, sixteen and eighteen years.

No. 7086.—One-piece Waist. 34 to 42 bust, with high or V-shaped neck, with or without sailor collar and undersleeves, with straight back edges, with or without gussets under the arms.

No. 7088.—Work Apron. 34 to 44 bust, with square or high neck, with or without sleeves.

No. 6828.—Six-gored Skirt, 24 to 32 waist, with plaited side portions.

The price of each pattern is 10 cents.

FASHIONABLE MODELS.

FREE TO YOU—MY SISTER

Free to You and Every Sister Suffering from Woman's Ailments.

I am a woman.
I know woman's sufferings.
I have found the cure.

I will mail, free of any charge, my home treatment with full instructions to any sufferer from woman's ailments. I want to tell all women about this cure—you, my reader, for yourself, your daughter, your mother, or your sister. I want to tell you how to cure yourselves at home without the help of a doctor. Men cannot understand women's sufferings. What we women know from experience, we know better than any doctor. I know that my home treatment is safe and sure cure for Leucorrhoea or Whitish discharges, Ulceration, Displacement or Falling of the Womb, Profuse, Scanty or Painful Periods, Uterine or Ovarian Tumors, or Growths; also pains in head, back and bowels, bearing down feelings, nervousness, creeping feeling up the spine, melancholy, desire to cry, hot flashes, weariness, kidney, and bladder troubles where caused by weaknesses peculiar to our sex.

I want to send you a complete ten day's treatment entirely free to prove to you that you can cure yourself at home, easily, quickly and surely. Remember, that, it will cost you nothing to give the treatment a complete trial; and if you wish to continue, it will cost you only about 12 cents a week or less than two cents a day. It will not interfere with your work or occupation. Just send me your name and address, tell me how you suffer if you wish, and I will send you the treatment for your case, entirely free, in plain wrapper, by return mail. I will also send you free of cost, my book—"WOMAN'S OWN MEDICAL ADVISER" with explanatory illustrations showing why women suffer, and how they can easily cure themselves at home. Every woman should have it, and learn to think for herself. Then when the doctor says—"You must have an operation," you can decide for yourself. Thousands of women have cured themselves with my home remedy. It cures all old or young. To Mothers of Daughters, I will explain a simple home treatment which speedily and effectually cures Leucorrhoea, Green Sickness and Painful or Irregular Menstruation in young Ladies, Plumpness and health always results from its use.

Wherever you live, I can refer you to ladies of your own locality who know and will gladly tell any sufferer that this Home Treatment really cures all women's diseases, and makes women well, strong, plump and robust. Just send me your address, and the free ten day's treatment is yours, also the book. Write to-day, as you may not see this offer again. Address

MRS. M. SUMMERS, Box H • • Notre Dame, Ind., U. S. A.

No. 7090.—Short, Semi-fitted Coat. 34 to 44 bust, with collar that can be made square or round at the back.

Please be sure to give the size of pattern ordered and write your own name and address plainly, that no mistake can be made to cause delay.

Please address all pattern orders to **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

The Woman Who Gives.

The happiest woman I know is the Woman Who Gives. She has been giving all of her life and she will continue to do so as long as she lives, for giving is her life. She began her business career when she was fifteen years of age at a salary of one dollar a week. Fifty cents of this she gave to her mother, ten cents she set aside for "tenth money" to be used for church work, two dimes she dropped into her dime bank as savings against a rainy day (which more often proved to be some one else's rainy day rather than her own) and the remaining twenty cents she used to buy for herself the necessaries in the way of clothing. Now her salary is about $2,000 and she is still dividing it systematically and giving. But she gives more than money. She gives herself with her money. She is one of the busiest women in her town, but she is never too busy to visit the sick or the old or the poor. She doesn't make these visits in a long-faced, pious manner either. No, indeed! She comes to the needy ones all good cheer and smiles and interest. Before these needy ones realize it they are telling all of their little affairs and are pouring out their hearts because they know she wants to hear. Many a pretty gown and pleasure trip has this girl denied herself that she might help her mother to buy the home this mother has always longed for. And such a happy mother as she is in the pretty home. But this mother does not know that her daughter refused to marry the man she loves because she felt that her mother could not spare the help she was able to give. She will probably be married some day, but not until the mother is otherwise cared for.

This girl's position is a public one and brings her in contact with all classes of people, from the wealthiest to the very humblest. If there comes a time when she must show a preference in dealing with people, the favored ones are always the poor or the old, much to the chagrin of tht wealthy ones who are accustomed to having every whim humored immediately upon its expression. Some of the gifts brought her by grateful ones might be laughable were they not so pathetic.

This woman is no longer in the first bloom of young womanhood, but she looks young and she is as happy as a woman can be. She has a keen sense of humor and gets great pleasure out of little things. She makes the most of her minutes, and they are so charged with duties and pleasures that she is never unhappy, never blue and never sick.—Janet Thomas Van Osdel.

Breeding Draft Horses by the Corn-belt Farmer.

[Address by W. S. Corsa, of Gregory Farm, Whitehall, Ill., at Farmers' Institute, Champaign, Ill.]

King Richard offered his kingdom for a horse. Prof. Center only offers ten minutes. We bow to Prof. Center and will attempt to touch a few of the high spots in "The Breeding of Draft Horses by the Corn-belt Farmer" in the time allotted.

Tht draft horse is the logical horse for corn-belt conditions. The proper tilling of the soil and the scarcity of farm labor require power for the large and larger machinery devised to perform the most work at the least expense for manual labor per acre of ground or bushel of grain. This evolution of agricultural machinery to the large model has been rapid and wide-spreading until in the West powerful tractors are in common use. There the climate and soil and extent of ground to be covered point to the use of such massive machinery; but in the corn belt, upon the majority of farms, and in the general run of seasons, the draft horse will prove the most economical source of power in producing our crops for some time to come.

In the corn belt we don't breed draft horses to cultivate fruit, nor to raise cotton, but wheat, corn, oats, clover, alfalfa, the very best feeds to develop the draft horse to his best estate. It is a weakness of human nature to feed more liberally when you raise the feed than when it is brought in over the railroad. Draft horses, for their proper development, require generous feeding. So that nowhere else in all the country are the natural conditions for developing the draft horse so favorable as in the corn belt.

The custom and training of the corn-belt farmer is to handle stock in bunches. The kindly disposition of the drafter, his quiet, friendly manner, his peaceable ways with those of his kind, as well as all other kind and mankind, enable him to fit in most adaptably with the prevailing methods and equipment on a corn-belt stock farm. As with cattle, you can double the average bunch of draft horses, and practically the only expense you have doubled is the expense of feed. Here is an economic feature which has considerable bearing on the successful contraction or expansion of such an enterprise. At home we have a two-cent parrot in a $20 cage, but a bunch of somewhat valuable draft mares went all winter and never saw the inside of a barn. An hour's chill would do up the parrot, but whoever heard of a draft horse, that had plenty to eat, freezing to death in the corn belt, if on a day like this, one cannot imagine anything ever freezing? Woodland blue grass pasture and grain twice a day, and to-day twenty-one colts saved out of twenty-two foaled, a result due in no small measure to abundant out-of-door life and plenty of feed.

We overlook our hand when we fail to remember that the horse is an out-of-doors animal, that the corn belt furnishes a well-nigh perennial and salubrious out-of-doors for the drafter at a minimum expense per head for equipment.

There has been, and is, much argument as to whether there exists such an animal as a "dual-purpose" animal. Permit me to lead forward a corn-belt draft mare and mark her for Exhibit "A." She produces the crop which sells for cash, and a colt which from weaning time on may be transmuted into more coin than the average individual offspring of any farm animal at the same age. Jane produced $1,400 worth of colts and Daisy $900 worth and performed their full share of labor on the crops. Later, branded by wire and marked with age, they sold for approximately their original cost. The depreciation in the power plant of the corn-belt farmer is at a minimum when the units are drafters, and when these units are draft mares it is the only power I know of that renews itself while producing profitable labor. Many corn-belt farmers have their own good grade draft mares, Jane and Daisy, and these mares have been busy.

The census bulletin shows that in 1900 Illinois had horses to the value of $69,600,000, while in 1910 our horses were worth $163,000,000. Part of this gain can be attributed to the increase in value, but not all. There has been a large increase in the number of horses, and it is safe to say that the increase has been largely of the draft breeds. In this same year, 1910, the Illinois Stallion Registration Board issued up to October 1 9,370 licenses. Of this number 3,397 were for pure-bred draft stallions—all breeds—an average of about thirty-three pure-bred draft stallions to each county of this, the greatest draft horse state in the Union—a mighty little to leaven $163,000,000 of dough.

Reports from neighboring states tell a similar story. In spite of the automobile and auto truck, the growth of population has brought about a greater demand for horses for farm and city work.

The corn-belt farmer wants to awaken to the use of only pure-bred draft stallions and to the necessity of increasing the number of such stallions in every community, to the exclusion of the mongrel and the scrub

"Grading up," as Doctor Alexander so well states, "means using a pure-bred stallion for the first cross and continuously crossing the resultant female progeny with pure-bred stallions of the breed first used until all impure blood has been practically bred out." And that "as soon as possible in every community unsound, unsuitable, undersized breeding animals should be discarded, sound, high-class mares substituted and only pure-bred stallions patronized."

But the call of the times is to the pure-bred as never before. The expense of maintenance is the same; the labor of the pure-bred is equal or superior to the grade. Lineage is no license to loaf in either man or beast, and the profit and pleasure of breeding pure-breds is incomparably greater. The pure-bred drafter on the corn-belt farms spells better farming, better fencing, practical elimination of the barb wire and the barbarian scrub, and the maintenance of our heritage unimpaired as the seed-bed of the draft horse industry.

Other lands are casting eyes toward the United States for breeding stock of the beef breeds of cattle. Breeders of dairy cattle are at this very time anticipating the production in America of the choicest specimens of their favorite breeds. Already we have distanced foreign lands in the production of ideal types of swine. Is it possible, that, having drawn to this country for years the highest type and best individuals of draft horses, that the day will not come when the draft horse in the splendor of his massive form, graceful and symmetrical outline, will not be sought for in our own country by our own breeders and the breeders of foreign countries? It would be an indictment of the intelligence and perseverance of our people to deny it, and when that day arrives the drafter of our ideals and our dreams will be found on the land of the corn-belt farmer.

Bargains in Feeding Sheep and Lambs.

Not in years have either feeding sheep or lambs, or breeding ewes, been available at such low prices as now. Lambs and yearlings are going around $1.25 per 100 pounds lower than a year ago. Now is a good time to buy. Best range feeding lambs are going around $5.00 to $5.25. Desirable range feeding yearlings went at $4.00, with yearling ewes at $3.60. Strictly good range feeding wethers were selling at $3.25 to $3.50. Choice native breeding ewes are obtainable at $4.00 to $4.25. Goodly runs of Western range sheep and lambs are in sight for the coming weeks. If you have the feed, you cannot make a better investment than to stock up with the animals with golden hoofs. As we have the best buyers to be had on all of the leading markets, you are assured of prompt and money-saving service if you send your order to Clay, Robinson & Co., Live Stock Commission, well established at ten live stock markets: Chicago, Kansas City, South St. Joseph, East St. Louis, Fort Worth, South Omaha, Sioux City, South St. Paul, East Buffalo and Denver.

Don't Wear A Truss

After Thirty Years Experience I Have Produced An Appliance for Men, Women or Children That Cures Rupture.

I Send It On Trial.

If you have tried most everything else, come to me. Where others fail is where I have my greatest success. Send attached

The above is C. E. Brooks of Marshall, Mich. who has been curing Rupture for over 30 years. If Ruptured write him today.

coupon today and I will send you free my illustrated book on Rupture and its cure, showing my Appliance and giving you prices and names of many people who have tried it and were cured. It is instant relief when all others fail. Remember I use no salves, no harness, no lies.

I send on trial to prove what I say is true. You are the judge and once having seen my illustrated book and read it you will be as enthusiastic as my hundreds of patients whose letters you can also read. Fill out free coupon below and mail today. It's well worth your time whether you try my Appliance or not.

FREE INFORMATION COUPON

C. E. Brooks, 4711 Brooks Bldg., Marshall, Mich.

Please send me by mail in plain wrapper your illustrated book and full information about your Appliance for the cure of rupture.

Wet Going.

Albert Hubbard advocates good roads wittily.

"In France," he said, "the remotest mountain villages are connected with Paris by white, firm roads, equal to those of our parks and race courses. But here—especially here in Oregon!

"I motored yesterday afternoon out from Portland to Estacada and Molalla, returning by way of Clackamas. The roads were awful.

"'What awful roads you've got here,' I said to a Molalla farmer.

"'Wall, yes,' the farmer agreed. 'A mule was drowned yesterday in the road by my orchard.'"—Washington Star.

From August 8th to 12th, at Pleasant Hill, Ohio, a convention of horsemen will be held by Prof. Jesse Beery, the famous horse trainer.

SELECTED POETRY.

THE SERVANTS OF THE KING.

One day I wandered out upon the road
That spans the mad world, near my calm abode,
Seeking companions in the restless throng,
That staggered on beneath its varied load.

I bore no burden save the rhymester's pack
That lay as light as wings upon my back;
My goal was life, my only task to sing
And speed the sun around the zodiac.

I hailed a haggard fellow with a pile
Of printed stuff—the world's ephemeral file—
Calling: "Come, listen to a troubadour!"
He said: "I may have time—after a while."

There paused another in a gorgeous dress,
Laden with gems, but pale with weariness.
"Pause, friend," I said, "and listen to the wind."
"Pause?" he replied, "and lose all I possess?"

Then came a man with bricks upon his head,
Pursuing blindly his elusive bread.
I called: "Come, listen to a song of life!"
"What is a song? And what is life?" he said.

I cried: "What seek ye all—what wondrous thing,
That ye have souls neither to laugh nor sing,
Nor hearts to love, nor time to think or dream?"
They said: "We do not know; we serve the king."

"Who is the king to whom your lives are sold?
Whence came his power?" I questioned young and old,
Seeking for knowledge; and I only heard:
"The king is nameless; but his power is gold."

I cried: "Your king is mad! Why, if he knew
The difference between the false and true—
Between life's kernel and its worthless chaff—
Would he not find some nobler use for you?"

They paused, they stared, they sighed; then one by one
Resumed the weary race they had begun,
And I? I walked beside them down the road—
And went on singing till the day was done!
—Elsa Harker, in Metropolitan Magazine.

ARROYO AL'S COW PONY.

I took a trip this summer to the market with some steers,
And I struck an Eastern city where they sell you tubs of beers;
I was feelin' pretty yowlish and I couldn't say my name,
When I wound up, somehow 'nuther, at a high-toned polo game.

There was sunburned doods cavortin' on some ponies in a lot,
And they whacked a little spheeroid till it traveled like a shot;
I couldn't savvy, nohow, and I vowed that I was thru,
When I spied a feller ridin' on a pony that I knew.

It was that here buckskin broncho that I rode for Circle Bar,
He was clipped and oiled and powdered, but I knew each old-time scar;
I had lost him when Bear Hawkins played an extra ace and jack,
And I'd allus had a longin' fer to git that pony back.

Well, he sorter stopped and snorted when I yelled an old-time "Yip!"
And he bucked until his rider hit the ground upon his hip;
And he came a-runnin' to me, and I jumped upon his back,
And he pitched for sheer enjoyment when I hit his flank a whack.

Well, I rode across the open and I stopped down on the run,
And picked up the polo mallet (fer the player he was done),
And I hit that ball a crack, sir, and it sailed plum o'er the fence,
And the crowd just howled with pleasure, for they thought the sport immense.

Well, it cost me just six hundred fer to get my little bronk,
And to have that player patched up, from his heels to injured conk;
But I got my old cow pony—and jest hear this one thing more:
Don't whisper "polo" to him, or he'll buck like Satan, shore!
—Toronto World.

OVER THE BATTLE FIELD.

How quietly they sleep,
Lulled by the music of the everlasting years,
And suns that go their way by night,
They have no need,
They have no tears,
The flowers that watch and take their silent flight
Bear no glad message from this world of ours;
The winds and the bugle of the mountain peak,
The laughter of the clustered stars which honor them to-day,
They heed them not.
Defeat or victory are all the same to them;
Truth or iniquity may reign with us, and what care they?
They slumber in love's holy sepulcher of rest;
The pomp and majesty of war,
The agony of blood,
Are powerless to prevail;
Life is a dreamless dream, and death and life as one,
All, all is but as peace to them,
So deep, so stately their repose
In that far-reaching, wide eternity, whence they are gone;
How quietly they sleep.
The glory of the earth flares not along their sky;
The nightingales may weave and sing and sing and weave,
They never know;
The mystery of silence lies east and west and north and south,
And all around, in their immortal world:
How quietly they sleep.
—Herbert Randall, in Boston Transcript.

MARY.

When Mary spanks th' butter in the' spring-house by th' crick,
She looks almighty lovely—twic't as purty an' as slick
As them gals daown t' th' city with their funny struttin' walk;
An' I hang eround an' putter, jest t' hear Miss Mary talk.

She has eyes that haunt a feller in th' middle o' the night;
Eyes that sort a' makes th' vi'lets hide their petals out o' sight.
Wisht that I could git up courage jest t' ask her fer a wife.
Fer with Mary spankin' butter—well I guess that would be life!

Mary's arms are round an' rosy an' her cheeks is blushin' red;
Jest t' gaze upon her featu's sort a goes right t' yer head!
Then she spats her butter, mad-like, sez: "Git out, you lazy thing."
Keeps on spattin' an' a hummin' like th' water in th' spring.

Then I sneak away a-laughin', jest t' hide th' love I feel;
Go out yonder t' th' orchard with my senses in a reel!
When I think o' Mary spankin' of her butter by the spring,
Seems like heaven is some higher, an' th' stars, an' everything!
—From "Down Country Lanes," by Byron Williams.

A COQUETTE.

I am never in doubt of her goodness,
I am always afraid of her mood,
I am never quite sure of her temper,
For willfulness runs in her blood.
She is sweet with the sweetness of spring-time—
A tear and a smile in an hour—
Yet I ask not release from her slightest caprice,
My love with a face of a flower.

My love with the grace of a lily
That sways on its slender fair stem,
My love with the bloom of the rosebud,
White pearls in my life's diadem!
You may call her coquette if it please you,
Enchanting, if shy, or if bold,
Is my darling, my winsome wee lassie,
Whose birthdays are three, when all told.
—Margaret Sangster.

THE WASHERWOMAN'S SONG.

In a very humble cot,
In a rather quiet spot,
In the suds and in the soap,
Worked a woman full of hope;
Working, singing, all alone,
In a sort of undertone:
"With the Savior for a friend,
He will keep you to the end."

Sometimes happening along,
I had heard the semi-song,
And I often used to smile,
More in sympathy than guile;
But I never said a word
In regard to what I heard,
As she sang about her friend
Who would keep her to the end.

Not in sorrow nor in glee
Working all day long was she,
As her children, three or four,
Played around her on the floor;
But in monotones the song
She was humming all day long:
"With the Savior for a friend,
He will keep me to the end."

It's a song I do not sing,
For I scarce believe a thing
Of the stories that are told
Of the miracles of old;
But I know that her belief
Is the anodyne of grief,
And will always be a friend
That will keep her to the end.

Just a trifle lonesome she,
Just as poor as poor could be,
But her spirits always rose
Like the bubbles in the clothes,
And, though widowed and alone,
Cheered her with the monotone,
Of a Savior and a friend
Who would keep her to the end.

I have seen her rub and scrub
On the washboard in the tub,
While the baby, sopped in suds,
Rolled and tumbled in the duds,
Or was paddling in the pools,
With old scissors stuck in spools;
She still humming of her friend
Who would keep her to the end.

Human hopes and human creeds
Have their root in human needs;
And I should not wish to strip
From that washerwoman's lip
Any song that she can sing,
Any hope that songs can bring;
For the woman has a friend
Who will keep her to the end.
—Eugene Ware (Ironquill.)

THE MOST BEAUTIFUL THING.

The Lord sent down to this world one day
An angel to bear to heaven away
The earth's most beautiful thing.
The angel came to a beauty rose,
"'Tis the fairest thing," he cried, "that grows,
To my Lord the flower I'll bring."

He plucked the rose with tender hold,
Dearer to him than mines of gold,
To lay at his Master's feet.
On him, ere yet his upward flight,
A baby smiled, his eager sight
Saw naught more fair or sweet.

Beside the rose the smile he placed,
'Twere fairer than the flower it graced,
So full of trusting love;
But now he saw a glowing ray,
A mother's love shone o'er his way,
All other light above.

I will take them all to my Master's bower,
The love, the smile and the beautiful flower,
"My Lord will choose," he said.
Ere the angel entered the shining door,
He looked at the rose, 'twas fair no more,
The beautiful flower was dead.

He looked for the baby's smile, it was gone,
But the mother's love shone steadily on,
A gem of priceless worth.
Then the angel bore through the golden street,
The mother's love to his dear Lord's feet,
The most beautiful thing on earth.
—Ellen Newcomb.

COMPENSATION.

Good health may compensate for wealth,
If riches one may not acquire
Except at sacrifice of all
That's holiest of man's desire.

And brains may compensate for brawn,
The scholar playing loftier game
Than he whose muscles are his pride,
And skill his only claim to fame.

Who hath not beauty still may have
Brave talents that may compensate
In part, at least, for what is missed
In meting out the gifts of Fate.

But one thing can not be exchanged,
But stands all other things above.
Nor honor, riches, wealth nor fame,
There's naught can compensate for love.
—Frank Fair.

DAD'S DAY.

Why do all the daily papers
Printed since the world began,
Call the bridegroom at a wedding
Happy Man?
Anyone with any sense who
Some experience has had
Knows the really happy fellow
Is her Dad.
—Syracuse Journal.

OUR FLAG. COLE BROS. FRANKLIN LIGHTNING ROD. C B F R

When you buy a Lightning Rod you want ABSOLUTE PROTECTION. Only a PERFECT ROD will afford it. THE WORLD'S BEST LIGHTNING ROD costs only a little more than the cheap affairs which are hawked about. Buy the BEST and make your family and your property safe from lightning. COLE BROS. FRANKLIN ROD is the BEST, in use Sixty-two years, never failed. Avoid "Imitations", the GENUINE has C B F R stamped on the coupling of each Rod Section. Every foot guaranteed.

SPLENDID SUBSCRIPTION PREMIUM.

Beautify Your Home With This Popular Stencil Outfit.

Stenciling has long been a popular form of home decoration and is to-day used more extensively than ever. Ladies are particularly apt at this work, and anyone can produce beautiful effects. From every standpoint stenciling is a very fascinating art of extreme usefulness. You can make the most artistic pillow tops, curtains, portieres, centers, etc., in colors for yourself or for sale, without having any knowledge of painting, by using this up-to-date outfit. In fact, stenciling is so simple with this outfit that a child ten years old can do it.

This outfit is just the thing for beginners. It consists of six cut stencils on special oil board, six cups

of water colors (something new, that will not spread, but dries instantly), two bristle stencil brushes, four thumb tacks, also full and explicit directions for mixing colors and using stencils.

Our Subscription Proposition.

Send us Fifty Cents by postoffice money order and we will send you the Universal Magazine for two years and you can select the Popular Stencil Outfit as a free premium.

The Universal Magazine is a nice bright, cheerful, illustrated monthly magazine of thirty-two pages, three columns to the page, containing home reading, stories, fashions, patterns and poetry—a splendid publication for the money. Address, **HALL PUBLISHING CO., 3550 Vista Ave. St. Louis, Mo.**

THE FORTY-ACRE FARM.

I'm thinking, wife, of neighbor Jones, that man with stalwart arm;
He lives in peace and plenty, on a forty-acre farm,
When men are all around us, with hearts and hands a-sore,
Who own two hundred acres, and still are wanting more.

No weeds are in the corn fields, no thistles in the oats,
His horses show good keeping, by their fine and glossy coats;
The cows within the meadow, beneath the bleachen shade,
Learn all their gentle manner from a gentle milking maid.

Within the field on Saturday, he leaves no cradled grain,
To be gathered on the morrow, for fear of coming rain.
He keeps the Sabbath holy, his children learn his ways;
He fills his barns with plenty, at the close of harvest days.

He never has a lawsuit to take him to the town,
For the very simple reason that he has no fences down.
The bar room in the village for him has ne'er a charm:
I can always find my neighbor on his forty-acre farm.

His acres are so very few, he plows them very deep;
'Tis his own hand that turns the sod, 'tis his own hand that reaps;
He has a place for everything, and things are in their place;
The sunshine smiles upon him, contentment in his face.

May we not learn a lesson, wife, from prudent neighbor Jones,
And not, for what we haven't got, give vent to sighs and groans?
The rich ain't always happy, nor free from life's alarm,
But blest be those who live content, tho' small may be their farm.
—Unknown Author.

OUR BANNER.

When our flag, all a-ripple, leaps upon the breeze,
Its beauty enhances the green of the trees;
And we ask in our hearts: What skies ever knew
An emblem more fair than the red, white and blue
Of our banner?

Though our flag has become an old sight to our eyes,
Like sunrise, like sunset, it reddens our skies;
Yet how seldom the rays of the sun filter through
To our hearts, and how seldom the red, white and blue
Of our banner!

But on days when old memories waken our hearts,
And the past to the present its glory imparts,
The feelings that stir us proclaim us still true
To the meaning that hides in the red, white and blue
Of our banner.

Oh, where, and by whom, is our flag valued best?
Ask the homesick American, exiled, oppressed,
When, far from his country, there breaks on his view,
Like a friend among strangers, the red, white and blue
Of our banner.

Nay, ask of our soldier or sailor who lies
With his face to the foe under hot, tropic skies,
What is it that maketh his heart beat tattoo,
When he sees, fluttering high, the red, white and blue
Of our banner!

So here's to the sons of our country who fought
And died for their flag—to the great deeds they wrought;
Let our hearts, reaching up to them, give them their due,
As we see in new glamour the red, white and blue
Of our banner.
—Hanford Chase Judson.

FABLE OF THE FROGS.

Two gay young frogs, from inland bogs,
Had spent the night in drinking,
As morning broke and they awoke,
While yet their eyes were blinking,
A farmer's pail came to the swale
And caught them quick as winking.

Ere they could gather scattered senses
Or breathe a prayer for past offenses,
The granger grave—that guileless man—
Had dumped them in the milkman's can;
The can filled up, the cover down,
They soon were started off for town.

The luckless frogs began to quake
And sober up on cold milk shake;
They quickly find their breath will stop
Unless they swim upon the top;
They swim for life, they kick and swim
Until their weary eyes grow dim.

Their muscles ache, their breath grows short
And, gasping, speaks one weary sport:
"Say, dear old boy, it's pretty tough
To die so young, but I've enough
Of kick for life; no more I'll try it—
I was not raised on a milk diet."

"Tut, tut, my lad," the other cries,
"A frog's not dead until he dies;
Let's keep on kicking—that's my plan,
We yet may see outside this can."
"No use, no use," faint heart replied,
Turned up his toes and gently died.

The braver frog, undaunted still,
Kept kicking with a right good will,
Until with joy too great to utter
He found he churned a lump of butter,
And, climbing on that lump of grease,
He floated round with greatest ease.

MORAL.

When things go wrong—don't scowl and frown;
Don't get discouraged and sit down;
But struggle on—no murmur utter,
A few more kicks may bring the butter.
—Unknown author, in Jersey Bulletin.

WHERE?

There was Jimmie with his blarney and his rank old pipe,
There was Johnny, Tom and Barney of the same stanch stripe,
There was Bill, who tried to rumble in a deep bass tone
Till the landlord used to grumble and the gang would groan;
O, the pounds of good Virginia that we used to burn
(If the habit wasn't "in yuh," why, you had to learn;)
What a crew of "fellows royal" in a feast or row,
Bully boys and truly loyal—
Where's the old gang now?

She was mighty sweet and rosy in a good old way
When you used to snuggle cozy in the big farm sleigh,
And you kept on thinking of her in that light blue dress
And you wondered—timid lover—if she might say: "Yes;"
O, her heart was warm and tender and her lips were sweet,
And her eyes were full of splendor when you used to meet,
Can't you recollect the glory flooding face and brow
As you told the ancient story—
Where's the old girl now?

Well, the old gang's widely scatered, far and near they're whirled,
And the old romance is shattered, it's a queer world;
For the old love there's a newer; makes your senses hum,
As the old gang's getting fewer, why the new friends come;
When the old home is decaying you can build one anew,
Where the children can be playing like we used to do,
And the years they rush and hurry, no one knows just how,
So what's the use to worry.
Where's the old times now?
—Barton Braley, in Puck.

THE MULE SKINNERS.

In readin' the story of early days, it's a cause of much personal pain
At the way the author men leave out us in charge of the wagon train;
Granted the rest of 'em worked and fit in the best way that they could do—
If it wasn't for us that skinned the mules, how would the bunch have come through?

We have frosted ourselves on the prairie sweeps, a-bringin' the Sioux to book,
And the sojer men never had no kick that the front rank had been forsook;
They cussed warm holes in the blizzard's teeth when waitin' fer grub and tents,
But the comforts of home we ailus brung, though at times at our expense.

We have sweated and swore in the desert land, where the white sand glares like snow,
A-rompin' around, forty rods from hell, playin' tag with Geronimo;
We larruped the Jacks when the bullets flew, and then, when 'twas getting too hot,
We used for our breastworks mules, dead mules, and we give 'em shot fer shot.

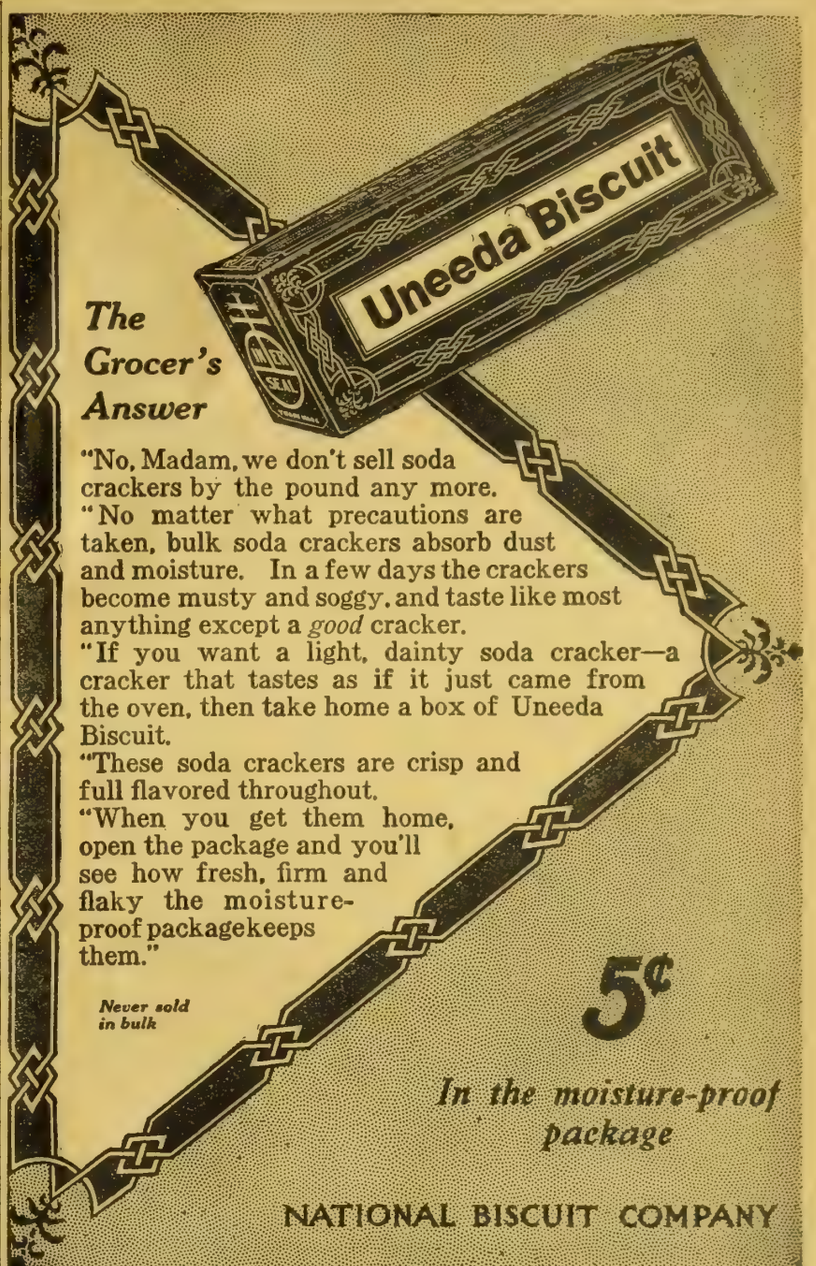
We never was rigged up purty, of course, and we didn't talk too perlite,
But we brung up the joltin' wagon train to the trail end of every fight;
We made a trail through the hostile lands, and our whip was the victory's key,
So why in the name of all that's fair, can't we figger in history?
—Denver Republican.

THE DEAREST PLACE.

"I know the dearest little place,
All sunny fair,
And there's no other spot I fain
Would go, but there!

Oh, is it sea, or hill, or stream,
Or desert wide?"
You ask: "And will its day be sweet
And calm beside?"

And then I laugh. "I do not know,
Nor do I care,
The dearest spot, an' you come, too,
Is—anywhere!"
—Claire Wallace Flynn, in Ainslee's.



Uneeda Biscuit
The Grocer's Answer
"No, Madam, we don't sell soda crackers by the pound any more.
"No matter what precautions are taken, bulk soda crackers absorb dust and moisture. In a few days the crackers become musty and soggy, and taste like most anything except a good cracker.
"If you want a light, dainty soda cracker—a cracker that tastes as if it just came from the oven, then take home a box of Uneeda Biscuit.
"These soda crackers are crisp and full flavored throughout.
"When you get them home, open the package and you'll see how fresh, firm and flaky the moisture-proof packagekeeps them."
Never sold in bulk

NATIONAL BISCUIT COMPANY

A STREET.

A street is but a thoroughfare
With houses rising here and there,
And creaking signs and swaying doors
And jumbled rows of shops and stores.
A street is but a way that goes
Where no one cares and no one knows,
And where folk hurry, straight or bowed,
Old, young, commingled in the crowd.

A street is but a narrow place
Where we meet strangers face to face,
Where people babble of the news,
What time each his hope pursues;
One street—another—all the same
Save for the width or kind or name.
A million streets there are and more
That lie between the house and store.

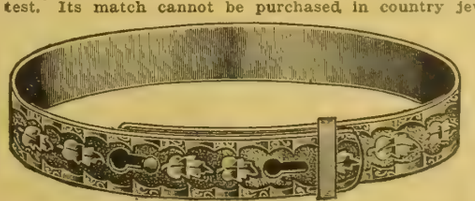
Yet did we know the folk we see,
How different each street would be!
One hurries by and hums a song,
One shuffles past with curses strong;
One strolls all leisurely of gait,
As though he bade the world to wait;
Another rushes, with a grim,
Tense fear upon the face of him.

And women, too—one old and weak,
One bold, and one all shy and meek,
And one whose face with rapture beams
Because she walks amid her dreams;
And little children laugh and call,
Their play-songs echo over all—
There goes a bridal coach, and there
A hearse creeps with some one's despair.

Why, bless us, it is but a street
That mutters of the tramping feet;
A place, a way, a common path—
And yet it tells of joy and wrath
And failure, and of happiness,
Of woe, and of some one's success.
Ah, did we know of all we see,
How different each street might be!
—Chicago Post.

The Universal Magazine Bracelet.

This is all the rage. And Adjustable Bracelet. The most elegant design and perfectly finished. It is not solid gold, but it is washed and plated and will stand the acid test. Its match cannot be purchased in country jewelry stores for any price. It is a duplicate of the latest Parisian creation made expressly for the purpose of using it as a subscription premium to the **Universal Magazine.** The **Universal Magazine** is a nice, bright, cheerful, illustrated monthly magazine of thirty-two pages, three columns to the page, containing home reading, stories, fashions, patterns and poetry—a splendid publication for the money. To anyone who will send us a money order for 50 cents we will send the **Universal Magazine** for two years, and we will send

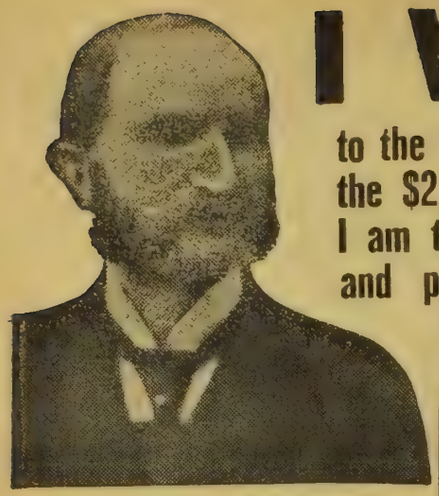


Universal Magazine Bracelet.

one elegant **Universal Magazine Bracelet,** postage free, as a subscription premium. Money returned if not satisfied. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

I WILL PAY $2,000

to the first person proving these letters are not absolutely genuine. I have deposited the $2,000 in the MERCHANTS STATE BANK of Wichita, Kansas, for that purpose. I am the originator and only living man in the world practicing my strange and peculiar method of healing. I have thousands of patients in the United States---patients in every State in the Union, and many foreign countries. Read their letters and form your own opinion.---*PROF. SAMUELS.*



PROF. SAMUELS,
Scientist and Originator of Samuels' Systematic Treatment.

LUNG TROUBLE.
Newton, Kas., March 12, 1910.

I feel it is my duty to tell you what wonderful good Prof. Samuels' treatment has done for me. I had suffered with lung trouble for eight years, and had hemorrhages almost every day. I took the treatment faithfully for one year, and gave it a thorough trial, and have never had a hemorrhage since taking it. I began to gain after the first month, and am now in better health than for years. Any help or reference I can give to those wishing to know of this strange treatment I will gladly give. Yours faithfully,
MRS. C. C. McDANIEL.
662½ Main Street.

NEURALGIA AND STOMACH TROUBLE.
Oswego, Kas., October 24, 1909.

Prof. Samuels.
Dear Sir:—I received your letter quite a few days ago, but have put off answering it. I certainly am very thankful to you for the good and great benefit I have derived from the use of the treatment prescribed by you.
What I suffered before I wrote you in regard to your method of treatment is beyond me to describe. The comfort I have now in living and being able to go about and enjoy my food and drink as others do, is simply wonderful.
I lost 16 pounds of flesh from early spring until after I had taken your treatment, probably about a little over three weeks; then I commenced to gain, and now have regained 8 pounds of the 16. On the whole, I consider myself as wonderfully blessed and extend to you my sincere thanks. Very gratefully and respectfully,
MRS. C. E. COLEMAN.
Oswego, Kas., Box 403.

DEAFNESS.
Baynesville, Kas., July 15, 1909.

Prof. Samuels.
Dear Sir:—Will write you about my child. She is getting along fine. She seems to hear as good as she ever did, but she is still using the medicine for a complete cure. How much longer do you think she will need to use the medicine? She hears all right now, but if you think she should still use the medicine, please send the same, as you have been. Yours respectfully,
W. H. SCHULTE.

PARALYSIS AND GENERAL TROUBLE.
Opelousas, La., June 21, 1910.

Prof. H. Samuels.
Dear Sir:—I have received and began taking your treatment on the 9th inst., and I am proud to say that I received beneficial results in twenty-four hours after the first dose. My eyesight has improved a hundred per cent.; my pains in all my limbs have been greatly relieved. In fact, all my ills are relieved; I feel altogether much better.
I desire to thank you heartily for the relief you have procured me, and hope and trust it will continue for the better, until a permanent cure is effected.
You will find enclosed names of persons affected with chronic diseases. I have also given your name and address to several other parties, whom you must have heard from by this time.
Thanking you again, I am, Yours gratefully, (Signed) D. F. DUPRE.
Opelousas, La., R. No. 2.

STOMACH.
Chicago, Ill., Sept. 22, 1910.

Prof. Samuels.
Dear Sir:—Have now been using last month's treatment. I am feeling fine, so I do not think I need use any more medicine just now. My stomach trouble, as well as other ailments, are all gone, so I am at present enjoying the best of health.
My heartiest thanks to you for your wonderful medicine. Respectfully yours,
(Signed) CHARLES PETERSON.
No. 5414 Fifth Ave., Chicago, Ill.

KIDNEYS.
Chelan, Wash., Sept. 19, 1910.

Prof. Samuels.
Dear Sir:—I have been away from home for some time, and, as the letter was not sent to me, I did not receive it until a short time ago I am very sorry, and had I been at home you would have have heard from me sooner.
I am entirely cured, and do not need any more of your treatments.
Thanking you very much for your kindness, and wishing you success, believe me, I am, Yours very truly,
(Signed) MRS. D. L. CLEMER.

CATARRH OF STOMACH.
Shamrock, Tex., March 23, 1910.

Prof. H. Samuels:—Enclosed find money for a month's treatment, which I think will be all I will need, as I am as well as I ever was and in one more month I think I will be cured. I am, Yours truly,
(Signed) MRS. T. H. SPOON.

BLIND AND DEAF.
Llamo, Tex., May 18, 1910.

Dear Sir:—I think my husband, Mr. Kuffman, is improving fast, as he can now see out of his blind eye and his hearing is improved. You will find inclosed money for another month's treatment. You will please send it in my name, Mrs. E. P. Kuffman, and oblige,
(Signed) MRS. E. P. KUFFMAN.

LIVER AND STOMACH TROUBLE.
Monett, Mo., Oct. 31, 1910.

Prof. H. Samuels.
Dear Friend:—Four weeks ago yesterday I received your medicine, and commenced treatment by directions, and have found myself benefited very much, and I have one-half bottle yet. I will not need any more at present, as I will wait a few days and see if it is going to hold my health good. If not, will send for more, as it is surely the finest treatment that the human family has ever taken. Respectfully yours,
(Signed) JOHN B. WITHERS.

KIDNEY AND STOMACH TROUBLE.
Bruce, S. D., Oct. 23, 1910.

Prof. Samuels.
Dear Sir:—I received your letter quite a few days ago, but have put off answering it. I certainly am very thankful to you for the good and great benefit I have derived from the use of the treatment prescribed by you. What I suffered before I commenced to take your method of treatment is beyond me to describe. The comfort I have now in living and being able to go about and enjoy my food and drink as others do is simply wonderful. I extend to you my sincere thanks. Very gratefully and respectfully,
MRS. WILLAN HOFFMAN.
Bruce, S. Dak., R. No. 2.

EYE AND GENERAL TROUBLE.
Willmarth, Fla., Sept. 15, 1910.

Prof. H. Samuels:—I can't fully explain to you how much good your treatment has done me.
I am doing well now, and not in a position to take treatment longer, although I expected to take treatment three months if I could have done it. I am willing to tell anyone that if they take the treatment according to directions it will do all you claim for it. BETTY GRANT.

GAINS RAPIDLY.
Jacksonville, Ill., Oct. 10, 1910.

Prof. H. Samuels.
Dear Sir:—Received treatment all O. K. Am still gaining in weight. Have gained 40 pounds since taking your treatment, and feel better than I have for over two years. Sincerely yours, MRS. R. M. FULLER.

ASTHMA.
Augusta, Kas., Nov. 7, 1909.

Prof. Samuels.
Dear Sir:—Some time last December we brought to you our son, Dandridge Lyon, who was then and had been for some time suffering from a severe case of asthma. After your first treatment he had one slight attack. Your medicine soon relieved him, and since then he has never been troubled with asthma.
He looks much better, and now feels that he is entirely cured. It was the best investment that I ever made. Yours very truly, W. W. LYON AND WIFE.

BRIGHT'S DISEASE.
Remus, Mich., Sept. 25, 1910.

Prof. H. Samuels.
Dear Sir:—I wish to write you these few lines today for the express purpose of thanking you for your very successful treatment of my wife's sickness, namely Bright's disease. We consider her entirely cured of this dread malady, and can say to any person or persons desiring to benefit themselves in anything of this kind, they would do well to consult you; and we are ready and willing at any time to testify to your ability to do what you claim to do.
So with heartfelt thanks for the great good you have done, I will close by writing myself, Your obedient servant,
(Signed) P. F. BRADLEY.
Remus, Mich., R. No. 4, Box 63.

TUBERCULOSIS AND TEREGIUM.
Maryville, Mo., June 10, 1910.

Dear Sir:—Find enclosed money, for which please send me another month's treatment of your wonderful remedy, for I certainly think it a godsend to suffering humanity. I have gained fifteen pounds in two months, and feel better than I have for two years. The teregium on my eye is disappearing, and I can read large print, such as the headlines of a paper, after being practically blind in it for five years. Yours truly, L. M. HELMS.
Maryville, Mo., Route 3, Box 44.

EYE TROUBLE.
Waynoka, Okla.

Prof. Samuels.
Dear Sir:—I am glad to tell you that my eyes are as good as they ever were, and as I do not need your medicine any more you do not need to send it. Hoping you may help others as you have helped me, I remain, LUCIE ULMER.

STOMACH AND KIDNEY TROUBLE.
Smallet, Mo., March 3, 1910.

Prof. H. Samuels.
Kind Sir:—I received your letter a few days ago, in which you ask how I was progressing. I wish to say that I am at present feeling fine in every way, and have been improving in health wonderfully since taking the treatment, of which I commenced on the 3d of March, and just before taking your eye treatment I assure you I was a miserable wreck. Could hardly stir about. Of course I am not entirely well, but at present I feel better than I ever did in my whole life. I could really write several pages in describing my improvement, but I assure you will make a full report at the time I am cured, and will let you know more of my improvement in about two or three weeks. Very truly yours,
PERRY A. McGUIRE.
Smallet, Mo.

ASTHMA.
Burlington Jct., Mo., Oct. 10, 1910.

Prof. H. Samuels.
Dear Sir:—I have been an invalid for twenty-eight years with Asthma or some trouble similar, wherein my breathing was affected. I have tried every remedy known to the M. D.'s, but failed to get only temporary relief from them.
I began treatment with you the latter part of March, and I believe I am cured by your treatment in the last seven months. Respectfully, (Signed) MRS. S. A. SHIEL.
Burlington Junction, Mo.

DEAFNESS CURED.
Connorsville, Ind., Feb. 2, 1911.

Prof. Samuels.
Dear Sir:—From neglect I have not written you, which should have been done some weeks ago, to let you know after waiting so long since having taken the treatment for my failing eyesight, wish to say I can hear as well as I ever did, and the pain in my head is all gone; also the buzzing noise. I can see fine. Of course, I have to use glasses to read or work in, but do not need them for anything else.
Too much cannot be said in favor of your wonderful cure. I heartily recommend you and your treatment to any and all who are afflicted as I have been. Think! I am a man seventy-seven years old, and am very well, indeed. May God continue to bless your way of treating diseases through the eye, is the wish of one who cannot say enough for it. Very truly your friend, (Signed) ISAAC HAPNER.
No.213 W.19th St.,Connorsville,Ind.

MY METHOD OF TREATMENT

The method of treatment which I have originated is a strange and peculiar method, differing from anything else used by any living man in the treatment of diseases. I do not use drastic drugs and medicines that doctors depend upon.

Men who are familiar with the chemistry of the human body understand that only the chemical elements used in the creation of the body are required to restore it to health when once its functional power becomes impaired. Nature does not require a mass of drugs dumped into the stomach, which merely represent an accumulation of foreign substances which must eventually be eliminated from the system. When Mother Nature created mankind she used no mercury, no strychnine, no quinine, no digitalis, no morphine or other poisonous chemicals such as the doctors delight to prescribe for you, and she needs none of them to accomplish any restorative work that may be necessary in your behalf.

My results are obtained by dropping a colorless liquid which I prepare into the eye. Strange as it may seem, so-called incurable cases of **Consumption, Bright's Disease, Dropsy, Epileptic Fits, Nervous Prostration, Heart Disease, Asthma, Hay Fever, Blindness, Deafness, Liver Trouble, Kidney Trouble, Stomach Trouble and Catarrh** are treated in this apparently miraculous way. My system is based absolutely on scientific principles. The eye is the window of the soul. I have evolved a system of treating other bodily ills based upon the relation of the eye to the system as a whole. This may seem strange, but my thousands of patients testify to the value of my treatment.

If you are sick or ailing you will find something in my Message of Facts, which I am sending free to everyone, that will greatly interest you. I explain my method of healing and give you absolute proof of its value. If you are tired of taking strong drugs into the stomach, if you have gotten to the point where you believe there is no hope, if you have tried all kinds of treatment your doctor could suggest without its benefiting you, write me today for my Message of Facts. It tells you something about the peculiar blood which I prepare and of a more scientific and more natural method of treatment. Send me the coupon properly filled out or send me your name and address on a postcard and my "Message of Facts" will be sent you by return mail free.

PROF. SAMUELS, 110 SAMUELS BLDG., WICHITA, KANSAS.

FREE

If you are sick my **"Message of Facts"** will tell you some things about the diseases of the human body and the logical method of treatment which will be new and interesting to you. Fill out the coupon and mail to me today, and my **"Message of Facts"** will be mailed to you postpaid, without any obligation of any kind upon your part. Write today — this hour — as this advertisement may not appear again.

Use the Coupon!

CUT OUT AND MAIL TODAY.

Prof. Samuels, Room 110 Samuels Bldg., Wichita, Kansas.

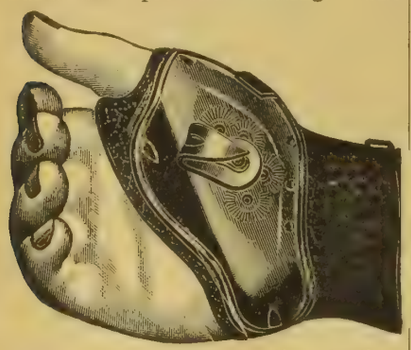
5 Cents a Copy. Published Monthly by The Hale Publishing Co. 50 Cents a Year.

and Stock GROWER

Favorite Corn Husker.

Clark's Corn King with its new self-shedding hook. The spear point enters the husks easily. The slant bend turns the husks for shredding, and the rounded, curved and beveled edges throw out the husks and prevent clogging. As this is the most approved husker on the market, we have selected it as a seasonable subscription premium. The hook sets at any angle; two positions for a thumb hook and five positions as a palm hook. Opening and closing the small end of the plate makes the adjustment perfect for any width of hand and prevents chafing. The



strap passes through the leather tongue and the first ring and over the hand to the opposite ring and back through the first ring. Be sure and have the strap enter the ring from the outer side. It brings the pulling strap underneath, forms the sinch draw and gives you the full benefit of the sinch-lock, which is the same as a half-hitch. The strap then passes to the last ring and then to the buckle; the half-hitch forms one fastening and the buckle holds the end of the strap. We will send The National Farmer and Stock Grower for one year and Clark's Corn King Husker for 50 cents. The Husker is a free premium. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

The Southern Pine Beetle.

Specific advice and recommendations on some of the most economical and effectual methods of protecting living pine trees from the depredations of the Southern pine beetle can be had by addressing the United States Department of Agriculture, Bureau of Entomology, at Washington, D. C., or the Forest Field Station 7, Spartanburg, S. C.

This insect destroyed a large percentage of the pine of Virginia and West Virginia in 1890 to 1893, and is now causing the death of patches of timber in the South Atlantic and Gulf States, from Virginia to Texas. It is the most destructive insect enemy of the living pine of the Southern States, and all farmers, forest owners, lumbermen and mill owners should collectively and individually actively enter into a campaign against it.

Its destructive work is indicated by the fading greenish brown and reddish brown foliage of patches of dying young or old trees, and careful examination should show galleries in the bark of the middle and upper portion of the trunk of dying trees and marks on the surface of the wood, which positively identify this insect as the cause of the trouble.

It is recommended by the Department that the infected bark of the dying trees be burned during the months of November, December, February, March and April.

Easily-made Desserts.

When tired of the ordinary fruit desserts, try a fruit pudding, which may be varied to suit the material at hand, though originally calling for berries.

One cup sugar, two cups flour, a tablespoonful of butter or lard, one-half teaspoonful soda, one egg, one teacupful of raspberries, water to make a stiff batter; if the berries are juicy, it will probably take one-half teacupful. Steam an hour and a half and serve hot or cold, with cream or a dressing made by stewing one pint of the berries. Sweeten to taste, add water to cover, and when they are cooked soft, thicken by stirring in one tablespoonful of flour with water enough to prevent its cooking lumpy.

Blackberries, cherries, peaches; in fact, almost any tart fruit, fresh or canned, may be substituted, the more juicy kinds requiring less water. A teacupful of apple sauce or stewed rhubarb can be used in the same way. If more convenient, the pudding can be baked instead of steamed, this taking much less time.

When cream is lacking, a fair substitute is made by mashing two or three very ripe bananas with the whites of two eggs beaten to a stiff froth. Sweeten to taste and serve at once with peaches or cake. By watching the fruit stands on Saturday afternoon one can usually get the fruit for this purpose very cheap, as it will not keep over Sunday and the dealer will close out at a bargain.

Soda crackers placed in the oven until crisp, buttered and covered with grated cheese, form a most agreeable relish. For this use save all the bits of cheese that have become broken, grate or grind through the food chopper.—Bessie L. Putnam.

The Number of Farms.

According to the United States Census there are 6,340,120 farms in the United States, an increase of 11 per cent. over the number previously reported, and the farms average about 138 acres. For purpose of comparison we show the number of farms enumerated each census year:

Census.	Farms.
1850	1,449,073
1860	2,044,077
1870	2,659,985
1880	4,008,907
1890	4,564,641
1900	5,739,657
1910	6,340,120

Plowing Under Peas and Buckwheat.

A Pike county, Illinois, correspondent asks: "Is buckwheat as good as cowpeas to plow under for wheat?"

I have never plowed under buckwheat preparatory to seeding wheat, and cannot state positive results; but from the nature of the two plants I would expect much better yield from the ground where cowpeas had been turned under. Peas should be plowed under rather early, say when the crop is about three-fourths grown, and should not be turned under too deep. If the growth is very heavy, a revolving coulter will put the vines under without much trouble. Cowpeas have become the main stand-by of wheat growers in Southern Illinois. No other crop brings to these lands just the material needed for wheat, and no other fertilizing crop is grown so cheaply or easily.—L. C. Brown.

One Cause of Clover Failure.

A neighbor calls my attention to a piece of ground seeded last spring to clover with barley.

The grain crop was taken off early enough to give the clover a splendid start, and there has been sufficient rainfall to keep the clover growing. But the clover is dying, and there is scarcely enough left now to bother with. Here is the trouble, and I believe the same trouble exists on thousands of Illinois farms. This ground is hard. Within one week after a heavy rain I noticed cracks in several places. There is no humus in that ground, and of course it cannot hold water. Too much hay and straw have been baled up and sold off that farm, and I have never known of a green crop being plowed under. Ground in that condition will not produce clover. The thing to do is to get some humus in that ground, and that must be done by applying manure, or by plowing under some green crop that will grow.—L. C. Brown.

Wheat or Straw?

On some of the best wheat land the crop runs to straw. This is because there are not enough available mineral foods to balance the manure or clover.

A field test on such land showed that Potash increased the grain from 20 bushels on unfertilized soil to 31 bushels where

POTASH

was used, and to 37 bushels where Potash and phosphate were used. Both were profitable. Supplement the humus of such land with 200 lbs. acid phosphate and 30 lbs. Muriate of Potash or 125 lbs. Kainit per acre. **Potash Pays.**

If your dealer does not sell Potash, write us for prices stating quantities required and ask for our free books on **"Fall Fertilizers"** and **"Home Mixing."** Study of the fertilizer question means saving and profit to you.

Thin-hull Oats.

A correspondent from Missouri asks if I can recommend some variety of oat that has thin hulls.

It is claimed that some varieties of oats have thinner hulls than others; still I have observed for many years that plumpness of berry and character of hull depend largely upon the season and region. It is a fact, which careful observers have noted, that oats grown in the southern part of the oat belt have a greater per cent. of hull than the same variety grown farther north, and for this reason southern-grown oats are usually much lighter. The small-berry sorts, such as Eherson and Sixty-day, are more apt to preserve the thin-hull characteristic, because they mature from two to three weeks ahead of the big late sorts and are not so much affected by hot weather. Another thing I have frequently observed is, rankness is conducive to coarseness, and when oats are grown on ground rich in nitrogen the straw is apt to be of poor texture and the hull is coarse and heavy.

I have been importing different varieties of seed oats from Canada for several years, trying to find a variety in which this characteristic of hull would be constant, but so far I have not been successful; neither have I been successful in retaining the short, plump berry, so characteristic of northern-grown oats.—L. C. Brown.

"Success in farming consists in making every minute, every cent and every seed count."—David Rankin.

Cement Workers' Handbook.

This book is designed to teach anybody how to work with cement; how to mix mortars of all kinds for all concrete purposes; how to make building blocks; how to build walls, floors, ceilings, walks, joists, cisterns, troughs, tanks, etc. It gives estimates of the cost of all kinds of mortars and concretes and all methods of house construction. It is a cloth-bound book of 100 pages and covers more than fifty most important subjects on cement and its uses and construction. This is a diamond of a book for wide-awake farmers. The price of the book alone is 50 cents.

For 60 cents we will credit one-year's subscription to The National Farmer and Stock Grower and send a copy of the Cement Workers' Handbook. Address, HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.

Combinations in Hog Feeds.

The kind of feed a man must provide for his hogs must depend on the kind of feed he has most at his command. Thus, east of the Rocky Mountains there is a great abundance of feed of the starch-forming varieties; while west of the Rockies there is a superabundance of foods rich in protein. East of the Rockies the problem is to get foods rich in protein, while west of the mountains the problem is to get food rich in starch.

This is because foods must be well-balanced to be economical. Too much of one kind or the other brings waste and poor results, because the digestive organs of the animals will digest only a certain proportion of each element. Often, too, the feeding of an unbalanced ration leads to indispositions of various kinds.

Roughly speaking, animals must have about five times as much starchy food as of food rich in muscle-building material. The human appetite illustrates the same need. We cook potatoes to eat with lean meat, and the potatoes consumed are much larger in bulk than the meat, as everyone knows. The lean meat furnishes the protein and the potatoes the starchy matter. At the same meal we also eat white bread which is largely starch, and that must be added to the potatoes in considering the question of balancing the ration. Our appetites do this naturally. If we eat all potatoes we have a craving for the meat, and if we eat all meat we have a craving for the potatoes

The foods of the lower animals must be combined in the same way. But as the lower animals cannot determine their own feed, we must do that for them. Hogs, perhaps more than any other animals, are dependent on the skill of man in compounding his rations.

Some years ago the writer was at a Farmers' Institute, at which one of the speakers was an expert on combinations of things to make up a suitable ration for the hog. It was in the corn belt of the Prairie States, where corn and corn products were to be had in abundance. On a chart the expert displayed his combination, the most important of all being, for that region, corn and alfalfa.

There is a practical difficulty about this combination. It is that corn does not naturally grow well where alfalfa thrives, and where alfalfa is to be found corn is not generally abundant. So the effort is being made to grow alfalfa in the corn belt and corn in the alfalfa regions. Both things are being done, but the task is not an easy one. However, the effort is along right lines, for these two feeds make an excellent combination. The corn is so rich in starchy matter (called scientifically carbohydrates) that men make starch from it; and the alfalfa is so rich in muscle-forming elements (protein) that ground alfalfa is considered the equal of bran.

East of the Rockies the problem in hog feeding is how to grow nitrogen-rich forage plants for hogs, and the effort must be continued. Alfalfa is the best, and the next is clover and the other legumes, for alfalfa, clover and cowpeas are all pod-bearing plants, and pod-bearing plants are rich in nitrogen, which makes the base of protein.

So in preparing hog feeds, we have to consider two general classes of foods. **On the one hand the foods having a large amount of protein** (a combination with nitrogen) which are: Wheat bran, oil meal, peas, beans, alfalfa, clover, vetch and skim milk, with some others. Of the opposite class we have wheat flour, corn, and all foods rich in sugar and starch. Sugar beets are therefore a part of the latter group. Potatoes form a very important group of the starchy food class and should be extensively used where protein foods are abundant.

Alfalfa Chop in England.

The supply of alfalfa chop to the Liverpool market is usually received from South America. The importation at this time from the various countries in South America is prohibited on account of the alleged prevalence of foot-and-mouth disease in that part of the world.

Neither alfalfa nor alfalfa chop is imported from the United States. Alfalfa and alfalfa chop are used only as cattle feed, and their use is limited by the fact that they are used only as cattle feed in the city, the farmers in the country having their own pasture land for summer grazing, and in the winter hay and produce of their own growing.

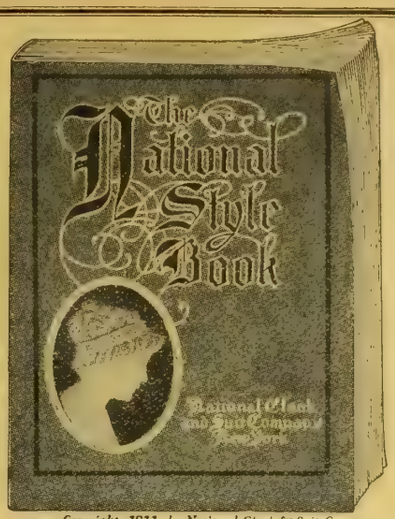
The wholesale price of alfalfa chop varies from $20.67 to $21.89 per ton of 2,240 pounds for good green quality. Those interested in the sale here state that there is no demand for poor qualities; that alfalfa of a dry character and brown in color should not be shipped, and suggest that a trial shipment of not more than fifty tons be made to test the market.

A list of alfalfa and hay dealers in Liverpool may be had from the Bureau of Manufactures of the Department of Commerce and Labor, Washington, D. C.—From Consul-General Horace Lee Washington, Liverpool.

Cowpeas vs. Vetch.

A Morgan county, Indiana, correspondent asks this question: "I have a piece of rather thin, sandy land. Which would be best to sow upon it, cowpeas or vetch?"

I take it that this correspondent wants to sow the crop this fall. If that is correct, there is only one safe thing to do—sow vetch. If the question had been asked earlier in the season I would have advised sowing cowpeas, because peas are much cheaper seed, and the cost of vetch seed is the hindrance to its general use. Vetch sown this fall may be plowed under next spring for corn, and it will fill the ground with the finest kind of crop material. If the crop is not to be plowed under, then I should seed the vetch late with winter wheat and allow it to mature, or cut the crop for hay when the wheat is in the dough. When the crop is grown for seed it is essential that it be grown with some grain crop that matures about the same time as the vetch; and whether grown for hay or seed, vetch should be sown with some kind of grain, something for the vines to cling to. If it is to be plowed under, the tangled mass of vines do not matter, for they can be cut and turned under. —L. C. Brown.



Copyright, 1911, by National Cloak & Suit Co

This is Your "NATIONAL" Style Book

This is the complete Fashion Book of the "NATIONAL," the largest Ladies' Outfitting Establishment in the entire world.

This book will show you the best New York styles in all kinds of apparel for Women, Misses and Children, and it offers all at "NATIONAL" prices, which mean a big saving to you. It will be time well spent for you to write for this Style Book. It will be sent you entirely free and without obligation. Write now for your copy and find out about the "NATIONAL" and learn what styles are to be worn this Fall.

Do You Know the "NATIONAL"?

During the Spring and Summer of 1911, over one million women bought their clothing by mail of the "NATIONAL." These women live in every county—in every State—in America.

Now let us reason this out fairly. Why, we ask, why did one million women find it profitable and desirable to send to the "NATIONAL" for their apparel? Why for 23 years has the "NATIONAL" been the leader in selling women's clothes? Isn't there a possibility of satisfaction and saving for you? Isn't it worth while investigating? It costs nothing but the time required to write for the Style Book pictured above.

This Style Book will Show You

Waists, 98c to $10	Petticoats, 98c to $6.98
Skirts, $3.98 to $15	Furs, $2.25 to $42.50
Dresses, $10 to $30	Ladies' Coats, $10 to $50
Hats, $2.98 to $15	Misses' Suits, $10 to $20

"NATIONAL" Tailored Suits

Made to Measure **$15 to $40**

Each Made to Measure suit is actually cut and made to order and each is guaranteed to fit perfectly, or we will refund your money. In writing for your Style Book, be sure to ask for samples of materials for "NATIONAL" Tailored Suits and state the colors you prefer. Samples are sent gladly, but only when asked for, and they are well worth asking for.

The "NATIONAL" Policy

We prepay postage and express charges on all our garments to any part of the world. You may return at our expense any "NATIONAL" Garment not satisfactory to you, and we will refund your money.

A Rat-proof Corn Crib.

"I have a rat-proof corn crib that is neither elevated nor has it flaring sides. I converted an ordinary building erected for another purpose into a corn crib by removing the siding from the sides and nailing on slats in the usual manner. I covered the sides with a galvanized woven wire having a half-inch mesh, commonly known as pigeon wire. The floor in the building was poor. This I covered completely with the pigeon wire, laying a new floor of a cheap grade of one and one-fourth-inch spruce flooring on the top of the wire. To give the corn all the air possible, I keep all the windows open, and these I have also covered with the wire. The building has now been used three years for the storage of corn in this manner, and although my premises are infested with rats, not one has found an entrance to the corn. As the building was in need of a new floor, the only additional expense was the cost of the wire, about $15, which was fully paid for in one-year's protection. I raise the twelve-row Dutton corn, and it preserves perfectly in this crib." — J. H. L., Chatham Center, N. Y., in Rural New Yorker.

Exercise For the Sow.

"Plenty of exercise is important for the pregnant sow; it should be insisted upon and provided in the way the breeder finds best adapted to his situation. A large pasture is not always available, but the breeder may secure results by arranging the house at one end of the hog lot and the feeding floor at the other end, or by giving the sows water in such a way that to procure it they will be compelled to walk some distance a number of times each day."—From Coburn's "Swine in America."

WITTE ENGINES

GAS—GASOLINE—DISTILLATE—NAPHTHA

Do the work at average cost of **One Cent** per horse power hour. Immense saving by our method of "pre-heating" the fuel. Built so perfectly that repairs cost less than **$1** per year average. Every valve is **vertical** and will not wear on the stem or slip inside. Freezing cannot injure bed as **cylinder and base** are **separate.** Hammered steel cranks, cut gears, etc.

GUARANTEED FIVE YEARS

We are experts in engine building; have done nothing else for twenty-six years. Our reference is thousands of satisfied customers. Our prices are right. All sizes, 2 to 40 H. P. Special inducements to introduce in new localities.

World's Wheat Crop For 1911.

Complete details of the Brownhall estimate of the world's wheat crop, as compared with last year, are as follows:

Russia, 525,600,000 bushels, against 696,800,000; other European, 1,316,400,000 bushels; increase, $1,233,040,000.

North America, 848,000,000 bushels, against 845,000,000. Countries other than North America, 729,600,000 bushels, against 658,000,000.

World's total, 3,419,600,000 bushels, against 3,438,840,000 last year.

The Wheat Market Situation.

On August 31st, 1911, at Chicago, on the general market, wheat for September 30th delivery was quoted at 89 cents a bushel. That was the closing figure, and it was ⅞ of a cent lower than thirty days ago. As we approach settling day for any month the wheat is traded in the strain of trading is enormous. The September option on August 31st was ¾ cent lower than a year ago.

On August 31st, 1911, the December wheat option was quoted at 94¼ cents, against $1.03¾ last year, showing a loss of 9½ cents, as compared with the market of a year ago.

On August 31st, 1911, the May wheat option of May, 1912, was quoted at the close at $1.00¼ a bushel, against $1.09⅞ a year ago.

Barring the possible admission of Canadian wheat free of duty, the statistical and general market condition for wheat is now stronger than a year ago, but the market is lower, because the local supplies are expected to be swelled by Canadian consignments; hence a market approximating 5 to 10 cents lower instead of a market about 5 cents higher. There is no sentiment in business and should be none in a market review, which is here written without prejudice.

To Buy Groceries Right.

On page 11 will be found an advertisement of Montgomery Ward & Co., relating to their pure-food grocery catalogue. This firm is well and favorably known as a strictly reliable house, and hundreds of thousands of farmers will testify to this from having bought of them for many years. To get this catalogue, all you have to do is to write a postal card, saying: "Please send us your grocery catalogue as advertised in The National Farmer and Stock Grower." Address, Montgomery Ward & Co., Chicago Avenue Bridge, Chicago, Ill., or to Montgomery Ward & Co., Nineteenth and Campbell streets, Kansas City, Mo. The service is equally as good from either establishemnt.

The Oats Market Situation.

Considering the few oats the farmers of the country will have for sale this winter, the market looks tame, although it is higher.

At St. Louis, August 31st, 1911, cash oats sold at 43½c. a bushel; a year ago at 34½ cents. Last February cash oats sold at 30 cents a bushel. The short crop is helping the market, but that is no consolation for the owner of the crop that failed.

On August 31st the Chicago market quoted oats for September delivery at 43¼ cents per bushel, December 46 cents, and next May 48⅞ cents a bushel.

Do not quarrel with these figures. They are bought and paid for by men who are engaged in the business. Grain crops are traded in for future deliveries. Men have contracted to deliver No. 2 oats next May at 48⅞ cents a bushel; others have agreed to pay the price, and each of them have put up forfeit to bind the bargain.

Such transactions as we have mentioned are just as necessary for the commerce of the world as the railroads that haul the grain to the seaboard and the ships that carry it across the ocean. Nearly every cargo of grain is sold before shipment, which is of itself a "future" transaction.

Opportunities to Save Money.

On page 11 will be found the advertisement of Montgomery Ward & Co., of Chicago, the original mail order house, and one that in every department is ahead of the times. There are two establishments—one at Chicago and the other at Kansas City. Note the coupon on page 11 and mark the item you are interested in and send it to the nearest address.

The Corn Market Situation.

The strong position of corn can be attributed to decreased production. The farmer will receive almost as much money for the crop of 1911 as he did for the enormous crop of 1910. On August 31st, 1910, the September quotation closed at 59 cents, and this year, on corresponding date, the September quotation was 65¼ cents. So much for a decrease of 500,000 bushels. It has caused an advance of 6¼ cents a bushel that can be proven.

The Board of Trade expects corn to sell around 63 cents in December and 65 cents next May. This looks like a fair corn prospect, and we are not inclined to look for higher figures for the reason that much of the corn-buying territory has corn this year.

Cash Grain at St. Louis.

The following represent the actual transactions at St. Louis on August 31st, 1911:

Wheat in bulk on track, sold by sample: No. 2 red sold at 88 to 89½c.; a fancy car at 90c.; No. 3 red sold at 87 to 87½c.; poor less; No. 4 red sold at 83 to 84½c.; No. 2 hard sold at 91½ to 92c.; Turkey, 98½c. to $1.00, nominal; No. 3 hard sold at 90c.; No. 4 hard sold at 86c.

Corn on track: No. 2 corn, 63¼c.; No. 3 corn, 62¾c.; No. 4 corn, 62c., nominal; No. 2 yellow, 63½ to 64c.; No. 3 yellow, 63c. bid; No. 4 yellow, 62c., nominal; No. 2 white, 64c., sel.; No. 3 white, 63½c., sel.; No. 4 white, 62c., nominal.

Oats on track: No. 2 white, 45c.; standard, 43¾ to 45c.; No. 3 white, 44½ to 45c., nominal; No. 4 white, 42½ to 43½c., nominal; No. 2 oats, 43½c., nominal; No. 3 oats, 42½c., nominal; No. 4 oats, 42c., nominal.

The Market For Peaches.

At St. Louis, on the first day of September, fair offerings were coming in, including car-loads from Michigan, and consigned lots from near-by Illinois and Missouri points, but wagon receipts of home-grown were smaller and of only ordinary quality. Michigan bushel baskets Crawfords at $1.00 to $1.25; near-by growth Illinois and Missouri at $1.00 to $1.25 for bushel baskets, and 25 to 50 cents for half-bushel baskets—lot White Heath (small) sold at 25 to 35 cents per half-bushel basket, and lot melon baskets at 30 cents. Home-grown (wagon receipts) red and white varieties at 25 to 50 cents per half-bushel basket for ordinary to fair to 75 cents for best offerings, and White Heath clings at $1.50 per bushel.

At St. Louis, on August 31st, a few mixed Alabama cattle sold at $2.85 per 100 pounds and weighed 654 pounds.

Red Clover.

Uncle Sam is again giving us a valuable line of information. It is Bulletin No. 455, issued by the United States Department of Agriculture, and the title of it is "Red Clover." It is a pamphlet of forty-eight pages by Professors J. M. Westgate and F. H. Hillman, both attached to the Bureau of Plant Industry of the Department of Agriculture.

It is not our intention to republish the bulletin. We wish our readers to send for and study the text and the illustrations. The bulletin begins as follows:

"Red clover must justly be styled the corner stone of agriculture in the North Central and Eastern States. Either alone or in mixtures with grasses for hay or pasture it generally constitutes from one-eighth to one-third of the total area of cultivated land on most successful farms throughout this area, and is an important crop, far beyond these boundaries. For centuries it has constituted one of the important factors in maintaining a permanent system of agriculture in the Old World. In this country for a century and a half it has assumed a more and more important role in conserving the natural resources of the soil, thereby tending to maintain the profitable yields of the staple agricultural products.

"Red clover is utilized both as a hay and as a pasture crop and often as a soiling crop. It is sometimes used as a green-manure crop to be plowed under if the ground is poor in humus. Even where it is cut for hay and only the roots and stubble turned under it has a marked influence in increasing the yields of succeeding crops. It makes an ideal hay for cattle, and in the clover sections should constitute from one-half to two-thirds of the roughage ration of milch cows. Sheep and young stock of all kinds make excellent gains on either the pasture or the hay. In addition to its usefulness as a food for animals it has a most important effect upon the land in maintaining the supply of nitrogen in the soil. By means of the nitrogen-fixing organism on its roots the red clover plant is able to gather large quantities of nitrogen from the air and leave it in the soil in a form which can readily be utilized by growing crops. It not infrequently happens that the yield of a grain crop can be doubled by the growing and plowing under of a crop of clover."

There is a map, showing where red clover is grown successfully, pictures of red clover fields, seed testers and germinators, clover hullers at work, harvesting by grain header, etc. The bulletin concludes by saying:

"The production of clover is the foundation of agriculture in the Eastern and North Central States, as upon its successful growth depends to a large extent the maintenance of the nitrogen content of the soils in the principal crop-producing sections. Clover must not be looked upon as a cure-all for farm troubles. Its roots do add large quantities of the very valuable nitrogen and humus to the soil, but aside from bringing up a limited supply of phosphoric acid and potash from the lower layers of the soil it does not add the other important fertilizer elements to the soil upon which it grows; upon many soils these elements (particularly phosphoric acid) must be added the same as though no clover was being grown upon them. So long as the soil is fairly well supplied with humus and is not too greatly depleted of the ordinary fertilizer elements there is usually no difficulty in obtaining successful stands of clover by the ordinary methods of seeding; but when continued cropping reduces the humus content of the soil to a point below that required for successful clover production it becomes necessary to adopt radical means to restore the ground to its proper condition. It has been repeatedly shown that the failure of the clover in a section is but a prophecy of the early failure of other leading crops in that particular section. The substitution of alsike for ordinary red clover will enable clover to be continued in the rotation on some soils which no longer grow the ordinary red clover. The lack of humus in the soil is the most potent factor in the failure of red clover in these sections, but other factors, such as too acid a soil and the presence of fungous diseases or insect enemies, must also be overcome. Liming and proper drainage will overcome the soil acidity. The insects and fungous diseases may be held in check by clipping or cutting at the proper time and by furnishing the proper soil conditions to produce a crop so vigorous that it will succeed in spite of the enemies which prove troublesome to less vigorous stands."

Best Watch in the World.

One hundred and eighty of the leading railroads have adopted the Howard Watch as the standard of excellence. It is because the Howard Watch has no actual competitor. There is an interesting story about this watch which our patrons will take pleasure in reading. Just write a postal card to Dept. 122, Howard Watch Works, Boston, Mass., and ask for the story of The First American Watch. See page 7 and read about the best watch in the world.

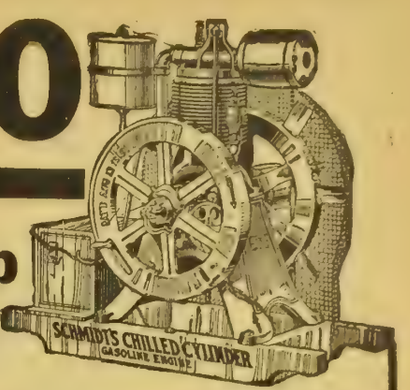
The Apple Market at St. Louis.

This is the market report for September 1st at St. Louis. With 2,500 barrels received to-day by boat of poor to only fair fruit, together with warmer weather, this market again dropped into a demoralized condition. It was hard work, indeed, to sell apples at all, even though the average run of receipts were offered down to $1.00 and $1.50 per barrel; in fact, only part of the offerings sold up to the close. Choice to fancy varieties of high color and properly packed salable and sustained in price; but these constitute only a small portion of the receipts just now. The offerings are nearly all of common to fair qualities, and these are hard to sell, even at inside quotations, at 90 cents to $1.00 for small and inferior, to $1.25 for good and $1.50 for choice—fancy large of high color and well packed at $2.00 to $2.25. Home-grown boxed mixed varieties sell at 30 to 40 cents per bushel box loose, and bulk wagon-loads Jonathan at $1.75 to $2.50 per barrel measure. Sales: Rail receipts—Fifteen barrels Blush at $1.50. River receipts—Fifty-six barrels Pewaukee and like varieties at $1.00; 100 barrels in lots at 90 cents to $1.40; 200 barrels in lots at $1.00 for common to $1.25 for Northern Spy and $1.50 for choice Shackleford. Crab apples—Near-by at 50 to 60 cents per half-bushel basket; Michigan at $4.00 to $4.50 per barrel, and $1.25 to $1.40 per bushel basket.

Our readers are requested to write to the Hale Publishing Co., 3550 Vista Ave., St. Louis, Mo., for estimates on all papers they wish to subscribe for. We can save all a little money.

"Cheerfulness is an offshoot of goodness and wisdom."—Bovee.

$7.50



And You Keep This Great Engine

Yes, sir, that's right—you keep this engine for $7.50, a wonderful gasoline engine offer, an offer without a parallel. We ship you Schmidt's Chilled Cylinder Gasoline Engine on your simple request without an order or any promise from you. You use the engine 10 entire days, use it all you want to. Then if you don't want it, send it back at our expense. If you do wish to keep it, pay us **only $7.50 and the rest in the easiest monthly payments. We send you the engine free,** to prove that it is the greatest **air cooled** 3 horse power engine on earth. It is the only engine with the marvelous, powerful **chilled cylinder.** The only engine for farm use with a **spark retarder.** The new type gasoline engine that has revolutionized the gasoline engine industry. The only engine good enough to send out on **actual free trial** without a cent down in any way.

Ten Days' Trial FREE

This is the first genuine free trial ever offered on gasoline engines for farm and shop use. We want you to see that women and children can run this engine. Use the engine to run any machinery you have—the pump—separator—washing machine—corn sheller—grinder—anything. Engine is ready to run when you get it. We will send you prepaid our sensational offer and our very useful book "How to Use Power" free.

Long Time to Pay

If you like this engine after trying it out for ten whole days you can keep it and take long time to pay for it on **easy monthly payments,** or after using it free for ten days, just send it back at our expense.

Makes Woman's Work Light and Easy

5 Years Guarantee Schmidt's Chilled Cylinder Gasoline Engine is absolutely guaranteed for 5 years in every piece and part. The biggest bank in Iowa backs our $1,000 challenge offer.

How to Use Power To all who will write promptly we will send our useful book "How to Use Power" free. Send us your name and address today.

Schmidt Bros. Co. Engine Works, Dept. 313 X, Davenport, Iowa

DAIRY SHORT COURSE OF INSTRUCTION. This picture needs explanation. It is entitled "A LIFT TO THE DAIRY BUSINESS." The Louden Machinery Company manufacture hay tools, barn-door hangers, feed and litter carriers and all kinds of hardware for dairy barn equipment. Having large numbers of salesmen introducing their goods throughout the country, the President of the company hit upon the plan of instructing the salesmen in the fine points of the dairy business in order to increase their usefulness and selling ability, and the picture was taken at the School of Instruction, which lasted four days in the month of August at Fairfield, Iowa. The catalogues issued by this company are just as useful to dairy farmers as the Short Course of Dairy Instruction was to the salesmen, all tending to the importance of using labor-saving apparatus on the dairy farm. In writing for these valuable free catalogues, address Louden Machinery Company, 651 Broadway, Fairfield, Iowa.

Estimate of the Oats Crop.

On August 21st Mr. B. W. Snow completed returns which indicate the average yield of oats per acre, crop of 1911, to be 23 bushels. Upon the basis of the acreage found by government agents this accounts for a crop of 812,000,000 bushels, against the official estimate of 1,127,000,000 bushels last year, and is slightly less than was indicated by the condition report of August 1st. In the important states the average yield is reported as follows: Ohio,29 bushels; Michigan, 27; Indiana, 22; Illinois, 26; Wisconsin, 27; Minnesota, 22; Iowa, 27; Nebraska, 12; North Dakota, 21; and South Dakota, 6. The quality in Iowa, Wisconsin and Minnesota has been damaged by rain while in shock. This showing of a total 315,000,000 bushels less than last year is on the basis of the full 35,000,000 acres reported as seeded. A very material part of this acreage was not harvested, and the final revision of acreage will further increase the crop shortage of the year, according to Mr. Snow, who is considered high authority.

THREE-YEAR SUBSCRIPTIONS.

Orders For The National Farmer and Stock Grower Solicited.

Kindly Sign the Blank Form Below and Become a Regular Subscriber.

We desire to invite attention to our three-year subscription proposition. We hope to obtain one hundred thousand additional subscriptions during the present year to continue for three years. It is practically a trial subscription and payable at the end of the first year. The subscription can be stopped at any time by paying for the period the paper is taken. This method of taking subscriptions is the invention of Uncle Piper, our subscription editor, who has guaranteed that every one of them will be paid when they are due. The subscription price of this paper is $1.00 for three years, and the bill for the subscription is sent to the subscriber at the end of the first year. When the bill goes out Uncle Piper slips in a list of handy premiums for the subscriber to select one from, providing he pays the bill promptly, and the general result is that the bill is soon paid. When it comes to getting subscriptions from intelligent, high-class farmers, Uncle Piper is at the head of the class.

Uncle Piper.

SUBSCRIPTION BLANK.

To the Hale Publishing Co., 3550 Vista Ave., St. Louis, Mo.:

Gentlemen: — You are hereby authorized to enter my name as a subscriber to The National Farmer and Stock Grower for three years. At the end of the first year I will pay One Dollar for the three-year period. This order is given with the understanding that I am at liberty to stop the paper at any time by paying the subscription to that date.

Missouri Sheep Record.

In the sheep statistics of Missouri there is ample room for thought and study because the Missouri sheep record of the past ten years is a remarkable one. The state of Missouri has now about 2,100,000 sheep and lambs, and 44,010 Missouri farms are engaged in sheep husbandry.

The sheep census of the United States demonstrated that in ten years the number of farms reporting sheep and lambs was reduced from 763,518 in the year 1900 to 608,363 in the year 1910, a decrease of 155,155 farms raising sheep. This is the statement for the whole United States.

The census figures show that the number of sheep and lambs in the United States were 61,503,713 head in the year 1900, the census being taken on June 1st after lambing, and in the year 1910 the number was decreased to a total of 51,638,590, the census being taken April 15th, during lambing. Thus the figures show an apparent loss of 9,865,123 sheep in ten years, whereas had the census been taken on even dates a credit of ten million lambs would have been added to the census of 1910.

Taking the figures as they are reported by the Bureau of the Census, we find the North Atlantic States decreased 48,907 sheep-raising farms, the South Atlantic States lost 30,146 sheep-raising farms, the South Central Division of States lost 44,440 sheep farms, the North Central Division of States lost 32,240, and the Western Division, including the ranch states, increased the small total of 578 farms and ranches raising sheep to offset the great losses.

The state of Maine lost 7,301 farms reporting sheep, New York state decreased 15,795 sheep farms, Pennsylvania lost 18,631 sheep farms, Virginia lost 3,245 sheep farms, North Carolina dropped out sheep from 14,244 farms, Kentucky lost sheep from 5,128 farms, Tennessee gave up sheep on 7,927 farms, and of course many other states did the same.

In the meantime, the state of Missouri increased the sheep-raising farms 5,997 in number, increased the number of sheep 720,825 head, and increased the lambing 270,312 head, in addition to 300,000 more lambs not credited by the census because they were dropped after the census of 1910 was taken. The record of Missouri far surpasses any other state in the matter of increase in sheep and lambs during the period from the year 1900 to the year 1910.

The grand showing on the part of the state of Missouri in regard to sheep and lambs was brought about by concert of action by and between the Immigration Department of the Missouri Pacific and Iron Mountain Routes, the Immigration Departments of the Rock Island-Frisco Systems, aided and supported by the work of the live stock editor of The National Farmer and Stock Grower. It is not often in this world that the records prove the results of efforts so conclusively. About six to seven years ago the St. Louis butchers and packers could not find enough sheep and lambs on the St. Louis market to satisfy local requirements, when the editor of The National Farmer and Stock Grower set to work to improve the situation. In addition to advising his own subscribers to engage in sheep raising he enlisted the railroad immigration agents into the work, showing them the advantages of the St. Louis market. They answered: "We are bringing in fruit growers and vegetable gardeners, dairymen and general farmers, and we will pay extra attention to farmers who will raise sheep." Just as farmers were giving up sheep raising in nearly all the old farming states, the states tributary to the St. Louis market made great gains in this branch of industry, with Missouri in the lead.

Sheep raising was abandoned on 9,855 farms in the state of Indiana, but sheep raising was commenced upon 5,997 farms in Missouri. The old sheep-raising state of Ohio gave up sheep raising on 2,113 farms, but 842 new sheep farms were started in Illinois. The state of Michigan cut sheep from 8,474 farms that formerly raised them, but the state of Kansas put sheep on 1,048 farms that had not raised sheep before. It will be seen from this statement that the bright spot on the map of the United States, so far as the sheep industry is concerned, centers upon the St. Louis live stock market and the state of Missouri, and this condition was largely brought about by a co-operative movement between a leading farm and stock paper and the immigration departments of two first-class railroad systems.

Proof That Merry War Lye Cures Sick Hogs

This advertisement is different, as you will see presently. We have been telling millions of farmers about "MERRY WAR" LYE. Now we are going to let some of these same farmers do the talking. They have tried "MERRY WAR"—and they know. Listen!

"It Cured Our Hogs"

Mrs. T. Akins, Hoxie, Ark., writes: "MERRY WAR LYE is all the LYE that we use. Before we began using it we had a lot of hogs with Cholera. We used MERRY WAR LYE and it cured our hogs."

"Cures Cough and Thumps"

Mr. A. W. Davis, Hamlin, Iowa, writes: "MERRY WAR LYE is the stuff to cure cough and thumps and put hogs in a thrifty condition and I will never be without it while I raise hogs."

"It Is a Sure Worm Killer"

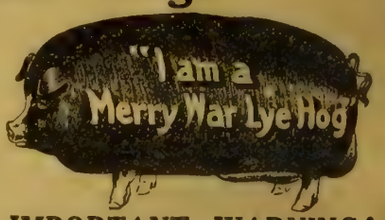
Mr. B. S. Row, Gracemont, Okla.: "I have fed it to my hogs and have had good results. It is a sure worm killer."

"Best Hog Medicine I Ever Used"

Mrs. Elvis Potter, Junction, Ill.: "Have been using a great deal of MERRY WAR LYE. Find it the best medicine for hogs I have ever used."

"Best and Cheapest Hog Remedy"

Adam Schultz, McLouth, Kans.: "I consider MERRY WAR LYE the best hog remedy I have ever used, and the cheapest. It has made a marked improvement in my herd."



IMPORTANT WARNING!

Don't infer that ordinary or regular, lye can be used as a hog remedy.

MERRY WAR LYE is prepared ESPECIALLY as a hog remedy and it is the only lye that is guaranteed to be absolutely safe to feed to hogs. It is the greatest hog fattener and conditioner in the world.

Feed "Merry War" Every Day

MERRY WAR LYE comes in cans with the convenient turning top covers. Make it a part of the daily ration, and keep your drove in prime condition.

Save These Directions

Follow these directions carefully: Mix one tablespoonful MERRY WAR LYE with slop for 10 hogs, or ½ can with barrel of swill. Stir well and feed night and morning. If your hogs are on a dry feed ration, mix ½ can MERRY WAR LYE to each barrel drinking water.

At All Leading Dealers

Most dealers handle MERRY WAR LYE. If yours can't supply you, write us, stating your dealers' names, and we will see that you are supplied and will also send you, free, a valuable booklet on, "HOW TO GET THE BIGGEST PROFITS FROM HOG RAISING." Remember, there is no "substitute" for MERRY WAR LYE

MERRY WAR POWDERED LYE comes in 10c cans, full cases of 4 dozen cans for $4.80, at Grocers' or Druggists' and Feed Dealers'. There are no substitutes.

E. Myers Lye Co., Dept. 22 St. Louis, Mo.

To Start With Pigs.

"If the beginner will start with not more than two or three sows, in pig when purchased, he can acquire much valuable experience with even so small a number, while his risks will not be great. The next year he may add to the number of sows, secure a suitable boar, and by slow but careful increase in the number of sows bred each year, if good management and freedom from disease prevail, should soon find himself with a profitable herd." — From Coburn's "Swine in America."

Sowing Barley in the Fall.

A Vigo county, Indiana, correspondent asks: "Will it do to sow barley in Southern Indiana for green feed? Will my variety be all right to sow?" Barley will make good early spring pasture, and the only question is whether it will winter kill. In the extreme southern part of Indiana or Illinois I should risk any of the ordinary spring sorts. It is used for just this purpose in Kentucky, and it is liked much better than rye, but is not so hardy. It would be better if home-grown winter seed could be secured. This would be more likely to endure winter conditions. For spring pasture it should be sown in September. —L. C. Brown.

Only Sure Place.

"Want to go to the ball game tomorrow?"

"No; I'd rather go to the matinee. I'm sure of a happy ending there."—Pittsburg Post.

CURES Distemper, Pink Eye, Epizootic, Coughs, Colds, and all Nose and Throat Diseases. One dose acts as a preventive. One bottle a Guaranteed Cure. Safe for Mares, Colts, and all others. $1.00 bottle holds three 50-cent bottles. Send postal for **FREE** Horse Booklet. Sold by all druggists, or prepaid from

BINKLEY MEDICAL CO., Dept. H, NAPPANEE, IND.

Veteran Alfalfa Patch.

Douglas county, Colorado, was one of the original dry-farming sections of the state. George A. Kelly has on his place near Franktown a patch of alfalfa that was planted twenty-six years ago. It still produces two to tree tons a year, although Mr. Kelly has never paid any attention to it except to go out and cut it. Specimens from this old timer will be shown at the Dry-farming Exposition at Colorado Springs, October 16th to 20th.

Feeding of Young Farm Animals.

Many farm animals are lost before they reach their growth, and the methods of feeding are largely responsible for it. The digestive organs in young animals are as tender as the rest of their bodies and can be easily overtaxed and given tasks to perform that they cannot accomplish.

The inexperienced feeder kills many a promising animal. The feeding of growing animals is a science that has to be learned, partly by experience.

Too rich foods cannot be fed with safety. An experienced dairyman told the writer that for several years he lost the calves of his best cow, because her milk was unusually rich. After he discovered the cause of the loss, he gave the calves of that cow milk from cows that gave only medium-quality milk, and thenceforth saved his calves.

Scours in calves are often caused by overfeeding the calves, and often, too, on cold milk. The stomachs of most calves are unable to utilize a great mass of cold milk. It is common on some farms to cool the milk with ice, skim the ice-cold product and feed the ice-cold skim milk to the calves. Calves come down with scours and consequently die, and the feeders wonder what has caused the loss of the animals. Had the milk been heated to a temperature near eighty degrees and fed a few quarts at a time, the scours would not have occurred. When calves run with their mothers they get milk at about ninety-six degrees, and that is the temperature best adapted to the digestive processes.

Large quantities of food should not be given at one time. The young animal is always hungry, in a normal condition, and will gorge itself to a point where the digestive ferments cannot perform the work they are created to do. If the food is not digested it must go through the digestive tracts undigested and be the object of intestinal fermentations of various kinds. Other bacteria than the digestive ferments find opportunity to develop and deleterious products are created. Some of these result in gases that sometimes become abundant enough to kill the animal by the mere power of dilation. The only bovine the writer ever saw killed by red clover was a young calf that went out into the clover-filled pasture with the cows one dewy morning. The animals ate the clover, but only the young calf was affected. She was found in time to get her back into the barn yard before she dropped down, but she died in spite of the efforts to relieve her, having in a short time bloated to double her size.

Such incidents are common with all our varieties of animals. Even many chickens are annually killed by being fed improper food. Beef scraps, beef meal and blood meal are excellent things to feed chickens if they are mixed with other things and fed in very limited quantities. The too abundant nitrogen in these foods is destructive of the immature organs. Such things should be mixed with less nutritious foods. One part of beef meal to five parts of ground grain seems to be safe, but in the case of blood meal the proportion of blood meal should not be more than one part in ten of the mixture.

The same principles hold with all our farm animals. Too much volume and too much richness must be avoided. Feed little and often and see that the temperature is normal. There should be a temperance in feeding as in other things.

The Plastered Silo.

Circular No. 48, issued by the Agricultural Experiment Station at Columbia, Mo., is devoted to "the plastered or Gurled silo." It is by Prof. H. E. McNatt, and copies can be obtained by writing for them.

The Gurled silo is built much like a frame house, except that it is round in form, with a lining of boards running lengthwise around it, somewhat like the hoops of a barrel, which give it strength to resist the immense pressure of the silage. Its cement-plastered wall protects the wood framework from decay.

Some of the strong points in favor of this style of silo are: 1. Can be built entirely from ordinary lumber. 2. Requires no highly-skilled labor for its construction. 3. Preserves the silage as well as any type of silo in use. 4. Is strong and durable when properly made.

In this article we are not going into the particulars of construction. It is unnecessary to do so. Those who are interested can obtain a copy, thereby obtaining the full directions and measurements for construction with illustrations showing the work in process of development.

When to Plow Under Crimson Clover.

A Marion county, Illinois, correspondent writes: "At what stage is it best to turn under crimson clover?"

The best time to turn under clover depends upon the use one wishes to make of the ground. Moreover, the thing to do is to get as much clover growth as possible before plowing it under. It has been found that an acre of good crimson clover contains around $23 worth of nitrogen when it was six inches high; nearly $38 worth when it was twelve inches high, and almost $44 worth when it was fully matured. From these figures it will be seen that crimson clover pays well for its seed at any stage of growth it is used. As we come to know more of the benefits of this clover I am sure it will be more generally sown in Southern Illinois. —L. C. Brown.

Humus and Commercial Fertilizers.

A Starke county, Indiana, correspondent states that he cannot get any results from commercial fertilizer, but on some neighboring farms it pays well.

This correspondent does not state the character of his ground, but I surmise that the trouble is due to lack of humus. It is a well-known fact that commercial fertilizers, especially potash, will give much better results if the ground is well supplied with humus. In Starke there are light soils and many fields are deficient in humus. On this character of soil we cannot expect profitable returns from commercial fertilizers. In the same county there are rich muck soils, fairly gorged with humus, and here we may expect good returns from the use of potash. —L. C. Brown.

Hay Crop For Next Season.

A Wayne county, Illinois, correspondent asks: "What crop can be sown this fall for a hay crop next season? My hay land has gone back and my seeding of last spring is only a part of a stand, and I am thinking of plowing it up."

Every effort should now be made to get pastures and meadows established again. The condition of grass lands is critical, and unusual sources must be drawn upon to furnish feed until meadows can be reseeded. Don't plow up even a partial stand. The thing to do is to nurse it along. A few loads of well-rotted manure scattered thinly over this ground will start things. Then put on the spike-tooth harrow and do a good job. When all of this is done, then sow ten pounds per acre of good timothy on the thinner places. Under normal conditions this will give a fair hay crop next season.—L. C. Brown.

"Always give of the best that is in you. Feel responsibility towards yourself and your work. Never be content with a compromise with work. Give an employer the best that you have in you to give."—Belvedere Brooks.

The Howard Watch

The Wireless Operator prefers a HOWARD Watch because he must have exact knowledge and record of the sending and receiving time of messages.

His station is seldom in a comfortable office building—it may be on a Battleship—an island—or a rocky point along the coast.

The HOWARD Watch is time authority everywhere—and has been for sixty-nine years.

It is the only watch that Peary would trust in his dash for the North Pole.

Wilbur Wright carried a HOWARD in his aeroplane flights—every other watch that he tried broke down under these conditions.

Now, these were not special HOWARDS. You, as a private citizen, can get exactly the same grades from your HOWARD jeweler.

The only special HOWARDS are the railroad models—they are *standard* on 180 of the leading American railroads.

Every HOWARD Watch is adjusted to make good in any service condition its owner can put up to it. The HOWARD is the finest practical watch in the world.

A HOWARD Watch is always worth what you pay for it.

The price of each watch—from the 17-jewel (*double roller*) in a Crescent or Boss gold-filled case at $40 to the 23-jewel in a 14K solid gold case at $150—is fixed at the factory and a printed ticket attached.

Find the HOWARD jeweler in your town. When a man makes a permanent investment like the purchase of a HOWARD Watch he naturally wants to *see* what he is buying—he wants to get the dealer's expert advice. The HOWARD Watch is sold only by legitimate jewelers—and not every jeweler can sell you a HOWARD. The jeweler who can is a representative merchant—a good man to know.

Send us your name on a postal card and we will send you—FREE—our pamphlet—THE STORY OF EDWARD HOWARD AND THE FIRST AMERICAN WATCH. It is a chapter of History that every man and boy in this country should read.

KANSAS CITY HAY PRESS CO., 425 Mill St., Kansas City, Mo.

The National Farmer and Stock Grower.

(Title Registered in U. S. Patent Office.)

Published Monthly
By THE HALE PUBLISHING CO.
Philip H. Hale, Managing Editor.
Claude A. Cour, Advertising Manager.

Charles H. Hopkins, 150 Nassau street, New York City, Eastern Representative.

Entered at Postoffice at St. Louis, Mo., as second-class matter in January, 1901.

Subscription Price in the United States, 50 cents a year, or three years for one dollar.

Office of Publication, 3550 Vista avenue, St. Louis, Mo. Bell Phone: Grand 400.

Our Industrial Policy.

The National Farmer and Stock Grower is in favor of the United States collecting a reasonable range of customs duties upon all foreign farm products and on all manufactured goods admitted into the United States from foreign countries, said duties to be applied to the support of the national government.

Every farmer in the United States is taxed by his county and state and he pays indirect taxation for the support of the federal government. We believe that the advantage of the markets of the United States belongs to the citizens of the United States, and that all foreign farm productions should pay a duty at the front door as the goods are admitted. By collecting these customs duties the government receives support that is necessary and the farmer has a very moderate degree of what is called protection. In times of scarcity foreign farm productions can come in on a fair basis, and in times of abundance the country thrives better without them.

We believe the farmer as a producer outranks all other people; the manufacturer is next; but without the farmers' products the manufacturer would shut his doors. Legislation against the farming interest is the height of folly, and special discrimination against the farmer is a political crime. It will cause more poverty in the cities than most people imagine. The non-producing, so-called consumers in cities will be the first to find it out.

The Chicago International..

We are in receipt of the premium list, or, as it is called, the "preliminary classification" of the International Live Stock Exposition, to be held at Union Stock Yards, Chicago, December 2d to 9th, 1911.

This is the recognized clearing house of the Live Stock Expositions of the United States, and it brings together all the animals that are worthy to compete for high honors in the collective exhibits which arrive from all the State Fairs. The contest is a struggle for championships by champions, and it is intensely interesting to all breeders and raisers of cattle, hogs, sheep and horses.

This is the right time to send to Mr. B. H. Heide, General Superintendent, for a copy of the "preliminary classification," which gives a list of classes, prizes and all necessary information. His address is Union Stock Yards, Chicago.

A Valuable Paper.

The subscription price of The National Farmer and Stock Grower is only 50 cents a year. We hope our friends and patrons will consider it to be worth the money. It is not easy to get a farmer to write a letter and go to the postoffice and get a money order to send to a publisher, but more have done so during the past year than in any other year since we began publishing the paper, and we are correspondingly thankful.

The business of collecting information for farmers is not easy. Information has to be hunted in all kinds of places; it has to be sifted, for the reason that much of it is not new or substantial, and it is often found to be the same old monotony without news or other interesting features. We generally get a paper together, and sometimes we are proud of it and sometimes not. The "sometimes not" papers cost us just as much as the better papers. We wish that our paper should be read from beginning to end. It contains simple, bright, clear-cut statements, is not abusive of anyone and does not look on the dark side if there is a bright side, and, above all, it is always studying the interest of the farmer politically and from the standpoint of economy of production and always encouraging independence in thought and action. We hope our readers will think this over and try to find an excuse to send in a dollar for one of our subscription combinations.

The next movement will be to impose additional taxes upon the people of the United States to offset the income that is lost by admitting Canadian productions free of duty.

Canadian Apples For United States.

Even in the off year of 1910 we exported 48,000 barrels of apples to the United States. The duty paid on these was 75 cents per barrel. In a normal year, and with no duty in the way, as provided for under reciprocity, much larger shipments would be made and with greater profit to Canadian producers. — From Toronto Weekly Sun.

Sensational Potato Market.

At St. Louis the daily papers work up a sensation about the high price of potatoes. The wholesale trade, September 1st, was as follows: Home-grown Early Ohios sold from farmers' wagons at 75c. to $1.00 per bushel; receipts from the North and East were heavy again and buyers were unwilling to give the prices asked; Minnesota Ohios were worth $1.15 to $1.20 per bushel, delivered; Jersey Giants, $1.30 to $1.35; Wisconsin Long White, $1.20; California and Jersey, $1.30 to $1.45 per bushel.

The Wool Market.

At St. Louis, opening of September market, tub-washed wool was selling at 18 to 31 cents a pound; the best Missouri, Illinois and Northern Arkansas wools were selling at 14 to 21½ cents, and lesser grades at 14 to 20 cents; Northern and Western bright medium were quoted at 20 to 20½ cents, and other grades at 11 to 19 cents; Texas wools at same range as Western.

More Canadian Potatoes.

Nearly 700,000 bushels of Canadian potatoes were sold in the United States in 1910, notwithstanding the fact that a duty of 25 cents per bushel had to be paid on crossing the border. The figures are an indication of the extent to which trade will be developed under the conditions that will be established by reciprocity.—Toronto Weekly Sun.

At St. Louis popcorn is being sold in wholesale lots at $1.25 to $1.75 per 100 pounds on the cob.

THE BOOK OF LIVE STOCK CHAMPIONS.

We are actively engaged in preparing the new edition of the Book of Live Stock Champions for publication.

We have published several editions of this valuable book and intend to make the new edition far superior to all others.

We already have illustrations of seven hundred different champions, and in each case the picture occupies a half page in the book. We are now gathering the remaining three hundred pictures.

Each illustration is a special demitone engraving from a photograph taken from life. No drawings or fancy pictures appear in the book.

First and second-prize winners are not eligible unless they have also won championship prizes. It is a Book of Live Stock Champions, not simply a book of ordinary prize winners.

Champions of the beef cattle breeds are admitted by their showring honors. We have enough pictures of beef cattle champions to make a book by themselves.

Dairy cattle are admitted by showring honors, also by officially tested dairy records. We have the finest selection of dairy cattle in the world.

Draft horses are admitted on show-ring honors. Trotters and pacers are admitted on track records or as noted sires. We have all the famous horses, going back thirty years.

Thoroughbred horses are admitted on account of track honors or as sire or dam of champions. Saddle horses and ponies are admitted as championship winners.

Jacks and jennets, also mules, are admitted on show-ring or market honors.

Hogs, sheep and Angora goats are admitted as winners of sweepstakes prizes at State, National or International Fairs.

Numbers of famous car-loads of cattle, horses and sheep which have won show-ring and market honors will be published in the book.

Every live stock champion is entitled to entry providing a first-class photograph can be obtained. We do not intend to disfigure the book with poor pictures. It is better to leave out the poor pictures than to apologize for an inferior book.

We do not charge the owner for publication of his animal, but we do ask his co-operation in furnishing first-class photographs and the records of said animals.

It is worth something to a publisher to know how many books to print and bind. We therefore offer the first ten thousand copies of this edition at One Dolar per copy, including a two-year subscription to The National Farmer and Stock Grower. The first ten thousand copies will be handsomely printed and elegantly bound in red cloth, with gilt title. This is an extraordinary offer. After publication the cloth-bound copies will cost Two Dollars a copy without the subscription.

HERE IS A SUBSCRIPTION BLANK.

Hale Publishing Co., 3550 Vista Ave., St. Louis, Mo.:

Gentlemen:—Herewith please find One Dollar to pay for two-years' subscription to The National Farmer and Stock Grower, for which please give me credit. You will please send me as a Souvenir Supplement, post free, safe delivery guaranteed, one copy of The Book of Live Stock Champions, cloth-bound edition of 1911, immediately after publication.

POULTRY HOUSES, COOPS, ETC.

This is an up-to-date poultry book, written by H. A. Nourse, editor of the Poultry Herald. It was prepared during the past year and is the result of many years' study and experience. It is a book of newest plans for building poultry houses, with description of coops, fixtures and poultry utensils for the farm, village or suburban poultry keeper. It is a book of 100 pages, and is finely illustrated. It is worth its weight in gold. We are sending The National Farmer and Stock Grower for one year and the book Poultry Houses for 60 cents. Address, Hale Publishing Co., 3550 Vista Ave., St. Louis, Mo.

Horse Secrets Disclosed.

This is a valuable book. It tells how to feed and fatten your stock in the cheapest, quickest way; how to rear an orphan foal by hand; the secret of silage feeding; how to break a horse of bad habits, and scores of other money-making, money-saving secrets.

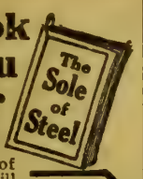
This book is published by the **FARM JOURNAL** of Philadelphia, the foremost monthly agricultural paper of this country.

THE FARM JOURNAL

does not sell this book, but offers it to its new subscribers. This paper has for thirty-three years been working for the prosperity of farmers and the happiness of farm homes. In the Farm Journal everything is boiled down so that its twenty-four to sixty pages every month give you the most matter in the least space. It is ably edited by authorities and is a cheery and welcome friend in every house it enters. Send us Fifty Cents to pay for the **Farm Journal** for two years and we will send you a free copy of Horse Secrets Disclosed as a free premium. Address, **EVANS SUBSCRIPTION AGENCY, 3550 Vista Ave., St. Louis, Mo.**

CORN HARVESTER with Binder Attachment cuts and throws in piles on harvester or winrow. Man and horse cuts and shocks equal with a Corn Binder. Sold in every state. Price $20 with Binder Attachment. S. C. MONTGOMERY, of Texaline, Tex., writes:—"The harvester has proven all you claim for it. With the assistance of one man cut and bound over 100 acres of Corn, Kaffir Corn and Maize last year." Testimonials and catalog free, showing pictures of harvester. **New Process Mfg. Co., Salina, Kan.**

This Free Book Will Save You $20.00 a Year



I want to tell you all about my *Celebrated Steel Shoes*—why one pair will outwear six pairs of leather shoes—how a pair will give you more foot-comfort than you ever had in your life. How they will keep your feet powder-dry all the time. How light and comfortable they are the year around. I have told half a million others these facts. They have bought steel shoes of me and saved millions of dollars among them. More than that—they can be on their feet all day—at any work, without foot fatigue. And they have gained health protection.

Steel Shoes

N. M. RUTHSTEIN
The Steel Shoe Man.

prevent rheumatism, sciatica, lumbago, lame back and other troubles caused by wet feet. I want to show you the way to avoid these dangers and all such troubles as tender feet, corns, bunions, chilblains, and at the same time show you a saving of $20 a year in actual money on account of the extra wear you get from my shoes.

Will you write me a postal today and get full particulars? Let me send you this free book of mine by return mail.

Address

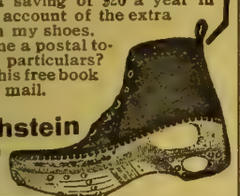
The Steel Shoe Man
254 Seventh St.
Racine, Wis.



The milk producers who are shipping to the Chicago market expect to get 16½ cents a gallon from October 1st, 1911, to April 30th, 1912.

It seems strange that in the vicinity of Troy, N. Y., it was necessary to dip blankets in milk in order to keep down a fire that had started. There was no water to be had, and horse blankets were dipped in milk and spread over roofs that were in danger of catching fire from sparks. We now expect to hear that Holstein milk is the best for putting out fires.

The Dairy Institute.

The American Dairy Institute will be held in Chicago during the second week of the National Dairy Show. Illinois is further honored by reason of the election of Hon. A. P. Grout, of Winchester, Trustee of the University of Illinois, as President. The Secretary is Mr. A. J. Glover, of Fort Atkinson, Wis.; and the Treasurer Mr. Geo. Sisson, of Pottsdam, New York. There are forty-seven Vice-Presidents, who are also the Secretaries of the various State Dairy Associations, and will appoint, as delegates to the Institute, a representative dairyman from each county in their respective states. The delegates will therefore number considerably over 2,000.

The American Dairy Institute will be very much like the ordinary Farmers' Institute, only the subjects for discussion will be limited to dairy propositions, and the questions dealt with will be predetermined and along the broadest and most intensely practical lines. For instance, the fundamentals of dairying will be taken up this year, viz.: Healthy cows, tuberculosis, alfalfa, the silo and soil conservation, the latter being claimed as the general and most beneficial result of dairy farming. The best authorities on these five topics will address the Institute, after which will ensue general discussions "from the floor," like an open Parliament.

The sessions of the American Dairy Institute will be held in the auditorium at the International Amphitheater.

McKinney Traction Cultivator.

We understand from Mr. W. R. Hightower, Secretary of the McKinney Traction Cultivator Company, that they are permanently located in their manufacturing plant, corner of Main and St. George streets, St.Louis, Mo. Their factory is a two-story building, 102x148, and situated on the tracks of the Iron Mountain Railroad. This company manufacture a riding machine which provides for plowing, seeding and cultivating, and is propelled by a gasoline power.

GET A ROAD DRAG READY.

Do Not Let the Road Get Bad Again, Says D. Ward King.

Keep the road good. The protracted drouth has permitted the ordinary roads to wear smooth and hard. Not for many years has so large a mileage of wagon roads been so unusually fine. Of course, the dragged roads were smooth without wear, and where they have been dragged for a series of years they are noticeably less dusty than undragged roads of the same soil. In fact, even the roads that have been dragged only a year or two show a marked decrease in dust.

Now that the roads are so generally good it would be almost criminal to let them go back to their old state, soft, rutty, rough, mud-hole state, when so little effort is required to keep them in fine condition. Get a split-log-drag ready and accept the first rain as an invitation to smooth the road and push a little dirt to the middle.

The breaking of a long drouth is usually a gradual process. I mean that moderate rains come at first, and that the parched earth drinks the moisture so greedily there is not much mud or washing of the soil. A choice opportunity is thus provided for bringing a neglected road into proper shape by doing a little frequently.

So get a road drag ready.

Use the drag when the soil is "moist but not sticky."

Go—after every shower; be greedy to grasp every chance to drag the road when the surface is softened. Do this and the road will remain good all winter. But the work must be continuous; if you fail once, then the rain water will lodge in the road after the next shower. And water remaining on the road means soft spots and mud-holes.

Build a light drag; build it according to directions, which may be had for the asking from the Office of Public Roads at Washington. It is all very simple.

Get a drag ready now. Do not let the GOOD road backslide.—D. Ward King, Maitland, Mo.

Separators Replace Skimming Stations.

Farm separators have worked a change in Wisconsin dairying during the past five years. In a recent bulletin, No. 210, of the Wisconsin Experiment Station, written by Professor C. E. Lee and Professor H. C. Taylor, they show that there are not so many skimming stations as five years ago. They state that this change has been brought about by the introduction of hand cream separators on the farm. In 1905 there were 260 skimming stations, while in 1910 there were only 88, a reduction of 172.

The closing of the skimming station is a natural result in territories where the system of factory operation has changed from receiving whole milk to that of farm-skimmed cream, because these stations are operated by a central plant which draws its milk supply from a territory that is too large or located too far away to permit the hauling of all the milk to the central creamery. Before the day of the hand separator, the skimming station was the means of increasing the size of the creameries. The separating of cream on the farm now serves the same purpose, and many skimming stations have been abandoned.—Press Bulletin Wisconsin Agricultural College.

Home Mixing of Fertilizers.

By writing to the German Kali Works, Continental Building, Baltimore, Md., any farmer can obtain a booklet entitled "Home Mixing of Fertilizers and How to Do It." This is a very interesting publication, and every one of our readers can learn something from it. The whole story is told so clearly that it does not require an interpreter. The book includes a table giving the composition of all farm manures and commercial fertilizers, with formulas adapted to all crops and the amount of fertilizer ingredients taken from the soil by all farm crops. Send for it without delay. See advertisement on page 2.

His Father Was in Right.

In one of the public schools a young woman teacher was trying to impress upon the pupils the lesson of patriotism and veneration for the achievements of the fathers of the country. She spoke of the Revolution and the great struggle of the Civil War. One little fellow put up his hand.

"At my house," stammered the boy when he got permission to speak, "we have a hat that my uncles wore at Gettysburg."

"That's very nice," said the teacher; "perhaps some of you other children have some relics at home of that great struggle?"

Another hand was raised, bashfully.

"Well, dear?" said the teacher.

"We have a sword that was in the Revolution. It belongs to my pa, and some day he says it will belong to me."

In the corner of the room a diminutive, freckled youngster had been waving his hand violently for five minutes. He got permission to speak.

"We hain't got no hats with holes in them that was in the Civil War," he ventured, "nor we ain't got no swords that was in the Revolution. But, say, teacher, my dad he has a union suit."—Philadelphia Times.

Golden Arrow Seed Catalogue.

The A. W. Schisler Grain Company, St. Louis, Mo., will send a catalogue of vegetable, flower, field and garden seeds to any of our readers who will write for it. It is called the Golden Arrow Seed Catalogue and is named after their Golden Arrow Seed Corn, which is a very prolific yielder and the cleanest and brightest yellow corn on the market. Quotations will be furnished on any and all seeds in season in any quantity. Address, A. W. Schisler Grain Company, 708 North Fourth street, St. Louis, Mo.

The Advantage to Canada.

Our exports of animals and their products to the United States in 1910 were three and one-quarter millions more than for the year before. Much of that increase was due to the alteration in the American duty on cream, from 5 cents per pound to 5 cents per gallon. Under complete free trade in farm products there will be an expansion that will make the old reciprocity days seem like a one-tent circus by comparison.—From Weekly Sun, Toronto, Canada.

The Twice-a-Week GLOBE-DEMOCRAT

Is a magnificent newspaper, containing all the latest home, foreign and political news. It is unquestionably the best semi-weekly Republican newspaper in the United States, and is published at St. Louis, Mo.

The National Farmer and Stock Grower

The best monthly Farm Paper in the United States. Useful on any farm, in any state. Good for grain farmers, horse, cattle, hog and sheep raisers, also dairymen and vegetable growers.

The American Poultry Journal

Published at Chicago. The oldest, largest and best Poultry Journal in America. Beautifully illustrated. Issued on the first of each month.

Your money back if not satisfied.

Catalog Free illustrating thousands of equally great government goods and other bargains.

CAL HIRSCH & SONS, U. S. Dept. 101 St. Louis, Mo.

Contest of Guernsey Cattle.

An extremely interesting thing is to take place at the National Dairy Show in Chicago this year, a contest between the breeders of the United States and the cattle experts of England as to which country has the best judges of dairy cattle. This international rivalry has never been settled.

About a month ago an intimation reached Chicago from a few representative, and, incidentally, titled breeders of England, that they were ready to try conclusions with their American brothers, it being suggested that the matter be settled in the ring of the National Dairy Show in Chicago next October. This was promptly agreed to by the officials of the Exposition, who realized that this would be the greatest case tried in their "Court of Last Appeal" for the world's leading breeders.

To show how important the Englishmen regarded the matter, and to illustrate the thorough way in which they went about it, there was a committee of five members of the English Guernsey Cattle Club, including its President, Sir Henry Lennard, and these men selected Mr. David Michie, who judged seven of the nine great English shows this year, and Mr. W. Male, an expert, who has attended the last fifty Royal Shows, to visit the leading herds and pick out absolutely the very best that England affords and send them to Chicago.

The English herd has been selected as follows:

Four from the herd of Sir Everard Hambro, Governor of the Bank of England; four from Sir Joseph Techbourn's herd (one a winner at this year's Royal;) two from Sir Henry Lennard's herd; one from Lord Falmouth's herd, and two from Canon Farror's herd. This is unquestionably the greatest lot of Guernseys ever assembled. No one breeder in England could begin to match it, and it is going to take a mighty effort and careful thought in selection upon the part of American breeders to win in this company.

News of this international competition has spread among the American breeders, and there is the same determination to win as is in evidence here when we built our cup defenders for the international yacht races.

Sir Henry Lennard with his cows, like Sir Thomas Lipton with his boats, will come over to see the blue ribbons tied. He will be the guest of the National Dairy Show Association during his stay in Chicago.

Dairy and Creamery Notes.

A chemical that prevents milk from souring is not always a help to milk. A recent investigation of boric acid for keeping milk sweet showed that the ten grains used would merely keep the milk from souring for some time, but at the same time permitted the putrefactive germs to develop very rapidly. Lactic acid ferments produce a healthful product and keep in check the putrefaction of the milk. One investigator says it would take 400 grains of boric acid to sterilize a single pint of milk. Of course, no such amount would be used, and the use of any such acid in milk should be discouraged, even if it did not injure the health of the consumer.

There is no gain in increasing the size of the dairy cow, as that increases the cost of maintenance. In selecting dairy calves, choose those that bid fair to make an ordinary-sized cow rather than a large cow. On some farms the managers are, by selection, increasing the milk yield and at the same time decreasing the size of the cows.

Gradually the regulation of the milk traffic is becoming a fact in all our large cities. The regulations are quite generally extending to the farms outside the city limits, as it has been found possible to prevent the bringing into cities of milk that has not been produced under sanitary conditions. This is working an immediate good to the inhabitants of the cities and will ultimately prove beneficial to those producing the milk.

Many a farmer is debating whether to make butter on the farm or sell the milk to companies that supply the cities. As a farm proposition, the farm buttermaking is best, as that prevents any of the fertility going off in the form of milk. Butter contains no important amount of fertility and its production does not exhaust the farm. The skim milk is left on the farm for feeding stock. It is the more valuable, as it can be combined with foods rich in starch, like potatoes and corn, and make them the more valuable for feeding.

More attention needs to be given to the pastures in which the dairy cows pass the summer. They have been too long regarded as wild land, merely used for pasture, because unsuited for anything else Therefore they have been neither fertilized or drained and often produce only such grasses and plants as have forced their way in. We often see such pastures overrun with wild plants and shrubs, such as the low-growing juniper, hardhack and various forms of herbaceous growth that do nothing except keep out other plants. Some of the grasses growing are wiry and little nutritious. Every pasture for dairy cows should be gradually brought under a high state of productivity, even if it has to be cultivated piecemeal for a few years.

As fall comes on, do not permit the pastures to be too closely grazed. It is better to feed the cows some corn or sorghum forage than to have them eat the grass down to the roots. Sod so closely grazed becomes thin, and the root systems are lessened. Keep the sod as thick as possible, and in that way get the most possible out of the pasture.

Reinforced Concrete Silo.

Prof. F. H. Demaree, of the Agricultural Experiment Station, Columbia, Mo., is the author of Circular No. 49, devoted to the description of and the directions how to construct a reinforced concrete silo.

If we attempted to reprint this circular, illustrations and all, it would require too much space and not serve the purpose nearly so well as the circular will do, and any of our readers can obtain a copy by writing for it. Experiment Stations are for the purpose of acquiring and disseminating knowledge of this kind, and in this instance it is very good work. The circular has chapters devoted to dimensions of silos; making the forms; building the foundation; erecting the walls; mixing the concrete; material for the concrete; a sample roof, etc. The construction of any kind of a silo ought to be carefully studied out before engaging in it, and the possession of this circular will be a great help.

The Accommodating Chicken.

Senator Martine, of New Jersey, was relating in Washington memories of his farm life.

"What quaint minds," he said, "have those New Jersey colored folk who work New Jersey's farms! I remember an old uncle who once paused in a job of potato hoeing to sing in my ears the praise of chicken.

" 'Chickens,' he said, 'is so accommodatin'. Dey's so accommodatin', suh. Yo' can eat 'em befo' dey's bawn, an' yo' can eat 'em ahftah dey's dead.' "

FOR YOU—THE BEST CROP INSURANCE IS AN IHC MANURE SPREADER

TO secure the best results, manure must be spread with a machine, because fork-spreading wastes manure, wastes time, wastes energy, and wastes opportunities for increasing the income which a farm is capable of yielding.

In progressive communities you will find that most of the manure spreaders in use bear the I H C trade-mark. Progressive farmers take no chances on their crop insurance. They want absolute assurance before they decide.

Before they bought I H C manure spreaders, they found that they were simple in design—unusual in strength—and remarkably efficient.

They found the power transmitting mechanism the most durable used on any machine, because the beater gear was held in a single casting which prevented the gears from springing out of alignment and cutting the teeth. They found that the long, square, chisel pointed teeth insured positive pulverizing of all manure; that the teeth were long enough to tear the manure to pieces before it wedged against the bars; that the teeth did not rim the bars; that the beater was large enough in diameter so it did not wind. They found that the rollers which supported the apron were large, that the apron moved easily; and that self-aligning roller bearings on the main drive axle not only reduced the draft but prevented the axle from binding, and cutting the axle brackets, a fault not uncommon to spreaders.

IHC Service Bureau

The purpose of this Bureau is to furnish farmers with information on better farming. If you have any worthy question concerning soils, crops, pests, fertilizer, etc., write to the I H C Service Bureau, and learn what our experts and others have found out concerning these subjects.

Kemp 20th Century Corn King Cloverleaf

You have choice of these three styles. Each style is made in several sizes to meet every condition.

Don't plant another crop before you see the I H C local dealer. Let him tell you all the facts. Let him point out the many advantages of an I H C spreader. Pick out the one that suits you best. Get catalogues from him, or, if you prefer, write direct for any information you desire.

Dry-land Wheat.

J. M. Bradshaw, of Peyton, El Paso county, Colo., has threshed an average of twenty bushels of wheat per acre from 100 acres, patches in which ran as high as fifty-seven bushels. On the Bradshaw land only four inches of moisture fell from the time this wheat was planted, September 2, 1910, to the day it was cut, July 15, 1911, and there is not a live stream in twenty-five miles. This land was summer tilled, that is, carefully cultivated, and the weeds kept down the summer before it was planted. Some of the Bradshaw wheat will be exhibited at the Dry Farming Congress, Colorado Springs, Colo., October 16th to 20th.

He Was Qualified.

"You're rather a young man to be left in charge of a drug shop," said the fussy old gentleman. "Have you any diploma?"

'Why—er—no, sir," replied the shopman, "but we have a preparation of our own that's just as good."—Sketch.

Traveling Salesmen and Saleswomen Wanted

Earn While You Learn. We now have on file letters from thousands of Wholesale and Manufacturing firms who are anxious to employ Salesmen and Saleswomen capable of earning from $1,000.00 to $10,000.00 a year and expenses. No former experience needed to get one of these good positions. We will teach you to be a high grade Salesman or Saleswoman in eight weeks by mail and our **Free Employment Bureau** will assist you to secure a position where you can earn good wages while you are learning Practical Salesmanship. Write today for full particulars, list of good openings and testimonials from over a thousand persons we have recently placed in good positions.

Hairy Vetch.

The Purdue University Agricultural Experiment Station has been growing vetch for several years, and since many inquiries have been made concerning vetch, this brief statement is made concerning the plant.

Hairy vetch is a legume belonging to the same family of plants as the clovers, soy beans and cowpeas. It is also known by the names of winter vetch and sand vetch. The plant has beautiful purple blossoms gathered in a cluster, compound leaves with six or eight leaflets, and weak stems. The roots are fibrous and rather coarse. The plant has a tendency to grow throughout the summer, having ripe seed and blossoms on the stem at the same time. The plant seems to be adapted to all types of soil, preferably the clay loam, well drained.

Land for vetch should be plowed and prepared the same as for sowing wheat. Thorough disking may also make a good seed-bed, depending upon conditions. Vetch may also be sown in standing corn. The sowing is best done with a drill, sowing from forty to sixty pounds of seed per acre. The month of August is preferable for sowing, although early September sowing may also be satisfactory. After sowing, the crop will need no further attention. The plant starts growing early in the spring and makes rapid growth, and is ready to pasture or turn under by the middle of April, at which time the growth should be as much as twelve inches to eighteen inches in length.

Hairy vetch is probably better for green manuring than for any other purpose, although some farmers have had good results from pasturing it with hogs and cattle. However, some farmers have found that their animals do not relish the plant as a pasture. If rye is sown with the vetch it tends to hold the vetch up, and the crop may be cut for green feed at about the time the rye is beginning to head. It makes very good feed for dairy cattle.

In 1910 the Station obtained from a mixture of rye and vetch, green weight of six tons per acre, equivalent to about two and three-fourths tons of dry hay. In 1911 the yield was eight and one-fourth tons of green weight, equivalent to about three and one-half tons of cured hay. Vetch sowed alone this year made a green weight of nine and three-fourths tons per acre.

The vetch plant, like other legumes, has an abundance of nodules on its roots when the ground is well inoculated. In some cases the plant produces nodules the first time sown. In other cases the nodules do not appear and inoculation sems to be necessary. It seems wise to sow a small area for one or two years until inoculation is obtained and then use this soil to inoculate larger areas. The plant is so little grown that inoculated soil is not easily obtained, and in most cases it is probably not needed.

The Experiment Station in its work has noted two things concerning hairy vetch which seem to be against it. One is that it has a tendency to winter kill, some winters killing badly, other winters not very much. There is also a tendency for the plant to escape from cultivation and become a weed. As a weed it will do no harm except as it may appear in wheat fields where it will grow and mature with the wheat, and the seed being threshed cannot be easily separated from the wheat.

The Experiment Station believes that the crop merits further consideration by the farmers in the state and suggests that the beginner operate on a small scale until he is convinced that it is something that he wants.—M. L. Fisher, of Purdue University Agricultural Experiment Station.

125,000 Opportunities to Save Money

Save every cent you can. The total will be worth while. We carry in stock more than 125,000 articles of every day use. On every item in this tremendous stock you are offered a saving that ranges from 20 to 50 per cent. So we offer you your choice of 125,000 separate and distinct opportunities to save money. We secure the lowest possible prices by buying in great quantities. The prices you pay us are a very slight advance over those we pay. Every article we sell is of the best quality—the biggest value. We guarantee that every purchase will be satisfactory. Return any article that is not. We will pay transportation charges both ways and return your money or make any exchange that is fair. Start saving NOW. Tear out the coupon and check the books you want. Mail it to us.

$4.68 Buys This Chair

This chair is a large, comfortable, upholstered rocker for the sitting room. It is covered with black imitation leather and is 40 inches high and 25 inches wide. It will be an ornament in your home and will give long service. This is just one out of the many hundred furniture bargains we offer. We buy the entire output of furniture factories. We know that our furniture is made of best materials and by expert workmen because we superintend every detail. We know our prices are the lowest because we ask only a slight advance over the manufacturing cost. You save 50c on the dollar.

Send for our new furniture book, book No. 7, to-day. You will get it by return mail. Look into this plan for securing at rock bottom prices, the best furniture that is made.

By return mail we will send you, free of all charge, the books you want.

Stoves and Ranges at a Saving of 1-2 $3.95 TO $9.29

Perfect stoves, perfect ranges, are the only kind we sell. We know they are perfect in every way because we control the output of stove foundries. Thus we can inspect every piece of material that goes into the making of them. We buy these stoves and ranges in solid trainloads at prices that are hardly more than the cost of manufacture. We guarantee our stoves or ranges to reach you in perfect condition. You will find real stove and range bargains in our special stove book. Every stove or range is of the best quality. You will save from 40 to 50 cents out of every dollar that you will be asked to pay elsewhere. Send for Book No. 23.

Buy Your Groceries at Wholesale Prices

Economize on your grocery bills, but do it in the right way. Here is a chance to get just the same amount of food—or more, and just the same quality of food—or better, for less money than you have been paying. Our grocery department is complete in every particular. In every article we give full weight and full value. We make many articles ourselves so that we can be certain they will be pure. The prices we ask are really 50 per cent lower than those you have been paying the local dealer.

New Grocery List Every 2 Months

It is not going to cost you anything to write to us and tell us to put your name on the list to receive our special grocery catalogue every two months. Just send to us today for Book No. 11; we will put your name on our regular mailing list to receive the grocery list every two months.

Buy Guaranteed Roofing and Save 1/2

You can forget that you have a roof if it is protected with our guaranteed roofing. Just send for Book No. 5. Compare the prices for yourself. You will see that you can save just ½. Remember, you are taking no chances because we guarantee the roofing for periods of 10, 12 and 15 years, depending upon the quality you buy.

Pay Manufacturing Cost Only for the Best Carpets and Rugs

Cover the "empty looking" spots on the floors in your home with fine carpets and rugs. Every carpet or rug quoted in our special catalogue No. 15 is an exceptional value. Send for our beautifully illustrated book and you will see this for yourself. Do as thousands of others have done and save half by buying your rugs and carpets from us.

Send for Book No. 15.

Bobsled and Cutter Time is Almost Here

You can afford a new cutter or sleigh this winter. Our special vehicle catalogue (Book No. 6) will make this possible because of exceptionally low prices. Send for it.

Winter Farm Supplies at Factory Prices

Feed cookers, tank heaters, incubators and brooders and winter farm necessities we can sell you at a great saving. Select the books you want from the list. Send us the numbers of them.

Two New Clothing Books

Save 1-2 on Your Fall and Winter Clothing

Dress comfortably and stylishly this winter at half the usual cost. Provide yourself with clothes made of the latest and best fabrics and perfectly tailored by experts.

In two special books we offer you the opportunity to do this. They are the "Women's Fall and Winter Fashions" and "Men's Fall and Winter Clothing."

We know that our clothes are made of the best fabrics and from the latest designs because the manager of our tailoring division keeps closely in touch with the leading fashion centers of the world. He selects those fabrics and designs which he knows to be the best.

We know that our prices are lower than you would pay elsewhere for the same excellent quality of clothes we sell because we buy the clothes in great quantities. We get right down to the rock bottom prices at which clothes can be bought. Then we ask but a slight advance over these in the prices we ask you to pay.

Get an early start and have your selections made before the fall and winter season is upon you. Send for the book you want—women's fashion book is No. 30, men's book is No. 33—and make your choice without delay.

Get a Cream Separator that is Guaranteed for a Lifetime

We know that we have the best cream separator on the market because ours was made especially for us. It combines all the good features of every cream separator and has many additional ones. It is because we are so sure of every detail of its construction, so sure of its lasting efficiency and durability, that we are able to guarantee it for a life-time. Buy your cream separator from the maker at one profit. We tell you all about our cream separator in the special catalogue (Book No. 21).

Men's Fur Coats and Heavy Winter Clothing Special

JUST OFF THE PRESS—Fur Coats for $13.65 and up. Fur gloves and caps, heavy mackinaw and sheepskin lined coats. This catalogue of special interest to all men who have to go out in cold weather. Our fur coat sales are about the largest of any house in America. This catalogue prices dog coats at $15.95 and up, raccoon at $48.50 and up, muskrat lined at $48.50 and up, lamb at $25.75 and up, coats for doctors, automobilists, lumbermen, farmers and liverymen. Also containing complete line of heavy underwear and outer clothing. Ask for book No. 18. You will find it interesting.

MONTGOMERY WARD & CO.

19th and Campbell Sts., Kansas City — Chicago Avenue Bridge, CHICAGO

Suggestions For Separator Users.

Prof. A. L. Haecker, famous dairy expert, gives the following suggestion for the users of cream separators:

1. Locate the separator on a solid foundation in a place free from dust.
2. For the best results, separate the milk as soon after milking as possible.
3. Cool the cream after it has been separated and feed the milk while it is warm.
4. Never put warm cream into old cream until the new has been cooled and stirred.
5. Cold milk will not separate as completely as warm milk.
6. Turn separator with a steady and uniform speed and flush down with skim milk or water at end of separation.
7. Wash all parts of separator at end of separation and scald, leaving in the open air to dry.

Price of New York Milk.

A shrinkage of slightly over 10 per cent. in the milk supply of New York City during the third week in August, coupled with a somewhat improved demand, made a shortage which seemed to warrant a little higher price. At a special meeting of the Milk Exchange it was decided to advance the rate to 3¼ cents net for all milk shipped in the 26-cent freight zone, making the cost delivered in this city $1.61 per can of forty quarts.—New York Produce Review and American Creamery.

Stepping Stones to Success.

Here are the seven stepping stones to dairy success: "1. Weed out the poor cows by means of the scales and Babcock test. 2. Feed the good cows a balanced ration. 3. Grow alfalfa and provide an abundance of silage. 4. Head the herd with the best sire obtainable. 5. Raise the heifer calves from the best cows. 6. Continue to weed, feed and breed. 7. Feed the mind of the man behind the cow."—Farm Magazine.

Some of the Congressmen who voted against the farmer ought to be left home next election day.

FARM AND RANCH LANDS.

ARKANSAS. — INVESTIGATE Bradley county, Arkansas; splendid agricultural, fruit lands; easy to cultivate; $10 to $20 acre; realize $25, $200 acre; free range, green vegetables each month; nice climate; a land of plenty; write us. **Norris & McKenney,** Hermitage, Ark.

ARKANSAS.—For Sale by Owner: 168 acres in heart of fruit belt of Arkansas. Under fence. 40 acres nine-year-old apple trees, best varieties. 35 acres woodland. 12 acres pasture. Rest in cultivation. Good four-room house; necessary outhouses. **J. N. Greene,** R. F. D. 1, Summers, Ark.

FREE Literature will be sent to anyone interested in the wonderful Sacramento Valley, the richest valley in the world. Unlimited opportunities. Thousands of acres available at right prices. The place for the man wanting a home in the finest climate on earth. No lands for sale; organized to give reliable information. Sacramento Valley Development Ass'n. SACRAMENTO. **California**

MAGNIFICENT FARM.

ILLINOIS.—A productive Illinois farm, 162 acres, near Crab Orchard, Williamson county, Illinois. Rolling land; every acre cleared and tillable; good, productive land. Good six-room house; large granite barn; granaries, etc. We can make especially attractive price on this farm. Easy terms. Dried Fruit at St. Louis.

There is a good market, ready sale and relatively high prices for merchantable stock; but it is useless and unprofitable to send in damp or wet, sour, dark, poorly pared or cored, etc.; dealers have resolved not to buy this stuff, as it is a violation of the pure-food laws. Quote: Evaporated ring apples at 8 to 9c. for poor to fair and 10c. for choice—fancy dry white more; chops at 1½ to 2c., and peelings, 2 to 2½c.; sun-dried apples at 6c.; sun-dried peaches at 6 to 6½c.; pears from 8c. for fancy evaporated peeled down to 2c. for inferior chopped. Some rather poor evaporated rings sold below 9c.; sun-dried apples firm; choice bright quarters salable at 6½c. All these figures are subject to change day by day.

Live Stock on the Street.

The following prices were paid on Third street, St. Louis, for calves and lambs shipped in by express, the quotations being dated September 1st: Light-weight (110 to 140 pounds) calves at 7½c. per pound; 150 to 165 pounds at 6½ to 7c.; and 170 pounds and over at 6c. per pound; rough, coarse and heretics at 4 to 5c. per pound. Sheep at 2 to 3c. per pound.; bucks at 2 to 2½c. Spring lambs of good weight and fat at 4½ to 5½c. per pound—inferior, thin, etc., 2 to 3c. per pound. Roasting pigs at $1.00 to $1.75 per head, 15 to 30 pounds.

Officers of the Apple Growers' Congress.

The meeting at St. Louis in August ended after an election of officers that resulted as follows: President, J. W. Stanton, Richview, Ill.; Vice-President, Louis Erb. Cedar Gap, Mo.; Secretary, T. C. Wilson, Columbia, Mo.; Treasurer, Wesley Greene, Des Moines, Ia.; Statistician, L. A. Goodman, Kansas City, Mo. These officers, together with the following, constitute the Executive Board: J. Mack Tanner, Springfield, Ill.; R. A. Simpson, Vincennes, Ind.; W. T. Flournoy, Marionville, Mo.; and U. T. Cox, Proctorville, O.

The place for the next convention will be decided later by the Executive Board.

John H. Osborne Dead.

From Auburn, N. Y., on August 16th, it was reported that John H. Osborne, last of the direct founders of the Osborne Works, International Harvester Company, had died in his 80th year.

Since the Harvester Company acquired the Osborne Works he has lived in retirement. He was a collector of etchings and engravings, but a fire that destroyed his home in 1904 wiped out the most valuable of what at one time had been pronounced the best private collection in this country.

Won Two Sets of Prizes.

Mr. James T. Boyd, of Rardin, Ill., won two second prizes at the Coles County Fair of 1911. These prizes were won with corn which he grew from seed furnished as a subscription premium by The National Farmer and Stock Grower. We furnished him one pound of white corn grown by L. B. Clore, of Indiana, and one pound of yellow corn grown by D. L. Pascal, of Iowa. He won two sets of prizes. One set was paid by the County Fair, and the other set paid by The National Farmer and Stock Grower.

Hay Sales at St. Louis.

The following hay report is based upon last sales made in the month of August. Sales on St. Louis Side: Part car no-grade old at $8.00; one car heavy clover-mixed at $12.50; one do. at $13; one car clover-mixed at $15.50, delivered to East Side; two cars No. 1 do. at $17; three do. at $17.50; one light clover-mixed at $18.50; two do. at $19. Timothy—One car common at $11; two cars threshed also at $11; one car scant No. 2 at $15; one car and part car do. at $16; part car No. 2 at $16.50; part car do. at $17; two cars do. at $18; one scant No. 1 at $18.50; one No. 1 at $19.50, delivered; one do. at $19.50, delivered; one do. at $20, delivered; one do. at $20.50; one do. at $21. Clover—Two cars No. 2 at $12.50; two do. at $13; three No. 1 at $15, two delivered; one do. at $16. Prairie—One car Arkansas at $8.50; one car No. 3 at $10; one car do. at $10.50; part car No. 3 at $11.50; one car do. at 12; one do. at $12.50; six No. 1 at $13, four delivered; six do. at $13.50; three do. at $14; two choice on p. t. Alfalfa—One car No. 2 at $15, r. c.; one scant No. 1 at $15.75.

On East Side: One car part common clover and part poor threshed timothy at $9.00 round; one car clover-mixed at $15.50, delivered to St. Louis. Timothy — Two cars threshed at $11; one car No. 4 at $14, delivered to St. Louis; three cars No. 3 at $16.50; one car good do. at $13, delivered to St. Louis; one car No. 1 at $19.

United States Market For Hay.

Eighty-six thousand tons of Canadian hay were sold in the United States last year. The American customs tax on this hay was $344,000. Under reciprocity this tax will be abolished.—Toronto (Canadian) Sun.

Cantaloupe Prices at St. Louis.

September 1st, 1911: Colorado Rocky Fords in jobbing way at $2.00 for standard, $1.50 for pony and $2.25 for jumbo crates, delivered; Missouri (express receipts) standard crates at $1.00 to $1.25, and flat crates at 60 to 70c.; home-grown wagon receipts Hackensacks and Gems at 25 to 50c. per bushel, according to quality.

Butter and Cheese at St. Louis.

On September 1st, in the wholesale trade of St. Louis: Creamery—Extra, 25c.; firsts, 21c.; seconds, 19c.; ladle-packed, 20c.; country make, in pails, at 16c. for average—inferior less. Cheese — On orders, per pound: Northern—Twins, 13¼c.; Singles, 13½c.; Longhorns, 14½c.; Daisies, 14¼c.; Young America, 15c.; Limburger, 13½c.. Swiss—No. 1 at 18c.; No. 2 at 11 to 13c.; broken, inferior or cracked at 6 to 7c. Brick, 14c.; No. 2, 9 to 11c.; off grades, 4 to 5c.

The Center of Population.

On August 31st, 1911, Director of the Census Durand announced the center of population of the United States to be in the western part of the city of Bloomington, Monroe county, Indiana. The migration of the center of population is explained by Director Durand as follows:

"The great increase in the population of New York, Pennsylvania and certain other states north of the thirty-ninth parallel has balanced the increase in Texas, Oklahoma, Indian Territory and Southern California. The greater advance toward the West is due to a large extent to the increase in population of the Pacific Coast States, their distance from the center giving them much greater weight than the populous states east of the center.

"For instance, San Francisco, Seattle, Portland and Sacramento, with a population of 906,016, have as great an influence on the center of population as Philadelphia, Boston and Baltimore, with a population of 2,778,078."

The total Western movement of the center of population since 1790 is 558 miles.

This year's Missouri State Fair will open at Sedalia on Saturday, September 30th, and continue until Friday, October 6th. Mr. J. T. Stinson, Sedalia, Mo., is Secretary. This great show improves every year.

The first Elgin butter quotation of September is 26 cents, against 31 cents a year ago.

THE LAND INTEREST.

Norris & McKenney, of Hermitage, Ark., are advertising valuable lands cheap in the fruit belt of Arkansas. Hermitage is in Bradley county, Southeast Arkansas, on the Rock Island Road, and accessible by other routes to first-class markets.

Last spring a Texas man bought a Pecos Valley orchard in New Mexico at a cost of $20,000; he took possession at the right time, and, the season being good, he sold the fruit on the trees for $22,500.00 cash. These things are possible in the artesian well and irrigation belt of the Southwest. Mr. J. T. Gillett, manager of the Independent Land Company at Dayton, N. M., on the Pecos Valley Railroad, north of Carlsbad, has several fine opportunities in sight, one of which is advertised on page 12 of this paper.

New Summary of Game Laws.

A comprehensive summary of the new game laws of the United States and Canada, including those enacted during the present year, is set forth in Farmers' Bulletin 470, United States Department of Agriculture, soon to be issued by Secretary Wilson. The bulletin brings the data relating to game up to date, and shows, by states, the new as well as the old laws, changes and modifications of all laws relating to shipment, sales, limits and licenses.

It is stated that while the 1911 laws exceeded in volume those of any previous year, that was due to changes in the warden service, control of license funds and to the curtailment of the bag limit rather than to modifying of seasons. Notable modifications in the warden system were made in Delaware, New York, North Dakota, Oregon and Wyoming. Other states also passed laws increasing the warden force. Montana created three; North Dakota two game preserves, while Idaho and Washington added one each to their preserves. Massachusetts and Oregon made permanent arrangements for the creating of future preserves. California, Maine, Massachusetts, Michigan, Missouri, New Jersey and Wisconsin passed laws permitting the possession and disposal of game reared in private preserves. North Carolina joined the lists of states prohibiting the exportation of live quail for restocking purposes. New York adopted legislation closing its markets to all but a few foreign species and game raised in captivity.

A novel feature of new legislation was the prohibiting of the belling of dogs or use of other noise-producing devices in wild-fowl shooting in Delaware and the prohibiting by North Dakota of the use of automobiles in duck hunting.

The deer season was shortened from eleven to six days in Colorado, and from 109 to 62 in California, but was lengthened in Michigan, South Carolina, Vermont and Wyoming. Cottontail and bush rabbits were placed on the game list and provided with a season in California. Wild ducks were added to the lists in Delaware and South Carolina. Delaware placed woodcock on the game list; Kansas, squirrels and snipe; Maine, eider ducks; Nebraska, kill-deers and doves; and New Jersey, Hungarian partridges. Much-needed protection was given gray and black squirrels by Kansas; wild ducks by Massachusetts; wood-ducks by Maine and Vermont; and doves and swans by North Dakota.

Rhode Island shortened its shore-bird season, opening October 15th instead of July 15th. Tennessee prohibited the sale of quail and robins. North Carolina revoked the authority of the Audubon Society to issue permits for the exportation of quail. Arkansas, Alabama, California, Colorado, Connecticut, Delaware, Florida, Idaho, Illinois, Indiana, Iowa, Kansas, Maine, Massachusetts, Michigan, Minnesota, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Washington, West Virginia and Wisconsin, all made changes in these laws. The total number of new game laws passed in 1911 was about 250. The way to obtain a copy of Farmers' Bulletin No. 470 is to write to the Secretary of Agriculture, Washington, D. C., and ask for a copy. It will be sent free by mail.

Keep this paper and refer to the weather forecasts on page 26.

IF YOU HAVE

Cattle, Hogs or Sheep

TO MARKET

Or Are Thinking of Buying Feeders

REMEMBER, THAT UPON YOUR CHOICE OF A COMMISSION FIRM MAY LARGELY DEPEND YOUR PROFITS. WE INVITE YOUR CONSIGNMENTS, WHETHER LARGE OR SMALL. WHETHER YOU ARE A FEEDER WHO SHIPS ONLY AN OCCASIONAL CARLOAD, OR A REGULAR SHIPPER, YOU MAY REST ASSURED OF FIRST-CLASS SERVICE AND HIGHEST MARKET VALUE. OUR FEEDER-BUYING SERVICE IS UNEXCELLED. Free Roof Insurance Against Lightning

Edwards Interlocking "Reo" Steel Shingles

Write today for our Big Free Catalog No. 957, which gives full details about Edwards Interlocking "Reo" Steel Shingles and other metal roofing and materials made by us. It tells you all about the Ten Thousand Dollar Guaranty Bond, which insures every Edwards "Reo" Steel Shingle Roof against destruction by lightning for all time.

Edwards "Reo" Steel Shingles are made of high-grade Bessemer Steel in sheets 5 to 12 feet long and 24 inches wide. Either painted or galvanized steel and all ready to put on. You can easily put them on yourself. Only hammer and nails required.

We have a Special Cash Money-Making Proposition for the man who writes for it, in each community. If any of your buildings need roofing, you are the man.

Send dimensions of your buildings and we will quote you cost of an Edwards Roof—freight prepaid. Write for offer—NOW.

The Edwards Mfg. Co., 907-957 Lock St., Cincinnati, O.
Largest Manufacturers of Steel Roofing Material in the World (50)

The Plantation Mule.

An old colored man had a mule that would not move for him. He pulled and dragged the mule until he was exhausted, and finally he sat down and said: "Well, ole fellow, you's got de best ob me." There was a drug store across the street and a thought struck the old negro.He went across and said: "Has yo' got anything dat will make dat mule ob mine go?" "I don't know; I can try." He came out and pinched a little medicine into the mule's side. The mule commenced to wiggle around, and finally off he started over the side of the hill at a good pace. Sambo watched him for a moment or two and then he ran into the drug store, saying: "Mister, how much yo' charge for dat med'cine?" "Ten cents." "Has yo' any mo'?" "Yes." "Den jes put twenty cents' wuf inter me so I kin ketch dat mule."—Inglenook.

Utility and Waste of Fertility.

Since the human race came on the earth the waste of fertilizing materials has been enormous. Only a few nations, like the Chinese, seem to have awakened to the realization of the advantage of utilizing the waste materials of all kinds for retaining the fertility of their fields.

The more modern the city the more certainly are the excreta wasted. In the cities it is common for the people that keep horses to ask someone to come and take away the manure, as they have no use for it. But in addition, there are other notable wastes. Take, for instance, the wash water and the sink water, which in some cases goes into catch basins and thence into sewers and sometimes directly into the sewers. The amount of potassium contained in this water is something beyond calculation. Every person in the nation uses soap, and all soap contains potash. When it is dissolved in water it is ready to be seized upon by the roots of plants.

A few weeks ago a gentleman given to investigating things had his catch basin cleaned out and the water and sludge put into a big, shallow cavity in the garden. Before, this sludge had been buried out of sight in a deep hole, the people having the impression that the material was detrimental as a fertilizer and might kill the plants.

As a trial, cucumbers were planted around the sides of this shallow space filled with sludge, and at the same time cucumbers were planted under normal conditions in another part of the garden.

In a little while something appeared on the site of the sludge hole, but the leaves were so large that the owner concluded it must be a squash or a pumpkin, but the form of the leaf was like that of the leaf of a cucumber vine.

Soon blossoms appeared and then the fruit, which proved to be cucumbers. Good-sized cucumbers were being eaten from this patch around the sludge hole before any had formed on the vines growing under normal conditions.

The sludge in the catch basin came entirely from the wash water that came from the washing of clothes and from the washing of dishes. It was rich in several fertilizing elements, especially potash.

Yet everywhere in thickly-settled communities this great item of fertility goes to waste. A hundred million people in this country are daily helping to swell the great river of wash water running to waste. In addition to that is the sewage, rich in all kinds of fertilizing material.

Victor Hugo, in Les Miserables, wrote a chapter on sewage waste and linked it with the poverty of the European nations. His conclusions have never been denied. The principles of it hold good in every nation where civilization reigns. The problem of utilizing such wastes is one that civilization has not yet solved.

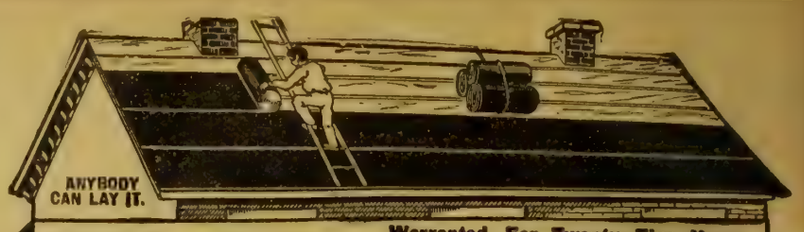
Sewage systems are being put in on the farms, and they should be so constructed that all fertility may be saved.

Questions About Fall Plowing.

A correspondent asks if it is a good thing to harrow fall plowing, and whether it is best to plow for wheat. I would not harrow fall plowing where the ground is intended for crop next spring. The soil will be left in much better condition for winter without harrowing or discing. It will not become so compact, and it makes a better seedbed for spring seeding. Much fall wheat is now sown on stubble ground. If this ground is tolerably clean, discing may answer every purpose, and really make a better seedbed than could be had from plowing. However, if plowing is necessary to get the ground in good condition, I would not plow over five inches deep. The important thing is to have a fine surface with a firm sub-surface.—L. C. Brown.

Postals For Advertisements.

My neighbor was showing me several interesting booklets and a couple of samples of goods in which she was interested. I made the remark that she kept abreast of the times, at least in the line of new devices and new manufactures. "I do it in this way," she replied. "I keep on hand a few postals, and as I go through my new magazines I glance over every advertisement. Many of the advertisers offer samples of the goods they manufacture or pamphlets and books of various natures—all to be had for the asking. When I come across something in which I am interested I write a card at once and in a few days am the recipient of the goods offered. In this way I have come in touch with many things of real merit that otherwise I might never have known anything about. I know that advertising pays, though in saying that I am not thinking of the advertiser but of myself who has been getting the benefit of the splendid offers made through these papers."—Janet Thomas Van Osdel.



Rubber Roofing

Warranted For Twenty-Five Years.
FREIGHT PAID To Any Station East of Rocky Mountains, except Texas, Okla., Colo., N. D., S. D., Wyo., Mont., N. M., La., Ga., Ala., Miss. and Fla., on all orders of three rolls or more. Special Prices to these States on request.

CENTURY MANUFACTURING COMPANY, Dept. 673, East St. Louis, Ills.

Egg-laying Information.

In the matter of egg-laying information the United States is far behind Australia. In the United States we are just beginning the A, B, C of egg-laying contests, and Australia can furnish much of the information we are going to acquire, having already conducted seven annual contests on the same grounds. Australia has conducted contests showing two-year egg-laying results by the same hens, and in a general way has answered more economic questions regarding egg laying than all the sources of information combined. Average eggs per hen per year, first contest, 130; average eggs per hen per year, seven contests, 162; average eggs per hen per year, last contest, 180. Highest average per hen of any contest, 180. Two-year records: First year—Eggs per hen per year, 180; second year, same hens, 124. Another contest: Average eggs per hen, first year, 179; second year, same hens, 127. Profit over feed cost the first year was two dollars to one in second year. White Leghorns cleaned up all other varieties in egg laying.

Fifty Dollars For a Gallon of Apples.

The Missouri State Board of Horticulture at Columbia, Mo., is offering a cash prize of $50.00 to the boy that will select and send in the best half peck of apples of any variety. The money will be given to pay the expenses of attending one term of the Short Course in the College of Agriculture at Columbia this fall. From the gallon of apples sent the committee in charge will pick out the best five specimens, enough to make up one plate.

The contest is open to all boys in Missouri between the ages of sixteen and twenty years who have never attended an Agricultural College or been connected with an Experiment Station. The apples may be taken from any orchard, but a paper must be written, setting forth why he chose the variety he did, and what treatment the trees have received in the way of cultivation, spraying, pruning, etc. Two neighbors must bear witness that the fruit was actually selected by the boy that sends it in.

The apples must be sent by prepaid express to Professor J. C. Whitten, Professor of Horticulture, Columbia, Mo., not later than October 15th. The prize will be awarded before the 20th. Fruit will be kept in cold storage, free, and later exhibited at Fruit Shows and Expositions which may be held by the Board of Horticulture. Each plate will be exhibited under the name and address of the owner, and all except the plate that won the scholarship will be eligible to any prize that may be offered. By this plan everyone is practically assured of winning a cash prize, even though he failed to land the scholarship.

The $50.00 prize will be sufficient to pay all necessary expenses of attending the first term of the Short Course, which opens November 1st and continues for eight weeks.

For full information about the Short Winter Course write to the College of Agriculture, Columbia,Mo.

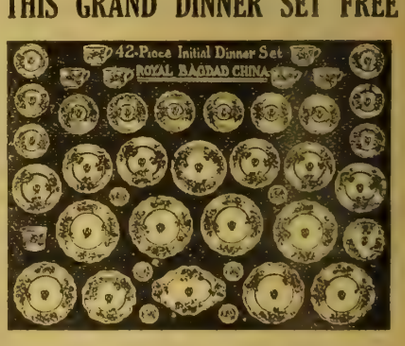
Fairs and Expositions.

In the year 1910 the Illinois State Fair cleared $30,000 as the profit of the Fair. It has since been expended for permanent improvements.

The recent Illinois Legislature gave the Board of Agriculture $125,000 for a sheep and swine pavilion, $75,000 for a mammoth horse barn and $15,000 for additional toilet facilities. The Illinois State Fair now represents an outlay of $1,105,803.00.

Every publication has a class number. See pages 18 and 19.

THIS GRAND DINNER SET FREE



I want to place a set of this high class Royal Bagdad china ware in every farm home in the country, and that too, without cost of a single penny to the recipient. This beautiful set comprises 42 pieces made up as follows: 6 cups 6 saucers, 6 dinner plates, 6 butter dishes 6 dessert dishes, 6 pie plates, 6 cake plates, 1 salad dish, 1 bread plate, 1 vegetable plate, 1 meat platter and 1 open sugar bowl. It is handsomely decorated in old rose and gold with your initial in gold on the large pieces of the set.

Drop me a card to-day, stating that you want a 42 piece dinner set, that is all you have to do at present. Upon receipt of your card I will send you at once 16 beautiful pictures, size 15 x 18 inches, lithographed in 12 harmonious colors, which I want you to distribute free to 16 of your friends and neighbors, who will give you an order for a years' subscription to my handsome monthly magazine, printed in colors and running monthly from 32 to 68 pages. Every one who sees a copy of this magazine will readily subscribe and especially so if they receive free one of these splendid pictures.

I am offering you an opportunity to get a beautiful set of dishes free, take advantage of it by writing for full particulars to-day. Address

J. R. WOLTZ, Publisher
Dept. D, 1322 So. Wabash Ave., Chicago, Ill.

Too Many or Too Few Trees.

The trees on a farm may be a good or an evil according to their kind, number and use. In the early days of the country war was made on trees because the trees were quite generally in possession of the land, and they had to be dispossessed before field and garden crops could be grown.

So, for centuries, the man that cut down a tree was considered a benefactor. But after awhile the people awoke to the fact that too many trees had been cut down. Then the movement gained headway for the reforesting of the land, and during the past forty years tree plantings have been so extensively made that on some farms they have become a detriment in certain places on the farm.

One man that has a poultry establishment was in the habit of growing rape in his poultry yards and considered it a great source of economical food for his flocks. But in the same poultry yard were permitted to grow two elm trees and a number of oaks. During recent years the development of these trees has been so great that no rape will grow in the poultry yard, and the fowls will have to get along without their rape pasture, much to the detriment of the fowls and the owner's pocketbook. Probably had he foreseen the effect of the trees he would not have permitted them to grow in the yard. But now they are so well established he has not the heart to cut them down, though they have no value except for looks. The same trees have so shaded part of the garden that it has become unproductive, as the sun reaches it only at high noon.

Many gardens are being rendered unproductive for the same reason—the growing of trees near them. A garden space must be clear enough of trees so that the sun of the whole day will be upon it from early morning till late afternoon. We cannot surround a garden with a wall of tall trees and get satisfactory results from the garden. This was a fact that the early settlers found out to their cost, but of which late generations have lost sight.

Recently the writer was in the vicinity of a newly-established park. A near-by resident was grumbling because the Park Commissioners had dug up a large number of trees. He very much objected to the removal of the trees, but was later consoled when he understood that they had been removed to let the slanting rays of the sun fall on a pond of beautiful and rare lilies that were the delight of the neighborhood. The lilies did not thrive while the trees intercepted so much of the light of the sun in the early forenoon and late afternoon.

Many gardens are partial failures for the same reason, and their owners do not mistrust it. The same is true in the gardens in the cities, where the plants get little sunlight on account of the high buildings all around them.

Trees are good things to have about, but there is such a thing as having too many of them in certain spots.

The Sanitary Privy.

Of great importance to human life is good health, which cannot be preserved if the sanitary conditions in and about living quarters are bad. Among the worst conditions to be found about any home is a soil that has become polluted. The Secretary of Agriculture has published a bulletin which treats of such soil pollution and certain simple plans for avoiding it.

Soil pollution by human excreta endangers the health of a family. It is possible by the expenditure of a few dollars for a sanitary privy to prevent this soil pollution, enabling the family to live, year after year, on the same premises, without endangering the members' health.

A number of widely-prevalent diseases have been spread by means of polluted soils, simply because the facts have not been widely known, and it is to bring needed information on this subject to the dwellers on all farms and residents of every village without a proper sewerage system, that Farmers' Bulletin 463 has been issued, and is now ready for distribution to anyone who makes application to either the Secretary of Agriculture, a Senator or Representative in Congress.

Full information, with illustrations, estimates of cost, and plans for constructing the sanitary outhouses, is contained in the pamphlet. Directions are given as to how to keep a privy sanitary and how to properly dispose of night soil.

In the United States about 400,000 persons suffer from and about 35,000 die from typhoid each year; over 2,000,000 persons have hookworm disease. Thousands of these deaths and many thousands of these cases of disease might be prevented by the use of sanitary privies.

Although there may be no soil pollution upon one's own premises, his children may be exposed to all the dangers at the schools which they attend, and the entire family may be so exposed when they attend church, unless these schools and churches are provided with these sanitary conveniences. Lack of sanitary privies on neighbors' farms may also be responsible for cases of typhoid and infections on farms which are provided with proper outhouses, because disease germs may be carried for considerable distances by flies, by animals, by the feet of persons, by wagon wheels and by drainage from one farm to another.

In view of these well-established facts, it is evident that among the highest duties that rest upon a farmer or dweller in a country village, is not only to have a sanitary privy on his own premises, but to insist that the pollution of soil be prevented throughout the entire neighborhood.

Be sure to write to the Hon. Secretary of Agriculture, Washington, D. C., and ask for Farmers' Bulletin No. 463.

Indicated Crop Yield.

The total production of the principal crops of the United States for 1911, as indicated by their condition on August 1st, reported by the United States Department of Agriculture, is as follows:

Crop.	1910.	1911.
Corn	3,125,968,000	2,620,221,400
Winter wheat	464,044,000	455,149,000
Spring wheat	231,399,000	209,645,700
All wheat	695,443,000	664,794,700
Oats	1,126,765,000	817,800,000
Barley	162,227,000	139,352,400
(a) Rye	33,039,000	30,677,000
Potatoes	338,811,000	249,893,000
Buckwheat	17,239,000	14,498,000
Tobacco	984,439,000	600,588,000
Flax (seed)	14,116,000	22,899,000
Rice	24,510,000	23,076,000
Hay	60,978,000	49,129,000

(a) Preliminary estimate of Crop Reporting Board. Corn, wheat, oats, barley, rye, potatoes, buckwheat and flax (seed) estimated in bushels; tobacco and rice in pounds; hay in tons.

How She Knew.

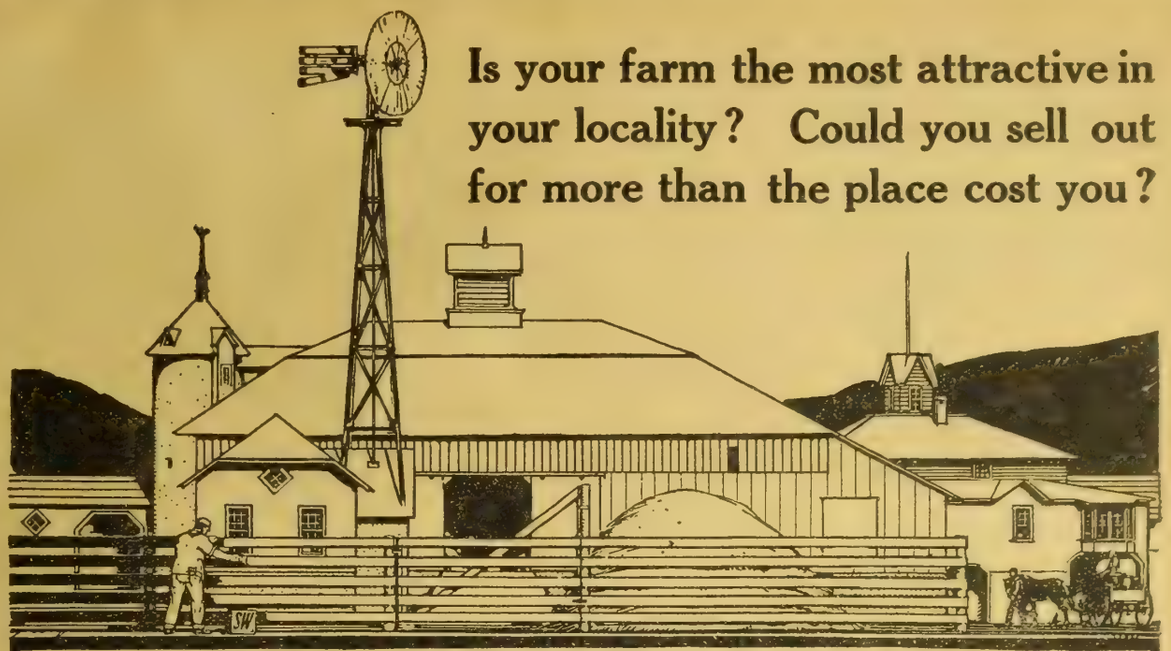
He—"You refuse me, then. Oh, well, there are others!'"

She—"I know there are. I accepted one of them this afternoon."—Boston Transcript.

Ice.

Ella—"Do I make myself plain?"

Stella—"Somebody has, if you haven't."—Judge.



Is your farm the most attractive in your locality? Could you sell out for more than the place cost you?

Sherwin-Williams Paint (Prepared) (S W P)
for buildings outside and inside—covers most, wears longest, looks best.

Sherwin-Williams Commonwealth Barn Red
made especially for painting barns, corn cribs, roofs, fences, etc.

Sherwin-Williams Inside Floor Paint
dries over night, wears well, stands scrubbing and foot wear.

Sherwin-Williams Wagon and Implement Paint
made especially for farm wagons, implements, tools, machinery, etc.

Sherwin-Williams Roof and Bridge Paint
for painting roofs, outbuildings, bridges, etc. Comes in four colors.

NOTHING runs down a farm so rapidly as the lack of paint. The longer your buildings are allowed to go without paint, the more paint it takes and the more time to apply it. Keep things painted and use good paint.

One name in the paint field stands for quality—The Sherwin-Williams Company—paint makers from start to finish.

You can get every kind of paint or varnish from a Sherwin-Williams dealer near you. You can get direct from us a most informing book, telling just what paint to buy for each particular surface and just how to apply it. This book is free, and it should be in the hands of every farmer. Write for it today.

Sherwin-Williams Buggy Paint
for painting and varnishing at one operation, buggies, automobiles, sleighs and other surfaces where a high gloss finish is desired.

Sherwin-Williams Paris Green
kills the bugs and does not blight the foliage. Send for booklet.

Sherwin-Williams New Process Arsenate of Lead
kills leaf-eating insects, grubs and moths. Send for booklet.

Sherwin-Williams Lime Sulfur
for the destruction of San Jose Scale and other sucking insects. Send for booklet.

Write today for these free books:
"Paints and Varnishes for the Farm"
"S-W Brighten-Up Booklet"
"Booklet on Insecticides."

NATIONAL STOCK YARDS, ILL.

Sherwin-Williams Paints.

On page 15 will be found the advertisement of Sherwin-Williams Paints and Varnishes. They issue a booklet entitled "Paints and Varnishes for the farm." This booklet is a wonder; it gives instructions that you need in the business of painting implements, houses, vehicles, fences and outbuildings. In addition to helping you to use the right paints in an economical manner they will see that you are directed to the dealer who will furnish their guaranteed paints, and that is worth something, for country stores are full of trash in the disguise of paint that will not preserve the surface for thirty days after it is brushed on. The same firm furnish Paris green, arsenate of lead and lime-sulphur to kill insects in orchards, etc. Write for the paint book, anyway, and address Sherwin-Williams Company, 689 Canal Road, N. W., Cleveland, Ohio.

The American Royal Show.

Remember that this great show takes place October 9th to 14th at the Kansas City Stock Yards. It is always attended largely upon its merits, and this year the exhibits will be up to the usual standards and with improvements of greater interest.

Bog Spavin

Cure the lameness and remove the bunch without scarring the horse—have the part looking just as it did before the blemish came.

Fleming's Spavin Cure (Liquid)

is a special remedy for soft and semi-solid blemishes—Bog Spavin, Thoroughpin, Splint, Curb, Capped Hock, etc. It is neither a liniment nor a simple blister, but a remedy unlike any other. Doesn't imitate and can't be imitated. Easy to use, only a little required, and your money back if it ever fails.

Fleming's Vest-Pocket Veterinary Adviser

describes and illustrates all kinds of blemishes and tells you how to treat them. Covers over 200 veterinary subjects. 192 pages, 69 illustrations. Write for a free copy. (5)

FLEMING BROS., Chemists,
218 Union Stock Yards, Chicago, Ill.

English Prices For Hackneys.

Prices recently paid for Hackney breeding stock in England indicate unmistakably an abiding faith in the future of the high-stepping harness horse. At a sale held by R. P. Evans, a few weeks ago, thirty-four head, among which were old mares and sucking foals, brought $20,300, an average of $1,572. The average for and fillies the returns were $12,575, an average $1,572. The average for five head—two of them yearlings—by Polonius, was $1,043. Beckingham Lady Grace, a five-year-old daughter of Beckingham Squire, topped the sale at $8,000, though $4,750 was bid for the stallion Evanthus, on which a reserve price of $5,000 had been put. Broadhatch Sunflower, a yearling filly by Polonius, brought $1,300.

Dried Fruit at New York.

Evaporated apples continue quiet on the spot, with inferior grades quoted at 10¼ to 10½ cents in bags, and 10¾ to 11 cents in boxes. Prunes are steady on reports of firmer markets on the coast. Quotation ranges from 9 to 16¾ cents, f. o. b. Californias up to 30-40s, and nominal for Oregons. Apricots are dull and barely steady; choice, 15 to 15½ cents; extra choice, 16 to 16½ cents; fancy, 17 to 18 cents Peaches are dull and featureless; choice, 11 to 11½ cents; extra choice, 12 to 12¼ cents; fancy, 12½ cents. Raisins are quiet, with an easier undertone on evidences of more selling pressure from the West. Loose Muscatels are quoted at 6¼ to 7 cents; choice to fancy seeded, 8 to 9½ cents; seedless, 5¾ to 7 cents; London layers, $1.40 to $1.45. The above were the quotations at New York, September 1st.

Top Prices For Sheep.

At Chicago, during the week ending August 19th, the firm of Clay, Robinson & Co. secured a clean sweep on top prices for sheep. The sales follow: $7.25 per 100 pounds was obtained for Idaho lambs belonging to T. H. Gooding and Sewell Bros.; $5.50 was secured for Indiana yearling wethers belonging to Smith Trotter; they sold Idaho yearling wethers at $5.40 per 100 pounds for F. R. Gooding; $4.00 was landed for Oregon wethers for O. Moody and the Westfall Commission Company; Idaho ewes were sold at $3.50 for Sewell Bros. and F. R. Gooding, and Oregon ewes for F. Cummings. All these prices were the highest of the week.

The August Buermann Mfg. Co., of Newark, N. J., are manufacturers of saddlery hardware, and make a number of bits and spurs, including the famous Daisy Concha Bit, which is advertised in this issue. See page 17.

Pleased With Her Praise.

One of the most charming bits of repartee we ever were fortunate enough to listen to was at a big wedding on East Seventy-sixth street, last Monday night.

"What charming teeth Miss Dibbleton has!" a lady exclaimed. "I never saw anything so beautiful!"

"Oh, thank you so much for saying that!" exclaimed the young lady's escort, fervently and sincerely.

"Oh, pardon me—are you her husband?"

"No, my dear lady—I am only her dentist!"—Cleveland Plain Dealer.

Grass Heifers at $5.50.

On September 1st, at the St. Louis National Stock Yards, J. W. Burchfield, a live stock operator of Webster county, Missoui, was represented on the market with two cars of cattle. Among his sales were eleven heifers, averaging 709 pounds, that sold at $5.50 per 100 pounds. This price is about the highest on Southwest Missouri grass heifers this year and indicates that quality counts even on grass cattle.

POLAND-CHINA BOAR—MASTER KEEP ON, NO. 157,271. One of the herd boars at Kirby Stock Farms, Marmaduke, Ark. MASTER KEEP ON is by Master Meddler, by Meddler, 2d, the greatest sire of State Fair prize winners, at four years old, the hog world has ever known, and his sire, Meddler, junior champion at St. Louis World's Fair. The dam of MASTER KEEP ON is Keep Me, by the mighty Keep On, who was champion at Chicago International and the greatest brood sow sire that ever lived. In describing MASTER KEEP ON Mr. J. W. Kirby says: "As a breeder MASTER KEEP ON is simply a winner. He puts the finish on his pigs along with all the size possible and at the same time they carry with them that Keep On vim that is so necessary in the making of a good hog. We have bred and established a great herd of Poland-China sows that are noted throughout the South for the high quality of their pigs, and we are proud to note the improvement in our herd for the past few years." For prices on pigs address J. W. Kirby, Manager, Marmaduke, Ark.

Cures Strained, Puffy Ankles, Lymphangitis, Poll Evil, Fistula, Bolls, Sores, Wire Cuts, Bruises, Swellings, Lameness, and allays Pain quickly without Blistering, removing the hair, or laying the horse up. Pleasant to use. $2.00 per bottle, delivered. Describe your case for special instructions and Book 5 E free.

ABSORBINE, JR., liniment for mankind. For Strains, Painful, Knotted, Swollen Veins, Milk Leg, Gout. Price $1.00 per bottle at dealers or delivered.

W. F. YOUNG, P. D. F., 106 Temple St., Springfield, Mass.

KENDALL'S SPAVIN CURE

The one remedy you can always depend on to cure Spavin, Curb, Splint, Ringbone or any lameness. Thousands have proved it invaluable. Get a bottle from your druggist. Price per bottle $1. 6 for $5. "Treatise on the Horse" Free at druggist or from Dr. B. J. KENDALL CO., Enosburg Falls, Vt., U. S. A.

WESTERN
RANGE HORSE SALES.

Horse raisers are advised that sales are being conducted by

Campbell & Reid and Western Sale Stables Co.,
NATIONAL STOCK YARDS, ILL.,
As usual, during the season of 1911. The Eighth Sale will be held on

Thursday, Sept. 7th,

And every two weeks thereafter until the close of the season. The Ninth Sale will be held on

Thursday, Sept. 21st.

We will be glad to hear from Ranchmen having Horses for sale, also from buyers who wish to have splendid Horses to finish up for the domestic sale ring.

Please address
J. J. SEARCY, Sale Manager,
NATIONAL STOCK YARDS, ILL.

The School of Horsemanship.

A remarkable example of the influence of advertising and of the possibilities offered to those who live on the free rural delivery routes was brought to notice by the event of the Second Annual Exhibition of the Beery School of Horsemanship held at Pleasant Hill, Ohio, August 6-12.

Over 5,000 people were in attendance. Fully 1,000 of these were students. These students,drawn, some of them, by the memories of last year's event, others by the desire to see the King of Horse Trainers put his theories into practice as taught them by his mail course, came practically from every state in the Union.

The little town of Pleasant Hill is located twenty-two miles out from Dayton, on the Dayton, Covington and Piqua Railroad. Some of the students were farmers, some of them riders, some were professional horse trainers, some were bronco busters from the ranches of the West. But all came with the one big purpose in view, which was to study the horse, to become acquainted with its various types and to learn how to master him and see him conquered at his worst in a safe, sane and humane manner by a master hand.

To furnish sufficient variety of subjects for this purpose, the exhibition was liberally patronized. These advertisements offered free handling for all such vicious and unruly horses as were entered. The result was a remarkable collection of animals. There were horses that were a menace to human life, who kicked, balked, bit and shied. In fact, the worse a horse was the more he was wanted, and the resulting aggregation of horse flesh did justice to the requirements of the occasion.

During the five days of the exhibition every performance had a thrill. The biggest thrill of all came when Prof. Beery subdued and drove the Wells' Outlaw. This Outlaw is a powerful stallion with a terrible record back of him. He is charged with killing three men, has severely wounded others, and came very near killing his present owner, Mr. Edward Wells, who, ever since his trying experience, has confined this wild and vicious animal in a strong box stall, making no further attempt to curb his viciousness.

This Outlaw was successfully handled and subdued by Prof. Beery in place of the ferocious Hinsdale, the man killer, that, after having been shipped 1,000 miles to Pleasant Hill, broke a blood vessel in a vicious plunge as he was being unloaded, and died in sight of the exhibition grounds.

Clay, Robinson & Co. at St. Louis.

A good way to make an acquaintance with a live stock commission firm is to write for market information, and the way to get it in the most satisfactory manner is to state what you are preparing to ship on the market, giving the number, breeding, age, average weight, quality, etc., and the probable time of shipment. Clay, Robinson & Co., live stock commission agents at St. Louis, make many friends by their advice to shippers. They came to St. Louis a few years ago and now in volume of business have passed all competitors except one or two. Any time you need market information in regard to stockers and feeders, hogs, sheep, calves and beef cattle, address Clay, Robinson & Co., National Stock Yards, Ill.

Horse and Mule Information.

Messrs. Holland, Nugent & Maxwell Bros. are the leading horse and mule commission salesmen at the largest horse and mule market in the world. Their auction days are Monday and Tuesday of each week. In their last circular Mr. T. H. Holland said: "I don't see any reason why we should not have a good trade right along. There is a good cotton crop and selling at good prices. The Southern people seem to have money to buy good mules. Eastern demand for big horses is as good as it has been any time this year. We have plenty of orders to fill and we have had plenty of buyers every week from the East as well as from the South. We are in position to take good care of our customers, if they will buy good, useful horses, something that we can safely put in to fill orders; but the common, plain stuff you will have to take your chances on." Horse and mule dealers who can put up car-load lots for sale at a first-class market will do well to communicate with Holland, Nugent & Maxwell Bros., National Stock Yards, Ill., and receive their weekly "Advice to Shippers."

The Price of Market Horses.

Horses are bought to be sold again, and all dealers are slow to quote prices. But horses are sold at auction and dealers can get a range of values by looking on. Plug horses and culls continue to sell at $15 to $45. At St. Louis the light horses are all called "Southern." Ten years ago they were selling at $40 to $85, with the tops at $90 to $100. At this time plain Southern horses are quoted at $50 to $75, and the better class at $80 to $125; then the stylish Southern horses bring from $130 to $165, these being better horses than used to go South years ago. Driving horses, so classed, sell at $150 to $225, when you reach meritorious animals here and there that will bring $230 to $275. The Eastern chunks are quoted in the market at $140 to $185, but when style and quality and weight come in the ordinary quotations are left behind. Draft horses are selling generally at $165 to $235, and here and there a matched team of full draft weight will bring $500 to $600.

Western Range Horses and Mules.

The sales of Western range horses and mules by Campbell & Reid and Western Sale Stables Company continue to be remarkably successful. At the last sale in August about 1,100 head were sold quickly at good prices. They were the pick of the Western country. Included in the sale were sixteen horses at $121 per head, twenty-six mares at $126, nineteen geldings at $100, nineteen mules at $151, twenty-one geldings at $75, a mixed lot of fourteen head at $59.50, ten inferior mares, etc., $25, twenty-five mares at $62.50, and a long string of other bunches. The September sales on the 7th and 21st will bring in draft geldings weighing 1,400 pounds, mares weighing 1,300 to 1,500 pounds, heavy draught two-year-olds and yearlings, pasture-raised, and gentle and unbraded, also loads of mules, from yearlings to four-year-olds, and several loads of good mares with mule colts.

For further particulars address J. J. Searcy, Sale Manager, National Stock Yards, Ill.

Mule Quotations at St. Louis.

A market that keeps on hand five or six thousand mules every day in the year must quote prices by the car-load. At the St. Louis National Stock Yards, 14-hand mules vary in price from $75 to $145; 14½ hands, $92.50 to $157.50; 15 hands, $117.50 to $192.50; 15½ hands, $135 to $225; and 16 hands or better, $150 to $275. Horse and mule receipts at the St. Louis National Stock Yards average about 15,000 a month.

A First-class Commission House.

In consigning live stock for sale at the St. Louis National Stock Yards, remember the Evans-Montague Live Stock Commission Company. It is a successful firm, highly competent and persevering in the interest of their customers. The Evans-Montague Commission Company solicit consignments of cattle, hogs and sheep for sale on the market, and desire stockmen to take notice that the company has special buyers who select and buy stock and feeding cattle for their customers. S. T. (Tom) Boothe, who has been on the market for fifteen years, is native cattle salesman. Colonel James H. Campbell is with this house as Vice-President, in charge of the Southern cattle department. His presence adds strength to the organization. The firm is equally well equipped to sell hogs and sheep. Stockmen requiring market information should address Evans-Montague Commission Company, Box 68, National Stock Yards, Ill.

Hog Prices at St. Louis.

At St. Louis, on August 31st, the best hogs, averaging 220 and 230 pounds, were sold at $7.55 per 100 pounds. The best hogs averaging 164 and 189 pounds sold at $7.60 per 100 pounds, and the best pigs, 150 to 159 pounds, sold at $7.50 per 100 pounds. The bulk of all the hogs sold at $7.30 to $7.50 per 100 pounds.

Too Little Ton.

Smiley—"That iceman down the street will have to change his name if he wishes to do any business."

Wiley—"Why? What's his mane?"

Smiley—"Littleton. Some people might not notice it, but I am afraid most folks would shy at a name like that on an ice-dealer's sign."—Chicago Record-Herald.

Made of the Best Hand-Forged Steel. The handsomest all-around Cowboy Bit ever made. Each Bit bears a guarantee tag. Introductory price, $5.00. Sent prepaid on receipt of price.
AGENTS WANTED.
AUGUST BUERMANN MFG. CO.,
NEWARK, N. J.

Matador Star Cattle.

On Monday, August 28, at Chicago, Clay, Robinson & Co. sold twenty-six car-loads of beef steers for the Matador Land and Cattle Company. They were from the Cheyenne River Reservation, in South Dakota. There were 509 head in the shipment and they made a general average weight of 1,200 pounds, and sold at $6.35, $6.45 and $6.50, netting straight $70 per head. "I am certainly well pleased with the prices received for my cattle on Monday," remarked Murdo Mackenzie, General Manager of the Matador Company, with headquarters at Trinidad, Colo. "The prices were considerably higher than the Pacific coast buyers offered me before shipping to Chicago." Included in the above shipment was a Matador steer of 1,500 pounds weight, which sold at $7.25 per 100 pounds, grossing $115.27. This price was the highest of the season so far.

TOWER'S FISH BRAND REFLEX SLICKER

WEATHERS THE ROUGHEST WEATHER

On ordinary slickers, water finds its way in at the front. On the REFLEX Slicker our REFLEX edge (pat'd) guides every drop of water to the bottom of coat where it drops off

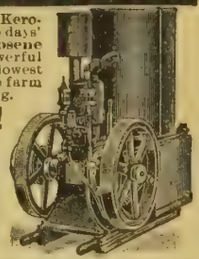
Use KEROSENE Engine FREE!

Amazing "DETROIT" Kerosene Engine shipped on 15 days' FREE Trial, proves **kerosene** cheapest, safest, most powerful fuel. If satisfied, pay lowest price ever given on reliable farm engine; if not, pay nothing.



Gasoline Going Up!

Automobile owners are burning up so much gasoline that the world's supply is running short. Gasoline is 9c to 15c higher than coal oil. Still going up. Two pints of coal oil do work of three pints gasoline. No waste, no evaporation, no explosion from coal oil.

Amazing "DETROIT"

The "DETROIT" is the **only** engine that handles **coal oil** successfully, uses alcohol, gasoline and benzine, too. Starts without cranking. Basic patent—only three moving parts—no cams—no sprockets—no gears—no valves—the utmost in simplicity, power and strength. Mounted on skids. All sizes, 2 to 20 h. p., in stock ready to ship. Complete engine tested just before crating. Comes all ready to run. Pumps, saws, threshes, churns, separates milk, grinds feed, shells corn, runs home electric-lighting plant. **Prices (stripped), $29.50 up.** Sent any place on 15 days' Free Trial. Don't buy an engine till you investigate amazing, money-saving, power-saving "DETROIT." Thousands in use. Costs only postal to find out. If you are first in your neighborhood to write, we will allow you **Special Extra-Low Introductory** price. Write!

Detroit Engine Works, 383 Bellevue Ave., Detroit, Mich.

Poultry and Farm Paper Club.

Two first-class papers can be had for the price of one. **The National Farmer and Stock Grower** is one, and the **American Poultry Journal** is the other. There are other excellent poultry papers, but the one we take home to read and one the family is determined to read is the **American Poultry Journal.** We have made arrangements whereby we can send **The National Farmer and Stock Grower** and the **American Poultry Journal,** both papers, one year, for fifty cents. This is a bargain that is good now, but this advertisement may not appear again. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Egg-laying Contest.

A world-wide egg-laying contest has been inaugurated by the North American, a newspaper published at Philadelphia, Pa., and the contest will be conducted at the Storrs Agricultural Experiment Station, not a great distance from Hartford, Conn. Why the North American went out of the densely-populated district surrounding Philadelphia to find a location for an egg-laying contest is not yet explained. The competition will start November 1st. Each entry is to consist of six pure-bred females, either hens or pullets; no males to be included. Five layers shall constitute a competing pen, the extra female being held in reserve as a substitute in case of death or incurable malady. The contest will last over a year, and the entries will be limited to 100 pens. All the fowls must be shipped to the contest grounds express prepaid. The express station is Eagleville, on the Central Vermont Railway, and is reached by the American Express.

Fowls will be received at any time from October 2d to October 25th. It is advised that shipment be made as early as possible after October 1st, in order that fowls may become acclimated previous to the date of opening.

The right is reserved to return fowls if they are deemed unsuitable for the purpose of the competition, and every specimen sent must be full-sized, healthy and vigorous. The right, of course, is reserved to refuse any and all entries.

An entrance fee of $25 is required in each case, $10 to accompany application and balance not later than October 1st. In the event of failure of entrants to make second payment, the first payment shall be forfeited.

All eggs produced will be retained for the purposes of this competition.

Should any surplus over and above the economical operation of the competition appear, such surplus will be equally divided between the several owners of pens.

All fowls entered must be of some recognized breed or variety. Mongrel or cross-bred fowls will not be accepted.

Any fowl suffering from an infectious or contagious disease of any kind, or which may not meet the requirements, as viewed by the committee, will be rejected and excluded from this competition.

The committee reserves the right to clip or cut the feathers of one wing on any fowl that may be inclined to fly out of the inclosures.

The competition to be decided by the total number of eggs laid by each pen.

No competitor shall be permitted to withdraw any of the fowls during the period of competition, unless permission is granted by full vote of the committee.

Chickens only will be eligible to this competition, and only such chickens as produce marketable eggs; ornamental chickens, including all bantams, are, therefore, ineligible.

Entries will be received from any point of the world.

The competition will be governed by the following Advisory Board:

Prof. F. H. Stoneburn, Storrs Agricultural College, Storrs, Conn.

Prof, Thomas F. McGrew, International Correspondence Schools, Scranton, Pa.

Prof. Homer Jackson, State College, Pa.

Dr. A. A. Brigham, South Dakota School of Agriculture, Brookings, South Dakota.

Dr. Prince T. Woods, Managing Editor American Poultry Journal, Chicago, Ill.

Dr. Nathan W. Sanborn, Editor American Poultry Advocate, Syracuse, N. Y.

Prof. F. C. Elford, McDonald College, Canada.

George A. McDevitt, The North American, Philadelphia, Pa.

F. V. L. Turner, The North American, Philadelphia, Pa.

The houses erected for the competition will be fitted with trap nests, five nests in each pen. This arrangement will guard against any failure to keep an accurate record of each hen, and will also provide against any tendency on the part of a hen to lay in the litter for lack of nest capacity.

There will probably be circulars issued, giving further particulars, and in the meantime a letter to any member of the Advisory Board will probably bring an answer. In the meantime other contests will be heard from.

To Increase the Product.

In a recent conversation in regard to the food supply of the United States and the necessity of increasing it to keep pace with the increase of population, Willet M.Hayes, Assistant Secretary of Agriculture, said:

"Already we have taken this matter up very seriously, and some remarkable results have been achieved. Indeed, the wealth of the world and the pleasure of living have been greatly augmented by the scientific improvement of plants and animals, though as yet only a start has been made toward accomplishing all that is possible in this direction.

"It is a question, primarily, of making an acre of land produce a maximum of output. Such output may take the form of grain or vegetables, or the acre may support animals or fowls that yield a larger amount of food for man. * * *

"The average hen lays 125 eggs in a twelve-month. It is too few. We want a hen that can be counted on to lay 200 eggs per annum, and we shall get her before very long. The Department of Agriculture is pursuing experiments which have for their object the production not only of a greater number of eggs per hen, but of larger and heavier eggs, of uniform color—this last being an important matter from a market point of view.

"Already there appears an occasional pullet which lays 240 or even 254 eggs a year, illustrating possibilities in this line. We want breeds of chickens which will do nearly, if not quite, as well. In 7,000 years, during which the fowl has been domesticated, the size of its eggs has been multiplied by four, through the simple process of picking out the biggest ones for hatching. We are going ahead with the same idea, systematically applied. But, not content with this, we are trying to improve the chicken itself as a market bird by increasing the weight of the flesh on its breast and thighs. The chickens of the future will have bigger drumsticks and more white meat than those of to-day."

Missouri Egg Laying.

We have previously mentioned the Missouri National Egg-laying Contest. It will be conducted at the Missouri State Poultry Experiment Station, in South Central Missouri, which is located at Mountain Grove. The contest will be under the direct charge of T. E. Quisenberry, Director of the Station, and the Missouri State Poultry Board, ably assisted by the Executive Board, consisting of Prof. F. S Jacoby, of the Kansas Agricultural College; Prof. W. A. Lippincott, of the Iowa Agricultural College; Prof. A. G. Phillips, of Purdue University, Indiana; Prof. D. O. Barto, of the Illinois Agricultural College; Prof. Jas. G. Halpin, of the Wisconsin Agricultural College; N. E. Chapman, of the Minnesota State Board of Agriculture; and R. C. Lawry, of the Yester-laid Egg Farm, Pacific, Mo. These men are among the leading poultry experts of this country, and they will have direct charge of the details, records, management, etc. Absolute fairness, impartial judgment and correct records are assured. The best birds will win.

The birds will be shipped to Mountain Grove in September and October, and the contest will begin November 1st and continue for one year.

As peviously stated, this contest is arousing much interest in all parts of the country.

There is a possibility that the same females competing in the first year of the contest may be continued for another year, thus determining their value as egg producers during their second year, as compared to the first. If this is done it will put this competition on the same status as the Australian contest, to which we have to look at present for data of this description.

Poultry Notes.

Rev. Edgar Warren, authority on poultry, says: "It is better to maintain health in the poultry yard than to have to expel disease."

Co-operation by farmers in egg selling is the first step towards getting away from the high cost of marketing. The unit of an egg shipment is a case of thirty dozen. It is not a difficult shipment to make up in any community.

In the course of a year there will be five hundred egg-laying contests in the United States of America.

Proof.

"Sir," said the astonished landlady to a traveler, who had sent his cup forward for the seventh time, "you must be very fond of coffee."

"Yes, madam, I am," he replied, "or I should never have drunk as much water to get a little."—Elmwood Courier.

THE BEST MAGAZINES

Also Farm Papers, Periodical Publications, All Offered at Club Rates by Club Numbers.

SUBSCRIPTION DEPARTMENT.

The publishers of The National Farmer and Stock Grower will receive and forward subscriptions to any publication in the United States. We take pleasure in doing so, thereby keeping our patrons in touch with the best literature. Our prices are absolutely the lowest. We do not solicit single subscriptions. We prefer our patrons to take advantage of the club rates as shown by class numbers.

Make Up Your Own Clubs.

All clubs are made up with class numbers. That is the simplest method of subscribing for publications. You obtain the lowest rate that is possible. The most wasteful method of buying papers is to buy them one at a time. For instance, the Saturday Evening Post is 5 cents a copy 52 times a year; which amounts to $2.60, and the subscription rate is $1.50, a saving of $1.10, or 22 copies out of 52. This agency is unable to make any reduction on the Saturday Evening Post, yet we use it as an example of economy in subscription work.

Class Numbers of Publications.

In looking over the class numbers of publications, please remember that from these numbers you obtain the clubbing price. Orders for single publications have nothing to do with class numbers. When you club several publications together you obtain the class rate. All you have to do is to add the class numbers of the papers you desire to subscribe for together, multiply by 5 cents and remit the amount.

CLUBBING EXAMPLE.

Class Number.		Regular (For One Year.) Price.
20	Metropolitan	$1.50
16	Delineator	1.00
22	World To-Day	1.50
58		$2.90, instead of $4.00

The class number total, 58, multiplied by 5 cents, is $2.90, and the regular price of the three papers is $4.00. The class price makes a saving of $1.10. Try your hand at it.

AGRICULTURAL PAPERS.

Class Number.			Full Price.	Our Price.
18	American	Agriculturist..W.	$1.00	$1.00
17	American	Bee Journal...M.	1.00	1.00
16	American	Cultivator.....W.	1.00	80
7	American	Farmer.....M.	40	35
19	American	Thresherman...M.	1.00	85
23	Breeders'	Gazette.....W.	1.75	1.75

(THE BREEDERS' GAZETTE is also called the American Stock Farm. It is a great publication, sometimes the first-named of all weekly farm papers. Being in Class 23, it is very cheap in club combinations.)

15	Colman's Rural World...W.	1.00	75
16	Connecticut Farmer.....W.	1.00	85
23	Country Gentleman.....W.	1.50	1.50

Class Number.			Full Price.	Our Price.
65	Country Life in America	S.M.	$4.00	$4.00
6	Farm and Home	S.M.	50	50

(FARM AND HOME is a remarkable semi-monthly publication at a low price, but it is very instructive and valuable. We recommend that it be included in every club.)

17	Farm and Ranch	W.	1.00	1.00
9	Farm and Fireside	S.M.	50	50
9	Farm Home	M.	50	45
17	Farm Journal, five years	M.	1.00	90
5	Farm News	M.	25	25
5	Farm Progress	S.M.	25	25
20	Farmers' Home Journal	W.	1.00	1.00
18	Farmers' Review	W.	1.00	90
9	Farmer's Voice	S.M.	50	45
15	Fruit Grower (St. Joe)	M.	1.00	75
7	Fruitman and Gardener	M.	50	40
22	Garden Magazine	M.	1.50	1.50
8	Green's Fruit Grower	M.	50	40
18	Hoard's Dairyman	W.	1.00	90
8	Home and Farm	S.M.	50	45

(HOME AND FARM, of Louisville, Ky., is published semi-monthly, and is a standard publication for Southern farmers. Added to any clubbing list it will cost but little and will surely please the subscriber.)

12	Indiana Farmer	W.	60	50
17	Inland Farmer	W.	1.00	85
16	Iowa Homestead	W.	1.00	85
15	Irrigation Age	M.	1.00	90
8	Journal of Agriculture	W.	50	45
15	Kansas Farmer	W.	1.00	85
30	Kentucky Stock Farm	W.	2.00	2.00
8	Kimball's Dairy Farmer	S.M.	50	40
18	Michigan Farmer	W.	1.00	90
8	Mo. and Kansas Farmer	M.	50	50
5	National Farmer and Stock Grower	M.	50	40

(THE NATIONAL FARMER AND STOCK GROWER is a splendid monthly publication, four columns to the page, 32 pages. It can be used at small expense to the advantage of all who are engaged in farming and stock raising. It is equally valuable in any state.)

18	New England Homestead	W.	1.00	1.00
13	Ohio Farmer	W.	75	75
7	Oklahoma Farm Journal	S.M.	50	40

34	Western Horseman	W.	2.00	1.75

MONTHLY MAGAZINES.

27	Adventure	M.	1.50	1.40
22	Ainslee's Magazine	M.	1.80	1.50
22	American Magazine	M.	1.50	1.50
20	American Suburbs	M.	1.50	1.50
20	Argosy	M.	1.00	1.00
77	Atlantic Monthly	M.	4.00	4.00
16	Black Cat	M.	1.00	90
27	Blue Book	M.	1.50	1.50
48	Bookman	M.	2.50	2.50
20	Cavalier	M.	1.00	1.00
77	Century Magazine	M.	4.00	3.85
20	Columbian Magazine	M.	1.50	1.25
16	Cooking Club Magazine	M.	1.00	90
17	Cosmopolitan	M.	1.00	1.00
45	Current Literature	M.	3.00	2.50
22	Everybody's Magazine	M.	1.50	1.50
45	Forum	M.	2.50	2.50
35	Fra Magazine	M.	2.00	2.00
22	Hampton's Magazine	M.	1.50	1.50
20	Harper's Bazaar	M.	1.25	1.25

(HARPER'S BAZAAR is a stand-by. It solves every programme in life for the American woman. It is the chosen magazine of the best and most thoughtful class of women in this country.)

70	Harper's Magazine	M.	4.00	4.00
17	Human Life	M.	1.00	1.00
16	Judge's Library	M.	1.00	1.00
8	The Ladies' World	M.	50	50

(THE LADIES' WORLD, published at 50 cents a year, is a miracle of beauty, elegance and utility. It is ornamental, instructive, with colored covers.

35	Lippincott's Magazine	M.	2.50	2.25
22	McClure's Magazine	M.	1.50	1.25
20	Metropolitan Magazine	M.	1.50	1.25
20	Munsey's Magazine	M.	1.00	1.00
22	National Magazine	M.	1.50	1.25
28	New England Magazine	M.	1.50	1.50
70	North American Review	M.	4.00	4.00
28	Out West Magazine	M.	1.50	1.50
25	Overland Monthly	M.	1.50	1.25
20	Pacific Monthly	M.	1.50	1.25
22	Pearson's Magazine	M.	1.50	1.25
17	Philistine	M.	1.00	90
18	Pickings From Puck	M.	1.00	1.00
16	Pictorial Review	M.	1.00	90
16	Progress Magazine	M.	1.00	90
16	Railroad Men's Magazine	M.	1.00	90
27	Red Book	M.	1.50	1.40
40	Review of Reviews	M.	3.00	3.00

(REVIEW OF REVIEWS keeps the busy man and woman fully informed on the work of the world and condenses the matter into readable shape. It is a time-saver and probably the most valuable of all publications classed as magazines. We have it in Class 40, but it cannot be included in any class where the class total is less than 60.)

20	Scrap Book	M.	1.00	1.00
57	Scribner's Monthly	M.	3.00	3.00
25	Short Stories	M.	1.50	1.35
16	Sis Hopkins' Magazine	M.	1.00	90
40	Smart Set	M.	3.00	2.50
22	Smith's Magazine	M.	1.50	1.40
28	Strand Magazine	M.	1.50	1.50
19	Success Magazine	M.	1.00	1.00
22	Sunset Magazine	M.	1.50	1.25
22	Taylor-TrotwoodMagazine	M.	1.50	1.25
22	Technical World	M.	1.50	1.25
22	Travel Magazine	M.	1.50	1.25
15	Uncle Remus' Magazine	M.	1.00	90

(UNCLE REMUS' MAGAZINE is a delightful publication, especially for the South. It has some of the most attractive stories and instructive articles in print. In Class No. 15 is a low-price magazine, but that does not detract from the high quality of the publication.)

15	Vegetarian Magazine	M.	1.00	85
15	Watson's Magazine	M.	1.00	80
34	Wide World Magazine	M.	1.20	1.20
22	World To-day	M.	1.50	1.40
40	World's Work	M.	3.00	2.50
22	Young's Magazine	M.	1.50	1.35

MUSIC and DRAMATICAL.

65	Bill Board	W.	$4.00	$3.75
18	Choir Herald	M.	90	90
18	Choir Leader	M.	90	90
69	Dramatic Mirror	W.	4.00	3.50

Class Number.			Full Price.	Our Price.
69	Dramatic News	W.	$4.00	$3.50
22	Etude	W.	1.50	1.50

(THE ETUDE, for music lovers, contains each month twelve pieces of new music, with instructions and interesting reading for pianists, violinists, organists, children and clubs.)

18	Metronome	M.	1.00	90
32	Music Trade Review	M.	2.00	1.60
34	Musical America	W.	2.00	1.75
90	Musical Courier	W.	5.00	5.00
17	Musical Observer	M.	1.00	1.00

MILL CREEK STOCK FARM.

THOS. H. EZELL, Proprietor,

Breeder and dealer in registered, high-class and Starlight Jacks and Jennets from four months to eight years old. (No partial Jacks.) A written guarantee. Catalogues contain pictures of each animal. Also Jersey Cattle.

R. F. D. 7, - NASHVILLE, TENN.

Long Distance Phone, Main 1326.

Iowa-fed Wyoming Cattle.

On Wednesday, August 9th, at Chicago, a notable cattle sale was made by Clay, Robinson & Co.. The load consisted of seventeen Hereford steers, 1,454 pounds average, at $7.65 per 100 pounds. Up to then the price was the highest on the open market since November, 1910. They were fed and marketed by H. A. Leaders, of Minden, Ia. They were bought through the advice of Clay, Robinson & Co. as feeders. Fed about six months, they put on an average gain of around 480 pounds. Speaking of the sale, Mr. Leaders said: "The price was surely a great one, and I cannot express in words my appreciation of your good work with my first shipment to you." Mr. Leaders stated that he started these cattle on ground and ear corn, and timothy and clover hay, being kept on this feed for about two months. The corn ration was gradually changed from ear to shelled. They were fed corn on grass only about one month, then put in a dry feed lot. The ration consisted of shelled corn, alfalfa-molasses feed, with oil meal and nuts as a conditioner toward the latter part of the feeding period.

Struck by Lightning.

On page 30 there appears the advertisement of the Franklin Lightning Rod, which has stood the test for sixty-two years. This is a standard rod, and by addressing the inventor and manufacturers you can keep away from worthless imitations. Struck by lightning is now the common heading in country newspapers, a calamity which can be prevented if ordinary precautions are taken.

Hog Comparisons.

Combined receipts of hogs at eleven markets, the last week of August, totaled 318,000, or 44,000 less than the previous week, 20,000 more than the same week last year, and 2,000 more than the corresponding week two years ago. Grand average of corresponding weeks of the last eleven years, which ranged at 267,000 to 387,000, was 336,000, or 18,000 more than the present week. Total for 1911 to date, 16,359,999, or 3,644,000 more than the same time in 1910, and 791,000 more than like period in 1909, but 2,108,000 less than corresponding time in 1908. The four-year average figured 15,777,000, or 582,000 less than this year.

Don't Have Hog Diseases.

The government specialists and experimenters are still working on the cure of hog diseases, whereas the great thing for a farmer to do is to prevent them. To prevent hog diseases, a little inexpensive "Merry War Lye" will come pretty near filling the bill. Many of the best hog feeders do not use anything else. Read the testimonials on page 6 and write to E. Myers Lye Co., Dept 22, St. Louis, Mo., for a copy of the booklet "How to get the biggest profits from hog raising."

Cattle Being Exported.

From Chicago exporters sent abroad 1,273 cattle the last week in August, against 795 the week before, 948 a year ago, and 1,576 two years ago. Morris took 589; Swift, 324; S. & S., 314; and J. Shamberg, 46.

The Oklahoma State Fair opens September 26th and continues until October 7th. A total of $19,154 has been offered in premiums for cattle, horses, sheep, swine and poultry, to say nothing of $20,000 additional in the speed department.

Never Fail.

"Do you think women would improve politics?"

"Well," replied Mr. Growcher, "after listening to the conversation on the front porch, I'll say this for them: If they ever start an investigation they'll find out something." —Philadelphia Times.

Watch For Canadian Lambs.

Eighty-eight thousand Canadian lambs were sold in the United States last year and paid a duty of 75 cents per head on entering the American market. Sixteen thousand five hundred Canadian sheep were sold in the same market and these paid a tax of $1.50 per head. Just watch for the expansion of this trade when reciprocity sweeps present barriers away. —Toronto (Canadian) Sun.

"Labor to keep alive in your breast that little spark of celestial fire—conscience." — George Washington.

COUGHS

Are caused by germs in the throat or bronchial tubes. And the proper way to end it is to directly destroy those germs. Cough cures which by opiates merely drug the throat nerves have little curative effect. Frazier's Distemper Cure is absolutely pure and contains no narcotic drugs. "Frazier's" cures coughs among horses and colts because it kills germs. Its effects are so certain and so immediate that we guarantee it to give satisfaction or refund the money. Send for free booklet. $1.00 bottle holds three 50-cent bottles. Sold by druggists or prepaid from Binkley Medical Company, Dept. H, Nappanee, Ind.

SUBSCRIPTION PREMIUM — A POCKET COMPASS.

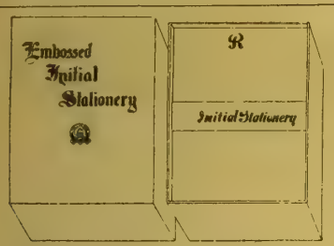
This is a true 1¾-inch Pocket Compass purchased from a reliable house. It is a fancy, nickel-plated, open-face, watch-shape Compass, with a silvered dial, and it weighs less than one ounce. Every farmer or ranchman should have one in his pocket. Send us One Dollar and we will send you The National Farmer and Stock Grower for one year, and we will also send you this Pocket Compass by mail postpaid. Address, THE HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.

TAPE LINE — A SPLENDID SUBSCRIPTION PREMIUM.

This is a five-foot Tape Line in a nickel-plated German silver case, with smooth joint; a pocket piece. The tape is enameled linen, spring and stop wind; width of tape ¼ inch, graduated in inches and eighths on one side. The diameter of the case is 1¾ inches. Every farmer needs one and it will last for years. Send us Sixty Cents and we will mail you The National Farmer and Stock Grower for one year, and we will also forward, postage paid, one of these fine Tape Lines. Address, THE HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.

Universal Magazine Initial Stationery.

One of the most refined and elegant subscription premiums ever offered. A box of elegant white, cloth-finish embossed initial stationery sent free, postpaid, and safe delivery guaranteed. This is a splendid subscription premium offer in connection with the interesting publication entitled the Universal Magazine. The Universal Magazine is a nice, bright, cheerful, illustrated monthly magazine of thirty-two pages, three columns to the page, containing home reading, stories, fashions, patterns and poetry—a splendid publication for the money. To anyone who will send us a money order for 50 cents we will send the Universal Magazine for two years, and they can select their own initial for the stationery, and we will send it as a free premium postpaid. Money returned if not satisfied. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**



Embossed Initial Stationery.

INTERNATIONAL HARVESTER CO. REPLIES.

The Facts Set Forth Regarding the Attack of the Unsigned and Misleading Townsend Report.

During the last month there have been widely-circulated certain statements regarding the International Harvester Company, all of which have their origin in a report made more than five years ago by Assistant District Attorney Townsend, after a brief and partial investigation.

The International Harvester Company has presented to the Stanley Committee, at Washington, a complete and vigorous answer, in which it is pointed out that the arguments and conclusions of the so-called "Townsend Report" are based upon clearly erroneous statements of well-known facts.

The "Townsend Report" claims that a monopoly in harvesting machinery has been created because the International owns the patents on all the best types of knotters.

The truth, as claimed by the International Harvester Company, is, that that there has been no patent whatever on the essential parts of any type of knotter since 1896, when the Appleby patent expired. Neither are there now any patents upon any essential part of the grain binder. The many basic patents had all expired in 1896, and there have been no substantial patented improvements since 1891—twenty years ago—while the life of a patent, as is well known, is only seventeen years. That there are no such patents is known to every manufacturer of harvesters, and is now emphasized by the fact that other manufacturers, including the Minnesota State Prison, have recently closely imitated the International models. The harvester business is therefore based upon manufacturing at least cost and selling at reasonable prices.

The Townsend Report charges that of all of the different types of harvesters purchased by the International, all except three—the "Deering," "McCormick" and Osborne"—have been abandoned, and that repairs are not furnished for any others. This statement is notoriously and absolutely untrue. Repairs for the "Minnie," "Buckeye" and "Keystone," although not manufactured for nearly ten years, have always been and are still furnished by the International. Although the Report states that the "Champion," "Plano" and "Milwaukee" binders and mowers have ceased to be manufactured, the truth is that they have been since 1902 continuously manufactured, and are still manufactured by the International and are generally sold throughout the United States. This is well known to the farmers and dealers of the country, and especially to us, who have advertised these repairs for former agents of the Buckeye Company.

The Report's charge of a "binder twine trust" is without any foundation whatsoever. The International is not only in constant and vigorous competition with the Plymouth Cordage Company and a half dozen or more other smaller twine manufacturers, but also with **seven state penitentiary twine mills.**

Since the International was organized, binder twine prices have steadily fallen, and the decrease between 1902 and 1911 amounts to 40 per cent.

The charge that the International has suppressed competition in harvesters, is likewise untrue. It has had continuously, and still has, the vigourous competition of the Johnston, Walter A. Wood, Acme and Adriance-Platt Companies in the binder trade, and several other in the mower trade. Recently two large manufacturers have entered the trade, while the Minnesota Prison factory compels free labor and private capital to compete with prison labor and public funds in the manufacture of harvesters and twine.

The Townsend Report repeats the story that binders are sold at a cheaper price abroad than at home. The United States Government's investigation, in 1909, proved that while the American farmer pays approximately $125.00 for a six-foot binder, in France this same machine costs $173.70; in Germany, $203.00; in Sweden, $160.80; and in Great Britain, $135.16.

In spite of the fact that materials had increased in cost more than 30 per cent., and wages more than 17 per cent., the International did not increase its price of binders until three years ago. And then an increase of only 7 per cent. was made. This, however, owing to some reductions in material, has been largely wiped out by an announced reduction of 5 per cent. for 1912, although the cost of labor has advanced more than 26 per cent.

The income of the International Harvester Company is about 8 per cent. upon the actual capital stock, and the company does business in one name with one trade-mark and without any disguises. No matter how large the business done by the company may be, it is entitled to be judged upon facts which are capable of proof by investigation.

SUBSCRIPTION METHODS.

What Class Numbers Will Do For the Subscriber.

Class numbers will save you money providing you understand them. In accepting subscriptions for newspapers and magazines the publishers usually receive single subscriptions at the full regular price, but they allow certain reductions providing clubs are made up. We make up a club every business day in the year and forward it to the Publishers' Clearing House, thereby securing the lowest rates. To understand the club class number system, you may take an example of three papers—Review of Reviews, $3.00 a year; Good Housekeeping, $1.25 a year; The Etude (musical paper), $1.50 a year—total, $5.75. Now we get Review of Reviews class number 40; Good Housekeeping class number, 20; The Etude class number, 22. Total class numbers, 82, multiplied by 5 cents, $4.10. Saving by class number club rates, $1.65. Every unit in a class number counts for 5 cents. On pages 18 and 19 we have listed every paper for which our patrons subscribed last year. The most expensive manner of buying publications is by single copies at the regular rate. The best way is to add up class numbers and remit the total amount, thereby getting the benefit of club rates.

$1 Worth of Mayr's Wonderful Stomach Treatment FREE

It is a positive remedy for all Stomach, Liver and Intestinal Trouble, Gastritis, Indigestion, Dyspepsia, Pressure of Gas around the Heart, Sour Stomach, Distress After Eating, Nervousness, Dizziness, Fainting Spells, Constipation, Congested and Torpid Liver, Yellow Jaundice, Sick Headache and Gall Stones.

The above ailments are mainly caused by the clogging of the Intestinal tract with **mucoid and catarrhal accretions,** backing up poisonous fluids into the stomach, and otherwise deranging the digestive system. I want every sufferer of any of these diseases to test this wonderful treatment. **You are not asked to take this treatment for a week or two** before you will feel its great benefits—**only one dose is usually required.** I say emphatically it is a positive, permanent remedy and I will prove it to you if you will allow me to. I will send the complete $1.00 treatment to sufferers absolutely **Free** so you can try it in your own home at my expense.

The most eminent specialists declare that 75 per cent of the people who suffer from Stomach Trouble are suffering from **Gall Stones.** I firmly believe that this remedy is the only one in the world that will cure this disease. Sufferers of Stomach and Liver troubles and **Gall Stones** should not hesitate a moment, but send for this **Free** treatment at once. I would be pleased to send you the names of people who state they have been cured of various Stomach ailments and speaking the highest praise of this medicine. Just fill out the Coupon below—let me send you this wonderful treatment together with highly interesting literature, testimonials, etc. Don't suffer with agonizing pains—don't permit a dangerous surgical operation, which gives only temporary relief, when this medicine will permanently help you.

Absolutely harmless. Guaranteed by the Pure Food and Drug Act, Serial No. 25793

A Delightful Noon-day Lunch.

One of the most palatable, and at the same time most healthful, noon-day lunches that can be eaten by anyone consists of Graham Crackers and milk.

The Graham Crackers baked by the National Biscuit Company have a delicious nut-like flavor entirely different from the old-fashioned Graham Crackers made in the crude old way.

All the natural sweetness and goodness of the wheat is preserved in the Graham Crackers baked by the National Biscuit Company, by modern and perfected scientific processes, which makes them particularly beneficial to the digestion as well as so pleasant in taste.

Graham Crackers and milk will be found to make a delightful delicacy, light, but sustaining, causing no heaviness or sleepiness, as rich and heavy foods do.

These Graham Crackers come in moisture- and dust-proof packages—thus retaining all their flavor, crispness and freshness—and are easily recognized by the well-known In-er-Seal Trade-Mark.

The Twice-a-Week ST. LOUIS REPUBLIC

Is a magnificent newspaper, containing all the latest home, foreign and political news. It is unquestionably the best semi-weekly Democratic newspaper in the United States, and is published at St. Louis, Mo.

The National Farmer and Stock Grower

The best monthly Farm Paper in the United States. Useful on any farm, in any state. Good for grain farmers, horse, cattle, hog and sheep raisers, also dairymen and vegetable growers.

The American Poultry Journal

Published at Chicago. The oldest, largest and best Poultry Journal in America. Beautifully illustrated. Issued on the first of each month.

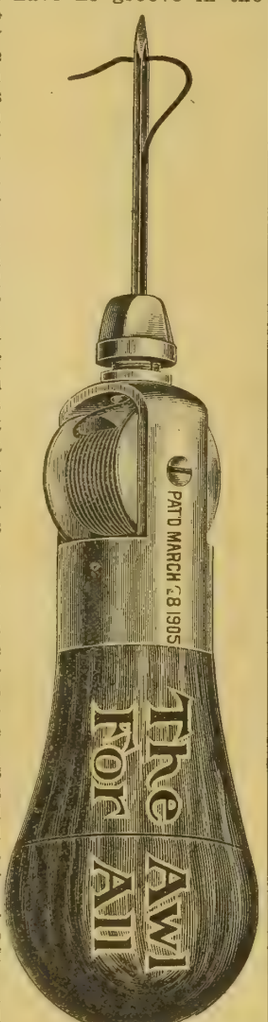
THE SEWING AWL.

A Most Useful Premium For Subscribers to The National Farmer and Stock Grower.

A farm on which there is not a sewing awl is in difficulties when work is most pressing. It is surprising how useful this little implement is. It is the Myers Famous Lock Stitch Sewing Awl. It is the only sewing awl made with a groove running the full length of the needle and has what is known as a diamond point. In order to sew leather or any heavy, thick material without breaking or cutting the thread it requires a needle with the groove running the full length of the needle. You might just as well have no groove in the needle as to have it only part of the way. With the Myers Awl you can sew old or new harness, saddles, carpets, canvas, tents, rugs, quilts, shoes, grain bags, and many other things. You can use any kind of thread in the Myers Awl, and it makes a lock stitch same as a sewing machine. It is very simple; a woman can use it as well as a man. It is one of the most practical devices ever invented. They are put up with two needles—one is straight and one curved—with a small screwdriver and wrench combined; also a reel of waxed thread with each awl ready for use. Every teamster and farmer should own a Myers Lock Stitch Sewing Awl, as there is use for one in almost every household. The Myers Awl is nicely finished, the metal parts are nickel-plated, the needles and wrench are kept in the hollow handle, which has a screw top.



Anyone who will send One Dollar cash to pay in advance for two-years' subscription to The National Farmer and Stock Grower can select one of Myers' Lock Stitch Sewing Awls, which we will send by mail, postage paid, as a free premium. Address, HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.

The Farmer's Wife.

Much has been said in recent years throughout the press about the farmer's wife, the prevailing sentiment being that she is much abused. Yet there are accounts which differ radically, statements almost diametrically opposite. Some maintain that she is worked constantly, milking cows and doing various other outdoor duties, while others are equally sure that her lot is of the very pleasantest, with all the conveniences and many of the luxuries of life.

Both are true, yet in different localities. With such a wide range of country, climate, productions and personal abilities and tastes, the picture of one farm wife must be wholly unlike that of many of her sisters. Even though the aspirations and energy are omnipresent, though each member of the family is considerate of her, life will vary greatly. This can be seen even in a single neighborhood.

Yet on the whole the condition of the farm wife is a vast improvement over that of a generation ago. There are labor-saving utensils, some of which are now within her reach, and these are helping her to obtain others. There is a good market for her poultry and dairy products, if not at her own door, she can make it in a neighboring city. The summer visitor finds value in the apples that once decayed in her yard because the pigs could not manage so many. Even the wayside weeds have in many places a commercial value for decorative purposes.

She is becoming more intelligent through contact with the best reading matter. She is finding that constant drudgery is not the mission of any woman; that it is hers to read the daily paper, to keep in touch with what the world is doing. For this reason she is younger than her mother was at the same age. She is growing more and more alert in finding out new and better ways of doing things; she is more self-reliant, more resourceful, and her life is more enjoyable.—Bessie L. Putnam.

Filling the Lunch Basket.

Once more the season rolls around when the school lunch basket is to be filled, and various are the components which find their way into it. Some seem to feel that an elaborate spread is a necessity, and unless pie, cake and cookies are ready for every day the duty of the cook is not fulfilled.

A simple lunch is much better for the child, though it should be nourishing. For the main part of the meal there is nothing so nice as the sandwich, and this may be varied every day in the week. Meats at this season are not always available, nor are they necessary. If pressed chicken or sliced ham is convenient once a week, most children will enjoy it. But there are plenty of other fillings to render the danger of monotony nil.

Peanut butter is now cheaper than dairy butter, and contains quite as much nutrition. Cut the slices of bread thin, and if the peanut butter is too dry to spread easily, even before the slice is cut from the loaf, moisten with cream or a little butter.

With all other fillings most children prefer to have the bread first buttered and then the other dressing spread on evenly. Lettuce leaves laid between slices of buttered bread, with or without a thin slice of cheese or a hard-boiled egg minced fine, with a touch of mayonnaise, are relished by many. Cottage cheese is delicious, and baked beans add to the variety, so that the menu for no two days need be exactly alike. When the nut season opens, run hickory or butternuts through the food chopper, using the finest cutter for nut butter and a coarser one if the product is to be put into bread or cake. Potato salad is a nourishing dish easily prepared. A baked sweet potato split in halves and buttered is one of the left-overs which almost any child will appreciate.

The Great MAJESTIC
Malleable and Charcoal Iron RANGE
Why It Should Be In Your Kitchen

Before deciding upon a range, the wise woman will examine closely into the superior points of merit of the *Great Majestic*—the range with a reputation, built on honor—of the best materials. Read some of them:

Outwears Three Ordinary Ranges

It is the only range made entirely of malleable iron and charcoal iron. Charcoal iron won't rust like steel—malleable iron can't break, and while the first cost of a *Great Majestic* may be more than others, *it outwears 3 ordinary ranges.*

Perfect Baker—Fuel Saver

The *Majestic* is put together with rivets (not bolts and stove putty) making it absolutely air tight, like an engine boiler. The joints and seams will remain air tight forever as neither expansion, nor contraction can affect or open them.

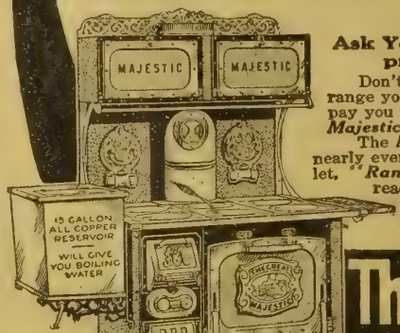
The oven is lined with guaranteed *pure asbestos board,* ¼ inch thick, covered with an iron grate—put there to stay—*you can see it.* No heat escapes, or cold air gets into the oven, thus with but half the fuel used in other ranges, you get an absolutely even, dependable baking heat.

All Copper Movable Reservoir

Heated like a tea kettle through copper pocket (stamped from one piece of copper) setting against left hand lining of fire box. Boils 15 gallons of water in a few moments and, by turning lever, the frame—and reservoir—moves away from fire. This feature is patented—found only on the *Majestic.*

Other Exclusive Features

All doors drop down and form perfect and rigid shelves. No springs anywhere to get out of fix. *Malleable oven racks* slide out automatically, holding anything they contain. *Open end ash pan*—no more shoveling ashes out of ash pit. *Ventilated ash pit* prevents floor from burning. *Ash cup* catches ashes that would otherwise fall on the floor. It's the best range at any price, and should be in YOUR kitchen.



Ask Your Dealer About The Greatest Improvement Ever Put In A Range

Don't buy any range "unsight, unseen"—what ever range you buy get it from a local dealer—and it will pay you to drive many miles to closely examine the *Majestic* before investing your money in any range. The *Majestic* is for sale by the best dealers in nearly every county in 40 states. Write for our booklet, *"Range Comparison."* Every farmer's wife should read it before buying any other range.

Majestic Mfg. Co., Dept. 131 St. Louis

Made In Four Other Patterns

The Range With A Reputation

The child who likes milk is fortunate if it can be supplied in plenty, a small bottle being the most convenient method of carrying it. It is wise to keep two bottles for this purpose, alternating daily, and thus rendering the process of sterilization complete, as it may not be in the rush morning and night if the same bottle is used. If the water at the school house is of a questionable nature, the thirst will be quenched with less if a bit of lemon juice without sugar is added; this also tends to counteract any tendency to malaria. Insist upon the individual drinking cup. A small tin cup will answer the purpose nicely. Mark it and insist that it be not loaned. There are too many diseases contracted by the public drinking cup, and public sentiment on this topic should be fully awakened.

For dessert a bit of fruit in its season is always pleasing, and much less work than the old-time pie. Aim to have something new occasionally. Oranges are cheap at some seasons, and it has been thoroughly demonstrated that they are cheaper and better than physic. Apples, raw or baked, pears, peaches, plums, are a few of the suggestions on the average farm. A small melon is also a safe dessert if eaten with salt, despite the columns of stuff dished up by the joke man. Rice pudding, baked custard, cereals well cooked and served with fruit, crackers or cookies, and canned fruit, are a few of the changes that may be rung. Keep one of the glass cans with tight-fitting cover, such as canned pickles come in, for carrying canned fruit and other desserts.

Plain cake or cookies may be used occasionally. A banana sliced and eaten with cream and sugar is another nourishing dessert that is easily prepared and not expensive. Of course, individual taste and the material at hand should enter largely into the question, but in the average farm home there may be variety, and that of a most nourishing sort, without great sacrifice of time or labor.—Bessie L. Putnam.

Got That Far.

She was very literary, and he was not.

He had spent a harrowing evening discussing authors of whom he knew nothing, and their books, of which he knew less.

Presently the maiden asked archly:

"Of course, you've read 'Romeo and Juliet?'

He floundered helplessly for a moment and then, having a brilliant thought, blurted out, happily:

"I've—I've read Romeo!"—Philadelphia Times.

Wise Johnny.

Teacher—"Now, Johnny, suppose I should borrow $100 from your father and should pay him $10 a month for ten months, how much would I then owe him?"

Johnny—"About $3.00 interest."—Boston Transcript.

Before and After.

He—"Were you ever in love before you met me?"

She—"Yes, but not since."—Boston Transcript.

Peculiarities of Pecan Growing.

If there is anything in the horticultural line more freakish than the pecan, I have yet to learn what it is. From the very time the seed is planted to the period of fruiting variations are going on all the time. The environments under which the trees are growing also have considerable influence in aiding improvement or deterioration. The principal change, however, takes place when the nuts are in the embryo stage of growth, for it is then that the future character of the tree is fixed, caused from cross-fertilization of the pollen from surrounding trees. This is what prevents us from getting choice seed nuts from planting, for nature knows only to reproduce.

In my seedling orchard of 1,000 trees (all from the one mother tree, San Saba, which is still growing healthy and vigorous in the midst of them) much is to be learned, for not one is a counterpart of the mother tree, although all are growing approximately under the same conditions. Some of these trees show distinctly her peculiarity of foliage, but the nuts proved to be entirely different, and when we find a tree whose nuts resemble nearest the mother type the foliage is not at all alike.

In fruiting qualities these seedling trees grade from almost barren to my Texas Prolific, the most precocious of anything yet found. The bark of some is thick and scaly, while on others it is thin and smooth. Then there are early and late bloomers; in fact, the deviation from the original is remarkable in many ways.

Now, can there be more proof that the pollen is the important factor? It becomes evident then that if we are to have our notions gratified, we must have a hand in the work; so with these facts in view, the pecan breeders of to-day are able to work with a greater degree of certainty than ever before.—By E. E. Risien, in Nut Grower.

Comfort and Looks.

A crowing, chubby little baby, clad as scantily as he can be and have any clothes on at all, and a crying, overdressed youngster of the same age are pictured on a poster prepared by City Health Commissioner George B. Young, of Chicago. The poster is entitled "Comfort and Looks." His object in preparing this is to bring home the truth forcibly to all classes of people, and especially to the class of mothers who cannot or do not read. He is preaching a gospel of perfect cleanliness, simple dressing, plain, wholesome eating and fresh air in unlimited quantities day and night. If the mothers of to-day put into practice the truths Mr. Young has so simply and forcibly illustrated, not only will the comfort of the babies of to-day be insured, but a solid basis of good health will be a certainty and the men and women of the future will have sound, strong bodies and clear, active brains. For in everything that we do to-day we build for to-morrow.

Emphasis is placed upon fresh air in abundance for the baby when he is awake and also when he is asleep. In warm weather he should live outdoors, waking and sleeping. He should have plenty of water to drink, but it should never be ice cold. He should have his daily bath, and in extremely warm weather a bath both morning and evening is suggested, the only precaution necessary being that it should not be given immediately after feeding. Simple clothing for hot weather is described as consisting of a clean cotton diaper, a gauze shirt and a cotton slip. Shoes and stockings, fancy beruffled skirts, stiffly-starched dresses, warm, tight-fitting bonnets with choking strings, are some of the fussy things to be avoided. Not bad advice, is it, mothers?—Janet Thomas Van Osdel.

The "Two-faced" Woman.

She is a tall, dignified young woman of rather a striking appearance, and she makes friends readily. She is obliging to the extent of depriving herself in order to accommodate others. She has a fair education, is a good conversationalist, is a born mimic and quite witty. The natural conclusion would be the such a person must be a favorite and have hosts of friends. To a certain extent Miss T. F. is a favorite because she makes things lively wherever she goes. She makes a good first impression and new acquaintances are quite ready to be charmed with her and hope to see much of her. But there comes a day, and it is never very long in coming, when these new acquaintances and would-be friends are shocked to hear Miss T. F. tearing to pieces with her sharp tongue the very people with whom she has been most intimate. Not the least omission or the slightest commission escapes her; every tiny mannerism is called attention to by her; even the houses her friends live in, the food they eat, the clothes they wear come under discussion. And it does not take an extraordinarily bright person to realize that, since everyone else comes under the lash of that nimble tongue, there is not the least possibility that he alone will escape it. Consequently this young woman who possesses so many charms whereby she might please and which might win for her permanent friends among worth-while people is rather dreaded by people as soon as they come to know her. A second invitation to the best homes is seldom received by her.

One day, when she was bewailing the fact that she could not hold friends, a woman who was trying to be a real friend to her said: "Bess, you make friends readily and are altogether charming upon first acquaintance, but you do not wear well because your sharp tongue picks everyone to pieces and people learn to dread you. Mrs. Smith well knows if you talk about Mrs. Brown and Mrs. Jones and all the rest the minute their backs are turned, that you will talk about her, too, the first chance you get. Consequently she prefers that you know just as little about her as possible. Can you blame her? Why, even I know that you will talk about me to other people, for the habit is now so firmly fixed that you couldn't stop it at once if you would."

Miss T. F. turned pale with anger. People so dreaded her tongue that no one had dared speak to her in that manner for years. But she never stayed angry for very long at a time, and after a few moments of reflection she grasped her friend's hand and said: "I know that I have been two-faced, but I never realized quite how bad it was. Thank you. From now on I 'see no evil, hear no evil, speak no evil.' "

The woman had the hardest fight of her life before her. Again and again she found herself relapsing into the old habit, but she fought on. To-day the little unruly member is pretty well under her control, but there are dozens of people in her native town who still fight shy of her because they cannot know that a reformation has been effected.—Janet Thomas Van Osdel.

Hold a Magnifying Lens Over These Watch Cases
Examine the deep, rich engine-turning or engraving on "Crescent" or "Jas. Boss" cases. It is made possible by the thickness of the gold.
Ordinary filled cases may look all right when you pay for them, have a high polish and all that. But the workmanship of such cases is thin and light—merely burnished on—because the surface is only a thin film or wash of gold. You may even find them stamped "Guaranteed for 20 years," but what is the guarantee worth when there is no way to enforce it?
If you want assured investment value for your money—service, wear, all-round satisfaction—see that you get a "Crescent" or a "Jas. Boss" case.
Every representative jeweler carries them. He will identify them for you by the trademarks illustrated on this page. These marks mean absolute integrity in material, in construction, in workmanship. They are standard with the fine jewelry trade and have been for fifty years.

The Illinois State Fair of 1911 will open on Friday, September 29th, at Spingfield, and continue to and include Saturday, October 7th. The Secretary, Mr. J. K. Dickerson, has been very largely instrumental in keeping the Fair to the front.

Our Subscription Department.

This office will quote subscription prices upon any regular publication issued in the United States. We do business direct with the New York Publishers' Clearing House, and all our orders are filled on the day of arrival. All who wish to subscribe for periodicals, magazines or class publications should send their orders direct to the Hale Publishing Co., 3550 Vista Ave., St. Louis, Mo. See page 8.

A Home-made Skin Whitener.

The woman who is exposed to the sun and wind a great deal will find cucumber juice a very good skin whitener. It can be prepared at home during the cucumber season and bottled for use until another cucumber season arrives. The following recipe is a good one: Wash medium-sized cucumbers and cut them into small pieces, skin and all. Allow a tablespoonful of water to each cucumber, bring to a boil and cook slowly for five minutes. Bottle while boiling hot and seal tightly in bottles or fruit jars. Use this as a face wash before retiring, then rub a little cold cream into the skin. After a few momens wipe off the cream, using an upward motion in the wiping, as this tends to stimulate the circulation in the blood vessels of the face. This treatment keeps the skin white and clean; it opens the pores and prevents the formation of blackheads. — Janet Thomas Van Osdel.

Cheese is getting to be as much a factory product as shoes or stockings.

OFTEN IMITATED—NEVER DUPLICATED

Suesine Silk 39¢

Two Silk Dresses Instead of ONE

Every time you decide to have a new Silk Dress you can have TWO instead of ONE — if you make it of Suesine Silk.

This is how you do it. Suesine Silk costs **but** 39c. a yard—or **less** than **half** the price **of** good China Silk. So for the price of a single dress of China Silk you can get **two of Suesine Silk.** Years ago when Suesine was first introduced, women of taste and discrimination bought Suesine Silk for a single dress, because they liked its value.

Today they are buying Suesine Silk again and again —not alone for one dress but for many—because they have proved for themselves by their months of trial that Suesine Silk is the **best** silk VALUE they can buy.

Go to your Dealer today and ask for Suesine Silk. See that the words

SUESINE SILK

are on every yard. Beware of accepting substitutes.

These substitutes are finished with glue, to make them glossy, and are weighted with tin and iron dust to give them "body." They look beautiful at first. A few months' wear will prove them worthless. Insist upon the genuine Suesine Silk with the name stamped along the edge.

We will send you absolutely free, forty-two samples of Suesine Silk —more than 255 square inches altogether.

We ask only, that, when writing for these free samples, you will mention the name of your regular dry goods dealer, and say whether he sells Suesine Silk or not. Please be sure to give that information in writing to us.

No matter where you live, it is easy to get genuine Suesine Silk

We do not sell Suesine Silk except through regular retail merchants. But if we cannot send you the name and address of a dealer in your vicinity who has Suesine Silk, we will see that your order is filled at the same price, and just as conveniently, by a reliable retail house, if you enclose color sample and price. 39c. per yard.

The price of Suesine Silk in CANADA is 50c. a yard.

Bedford Mills Desk 6

8 to 14 W. 3d St. New York City

The High-school Boys and Girls.

In very many homes all over the country are bright boys and girls who will this fall turn their backs on the rural schools to take up new and advanced work in high schools. They are looking forward with mingled delight and fear, for it is to be the entering of a new world to all of them. It is enough to make older people envy them as they eagerly discuss the possibilities of the coming term, for the enthusiasm of youth is a fine thing to possess. It nearly always happens that the country scholars in the town schools far outstrip the city boys and girls, but there are many good reasons for this. In the first place, the country children have had the best chances in regard to health; secondly, they are better fitted for hard work by the soil on the farm, and last, but not least, it is a case of the survival of the fittest. Only the best and brightest country children find their way to the high schools.

If the children are looking forward to the new life with mingled dread and anticipation, the fathers and mothers are also concerned with problems connected with the fitting. There are many things to be settled, many plans to be made and much speculation to be indulged in. No matter how ambitious parents are for their children, they always look forward to any change in the home life with uncertain feelings, and in many homes this is the first important change that has ever overtaken the family.

First of all, the question of where the boys and girls shall stay must be settled. If the home is within driving distance of a good high school, by all means provide the students with a safe horse, and let them come home every night until bitter weather sets in. The home nest is the safest even for trustworthy boys and girls, and for children inclined to be lively and fun-loving it is the only really safe place. Usually boys and girls are from thirteen to sixteen—a dangerous age —when they leave the country for the city schools, so it is well to safeguard them as far as possible.

But if coming home every night is out of the question, the next best thing is to place them in a relative's care or with some responsible person. Of course, they should not be kept like infants, but should know that certain restrictions would be imposed, just as if they were at home. A great many people consider the question of expense first of all, but that should come after the character of the home in which they are to be placed is settled. A refined, motherly woman can do a great deal with boys and girls away from home for the first time, and it is well to investigate before engaging board for the young students. In every town there are women who must eke out scanty incomes by taking a boarder or two, and many times country parents have made satisfactory arrangements by furnishing lard, flour, wood and such products in exchange for a home for the high-school students during the school term.

Clothes,. too, play an important part in the new life. By all means dress the boys and girls modestly and as well as you can afford, so they will not be handicapped by being awkward and out of place. It is just as easy to select a pretty brown dress, with hat and jacket to match, if brown is becoming to the young girl who is to enter high school, as it is to buy haphazard and send a self-conscious, shrinking girl away in a green dress, blue jacket and hat trimmed in red. Buy intelligently and stick to simple things. One well-made, pretty school dress is worth half a dozen flimsy silk waists and bright skirts. The boys should also be provided with neat suits. It is all very well to say a good student is above such considerations. Every person feels better and behaves better to be neatly and becomingly dressed, and children are especially sensitive about what they wear.

Not the least consideration is the kind of ideals you send with the boys and girls as they start in their new world. I have known parents to admonish their sons and daughters about their conduct toward "those stuck-up city people," and so prejudice them all the days of their lives. There are country boys and girls in every high school who are always "looking for trouble," simply because their parents have taught them that city people make fun of those in the country. Every word, every look, every sign and every laugh is directed at them, they think, and they are truly miserable unless common sense teaches them to overcome that feeling. There are city people with limited brain capacity who do make fun of country people, but they are not as numerous as some folks would have us think. Teach the boys and girls that truth, friendliness, honesty and common sense will win everywhere, and then let them make their own way unhampered by a lot of unfair ideas.—Mrs. Mary E. Underwood.

BEAUTIFUL PICTURE, ENTITLED "FAITHFUL FRIEND."

In cold, black ink it is impossible to describe the beauty of the picture entitled "FAITHFUL FRIEND." It is 21 inches wide and 28 inches high. It is a lithograph reprint in four colors of a famous oil painting. It is upon extra thick paper, almost as durable as canvas.

We are using "FAITHFUL FRIEND" as a souvenir premium for anyone who will send Twenty-five Cents to pay for six-months' subscription to The National Farmer and Stock Grower. This is our first offer of the subscription campaign, and it is likely to be the very best. Send Twenty-five Cents to the HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo., and we will send you The National Farmer and Stock Grower for six months and the picture "FAITHFUL FRIEND," safe delivery guaranteed.

A Poor Proposition.

Frank A. Munsey, the well-known publisher, is noted among his friends as a close reasoner.

A New York reporter submitted recently to Mr. Munsey a proposal for a new magazine on novel lines. Mr. Munsey proved in a closely-reasoned argument that this magazine would fail. Then, in conclusion, he said:

"Or, if the magazine did pay, it would pay so little that its publishers would be like an editor in the neighborhood of my native Mercer.

"Near Mercer, Maine, lived an editor who once printed in his weekly paper this editorial announcement:

" 'In view of the fact that we are unable to pay the road tax of $8.00 assessed against us, we have been sentenced to a period of confinement by the authorities. Consequently there will be no issue of this paper for the next month; but, as the state will have to board us, we figure that we shall come out some $15 ahead.' "—Washington Post.

The Canadian Farmer's Gain.

"One farmer, with 100 acres of land, tells me that free access to the American market would increase the value of his products by $500 a year. A milkman near Harrow says that he stands to gain, by reciprocity, $500 in milk alone."—A. H. Clarke, Canadian ex-M. P., at Erie Grange Picnic, reported by the Toronto Weekly Sun.

"Without tact you can learn nothing. Tact teaches you when to be silent. Inquirers who are always inquiring never learn anything."—Disraeli.

Menace of the Box Hive.

A swarm of bees issues from a hive in the apiary, and no frame hive being handy, the bees are hived in a box or keg. Or perhaps a stray swarm is found clustered on a bush or limb of a tree. The bees are captured in a box and taken home, and because of pressure of other business are left in the box, which they soon fill with comb, brood and honey. Doubtless some bees are kept in box hives because the owners think movable-frame hives are too expensive, judging that it is economy to use cheap boxes. These are the way the box hives come to be.

Box-hive bee keeping is profitless to the owner, as the honey has to be cut from the brood nest where it is mixed with pollen, young brood, soiled combs, etc. Box hives are a menace to all the bees in the community, as they cannot be inspected for disease without tearing the box and combs apart to examine the brood. If it is necessary to capture swarms in boxes in order to bring them home, they should be transferred to a movable-frame hive within a day or two. The frames must also contain a sheet or strip of comb foundation to insure the building of the combs straight in the frames. A frame hive in which the bees have built the combs crosswise of the hive is the worst kind of a box hive, for the hive is so securely nailed that opening is almost impossible.

As a measure for the eradication of American foul brood all colonies located in hives, boxes, kegs, gums or skeps the combs of which are not movable, must be transferred to movable-comb hives by July 1, 1912.

Box hives are the most fruitful sources of contagion to all bees in the community, and for the protection of the industry this notice with ample time in which to transfer the bees is given.—Wesley Foster, of Colorado, State Inspector of Bees.

Picture, 16x20 inches, rich and beautiful, and copy of The National Farmer and Stock Grower, the Universal Magazine, American Poultry Journal and Fruitman and Gardener—all for 10 cents in silver. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

THE UNIVERSAL AMERICAN FLAG.

Every family should have an American flag from patriotic motives, and the good and lasting flags that are of extra material and fast colors are hard to get. We have a flag of nice, soft cloth, fast colors, 2½x4 feet, a splendid flag. We are assured by the manufacturers that it is the best flag made, and it surely is one that any of our readers will be glad to own. We have adopted the Universal American Flag as a subscription premium. The **Universal Magazine** is a nice, bright, cheerful, illustrated monthly magazine of thirty-two pages, three columns to the page, containing home reading, stories, fashions, patterns and poetry—a splendid publication for the money. To anyone who will send us a money order for 50 cents we will send the **Universal Magazine** for two years, and we will send the Universal American Flag postpaid as a free premium. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

How Waggener Got Even.

One time Balie P. Waggener started for Denver in a private car over the Missouri Pacific. He was accompanied by a young lawyer connected with the Missouri Pacific law firm at Denver.

The first night out the young man borrowed $15 of Balie. Later on he got a check cashed at a railway station. Soon after that the train came to a halt out on the prairie. The porter rushed back to the private car and told the occupants that train robbers were going through the train. The young Denver lawyer handed Balie the $15 that he borrowed of him. A moment later the train robbers relieved Balie of the $15 and all the rest of his money.

Balie was quite sore on that Denver young man. He declared it was a scurvy trick to play on him. Yet Balie finally got even. He put in an expense bill to the Missouri Pacific for the trip in which he included this item:

"Held up by train robbers, $160. I was unable to secure a receipt for this expenditure."—Kansas City Journal.

Jack and the Cornstalk.

William Allen White, the Kansas writer, at a picnic in Emporia, was praising the fertility of his native state.

"It was a Kansas boy, you know," said Dr. White, "who tried to climb a cornstalk the other day to see how the corn was getting on. Unfortunately the stalk is growing faster than the boy can climb, and he is now out of sight.

"A lot of neighbors with axes have been trying to cut the stalk down, but it grows as fast they can't strike it twice in the same place.

"It was feared for a while that the boy would starve to death, but I am happy to say that over the private wire in my office we have got news to the effect that the little chap has already thrown down five bushels of cobs, whence one may infer that his diet, though monotonous, is adequate."—Los Angeles Times.

For Father.

"Would you mind tooting your factory whistle a little?"

"What for?"

"For my father over yonder in the park. He's a trifle deaf and he hasn't heard a robin this summer."—Kansas City Journal.

That Eternal Question.

Willie—"Pa!"

Pa—"Yes."

Willie—"Teacher says we're here to help others."

Pa—"Of course we are."

Willie—"Well, what are the others here for?"—Chicago News.

$1.00 a month
Buys this Machine
30 days free trial

We will sell you a high-grade, drop-head, Sew Easy Sewing Machine for $1.00 a month. We guarantee each machine for 25 years. We ship direct from the factory. We do not sell to stores and we have no agents. We can save you some money. You get the machine at once and use it while you are paying for it and it only costs you about 3 cents a day. We have many special features in our machine such as short needles which don't break easily. Our shuttles hold half again as much thread as the old spring tension shuttle. We can't tell all the good points in this advertisement, and we couldn't afford to send you a machine on the small dollar a month plan unless we gave big value and low prices. We want you to write us today, saying: "Please send me circulars and full particulars about your 'dollar a month' Sewing Machine offer." Write Today. Address

To Bring Them Up Well.

Nurse Girl—"Oh, ma'am, what shall I do? The twins have fallen down the well!"

Fond Parent—"Dear me! how annoying! Just go into the library and get the last number of The Modern Mother's Magazine; it contains an article on 'How to Bring Up Children.'"—Town Topics.

NITRATE OF SODA OF CHILE.

The Cheapest Nitrogen (Ammoniate) in the World.

It is of special interest to note the prevailing prices of the materials supplying nitrogen, commonly designated "Ammoniates" in the wholesale fertilizer market, and the very low cost of nitrate of soda is especially noteworthy.

All the sources of nitrogen except nitrate of soda are commanding unusually high prices. In the principal North American markets the leading materials which are used by fertilizer manufacturers have been for several months and are now quoted as follows:

Dried blood—$3.00 to $3.05 per unit.
Tankage—$2.70 per unit.
Sulphate of ammonia—$2.50 to $2.52½ per unit.
Nitrate of soda—$2.23.
A saving of from 11 per cent. to 27 per cent. by using nitrate of soda!

But when it is considered that nitrate of soda is completely and immediately available and that none of the others possess both these qualities, it is readily seen that nitrate of soda would cost the user still less. The following table, based upon the present quotations, and also upon relative availability, shows how very much less:

Dried blood (only 73 per cent. available), $4.11 to $4.18 per available unit.
Tankage (only 62 per cent. available), $4.35 per available unit.
Sulphate of ammonia (only 90 per cent. available), $2.77½ to $2.80½ per available unit.
Nitrate of soda (100 per cent. available), $2.23.
A saving of from 19½ per cent. to 48½ per cent. by using nitrate of soda!

Since the above quotations are for the leading materials used in making all so-called "complete" fertilizers, why not buy your ingredients separately and mix your fertilizer yourself? You will then know that you have secured the cheapest and best form of nitrogen, and satisfactory forms of the other elements.

The strong and deleterious acidity of sulphate of ammonia, which has of late been used so much by certain fertilizer manufacturers as a source of ammoniates, is an additional reason for avoiding the use of so-called "complete" goods, and buying nitrate of soda.

If the manufacturer has to pay so much for his ammoniates and uses those of acid character merely because he thinks the mechanical condition of his mixtures may be better, how can he sell you at right prices?

time only, absolutely safe delivery guaranteed, and the Universal Magazine for one year. The Universal Magazine is a nice, thirty-two-page, three-column magazine, issued monthly. It contains illustrated reading matter of interest to all the family. There are nice stories, historical sketches, selected poetry, a splendid line of patterns, and has a number of original household articles. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis Mo.**

About Practical Range Economy.

In these days when everyone is feeling the high cost of food, it is remarkable how many sensible, practical, economical housewives fail to practice economy in the right spots.

For instance: So many housewives continue month after month, year after year, trying to get good results out of the old cook stove or range—one that uses up twice as much fuel as is necessary to attain the best results—and then imagine they are practicing economy merely because they save, for the moment, the price of a new range.

Is that real, practical economy or good management?

It don't take much figuring to work out the correct answer—to demonstrate fully that it is a false standard of economy that permits the burning up of the price of a new range every little while in wasted fuel burned in an old, worn-out cook stove or range that was put together with stove bolts and putty and from which the putty has dried up and crumbled away, leaving open seams all over it through which one can insert a table knife anywhere.

In addition to this waste, there is a constant waste of high-priced food which hasn't had a square deal from the old, worn-out stove in a long time.

The practice of real range economy begins with a visit to the nearest local dealer and a careful investigation of the superior merits of the Great MAJESTIC Malleable and Charcoal Iron Range—it is indeed a "Range with a Reputation"—it is a perfect baker at all times.

The body of the Great MAJESTIC is made of Charcoal Iron, which gives it wearing qualities that will outlast three ordinary ranges. All top doors and frames are made of Malleable Iron—they won't break, crack or rust. Malleable Iron is absolutely necessary for perfectly air-tight joints, and on the MAJESTIC Range all joints are riveted perfectly air-tight—no heat escapes—no cold air can enter—it is also completely lined with pure asbestos—thus the oven can be heated quickly with about half the fuel used in the ordinary range.

The Great MAJESTIC has a 15-gallon all-copper reservoir which touches the fire, giving boiling hot water in a very few minutes.

The Great MAJESTIC contains the greatest improvement ever put into a range, making it 300 per cent. stronger where most ranges are weakest.

The Great and Grand MAJESTIC is justly called "The Range with a Reputation," because it has a reputation of a reliable manufacturer behind it and because there are hundreds of thousands MAJESTIC Ranges in use all over the country, each one of which is giving perfect satisfaction; some have been in constant use for more than 25 years and still give excellent results.

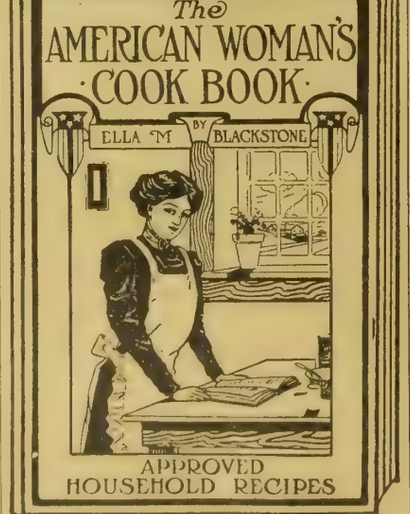
MAJESTIC Ranges are for sale in nearly every county in 40 states. If your dealer doesn't handle them you will do well to write the Majestic Manufacturing Company of St. Louis, Missouri, for their interesting booklet, "The Story of Majestic Glory;" it is well worth reading. At the same time they will tell you where you can see and examine the MAJESTIC and settle the range question. Address, Majestic Range Company, Dept. 131, St. Louis, Mo.

THE BEST COOK BOOK.

The American Woman's Cook Book.

This is a splendidly-bound book that weighs nearly two pounds. There are three hundred and eighty-four pages of approved household recipes, including many excellent dishes never before presented in a Cook Book.

The American Woman's Cook



Book is by Ella M. Blackstone, who is famous for clearing the road for the student of domestic science by giving the reasons for everything. It is easy to learn from her when everything having a bearing on the subject is explained so clearly.

The book includes chapters devoted to foods for each month; time required to digest different articles of food; menus for all occasions; table etiquette; kitchen don'ts; kitchen equipment, and useful hints and recipes for the home in general; specially-drawn articles upon various subjects, such as soups, fish, poultry, beef, veal, mutton, pork, salads, vegetables and all classes of dishes, besides beverages, candies, pickles and preserves, ice creams and ices; also ruled pages for new recipes to be preserved.

The thorough alphabetical index is a wonderful help to all subjects. A good book is known by its index, which in this case is eighteen pages, three columns to the page.

The publisher's price for single copies of the American Woman's Cook Book is $1.50 per copy and 15 cents postage, but we have contracted for such a large number we have obtained the benefit of a reduced rate. Therefore we will send one copy of the American Woman's Cook Book, postage paid, for One Dollar, and include one-year's subscription to The National Farmer and Stock Grower. Address, **THE HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

WEATHER FORECASTS

For the Month of October, 1911, by the Famous Prognosticator, Prof. W. Wadsworth Marsh.

[Copyright, 1911, by W. W. Marsh.]

We publish the weather predictions by Prof. Marsh one month in advance. This is the September edition of The National Farmer and Stock Grower, and the following are the predictions for the month of October. The success of Prof. Marsh is phenomenal. He locates the weather and stands by his forecasts day by day.

Forecasts For October 1st to 3d.

Between these dates tropical storm, hurricane winds in the Bahama Islands, and heavy seas and high winds off the Virginia, Carolina and Maryland coasts overspreading these states. Snow and rain in Montana, Idaho, Wyoming and Northern Colorado, Havre and Helena, Mont., Lander, Wyo., Pocatello, Idaho. Rain at Albany, N. Y. Eastport, Me., Grand Rapids, Miles City, Mont., Northfield, Vt., Reno, Nev., Salt Lake, Utah; and storm at Father Point, Que. Snow and freezing temperature in the Northern Rocky Mountain States. Elsewhere generally fair weather may be expected.

October 4th to 8th.

Between these dates cool wave will cross the country. Storm on the waters, Atlantic Ocean, Gulf of Mexico and the Great Lakes, the cool wave, bleak winds, rain, probably turning to sleet or snow, overspreading the Eastern States, New England and coasts and the cities of the East, followed by fair weather and frost.

Cool wave, storms, bleak winds overspreading the entire Ohio Valley, and in the states of Ohio, Indiana, Kentucky, West Virginia, Pennsylvania, Illinois, and the Alleghany Mountain region. Sleet and snow are probably following the rain in Northern Ohio, Northern Indiana, Northern Illinois and Western Pennsylvania, followed by frost.

Rain and snow, followed by heavy frost, over Manitoba, and storm, bleak winds, probably snow or sleet, followed by heavy frost, from Manitoba to Texas and over the Upper Mississippi and Lower Missouri Valleys, and rain, bleak winds, followed by heavy frost, in Arkansas, Oklahoma, Tennessee, and frost following the rain in the western part of North Carolina.

Cool wave with rain overspreading the Gulf States, followed by frost, damaging cotton and tobacco in Georgia, the Carolinas, Tennessee, Mississippi, Northern Alabama, Arkansas and states east of the Mississippi river, unless protected.

Cold wave covering the lake region with rain, sleet and snow at Buffalo, Sault Ste. Marie, Marquette, Parry Sound, Milwaukee, Cleveland, Detroit, Chicago, Grand Haven, Grand Rapids, St. Paul, Duluth, and covering the states of Wisconsin, Minnesota and Michigan, followed by killing frost.

Killing frost following rain in the Mississippi Valley north of Memphis, and heavy frost in Northwestern Arkansas, and cool wave from the Mississippi river to the Appalachian Mountains.

Cold wave, snow over Lake Superior region, covering a large area. Cold wave, snow and frost following the rain in Southern Michigan, Nebraska, Iowa, Missouri and Dakotas, and cold wave with snow storm in Wyoming, Montana, Colorado. Protect the stock over the ranges. Damage will be done to grapes and fruit in various points in the Mississippi Valley by heavy frost, causing gales and snow in its wake. the storm moving in a direction toward the Gulf of St. Lawrence.

Storm, cold wave throughout the West and Northwest. Unsettled weather in the Pacific States. Rain at Sacramento, San Francisco, San Luis Obispo and Red Bluff, Calif., Tatoosh, Tonopah and Roseburg, Nev. Rain and snow at Salt Lake, Utah, Pocatello, Idaho, Havre and Helena, Mont., Father Point, Que., Northfield, Mont., Montreal, Que., Prince Albert, Cheyenne, Durango, Colo., Devils Lake and Bismarck, N. D., Lander, Wyo., Victoria, B. C., Yellowstone Park, and rain at El Paso, Tex., Winnemucca, Nev., and Boise, Idaho.

October 10th to 15th.

Between these dates rise in temperature with high winds and quite heavy rains from Canada southward over the eastern slope of the Rocky Mountains, with general rain over the Western Plateau.

Rain storm, high wind over the Ohio Valley and Tennessee, covering the entire states of Ohio, Indiana, Kentucky, Pennsylvania and the mountain region of the Alleghanies,

covering the water sheds of the Ohio and its tributaries.

Storm, wind and rain throughout most Central and Eastern States, and rain with high winds from New Mexico to the lake region, with high gales over Lakes Erie and Michigan, overspreading the entire lake region, causing damage to shipping and vessels, affecting the cities of Buffalo, Milwaukee, Sault Ste. Marie, Duluth, St. Paul, Detroit, Marquette, and the greater portion of Michigan, Minnesota and Wisconsin.

A storm belt of rain and wind extending from the lower lakes southwest to Texas, covering the states of Indiana, Illinois, Missouri and portions of the Southwest, and rainfall quite heavy and high, covering the entire Missouri and Upper Mississippi Valley. Rain storm at St. Louis and covering greater portions of Iowa, Missouri, Nebraska, and from Missouri and Kansas southward. This storm will affect Concordia, Des Moines, Keokuk, Peoria, Springfield, Mo., Valentine, Neb., Springfield, Ill. The rain quite heavy and wind high from Missouri to Texas.

Rain turning to snow in the extreme Northwest.

Storm on the Gulf of Mexico, high winds and heavy rain affecting the entire Gulf coast and the cities of the South.

Rain over the Virginias, overspreading their coasts and cities, and rain and wind storm on the Atlantic, along the entire Atlantic coast, covering the Eastern and New England States and their cities.

Stormy, rainy weather, with damaging winds in the Pacific coast region from the state of Washington to Southern California.

Storm over the extreme Northwestern States, the rain turning to snow, followed by clearing weather with heavy frost.

Storm at Arkansas and Amarillo, Tex. Rain at Charles City, Ia., Modena, Utah, and storm, rain and wind at Santa Fe, Northhead, Wash., North Platte, Neb., and Oklahoma, Okla., storm covering the greater portion of the West and Northwest, followed by heavy frost.

October 15th and 16th.

Generally fair weather in most sections of the country, with frost.

October 17th to 23d.

Between these dates the same conditions will prevail, with storms on the waters, the Atlantic Ocean, Gulf of Mexico and Great Lakes, the lake region and the coasts, the storms being quite severe and damaging in the states west of the Mississippi river and over the country from Minnesota to Maine and from the Mississippi river to the Atlantic Ocean, and from the Rocky Mountains southward to the Panhandle of Texas, and from the upper lakes southward to Oklahoma. These storms will consist of quite heavy rains and high winds, rising streams over the states of Iowa, Missouri, Kansas, Nebraska and Illinois, and very severe with cyclonic winds, causing much damage over the entire Gulf States and coasts, with quite heavy rain and wind overspreading the Ohio Valley and Tennessee, Ohio, Kentucky, Pennsylvania, Western Pennsylvania water sheds of the Ohio and Alleghany mountain region and hurricane along the Florida coast.

Storms overspreading the Eastern and New England States and coast, affecting the cities of the East.

Destructive storms throughout the state of Virginia. Rain along the entire Rocky Mountain slope. Storm, heavy rain at Minnedosa, Manitoba.

Rain at San Francisco, Eureka, Calif., Kallispell, Mont., Lewiston, Idaho, Roseburg and Portland, Ore., Spokane, Tacoma, Tatoosh, Walla Walla and Seattle, Wash.

October 24th to 26th.

Generally fair weather with frost.

October 27th to 31st.

Between these dates change to cooler weather will occur, with storm over the Southwest, and rainy weather followed by frost all along the South Atlantic States as far north as Virginia, and storm over Manitoba and New Mexico, and cool wave and rain followed by frost over the entire country between the Mississippi river and the Rockies.

Cool wave with rain to snow storm along the eastern slope of the Rocky Mountains, from the state of Wyoming to New Mexico, covering Wyoming, Manitoba and Colorado, with blizzard in Northern New Mexico, accompanied by high wind, damaging property and causing suffering to stock, the storm over Colorado extending to the Western Slope, damaging apple orchards, the snowfall quite heavy in Northern Colorado.

Damaging wind storm with snow over Utah, affecting Salt Lake and Ogden, Lander, Wyo., Santa Fe, North Platte and Pueblo. Snow storm and freezing temperature throughout New Mexico, Northern Arizona, Northern Texas, extending through the Rocky Mountains.

Snow storm and gale over Lake Superior region and on Lake Superior, causing navigation to be dangerous. Cool wave, rain to sleet and snow covering the states of Minnesota, Michigan and Wisconsin and their cities. Storm over Quebec, Canada.

Storm overspreading the entire Ohio Valley and Tennessee, Illinois, and the Alleghany Mountain region, with the rain turning to snow over the Alleghany regions, covering Western Pennsylvania and water sheds of the Ohio river. The rain will turn to snow over northern sections of Ohio, Indiana, Kentucky and Illinois. Rain, followed by cool wave and freezing temperature, covering the Upper Mississippi and Missouri Valleys, the rain turning to snow in sections of Kansas, Missouri, Nebraska, Iowa and the West and Northwest, heavy frost following the snow.

Storm, followed by cool wave, and in some sections snow, overspreading the Eastern and New England States and along the North Atlantic coast and on the ocean. This storm will affect the cities of Philadelphia, Scranton, Washington, D. C., Baltimore. Cool wave, rain, wind and snow over Manitoba, extending over the upper lakes.

Storm over the South, covering the entire Gulf States and coasts and cities. Rain and wind affecting the Carolinas and Virginias.

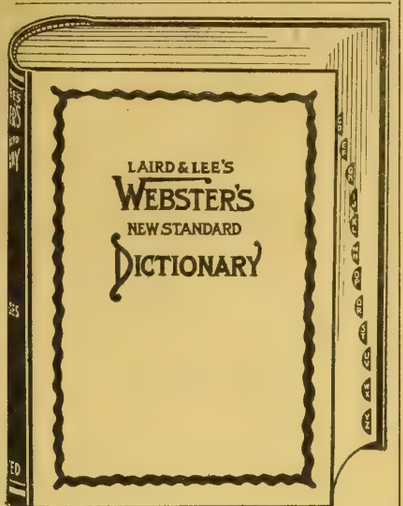
Rain at Portland, Ore., Tacoma, Red Bluff, Calif., Sacramento, San Francisco, and rain over the states of Washington, Oregon and Idaho.
PROF. W. WADSWORTH MARSH.

The Standard Watch Case.

In buying a watch, be sure to obtain the Keystone Watch Case. In order to understand this subject, see page 23. It is easy to obtain the benefit of the guarantee, for the reason that it is engraved inside every case. If you will take the trouble to examine the case you will then know exactly what you are buying, just the same as you know a gold coin issued by the United States Mint. The subject is worth investigating by all who buy watches.

WEBSTER'S DICTIONARY.

This is Laird & Lee's Webster's New Standard Dictionary of the English Language, a wonderful book, 756 pages in all, 840 illustrations, substantially bound, gilt title, red edges, patent thumb index. Special edition for office and general use on farms, estates, ranches, etc.; massive but handy; contains ten encyclo-



pedic features, supplement of new words, dictionaries of biography, geography, musical terms, Biblical, classical, historical and mythological names, foreign phrases, English word-building, rules in orthography, current abbreviations, metric system with conversion tables; weighs twenty-eight ounces. Our offer to you: Send us One Dollar and we will send you The National Farmer and Stock Grower for two years and we will also send you, postage paid, safe delivery guaranteed, one copy of this great Webster's Dictionary. We also agree to refund money and pay return postage to anyone who is not satisfied with the bargain. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Ropp's Commercial Calculator.

This is a standard book, and a revised, enlarged and improved edition. There are millions in use. **Ropp's Commercial Calculator** is especially valuable to farmers. By its regular use many hard problems become easy. It will prevent mistakes, relieve the mind, save labor, time and money, and do your figuring in the twinkling of an eye. As handy as a watch, always ready and reliable. Anyone who will send 50 cents for one-year's subscription to this paper, The National Farmer and Stock Grower, can select one copy of **Ropp's Commercial Calculator** as a free premium. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

The Grain Dealer Surprised.

Farmer—Isn't No. 2 Corn worth more than 35c?
Grain Dealer—That is really the market price today, but I will make it 35½c. (Load weighs 2720 lbs.)
Farmer, opening Calculator—Amounts to $17.24; had on 48 bushels and 57 hundredths. (Page 13.)
G. D.—Well, I declare! Whose lightning Calculator is that?
F.—Why, Ropp's of course—the **New** improved edition. It comes handy indeed, couldn't get along without it.

$5.00 Worth of Havana Smokes For 99 Cents

YOUR idea of what is meant by the word "stogie" will undergo a big change after you smoke one of the fifty Menges Stogies I will send you postpaid for 99 cents. I call them stogies because they resemble ordinary stogies in size and shape, but in other respects, tobacco quality and smoke satisfaction, they are equal to any 10-cent straight cigars. Old smokers have written me often regarding the tobacco I put into my stogies—it is grown in this country from the purest Havana seed. It is impossible to equal this tobacco in any stogies or cigars at my prices. This is absolutely the greatest smoker's offer made, and no smoker can get such genuine satisfaction and pleasure for so little money elsewhere.

Exact Size

Menges Stogies Sure to Afford You Lasting Pleasure

The value is in the filler, not wasted in a fancy but worthless wrapper. My wrapper is good, honest leaf, free from breaks or openings and therefore draws well. A Menges Stogie is a real treat, a smoke good enough to offer to your friend or guest. I have sold thousands upon thousands of Menges Stogies under my **money-back guarantee.** I have not had a single stogie of the thousands returned but, instead, **have had repeat orders from 96 out of every 100 smokers who have tried them.**

Absolute Good Faith in Every Detail of This Big Value Offer

I guarantee my goods. I guarantee you satisfaction. I can't afford to let a single man question anything—I don't leave a single loophole for myself. I say to you in plain English—if after you smoke a few of the 50 Menges Stogies I will send you at 99 cents you find that you do not consider them worth what you have paid for them, you do not consider them satisfactory or pleasant smokers, then return what you have left to me and I will refund what you have paid me without argument and cheerfully. This offer practically means getting Havana cigars of 10-cent straight quality for 2 cents each, so let me have your order at once. Just send me the coupon or a note and money order and I will send you the goods postpaid very promptly.

H. MENGES
The Smoker's Friend

Selling by Farmer's Sample.

Hon. James Wilson, the Secretary of Agriculture, ended a recent address in Washington on the autumn crops with a crop story.

"A commission agent," he said, "looked carefully at a handful of wheat that had been brought him by a farmer boy, and then inquired:

"'How much more has your master got of this, my lad?'

"'He ain't got no more of it,' said the boy. 'It took him all the mornin' to pick that out.'"—Los Angeles Herald.

"Principal causes of failure in farming by irrigation are: Overplanting, undercultivation and improper application of water."—Rice Journal.

MAY MANTON PATTERNS.

Very Elegant Pattern Service, With Full Instructions For Ordering and Making.

This is the very best pattern service, and we are very much pleased to obtain it for our friends and patrons. Each pattern is new and original. In this edition we present for consideration twenty seasonable patterns absolutely up-to-date, with directions for ordering and quantity of material required.

FASHIONABLE MODELS.

No. 7122.—Fancy Peasant Blouse. 34 to 42 bust, with high or low neck, with or without undersleeves.

No. 7111.—Girl's Coat. Six, eight, ten and twelve years.

No. 7052.—Semi-Princess Gown, With Two or Four-piece Skirt. 34 to 42 bust.

No. 7099.—Seven-gored Plaited Skirt, For Misses and Small Women. Fourteen, sixteen and eighteen years.

No. 6891.—Three or Four-piece Skirt, With Underlying Panels on Sides. 22 to 32 waist, with high or natural waist line.

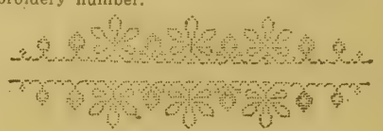
Please be sure to give the size of pattern ordered and write your own name and address plainly, that no mistake can be made to cause delay.

The price of each pattern is 10 cents.

Please address all pattern orders to **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

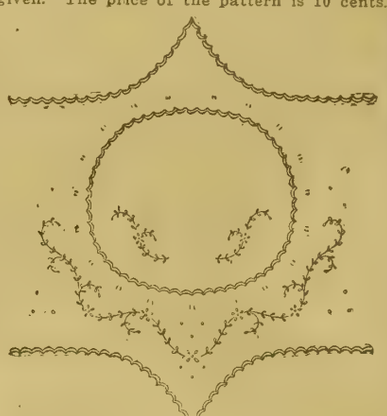
MAY MANTON EMBROIDERY.

These paper patterns require only a hot iron to insure a perfect transfer on cloth. The way to do it is to lay the material to be stamped on a padded ironing board or table, place the pattern over it with the printed side down and press over the entire surface of the paper with a hot iron, when a perfect outline will result. Please order by embroidery number.



Towel Ends in Cross Stitch.

No. 597.—Design for embroidered towel ends in cross stitch style. Two ends are given. The price of the pattern is 10 cents.



Night Gown Pattern.

No. 595.—Design for embroidering a low-neck night gown. This is a very satisfactory pattern. The price is 10 cents.

Please send all orders for these embroidery patterns to the **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

FREE TO YOU—MY SISTER

Free to You and Every Sister Suffering from Woman's Ailments.

I am a woman.
I know woman's sufferings.
I have found the cure.

I will mail, free of any charge, my home treatment with full instructions to any sufferer from woman's ailments. I want to tell all women about this cure—you, my reader, for yourself, your daughter, your mother, or your sister. I want to tell you how to cure yourselves at home without the help of a doctor. Men cannot understand women's sufferings. What we women know from experience, we know better than any doctor. I know that my home treatment is safe and sure cure for Leucorrhoea or Whitish discharges, Ulceration, Displacement or Falling of the Womb, Profuse, Scanty or Painful Periods, Uterine or Ovarian Tumors, or Growths; also pains in head, back and bowels, bearing down feelings, nervousness, creeping feeling up the spine, melancholy, desire to cry, hot flashes, weariness, kidney, and bladder troubles where caused by weaknesses peculiar to our sex.

I want to send you a complete ten day's treatment entirely free to prove to you that you can cure yourself at home, easily, quickly and surely. Remember, that, it will cost you nothing to give the treatment a complete trial; and if you wish to continue, it will cost you only about 12 cents a week or less than two cents a day. It will not interfere with your work or occupation. Just send me your name and address, tell me how you suffer if you wish, and I will send you the treatment for your case, entirely free, in plain wrapper, by return mail. I will also send you free of cost, my book—"WOMAN'S OWN MEDICAL ADVISER" with explanatory illustrations showing why women suffer, and how they can easily cure themselves at home. Every woman should have it, and learn to think for herself. Then when the doctor says—"You must have an operation," you can decide for yourself. Thousands of women have cured themselves with my home remedy. It cures all old or young. To Mothers of Daughters, I will explain a simple home treatment which speedily and effectually cures Leucorrhoea, Green Sickness and Painful or Irregular Menstruation in young Ladies, Plumpness and health always results from its use.

Wherever you live, I can refer you to ladies of your own locality who know and will gladly tell any sufferer that this Home Treatment really cures all women's diseases, and makes women well, strong, plump and robust. Just send me your address, and the free ten day's treatment is yours, also the book. Write to-day, as you may not see this offer again. Address

MRS. M. SUMMERS, Box H - - Notre Dame, Ind., U. S. A.

In the year 1910 the twin island of New Zealand had 24,269,620 sheep, and the wool production was estimated at 192,822,002 pounds, of which 187,619,181 pounds were exported.

Send for beautiful "ELDORADO" CATALOG of 48 pages, which tells about the best machine made—regardless of name, make or price—and how to get one on 30 days' trial.

JONES, POST & CO. Successor to JONES BROS. MERC. CO.
425 Liberty Street, KANSAS CITY, MO.

Washing Woolen Goods.

There is no cleanser that can be used so safely in renovating delicate colored woolen goods as soap bark, and the right way to use it is to put a small quantity in cold water and stir with the hands to make a nice lather, then add hot water till the whole is moderately warm and it is ready for use. When the garment is clean, rinse out and hang in the shade to dry.

Another way to clean dainty colored woolen goods is to grate two good-sized Irish potatoes into one pint of soft cold water; let stand an hour or two, then strain into another pint of water, and after this settles strain again. Rub the garment all over with a sponge dipped in the potato water, then wash in clean water without any soap; and another way to use the potato water is to strain the water that potatoes have been boiled in and wash the garment through this and then rinse in clear rain water.

Nice woolen goods should never be rubbed hard nor twisted in wringing. The water should be pressed out between cloths or the goods hung on the line to drip dry, then the water running out of the material will help to stretch it and keep it from shrinking.

Any dark-colored woolen goods that are not quite soiled enough to be washed can be cleaned and freshened by first removing all spots with gasoline and then putting the garment in a large bucket and pouring enough gasoline over it to saturate it thoroughly, then cover the bucket closely and let stand for two or three hours, then rinse in clean gasoline and hang over the line.

There is nothing better for washing woolen goods that are much soiled than warm borax suds, and this is prepared by stirring enough borax in the water to soften it, and the quantity it will take depends entirely upon the quality of water, and the borax not only softens the water and makes the cleaning easier, but it brightens the color in the goods and leaves the fabric as soft and clean as when new.

An unlined woolen skirt is as easily washed as a cotton one, but in pressing any woolen goods or garment, great care should be taken to preserve the shape of the pieces by ironing one of the goods, either lengthwise or across.

Any white woolen article may be kept as soft and white as when new by washing through warm borax suds, and it is especially good for the soft flannels and all dainty woolen articles worn by young children.—A. M. H.

Why Not Chinese and Japanese?

Col. R. H. Stockton, President of the Majestic Manufacturing Company, of St. Louis, Mo., has carefully considered the subject of farm labor in the house and in the field and is favoring the re-admission of the Chinese and the Japanese for special purposes only. His views have been received with favor by farm owners and by the influential farm press. Colonel Stockton says:

"The uneasiness and uncertainty attending the farmer's efforts as to securing help to raise and harvest his crops is doing more to drive the farmer and his family to town than all else combined. What would the regular manufacturer do were he to be uncertain as to his workmen being with him one year after another? He is not uncertain. Among all reputable factories a few are to be found drifting from one place to another, but more than two-thirds of the same mechanics are to be found working for the same people in the same shops for five, ten, fifteen or twenty years, and many longer, and I am sure if the instability of the workmen was as great in mechanical manufacturing as it is with the farmer, the manufacturing operations of the country would steadily decline. Men engage in and operate their manufacturing plants as much for the pleasure as for the profit. I know of many who look at the profit as the smallest of the recompense; it is the love of the game that keeps most of us at it, and did we expect to be continually anxious as to our employes reporting for work, or continually breaking in new men in work and to our way and see no end to it, but, on the contrary, see the anxiety increasing every year, most of us would quit.

"I can see no reason why Congress cannot make a law that would enable the farmer to secure all the Chinese laborers he would want **for farm work only,** and Japanese **for house servants.** Let them come in under proper restrictions, say, for a period of five years, and let them arrange to work for that period and then to renew it if desirable for five more, but give them no suffrage. I have never heard any sound argument against it. We need their labor and they need our work. A farmer can afford to bind himself to pay them a certain amount per month and furnish them a house or room and let them board themselves. They would prefer to cook and eat their way, and once having entered into a contract the United States government would see it enforced on both sides.

"We would see no more on 'back to the farm.'

"No matter how thrifty and well-fixed a farmer may be, if his wife has to drudge in 1911 as he and his father did in 1811, what good does his money do his wife, and where does her enjoyment come in? We need the Chinaman and the Japanese both to work on the farms, just as we needed the Irish and the Germans to help open up the country previous to 1860.

Household Dangers.

Frightful casualties which are due to the ignorance or carelessness of mistress or maid are almost daily recorded.

A friend of the writer, while scrubbing, threw a nearly empty can of concentrated lye into a boilerful of water over the fire. An explosion followed, the scalding water flew in the lady's face, and she narrowly escaped blindness, being confined to a dark room for many days.

Another acquaintance suffered a trying experience through her ignorance of the science of common things. Wishing to make syrup for breakfast cakes, she placed a tin lard pail containing sugar and water on the stove, fastening the lid on tightly, so that no steam could escape. Of course, the cover blew off when the boiling process began. The contents of the pail flew out, and, as the woman happened to be bending over the stove, her face was scalded in a frightful manner.

A young lady was recently burned very painfully by the ignition of benzine, with which she was cleaning her gloves. To see more clearly, she stepped under a lighted gas jet. A blaze resulted. The gloves saturated with benzine were on her hands, and a severe burn was the result.

Intelligent people still persist in pouring kerosene on dull fires, notwithstanding the frequent fatal results of such carelessness.

Many women are unaware that the dirty, almost empty lamp is a menace to life. It is in these, not the full lamps, in which gas is generated, and the danger of an explosion made imminent.

The gasoline stove is now in almost universal use, and housekeepers say: "There isn't a bit of danger in them if one is careful." But it sometimes happens that one isn't careful, or that one's servants or children lack caution, hence so many reports of death or injury from explosions. Though very convenient, one would better suffer a trifle from heat than risk the danger of explosion where there is a family of children.

The careless handling of drugs is another source of danger.

The writer once swallowed ammonia from a bottle labeled "Cough Remedy." She was nearly strangled by the fumes, and through the struggle to regain her breath the vocal organs were so injured that she was deprived of speech for many days.

Many housekeepers are not aware of the danger they invite by leaving cans containing fruit, vegetables or meat open for any length of time. The poison thus generated has more than once resulted in violent sickness and sometimes death.—Mrs. Mary E. Underwood.

Where He Got It.

Teacher—"Now, Willie, where did you get that chewing gum? I want the truth."

Willie—"You don't want the truth, teacher, an' I'd ruther not tell a lie."

Teacher—"How dare you say I don't want the truth! Tell me at once where you got that chewing gum."

Willie—"Under your desk."—Judge.

Unnecessary.

It was at a reception and the lady, who had been reading up on health culture, mistook Lawyer Williams for his brother, the doctor.

"Is it better," she asked confidentially, "to lie on the right side or the left?"

"Madam," replied the lawyer, "if one is on the right side it often isn't necessary to lie at all."—Success.

At St. Louis, August 31st, the best cattle in the Southern division were eighty-eight head, 1,042 pounds average, at $5.50 per 100 pounds.

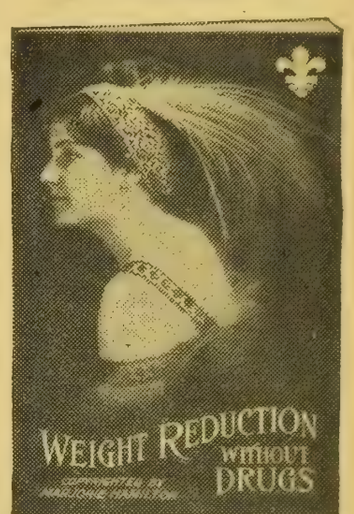
FAT VANISHES
ONE POUND A DAY.

By New Drugless Method.

TRUE SUCCESS AT LAST.

Double Chin Vanishes.

During the Last Two Months, Over Fifty Thousand Women Have Sent to Me for a Copy of This Remarkable Booklet, "WEIGHT REDUCTION WITHOUT DRUGS." Isn't This Convincing Evidence As to its Value?



I Will Send This Booklet to You at My Expense.

THE JOY OF LIVING IS THE HERITAGE OF THE LEAN. I WAS STOUT, —AND I KNOW.

My friends were charitable and they called it **obesity;** others referred to me as being STOUT, but I know, it was just plain bulky weight. I was miserable,—you, too, are equally miserable if you are too stout. To reduce your weight you must find the cause; you must get at the very reason.

I FOUND THE CAUSE—THE REST WAS EASY.

Before I succeeded, I tried everything within reason and some things beyond reason.

It was maddening.—disgusting.

All I had to do was to remove the cause, and I swear under oath, that by my simple method, without drugs, medicine, harmful exercises, or starvation diet, I reduced my weight 37 pounds in five weeks, and guarantee that I can do the same for you. I do not use medicine of any kind or worthless stuff to rub on the body, but a simple home treatment; even a child can use it without harm. Through this marvelous combination home treatment, I succeeded because I had found the right way. I can now climb to the summit of Pike's Peak with ease. I could not do that until I had taken off 37 pounds of my ponderous weight.

If you are interested in your own happiness and health and figure, you will permit me to tell you how to reduce your weight "Nature's Way."

I have printed a booklet for you entitled "Weight Reduction Without Drugs," which I am giving away without charge, prepaid to you, so that you may know of my successful method and be able to permanently reduce your weight any amount up to 70 pounds, without harmful exercises or starvation diet, drugs or medicines.

Send for my booklet, "Weight Reduction Without Drugs." It is yours for the asking, and I will be glad to send it to you, postage prepaid.

I have found that the best way to know happiness is to give it.

Sincerely your friend.

MARJORIE HAMILTON,
Suite 267, Central Bank Bldg., Denver, Col.

Time and work are worth all they cost in making dresses of

Simpson Eddystone
Black-and-White Prints

The designs of these fine cotton dress-goods are the latest and most artistic. The cloth is made of that long-wearing old-fashioned quality that has made these calicoes the standard of the United States since 1842. Colors are light-proof, tub-proof and perspiration-proof.

Show this advertisement to your dealer when you order, and don't accept substitutes. If not in your dealer's stock write us his name and address. We'll help him supply you.

The Eddystone Mfg. Co., Philad'a

Founded 1842 by Wm. Simpson Sr.

By the Way.

Said a friend to one who had raised a family of little folks: "Do not allow yourself to grow prematurely old. You have duties to yourself as well as to the children. Do not allow your mental attainments to rust out or your attire to become shabby through sacrifice to them. They will respect you more for keeping yourself up-to-date."

The observations of one shrewd observer ran in this way: "When I see the daughter in a family dressed in silks while the mother is almost too shabby to be presentable, the impression comes at once that there is a matrimonial bid in the field. The mother should wear the rich garb if one only in the family can afford it. Simple gowns are more in keeping with the beauty of youth.'" And is there not much of sound sense in the logic, though there are some well-meaning daughters who transgress wholly through thoughtlessness and with no thought of laying schemes or nets. They like handsome things, and as mother is so old and has perhaps worn plain clothing for so long, they forget that she might like the dainty lace or the touch of bright ribbon; they have had the chance since they could remember to see what a change the few dainty touches will give when worn among the grey hairs.

Yet, on the whole, we see very few old, old ladies, wrinkled and seemingly of no use in this world but to knit and tell stories of the olden time. There are so many outside influences at work, so many things to divert the mind from the rut of humdrum housework that the eyes are bright and the brains active to the very last. What interests her daughter or granddaughter interests grandma, and she is much the better off for the adaptations. Life is much less apt to become a burden either to her or to those arouud her because of her determination not to run up to seed.

The farm wife may be hampered in some ways, but in others she has a certain amount of freedom not enjoyed by many of her city sisters. If she wants pin money, there are the poultry, eggs and fruit from which to draw her funds, with several side lines, like home-made preserves, schmierkaes, etc., if she is resourceful. She has seen her urban friends through a pleasant summer vacation, with possibly no thought that she, too, is entitled to a vacation. And there are various ways in which she may have this vacation if she really makes up her mind to do it.

Even a day or two in the city will prove profitable in many ways besides the mere phase of rest and enjoyment, though this alone should prove sufficient. One enterprising woman takes orders for wall paper each spring and autumn, supplying it at a reduction from the prices usually asked in the stores. She has worked up quite a patronage in the vicinity of her residence and of some of her special friends, and the work gives her a chance for visiting these friends and at the same time considerably more than paying her expenses.

Where there are purchases to be made for a large family it is gain in the end to make them in bulk, going to the city during bargain week and thus saving the cost of the trip in the lessened cost of the goods. The first experience may not be a complete success, as it takes a little time to learn the ins and outs in a strange place, but by watching the advertisements in the city papers as presented by the leading firms, one may soon learn when is the best time to go in order to purchase certain articles. And it is no more expensive to pay a little money to the transportation companies and enjoy a change than to go on forever in the old humdrum manner. Excursion rates, too, should be kept track of and turned to advantage. We are here to get what we can out of life for ourselves and for our friends, and incidentally to build ourselves up through enjoyment and general observation. Money is not to be hoarded but to be spent judiciously.—Bessie L. Putnam.

SPLENDID SUBSCRIPTION PREMIUM.

Beautify Your Home With This Popular Stencil Outfit.

Stenciling has long been a popular form of home decoration and is today used more extensively than ever. Ladies are particularly apt at this work, and anyone can produce beautiful effects. From every standpoint stenciling is a very fascinating art of extreme usefulness. You can make the most artistic pillow tops, curtains, portieres, centers, etc., in colors for yourself or for sale, without having any knowledge of painting, by using this up-to-date outfit. In fact, stenciling is so simple with this outfit that a child ten years old can do it.

This outfit is just the thing for

beginners. It consists of six cut stencils on special oil board, six cups of water colors (something new, that will not spread, but dries instantly), two bristle stencil brushes, four thumb tacks, also full and explicit directions for mixing colors and using stencils.

Our Subscription Proposition.

Send us Fifty Cents by postoffice money order and we will send you the Universal Magazine for two years and you can select the Popular Stencil Outfit as a free premium.

The Universal Magazine is a nice, bright, cheerful, illustrated monthly magazine of thirty-two pages, three columns to the page, containing home reading, stories, fashions, patterns and poetry—a splendid publication for the money. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Among the Flowers.

Some flowers will not bear seed and bloom satisfactorily for a protracted season. But the poppy can be depended upon to perpetuate its kind without interfering with the floral display. A single poppy will produce seed to plant all that any person can need, and by tying a string around the stem of the best individual flower of each kind you are assured of plenty of blossoms of the very best type next season.

Those who have never grown the poppy will be surprised at how much pleasure it will give, even though ephemeral in nature. It is not a flower for cutting, but the gentle quiver of the silken petals in the garden, each of the richest colors, is a pleasure which the flower lover will not soon forget.

The petunia is another old-time blossom with many fine seeds, and the flowers are often widely different in the variegations, even on the same plant. It grows easily from slips, and, if desired, it may become a comely window plant when danger from frost renders its life in the garden a precarious one.

Try cutting back one of the best of the geraniums and transplanting it to a pot. Sometimes these plants bloom better in winter than the freshly-started slips. Salvia, the most shapely and floriferous plant in your bed, will continue to bloom for weeks after potting in September, and then after a rest of a few weeks the first sunny days will again woo the buds into bloom. Though not usually regarded as a house plant, few are more satisfactory.

Carnations are difficult for amateurs to grow in winter, being subject to insect ravages. It is best to be satisfied with these plants as summer bloomers only, when they can be grown out doors with fewer enemies to fight.—Bessie L. Putnam.

His Own Medicine.

Gov. Dix, at a luncheon in Albany, said of a political leader who had been worsted:

"He will get a little of his own medicine back now. It reminds me of a story.

"A man entered an eating house and ordered a steak and fried potatoes.

"'Yes, sir; steak and potatoes, sir,' said the waiter. 'And will you have chops and peas along with it?'

"'No, thank you.'

"'Roast beef, then, perhaps, sir? The roasts beef's very fine to-day.'

"'No, just steak and potatoes.'

"'How about a nice lobster or a brace of crabs, sir, with the steak?'

"'No!'

"'Shadroe and succotash, perhaps, sir?'

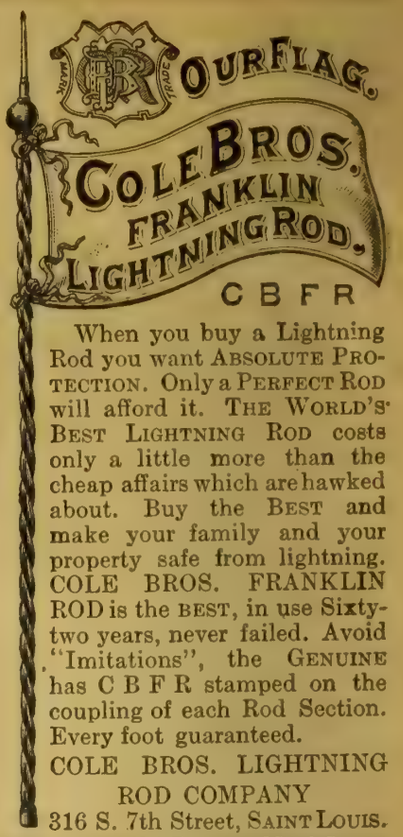
"'No, I tell you!'

"'A nice mess of fried catfish and waf—'

"But at this point the proprietor summoned the waiter to him.

"'What do you mean, you scoundrel,' he said, 'by tormenting that patron in such an outrageous manner?'

"'Oh, I wasn't tormenting him, sir,' said the waiter. 'I was just trying to make him feel at home. He's a barber.'"



When you buy a Lightning Rod you want ABSOLUTE PROTECTION. Only a PERFECT ROD will afford it. THE WORLD'S BEST LIGHTNING ROD costs only a little more than the cheap affairs which are hawked about. Buy the BEST and make your family and your property safe from lightning. COLE BROS. FRANKLIN ROD is the BEST, in use Sixty-two years, never failed. Not the Same.

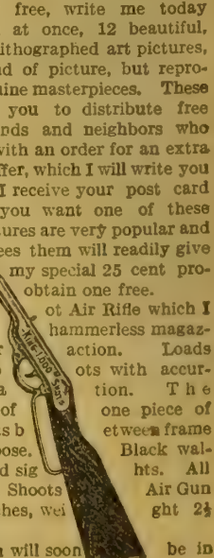
A child of strict parents, whose greatest joy had hitherto been the weekly prayer meeting, was taken by its nurse to the circus for the first time. When he came home he exclaimed:

"Oh, mamma, if you once went to the circus you'd never, never go to prayer meeting again in all your life."—Tit-Bits.

BOYS, THIS RIFLE IS FREE!

If you want one of these 1000 shot King Air Rifles absolutely free, write me today and I will send you at once, 12 beautiful, size 15 x 18 inches, lithographed art pictures, not the ordinary kind of picture, but reproductions of genuine masterpieces. These pictures I want you to distribute free to 12 of your friends and neighbors who will favor you with an order for an extra special 25 cent offer, which I will write you all about when I receive your post card telling me that you want one of these rifles. These pictures are very popular and everyone who sees them will readily give you an order for my special 25 cent proposition in order to obtain one free.



The King 1000 shot Air Rifle which I want to give you is a hammerless magazine repeater with lever action. Loads automatically and shoots with accuracy and great penetration. The frame and barrel are of one piece of nickeled steel—no joints between frame and barrel to work loose. Black walnut stock and splendid sights. All parts interchangeable. Shoots Air Gun Shot. Length 36 inches, weight 2½ pounds.

The hunting season will soon be in full swing, and I want you to have one of these rifles in time, so that you can bring down your share of the game. Don't delay, write that card today stating that you want a 1000 shot King Air Rifle, and by return mail, I will send you 12 of the pictures above mentioned and full information about my special 25 cent offer. Address:

SELECTED POETRY.

THE BOY THAT WENT TO COLLEGE.

Every acre we had mortgaged,
When we hoped for better days,
In our lofty aspirations
After more aesthetic ways,
Till our farm was overburdened,
And disaster loomed apace—
But we sent a boy to college,
And 'twas that that saved the place.

We had filled him with the wisdom
That our fathers handed down,
With the rural dispensations
That are rife in every town;
But we more than half suspected
That our modes, antique and gray,
Were exceedingly back-numbered—
So we sent our boy away.

In the school of agriculture
Learned he new and better ways,
Weighed he all the trusted precepts,
We inherit from old days,
Sifted out the chaff and cockle
From the body of the grain,
Till he saw for future sowing
Only perfect seed remain.

Then our farmers saw what science
And a fertile brain can do,
When our boy came home from college,
Filled with aspirations new;
For our fields grew somewhat fairer,
And our trees in fruitfulness
Bent beneath their heavy burdens—
And our debts grew ever less.

We have other boys true-hearted,
Just as brave and strong as he,
Always dreaming of and planning
For the work that is to be,
Always using brain with muscle,
Not a whit behind in grace— —
But the boy that went to college
Was the boy that saved the place.
—H. F. Thurston, in Southern Shippers' Guide.

THE TWO MYSTERIES.

We know not what it is, dear, this sleep
so deep and still;
The folded hands, the awful calm, the
cheek so pain and chill;
The lids that will not lift again, though
we may call and call;
The strange white solitude of peace that
settles over all.

We know not what it means, dear, this
desolate heart-pain;
This dread to take our daily way, and walk
in it again;
We know not to what other sphere the
loved who leave us go,
Nor why we're left to wonder still, nor why
we do not know.

But this we know: Our loved and dead, if
they should come this day—
Should come and ask us: "What is life?"—
not one of us could say.
Life is a mystery as deep as ever death
can be;
Yet Oh! how dear it is to us, this life we
live and see!

Then might they say—these vanished ones
—and blessed in the thought!
"So death is sweet to us, beloved! though
we may show you naught;
We may not to the quick reveal the mystery
of death—
Ye can not tell us if ye would, the mystery
of breath."

The child who enters life comes not with
knowledge or intent,
So those who enter death must go as little
children sent.
Nothing is known. But I believe that God
is overhead;
And as life is to the living, so death is to
the dead.
—Mary Mapes Dodge.

YOUR FRIEND.

Perhaps no base of circumstance
Can justify the thing he did;
No charity erase a stain
That can not be forgotten or hid.
And yet, however he offend,
Was he not once your friend?

You look with sorrow on the deed,
You find him pitifully marred.
His honor seems a broken reed,
His gallant youth forever scarred.
The world can not restore or mend,
And yet—he was your friend!

You called him once your comrade true,
As, happy lads, you laughed on life—
Together playing, working, too,
You learned the thrill of wholesome
strife;
You swore to serve, leal friend for friend,
Until the story's end.

But that is altered—must be so,
Since he has failed to meet life's test!
And yet must he, unbrothered, go
Where failure, lurks apart, confessed?
Can nothing help, no love defend
This man you called your friend?

Ah! Give him now your loyal hand
To lead him from this utmost hell!
This burning, baneful, barren land,
Where only friendless failures dwell!
Give him your hand! Despair shall end
For him who hath one friend!
—Elizabeth Newport Hepburn, in New York

SCHOOL IS OUT.

Why is little Willie happy?
Why his look of joy?
Why that step so light and snappy
In our little boy?
Why that face so bright and cheerful?
Why that gladsome shout?
Why a lack of all that's tearful?
School is out!

Why those books so quickly banished
From his youthful sight?
Why those school clothes have vanished
In a single night?
Why those well-worn duds he's wearing
In the yard about?
Why that fish pole he's repairing?
School is out!

Why does Bobby keep on sleeping
When the clock strikes eight?
And to breakfast comes in creeping
As the hour grows late?
Why that unwashed face this morning?
Well, there is no doubt
Why such cleanliness he's scorning—
School is out!

Why are all the neighbors kicking
At the awful noise?
Pleading for a wholesale licking
Of that bunch of boys?
What's the reason there's a racket
When those youngsters shout?
Just this simple cause to back it—
School is out!

Why is mother cross and fretful?
Why so nervous, too?
Tired, jaded and forgetful,,
Weary, worn and blue?
Why has she so peevish acted,
As she went about?
Here's what's driving her distracted—
School is out!
—E. A. Brininstool, in Los Angeles Express.

SHORT A NICKNAME.

There's Freckles Smith an' Grinner Brown
An' Toothy Bowles—an' all the rest
O' boys 'at is in this here town
Is nicknamed! Even Measles West,
'At's poor as poor, he's got me beat,
Sometimes I wish 'at I could get
An eye out, or lose both my feet—
I haven't got a nickname yet.

You see, a nickname, it ain't like
The one your parunts names you with—
It's got to be a name to strike
Yourself, like "Freckles" does Paul Smith.
An' I ain't got no warts nor moles,
Nor toothache when wy clo'se gets wet—
('At's why we call him "Toothy" Bowles)—
I haven't got a nickname yet.

If I was fat, or I was thin,
I might be "Meat" or "Skinny" then;
I wisht I had a pimpled skin,
Or had a cross eye, or a wen,
Or was left-handed, or had spells
That made my jaws an' teeth get set!
I'm simply William Arthur Wells—
I haven't got a nickname yet.

You see, already there's a "Bill"
An' "Billy" mixed up in our crowd;
An' that Moore boy up on th' hill,
They call him "Glue," an' he is proud!
I don't know how to get me one,
But I'll be nicknamed yet, I bet,
But now I don't have any fun—
I haven't got a nickname yet!
—W. D. N.

BACK TO NATURE.

A hen is not supposed to have much common
sense or tact,
But every time she lays an egg she cackles
forth the fact.

A rooster hasn't got a lot of intellect to
show,
But none the less most roosters have
enough good sense to crow.

The mule, the most despised of beasts, has
a persistent way,
Of letting people know he's round, by his
insistent bray.

The busy little bees they buzz, bulls bellow
and cows moo,
And watch dogs bark and ganders quack
and doves and pigeons coo.

The peacock spreads his tail and squawks;
pigs squeal and robbins sing,
And even serpents know enough to hiss
before they sing.

But MAN, the greatest masterpiece that
nature could devise,
Will often stop and hesitate before he'll
ADVERTISE.
—C. P. S.

A BALLAD OF VEGETABLES.

A potato went on a mash
And sought an onion bed;
"That's pie for me!" observed the squash,
And all the beets turned red.
"Go way!" the onion, weeping, cried;
"Your love I can not be;
The pumpkin be your lawful bride—
You cantaloupe with me."

But onward still the tuber came,
And lay down at her feet.
"You cauliflower by any name
And it will smell as wheat;
And I, too, am an early rose,
And you I've come to see;
So don't turnip your lovely nose,
But spinachat with me."

"I do not carrot all to wed.
So go, sir, if you please!"
The modest onion meekly said:
"And lettuce, pray, have peas!
Go, think that you have never seen
Myself, or smelled my sigh;
Too long a maiden I have been
For favors in your rye!"

"Ah! spare a cuss!" the tuber prayed;
"My cherryshed bride you'll be;
You are the only weeping maid
That's currant now with me!"
And as the wily tuber spoke
He caught her by surprise,
And, giving her an artichoke,
Devoured her with his eyes.
—Tit-Bits.

THE HOLES WERE FINE.

"How do you like my doughnuts, dear?"
She asked; "ain't they divine?"
"They surely are," her husband gulped;
"The holes are simply fine."
—Dallas News.

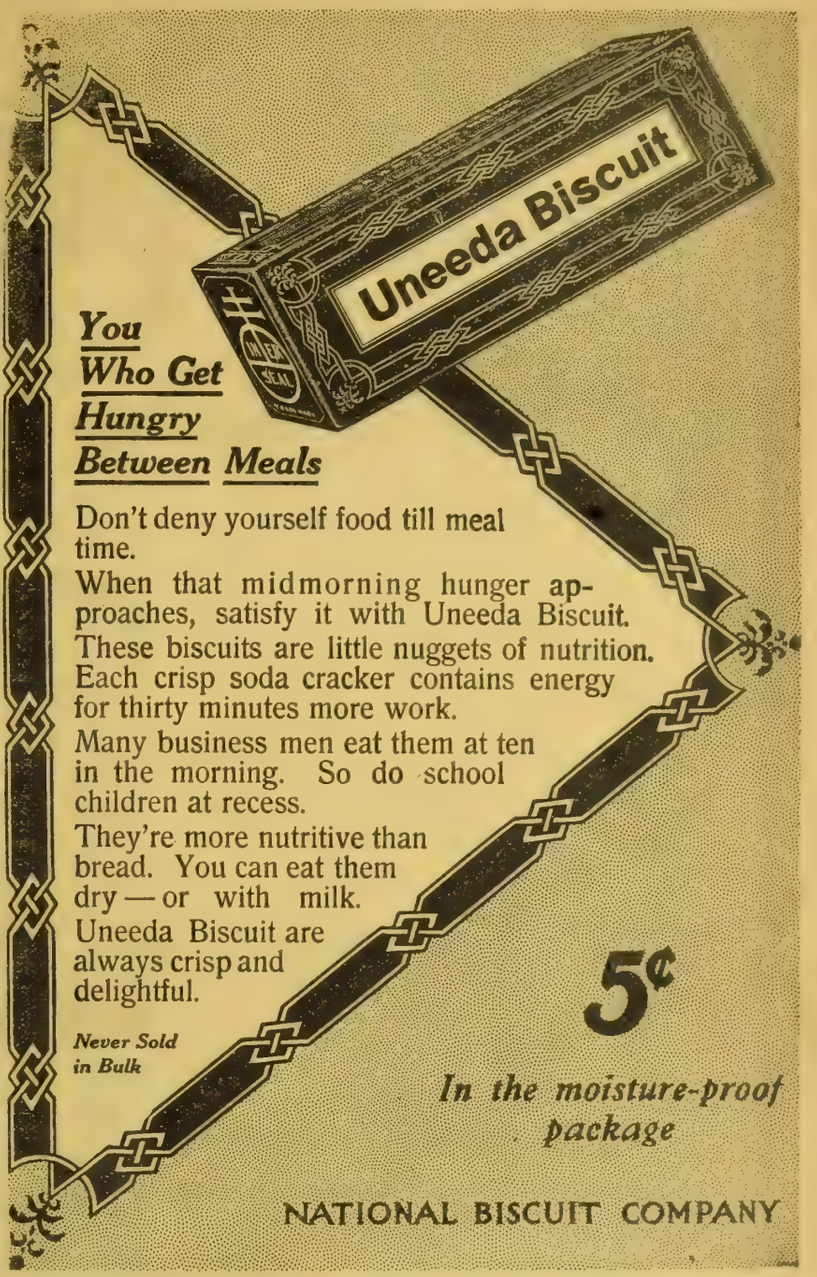
BOYS THAT RUN THE FURROW.

You can write it down as gospel,
With the flags of peace unfurled,
The boys that run the furrow
Are the boys that rule the world.

It is written on the hilltops,
In the fields where blossoms blend;
Prosperity is ending
Where the furrow has an end.

The glory of the battle,
Of clashing swords blood red,
Is nothing to the warfare
Of the battle hosts of Bread.

The waving banners of the fields
O'er the broad land unfurled—
The boys that run the furrow
Are the boys that rule the world.
—Frank L. Stanton, in Atlanta Constitution.



Uneeda Biscuit
You Who Get Hungry Between Meals
Don't deny yourself food till meal time.
When that midmorning hunger approaches, satisfy it with Uneeda Biscuit.
These biscuits are little nuggets of nutrition.
Each crisp soda cracker contains energy for thirty minutes more work.
Many business men eat them at ten in the morning. So do school children at recess.
They're more nutritive than bread. You can eat them dry — or with milk.
Uneeda Biscuit are always crisp and delightful.

Stomach and Lung Troubles

Rheumatism, Kidney and Liver Troubles

Have Been Cured by MAGNETIC SHIELDS in Hundreds of Cases After Other Treatments Had Failed

For 30 Years They Have Given Prompt, Positive and Permanent Relief

We Prove It To You

By the Words of Those Who Say They Have Been Cured With Magnetic Shields

All we wish is an opportunity to show you the evidence, and after you have seen what wonderful work has been accomplished by Magnetic Shields, **YOU ARE TO BE YOUR OWN JUDGE** as to whether or not you want to use Magnetism in your own case, the same as others have. We do not urge anyone to buy Magnetic Shields; we simply give you the facts, and after considering the facts you follow your own inclination. It is your duty to investigate. It will cost you nothing to get the facts, and you will obtain much valuable information, free of charge, upon the subject of Magnetism, if you send statement of your case.

You Have Everything To Gain

By a careful, thorough investigation, for Magnetic Shields have done all we claim for them and a great deal more, or we certainly would not ask you to make an investigation and use the result of that investigation as the basis from which to judge the merit of Magnetic Shields as a curative agent.

We Make Shields For Every Part of the Body For the Treatment of Every Form of Disease

The accompanying cut shows how magnetism is radiated from the Lung Shield, Belt and Lower Leggins into all the vital organs, as well as lower extremities, giving new life and activity to the circulation from head to foot, thus strengthening all the vital organs and large nerve centers and assisting nature in the work of eliminating diseased conditions by reason of the better circulation of blood that is established as soon as the Shields are applied. This set of shields contains over eight hundred powerful Magnetic Storage Batteries, that are guaranteed to hold their power and will never have to be recharged.

MAGNETISM Is Organized Force

Read the Truth

More Forcibly Expressed in These Letters Than Any Statements We Could Make

CURED AFTER SUFFERING FOR FIFTEEN YEARS WITH CATARRH OF STOMACH AND BOWELS AND BORDERING ON PARALYSIS

For the benefit of the sick and suffering I wish to confirm the following statement, which I made Jan. 16, 1903:

I had been afflicted with catarrh of the stomach and bowels and general debility, bordering on paralysis, for the past fifteen years. For two years I lived altogether on fresh fish and dry bread and milk. After a while I had to quit fish and for three months I lived on toasted bread and milk, and kept getting worse, until I had to quit work, having no strength left. Myself and friends thought that my time in this world was short, having all this time been in the hands of at least twelve doctors, some noted specialists, and the doctors all diagnosed my case as catarrh of the bowels and stomach. After I had given up all hope of getting well again, a friend of mine, who had taken Dr. Thacher's treatment, advised me to consult the doctor. I wrote him and he advised me. I made up my mind to make one more effort and give him a trial, and the result was that today I am as well and sound as ever I was, am attending to my business, which requires from sixteen to twenty hours a day. I eat anything that is set before me, having perfect digestion, and I think Dr. Thacher's treatment is a blessing to suffering humanity, and would advise persons with chronic diseases to consult him, as I honestly believe he can do for others what he has done for me.

Very truly,
J. Y. KECK,
17 E. Third St., Pottstown, Pa.

Serious Complication of Lung, Stomach and Kidney Trouble. A Marvelous Chicago Recovery

DR. THACHER:

Dear Sir:—It gives me great pleasure to testify to the perfect cure I have gained by using your wonderful Shields. After suffering fifteen years with stomach troubles, although doctoring the greater part of the time, I kept getting worse until I was the victim of a severe complication of stomach and kidney trouble, which a year and a half ago all seemed to go to my lungs. Had dreadful pains, lost my appetite, could not sleep, became so very weak I could hardly walk across the floor, and not able to do my work. At times when my pains were not so severe I would try to read, but could not for more than five minutes at a time, as I was very nervous. My family and friends thought I could not live another month. I was getting tired of taking medicine. Nothing helped me. I happened to see your advertisement in the paper, which read: "Magnetism Cures Without Medicine." I thought "while there is life there is hope." So just one year ago today I put on your wonderful Magnetic Vest, Leggins and Insoles. The result was a miracle, for in two days I felt relieved; in a week very much better; in three weeks entirely cured.

Words cannot express how thankful I am to you for your your kind advice; also for the treatment, to which I owe my life. May you live long for suffering humanity's sake. May your great and sure cure be known a great deal better than it is today.

Yours respectfully,
MRS. O. RAY, 2316 Ridgeway Ave., Chicago, Ill.

Complicated Case of Piles and Stomach Trouble Restored to Youthful Vigor at Age of 64

DR. THACHER, CHICAGO, ILL.

Dear Dr. Thacher:—It is now eleven years since I first made my acquaintance with the Magnetic Shields. I was then a physical wreck from indigestion and piles, which made life a burden to my existence. I had suffered with a weak stomach from my boyhood, and in the army I contracted the piles and other complicated conditions, which disabled me from active work. One day I called at a house and for the first time learned of the Magnetic Shields. The book, "Plain Road to Health," had been sent to those people and I got it and read it. I recognized and felt the truth of your statements in that valuable work, and concluded that I would send for a Belt and Leggins. I soon felt a new impetus of life and general improvement. My piles left me in three days, and I never had them since. I recovered my health perfectly, and am now in my sixty-fourth year, and I am as sound and active as I was at twenty. I wear the Shields every winter and I am always free from colds, grip, etc. I never have any "tired feeling" and "under the weather," as the majority of people tell about their feelling. I have no aches and pains because the Magnetic vibration of the Shields has re-established perfect circulation of my blood in every fiber of my body; hence my perfect vigor of youth at the advanced age of sixty-four years.

I desire to have this statement published, that it may go out for the benefit of humanity. I shall gladly answer anyone wishing to know more of my case and the nature of this statement.

I am yours with love and gratitude.
N. AEBISCHER, Wausau, Wis.

We have hundreds of letters like the above, stating what marvelous results have been obtained in cases that were considered incurable in many instances. Do not be discouraged. Do not give up hope, even if you have been told your trouble could not be cured, as Nature's methods are wonderful and many cases are restored where medicine has failed to give beneficial results, as shown by the indisputable proof that we will supply you. Investigate our claims, for it is a duty that you owe yourself. All that we ask is for you to write us and send a complete description of your case and let us prove to you what has been done in some cases.

We will send you FREE OF CHARGE our new book, "A PLAIN ROAD TO HEALTH," by C. I. Thacher, M. D., and will advise you just what application of Magnetism will be required for your case. Write us fully today and we will take the same careful pains to advise you as if you called at the office and saw us in person.

DIRECT PROOF ON YOUR OWN BODY

If you are skeptical and must see before you can believe, try a pair of our FOOT BATTERIES in your shoes. They will convince nearly any living being that Magnetic Shields make the blood circulate. They insulate the body from the negative earth and conserve your positive force. They are good for Rheumatism in feet, weak circulation, cold feet, cramps, sore, tender feet, and any weakness in feet. They are worth their weight in gold to any person. They are guaranteed to hold their power. $1.00 per pair, or 3 pair for $2.00. Send size of shoe. THEY DO CONVINCE.

THACHER MAGNETIC SHIELD CO., Inc., Suite 272, 110 So. Wabash Ave., Chicago, Ill.

ROYAL GRAY—Imported Shire stallion, three years old, owned and exhibited by Trumans' Pioneer Stud Farm, Bushnell, Ill. ROYAL GRAY is one of the greatest Shire stallions ever seen in this country. Last year he won first prize in the two-year-old class at the Illinois State Fair and at the Chicago International. This year he was first in a strong three-year-old class and grand champion of the Shire horse breed at Iowa State Fair.

Our Subscription Department.

Send us your list of publications and we will see that you receive prompt estimate of what they will cost. We can save you some money. Address, The Hale Publishing Co. 3550 Vista Ave., St.Louis,Mo.

The Cotton Estimate.

The United States Department of Agriculture has announced a cotton crop estimate of 13,868,337 bales. This estimate will cause all kinds of talk about overproduction, but every bale can be marketed in good shape, providing the crop is properly marketed. See article on page 5, entitled "What Governor Donaghey Said."

5 Cents a Copy. Published Monthly by The Hale Publishing Co. 50 Cents a Year.

and Stock GROWER

Favorite Corn Husker.

Clark's Corn King with its new self-shedding hook. The spear point enters the husks easily. The slant bend turns the husks for shredding, and the rounded, curved and beveled edges throw out the husks and prevent clogging. As this is the most approved husker on the market, we have selected it as a seasonable subscription premium. The hook sets at any angle; two positions for a thumb hook and five positions as a palm hook. Opening and closing the small end of the plate makes the adjustment perfect for any width of hand and prevents chafing. The strap passes through the leather

tongue and the first ring and over the hand to the opposite ring and back through the first ring. Be sure and have the strap enter the ring from the outer side. It brings the pulling strap underneath, forms the sinch draw and gives you the full benefit of the sinch-lock, which is the same as a half-hitch. The strap then passes to the last ring and then to the buckle; the half-hitch forms one fastening and the buckle holds the end of the strap. We will send The National Farmer and Stock Grower for one year and Clark's Corn King Husker for 50 cents. The Husker is a free premium. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Importance of the Water Table in the Soil.

The writer has this summer had impressed on him the immense importance of having the water table in the soil at a right distance from the top. What is known as the water table is where the water in the soil fills the entire space between particles of soil. If a hole is dug down to the water table, water will appear in the bottom of the hole.

From that water table the soil takes up the water by capillary attraction throughout the summer and feeds it to the roots of the thirsty plants.

There is one piece of ground that the writer has had under his observation for many years. The soil is a friable clay and good in every way so far as composition is concerned. Different people live on that piece of ground and have for fifteen years been trying to grow all kinds of things on it. But even in years when the rainfall has been excellent, the crops produced have been unsatisfactory, except where large quantities of artificial watering has been done. There is city water on this piece of land, and in some parts of it the water has been freely applied. Where this has been done, the results have been excellent.

But for fifteen years the blackberries have dried up without fail. Plum trees growing on this soil for ten years have made little growth, and only the very deep-rooting trees do well.

This piece of ground is on a gentle rise of not more than ten to fifteen feet above the ordinary level of the vicinity. But the texture of the soil is evidently such that the water table is ten or more feet from the surface most of the time. This fact is a great obstacle in the way of successful cultivation.

This presents one reason why irrigation will finally become popular in many sections of the humid states where it is now believed generally that irrigation is not needed. There are numerous localities, even in our humid states, where the water table lies naturally so low that good crops are seldom or never produced. Irrigation water is the only factor that will ever make such lands profitable. Frequently small areas of such lands are on farms that are mostly well supplied with underlying strata of water.

In the buying of a new farm this is a matter that should be looked to as well as the richness of the soil and the texture of the soil. It will be hard to find out much about this factor, for it is one to which most people have never given any thought. But the permanent growths above such soil will indicate something. Thus, if there is a grape plantation on it that has not developed large size to the vines, though planted many years, that is a fairly good index of a low water table, if the soil appears to be fairly rich. The writer knows of two grape plantaions on such land, most of the vines of which have made only slight growth in ten years, while here and there are individual vines that have received large quantities of water annually and have made great development and borne fine crops. Of course, there is no way of finding out the age of such a plantation without asking the people that own or have owned it.

Not all tree growths are an index of the height of the water table, for some trees, like the pine, are adapted to growing on just such land.

Sherwin-Williams Paints.

On page 2 will be found the advertisement of Sherwin-Williams Paints and Varnishes. They issue a booklet entitled "Paints and Varnishes for the Farm." This booklet is a wonder; it gives instructions that you need in the business of painting implements, houses, vehicles, fences and outbuildings. In addition to helping you to use the right paints in an economical manner they will see that you are directed to the dealer who will furnish their guaranteed paints, and that is worth something, for country stores are full of trash in the disguise of paint that will not preserve the surface for thirty days after it is brushed on. The same firm furnish Paris green, arsenate of lead and lime-sulphur to kill insects in orchards, etc. Write for the paint book, anyway, and address Sherwin-Williams Company, 689 Canal Road, N. W., Cleveland, Ohio.

Increased Demand For Ice Cream.

More cream is now being used in the manufacture of ice cream in the year 1911 than the entire output of cream thirty years ago. In the Michigan Farmer, Colon C. Lillie gives an idea of this, saying:

"Just this past week it was my privilege to visit what is said to be the largest manufacturer of ice cream in the city of Chicago. To give you an idea of the extent of the business of this firm, allow me to say that the company owns 140 horses, simply used for the delivery of ice cream from the factory to the retail dealers in the city of Chicago. I saw in one cold-storage room ten 1,000-gallon tanks used for the storage of the cream as it is received from the farmers. There were installed, ready for use, ten continuous ice cream freezers with a capacity of 1,000 gallons of ice cream a day, or, in other words, the firm has a capacity of manufacturing 10,000 gallons of ice cream every day; that is, every ten hours; and they had other machines that could be used should the business demand. This is only one firm in one city. Some may be surprised to learn that people put away ice cream in cold storage. By sweetening this cream and putting it away at a temperature just about at freezing, they can keep the cream in perfect condition. They have learned from experience that when the first warm spell comes everybody is hungry for ice cream, and at the same time it is almost impossible to get cream that will do for manufacturing ice cream on account of the weather. The first warm weather of the season always brings a lot of sour cream that will not do at all for this purpose. Consequently the manufacturer stores his cream for future use, just as butter is stored in the summer time for use in the winter time, when there is a shortage."

Caring For Orchards in Off Years.

The difference in the quality as well as the quantity of fruit in orchards in Southern Indiana is very noticeable this season. Some orchards are full of the finest quality of fruit, while others have only a partial crop and even that is of poor quality. Last season was an off apple year in some regions, and not much attention was given to the trees. This was an error, and this neglect is responsible for many failures this season. These orchardists who sprayed their trees last season and cultivated their orchards are now reaping the results of that work. Spraying and cultivation in off seasons insures clean, thrifty growth and plenty of foliage, and this is essential in setting fruit buds for the next crop. A very successful apple grower tells me that persistent attention to trees is the best safeguard against injury at blossoming time.—L. C. Brown.

SHERWIN-WILLIAMS PAINTS & VARNISHES FOR THE FARM

Sherwin-Williams Paint (Prepared)(S W P), is made for painting buildings outside and inside. S W P is made of pure lead, pure zinc, pure linseed oil and the necessary coloring pigment and driers, thoroughly mixed and ground by special machinery and put up in sealed cans, full U. S. Standard measure. S W P will cover the greatest possible amount of surface and will last for the longest time. There is economy in using good paint.

Sold by dealers everywhere. Ask for color cards

Cement Workers' Handbook.

This book is designed to teach anybody how to work with cement; how to mix mortars of all kinds for all concrete purposes; how to make building blocks; how to build walls, floors, ceilings, walks, joists, cisterns, troughs, tanks, etc. It gives estimates of the cost of all kinds of mortars and concretes and all methods of house construction. It is a cloth-bound book of 100 pages and covers more than fifty most important subjects on cement and its uses and construction. This is a diamond of a book for wide-awake farmers. The price of the book alone is 50 cents.

For 60 cents we will credit one-year's subscription to The National Farmer and Stock Grower and send a copy of the **Cement Workers' Handbook.** Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

To Club Raisers:—Anyone getting up a club of four subscriptions and sending in $2.40 will be credited with one book and one-year's subscription free.

Future Delivery of Grain.

In defense of the Board of Trade system of buying and selling grain for future delivery Mr. Chester Arthur Legg says:

"Everywhere in business life we note some system of buying and selling for future delivery. When the milkman agrees to supply us with milk for the coming month or year, he is but selling milk to us for future delivery. Again, what prudent housekeeper does not purchase his coal to be delivered during the preceding summer, when prices are more reasonable? Moreover, what one of us, in arranging to feed a great crowd at a picnic, wedding or church festival, would wait until the very day of the occasion to obtain the food, flowers or drinks? If we are wise, we make our arrangements with the caterer or florist a week or more before the event.

"In every one of these familiar and common-place illustrations, which could be multiplied indefinitely, we are doing identically what the man in the 'pit' does when he purchases wheat, etc., for future delivery, and the one who sells it to him is occupying the position of the milkman, coal dealer or caterer. This should at least demonstrate that such purchases and sales of grain, etc., for future delivery are not an unusual and therefore suspicious form of trading.

"The charge is no less untrue that the system is a recent invention of the Stock and Produce Exchanges, designed for their special purposes. History records that as far back as the time of Aristotle a certain Greek merchant contracted to buy the entire olive oil output of the Island of Miletus one year before the crop matured. Moreover, in England and Holland, during the entire colonizing era of the fifteenth and sixteenth centuries, we find the practice of buying and selling warrants covering cargoes to arrive from America and the West Indies carried on most extensively. The system provided then, as it does now, a splendid service in the distribution of products at fairly stable prices and with the minimum risk to the merchants."

"The miller to-day may desire to accept an order to deliver a large consignment of flour in Europe or Asia some time in the future. At to-day's price of wheat he can see his way clear to make such a contract, but if at the time he wanted to mill it the price is advanced greatly, he may be financially ruined. By buying for future delivery the quantity of wheat necessary to make the flour, he obviates any such catastrophe. When the time of delivery comes, if he needs all the actual wheat he has bought, he will demand and get it. But if he does not need all of it, he will 'close out' his trade at the market price. It would be impossible without Board of Trade facilities for millers to engage in international trade."

Cold Storage to Cheapen Foods.

The New York Produce Review and American Creamery explains the views of different nations in regard to the value of cold storage for produce as follows:

"A cable dispatch from Rambouillet, France, dated September 7, says that a Cabinet Council presided over by President Fallieres was recently held to consider the disorders arising from the popular clamor for cheaper food, and to adopt measures intended to decrease the cost of living. The Ministers of Commerce and Agriculture explained to detail the results of their investigation of the problem and the Cabinet approved of plans to ameliorate the situation by facilitating the importation of cattle and frozen meats, and by installing refrigerating and storage plants, of which there is said to be a lack in France.

"It is declared that the cost of everything eatable in France is higher than ever before, and this is the case all over Western Europe, where the natural upward tendency of food values has been exaggerated by drouths and generally unfavorable conditions for food production.

"We mention the matter here principally to set forth the estimation of the French government in regard to the natural effect of cold storage upon the supply of food and its cost. There an extension of cold storage facilities is prescribed as a means of ameliorating the condition of food scarcity—as it should be by anyone conversant with economic laws—while here our splendid cold-storage industry is attacked and hampered with restrictions as the first move toward the same end, by legislators and newspapers who appear to know about as much of political economy as a cow does of aviation."

Cotton in Morocco.

Two years ago, while prospecting for minerals in Morocco, Herr Mannesmann was taken prisoner by the Moors and conveyed to the Sus district, which up to that time had been trodden by the foot of no European. To his surprise, he found the ruins of vast cotton plantations, which must have existed and flourished in the reign of the Sultan Edris, grandfather of the present Sultan, but which now, uncultivated and uncared for, have run wild and gone to seed. Not only did Herr Mannesmann discover the plantations themselves, but above and below Tarudant, the capital of the province, he declares are the remains of an irrigation system designed to feed the plantations with the water which their dry, chalky soil requires to make it fruitful.

An artificial canal, with a depth varying from three to nine feet, drew water from the river Sus, and a hundred years ago, when the Sultan Edris had the power to force the insolent population to work, the cotton plantations must have yielded a rich harvest, even with the primitive native methods of cultivation.

Herr Mannesmann is of the opinion that these plantations can easily be regenerated and brought up to a state of culture which will render Morocco one of the most valuable cotton-producing fields of the world. The climate, he says, is essentially suited to cotton growing, and the even temperature of Morocco makes it possible for Europeans to do manual labor, even if the natives could not be used. It was with this end in view that the Mannesmann brothers obtained from the Sultan large concessions in the Sus district.

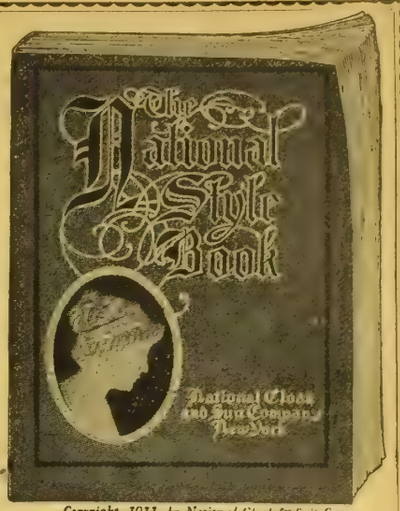
"What Hat Will be Most Becoming to Me?"

"What suit shall I wear, what dress shall I buy, what skirt, what waists,—where, just where can I find the clothes most becoming to me?"

And your answer is printed here.

The "NATIONAL" Style Book, your Style Book, assures you of the greatest becomingness by giving you for your choice the widest variety of the most delightful new styles in every kind of apparel.

And the whole matter of the selection of your clothes is thus made very simple.



Copyright, 1911, by National Cloak & Suit Co

You only need write us today, "Send me, free, my "NATIONAL" Style Book." That is the one important first step—the thing to do *now*.

And, second, select from this Style Book—from all New York's best styles—the garments you like best. Your order will be filled immediately, express charges will be prepaid by us, and we will take all the risk of your being fitted perfectly and entirely delighted. You thus gain in **Price, Promptness and Style.**

"NATIONAL" low prices mean an important saving to you. "NATIONAL" prices are so low, our promptness in filling orders so well known, our styles so beautiful and becoming, that today more women buy their apparel at the "NATIONAL" than buy of any other house in the entire world.

The question is, "Will you take the first step *now* by writing for your Style Book?" It shows you

Dresses . .	$10 to $30	Hats . . .	$2.98 to $15
Coats . . .	$10 to $50	Skirts . . .	$3.98 to $15
Furs . . .	$2.25 to $75	Waists . .	.98 to $10

Also a full line of Underwear, Hosiery, Scarfs, Veils, Raincoats, Gloves, Sweaters, Leather Goods, Jewelry, and a complete line of Boys', Misses' and Children's Wearing Apparel.

"NATIONAL" Tailored Suits

Made to Measure **$15 to $40**

Samples of Materials Sent Free

Each Made-to-Measure Suit is actually cut and made to order, and we guarantee each suit to fit perfectly or we will cheerfully refund your money.

The "NATIONAL" Policy

We prepay express charges on all our goods to any part of the world. You may return any "NATIONAL" garment not satisfactory to you and we will refund your money and pay express charges both ways.

In writing for your Style Book, be sure to state whether you desire samples of materials used for "NATIONAL" Made-to-Measure Tailored Suits. Samples are sent gladly but only when asked for. And the samples and the Style Book are well worth asking for—*now*.

NATIONAL CLOAK & SUIT COMPANY

280 West 24th St., New York City

A Few Words on Fertilizer.

The Commissioner of Agriculture of Nashville, Tenn., says:

"We think it timely to talk about commercial fertilizers. While we advocate making as much fertilizer on the farm as possible by keeping live stock and feeding the products of the farm, together with cotton-seed meal, etc., yet the truck gardener and intensive farmer can not always do so. He has to supply his plant food in some other form, often by buying the ready-mixed fertilizers on the market.

"If the farmer buys a commercial fertilizer he will find printed on the bag a statement of the percentage of nitrogen, phosphoric acid and potash it contains. No fertilizer should be bought until the buyer has calculated its commercial value from the figures on the bag.

"The commercial value of a pound of nitrogen, phosphoric acid and potash is the average wholesale selling price of these substances in the largest fertilizer markets. Chemists average these prices every year and publish the figures as commercial value for that year. Following are the prices for this year:

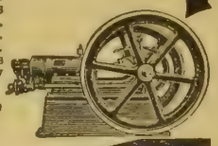
"Nitrogen, 17 cents a pound.

"Phosphoric acid, 5 cents a pound.

"Potash, 5 cents a pound.

"By mixing his fertilizers the farmer can usually save several dollars per ton. He can also make a variety of mixtures and adapt them to each crop and each field. He saves the freight on the filler, at least."

The farmers of the United States did not have any opportunity to vote against the so-called reciprocity proposition, but the Canadians voted all right.

WITTE ENGINES
GAS—GASOLINE—DISTILLATE—NAPHTHA
Do the work at average cost of **One Cent** per horse power hour. Immense saving by our method of "pre-heating" the fuel. Built so perfectly that repairs cost less than $1 per year average. Every valve is **vertical** and will not wear on the stem or slip inside. Freezing cannot injure bed as **cylinder and base** are **separate.** Hammered steel cranks, cut gears, etc.
GUARANTEED FIVE YEARS
We are experts in engine building; have done nothing else for twenty-six years. Our reference is thousands of satisfied customers. Our prices are right. All sizes, 2 to 40 H. P. Special inducements to introduce in new localities.


Write for free catalog stating size wanted.

Milch Cattle on Market.

Milch cows and calves, all grades and qualities, are selling at the St. Louis National Stock Yards at $20 to $60 per cow and calf. They are not much until you get to $45 and upward.

The Dry-farming Congress.

Many of the most famous agriculturists throughout the world have places on the programme of the International Dry-farming Congress, which meets at Colorado Springs, Colo., October 16th. The Congress is devoted to the propaganda of better farming, along the intensive lines known as "dry-farming" methods. It has 15,000 paid members and is the largest agricultural society in the world. Among the prominent names are: W. M. Hays, First Assistant Secretary of Agriculture; M. A. Carleton, Cerealist, Department of Agriculture; Dr. A. C. True, Director of Experiment Stations; Hon. W. R. Motherwell, Director of Agriculture of Saskatchewan, Can.; Hon. Duncan Marshall, Minister of Agriculture for Alberta, Can.; Hon. J. Ed. Caron, Minister of Agriculture for Quebec; and the following Presidents of Agricultural Colleges: Dr. L. H. Bailey, of New York; Dr. K. L. Butterfield, of Massachusetts; Dr. J. H. Connell, of Oklahoma; Dr. J. H. Watters, of Kansas; Dr. J. A. Widtsoe, of Utah; Dr. J. H. Worst, of North Dakota; Dr. W. E. Garrison, of New Mexico; Dr. C. A. Lory, of Colorado; and others.

St. Louis Root Quotations.

On the St. Louis market, September 30th, the following were wholesale root quotations: Golden Seal at $4.30 per pound; Lady Slipper, 15c.; Seneca, 34c.; Pink, 18c.; Black, 6c.; May Apple, 4c.; Snake, 24c.; Kansas Blacksnake (Echinacea), 11c.; do. Oklahoma, 6c.; Missouri nominal; Angelica, 5c.; Wahoo—Bark of root, 20c.; bark of tree, 4c.; Blood, 4½c.; Blueflag, 5c.; Sassafras—Bark of root, 5c.; Wild Ginger, 9c.; Spikenard, 3c.; Skullcap, 7c.; Ginseng—Wild, $5.50 to $5.75; and cultivated, $5.25 to $5.50 per pound.

St. Louis Quotations For Nuts.

Wholesale quotations for nuts on the St. Louis market, September 30th, were as follows: New Western pecans, 8 to 9c. per pound; new Texas pecans, 9 to 10c.; new black walnuts, $1.25 per bushel; new hickory nuts, $1.50 to $1.75 per bushel; Shellbarks, $1.75 to $2.00 per bushel; hazelnuts, 6c. per pound; peanuts at 3 to 3½c. per pound for farmers' stock.

Not the Result Expected.

A movement is on foot in Texas to eliminate competition in selling live stock. The idea is to consolidate all the important shippers into one company and cut out all commission firms but that one and giving that one a monopoly of the offerings. The result expected from this combination is better markets, higher prices, more competition and a big time all round.

All this was attempted before. The American Live Stock Commission Company was organized by Texas cattlemen and went into the live stock markets with the avowed intention of doing away with all the market rules then existing. They disregarded the commission rules, went into the stock-car transportation business, shipped large numbers of cattle to market, and finally did come within a fraction of controlling the shipments of grass Texas cattle when grass cattle were nearly all the cattle shipments from Texas.

They antagonized everybody they came in contact with. They wanted competition for themselves, but they rubbed the monopoly on everyone else. They did not try to find out how the market was, but they did try to convince others how the market ought to be, and the others refused to be convinced. Furthermore, although their mismanaged shipments did often break the market, it is not of record that they ever received a strong price for any shipment. They sold nearly all they had to the big packers and ignored the small buyers that were trying to fill their orders for single car-loads.

The fact of the matter is that the great influence that has built up live stock markets is the competition between commission men, each trying to outdo the other in selling the consignments entrusted to their care. The buyers represent the opposing force in selling, but the efforts of commission men to outdo each other keep them all working, fighting, competing and guessing. Eliminate the commission firms and the market will be robbed of the principal element of competition, and then the buyers will have an easy time with the one great live stock selling monopoly that will remain with their cattle in the yards eating their heads off.

Some who will read this will say: "That man is working for the commission business and he does not know what he is talking about;" but he does know, and has been through it all—as cattle raiser, as market reporter and as spectator for thirty-five years. But for the commission men the great packers would now be buying Texas cows at 1½ cents a pound and steers at 2½ to 3 cents, the same as they used to do. The commission firms enter into two contests every market day, one with the buyers who try to buy cattle cheap and the other with competitors of their own kind that are trying to get away their trade. The result is, that the stockmen have better markets than cotton growers, tobacco raisers, grain producers or fruit growers. Stockmen have well organized competitive markets on which none of the packing-house buyers can afford to go to sleep, and if they wish to buy cattle they have to make a noise like cattle buyers.

The Bogus Reciprocity.

When the voters of British North America decided to decline the offer of the United States government in the matter of reciprocity, they acted not wisely but they acted decidedly. In Canada the people vote for or against all great measures, and the failure of the people of Canada to ratify the treaty which had already been accepted by the United States government caused the overthrow of the ministry that was in power in Canada when the draft of the treaty was made.

As between the farmers of the United States and the farmers of Canada, the treaty was decidedly in favor of the Canadian farmers. Those legislators in the United States Congress who voted for reciprocity voted for the interests of Canadian farmers, and they voted against the interests of the farmers of the United States. As the incident is now closed, it may not be worth while to reopen the grave of bogus reciprocity for the present, but it is well worth while to remember that it is easy to ascertain by the records who it was that voted against the farmers of the United States in the greatest issue that the interests of farmers as a class were involved. What they have done once they will certainly do again whenever the opportunity presents itself.

Barley is a good crop, and for the present there is a duty on foreign barley; in other words, the American farmer has not yet been legislated out of his own market.

Mitchell AUTOMOBILES
Runabout, fully equipped, $1200

The Wheat Situation.

Now that the reciprocity proposition is cleared away, thanks to our good neighbors in Canada, the wheat market is relieved of the possibility of an oversupply of foreign-raised wheat coming in duty free. The duty to be paid on every bushel of wheat admitted into the United States is 25 cents, and that duty will remain until it is legislated away.

Notwithstanding foreign wheat is dutiable and the American farm production is protected by that duty, wheat is not scarce, neither is it high in price. From the farmer's standpoint wheat is cheap. The United States farmers are raising about eight bushels of wheat a year for every man, woman and child in the United States of America, consequently there ought not to be much complaint.

For the last six months cash wheat has sold in St. Louis largely at 85 to 90 cents a bushel, and if the cost of transportation and sale is deducted the farmer has been getting 75 to 85 cents for a sixty-pound bushel of wheat. Since reciprocity has passed, wheat has nearly resumed the prices of a year ago. On September 30th, 1910, cash wheat sold in St. Louis at $1.00 to $1.04 a bushel, and on September 20th, 1911, cash wheat in St. Louis sold at 98½ to 99½ cents.

To give an idea of the normal wheat market, we give quotations of September 30th, 1910 and 1911, and examples of markets depressed by fear of reciprocity are given for June, July and August, 1911.

Quotation of	Sept.	Dec.	May.
Sept., 1910.	$0.93½	$0.97⅞	$1.02⅛
June, 1911.	89⅞	92¼	.....
July. 1911.	89⅞	93⅝	98
Aug., 1911.	89	94¼	1.00¼
Sept., 1911.	94¾	98¼	1.04¼

It will be seen that at the close of business September 30th, 1910, No. 2 wheat for September delivery closed at 93½ cents a bushel, but in August, 1911, the new September quotation dropped to 89 cents; but when they gave up reciprocity the Canadians gave us back our normal market, which was worth five cents a bushel immediately, and in our opinion will be worth five cents more later on.

The most significant quotation on the list is $1.04¼ a bushel, quoted September, 30th, 1911, for wheat to be delivered May 30th, 1911. With the present outlook there is nothing weak in the appearance of the wheat market.

Butter in New York.

At the close of September butter was selling at wholesale in New York as follows: Creamery specials, 29c.; firsts, 28c.; state dairy, finest, 27c.; good to prime, 24 to 25c;. common to fair, 20 to 23c.; factory, current make firsts, 20 to 20½c.; seconds, 19½c.

What Governor Donaghey Said.

At a meeting of cotton farmers and business men held at Little Rock, Ark., to devise ways and means for getting a better price for cotton, Hon. Geo. W. Donaghey, Governor of the state of Arkansas, declared that as an economic proposition it might be better to burn some cotton and sell the remainder at a larger price than to grow a large crop and sell it at a small price, which goes to prove that the Hon. Governor of Arkansas has much to learn as an economist. A bale of cotton that is out of debt is very easy to hold; it does not eat three meals a day, neither does it require very much shelter. If a man has borrowed 10 cents a pound on his bale, however, and he wishes to burn that bale, he will have to buy it back again before he can rightly burn it. But it is not necessary to burn cotton to keep it off the market. That can be done by an agreement that is possible and reasonable. Cotton growers can easily reach an agreement to divide their cotton into twelve parts and each twelfth part be sold each month. It is a year's crop and the market is always reduced by placing it all on sale at one time. If it is divided into twelve parts it will sell for all the cotton is worth on the market. In fact, there could be a standing rule that no man raising cotton should sell more than one-twelfth of his cotton crop in any one month, unless he pay a penalty for doing so.

A man with four bales of cotton could sell one every three months; a man with six bales could sell one every two months; the man with thirty-six bales would sell three bales a month, and so on. The sale of the largest crop in the world being regulated, the market would adjust itself. Every man who of necessity must violate the selling rule should be released from his obligation on payment of one dollar a bale to the Central Cotton Growers' Association, out of which all expenses could be paid.

The editor of The National Farmer and Stock Grower has advanced this idea before and will probably do so again and again without any influential men favoring it; but we have no hesitation in saying that some day it is the manner in which the sale of cotton will be regulated in the interest of the producer. In the meantime, Governor Donaghey is welcome to burn his own cotton.

Prices of Cash Grain.

Once a month we try to make a record of the cash prices for wheat, corn and oats on the St. Louis market. That will enable our readers to build up a line of handy information by keeping a file of the paper. The day we select is the last day of each month. The following were quotations September 30th, 1911.

Sample wheat in bulk on track.—No. 2 red sold at 98 to 99½ cents: No. 1 at $1.00. No. 1 is an unusual grade. No. 3 red sold at 96 to 98 cents; No. 4 red sold at 94 to 97 cents; No. 2 hard sold at $1.00 to $1.01 (soft Illinois) to $1.04 for semi-dark; Turkey, $1.08 to $1.12; No. 3 hard at $1.00 to $1.02; No. 4 hard at 95 to 98 cents.

Sample corn on track.—No. 2 corn, 68¼ to 68½ cents; No. 3 corn, 67¾ cents; No. 4 corn, 67 cents: No. 2 yellow, 68¼ to 69 cents—mainly 68½ cents; No. 3 yellow, 68 cents; No. 4 yellow, 67 cents; No. 2 white, 70 to 70½ cents; No. 3 white, 69½ cents; No. 4 white, 68½ cents.

Sample oats on track.—No. 2 white, 47½ to 48 cents; Standard, 47 to 47½ cents; No. 3 white, 46¾ to 47 cents: No. 4 white, 46¼ to 46½ cents; No. 2 oats, 46½ cents; No. 3 oats, 46 cents; No. 4 oats, 45¼ cents.

Home-made Gas-Light From Crushed Stone

TWENTY years ago the oil lamp had already been driven out of the city into the country home, where gas could not follow—so we thought.

In those days we would have laughed at the idea of a country home lighted with gaslight.

But like the telephone and free mail delivery gaslight has finally left the city to become a common rural convenience.

In the year 1911, the up-to-date villager or farmer not only lives in a gas-lighted house, same as his city cousin, but when he drives home on a cold, wet night he actually lights up his barn, his barnyard or porches on his house with this gas-light by simply turning an "ignition" button on a post or wall.

* * *

And this change seems quite like magic when you consider that this rural gas-light is home-made— made by the family itself right on the premises.

CRUSHED STONE

Take fifteen minutes once a month to make all that can be used in a large house.

The magic is all in the curious manufactured stone known commercially as "Union Carbide."

This wonderful gas-producing substance, "Union Carbide," looks and feels just like crushed granite. For country home use it is packed and shipped from warehouses located all over the United States in sheet steel cans containing 100 pounds.

Union Carbide won't burn, can't explode, and will keep in the original package for years in any climate. For this reason it is safer to handle and store about the premises than coal.

* * *

All that is necessary to make "Union Carbide" give up its gas is to mix it with plain water—the gas, which is then instantly generated, is genuine Acetylene.

When piped to handsome brass chandeliers and fixtures Acetylene burns with an intensely brilliant, stiff flame, that the wind can't affect.

This flame makes light so white in color that it is commonly called "Artificial Sunlight."

Experiments conducted by Cornell University have proven that it will grow plants the same as sunlight itself.

Physicians recommend Acetylene as a germicide and a remedy for eye-strain, and it is used as an illuminant in fifty-four hospitals in New York City alone.

Then, too, Acetylene is so pure that you might blow out the light and sleep all night in a room with the burner open without any injurious effects whatever.

On account of its being burned in permanent brass fixtures attached to walls and ceilings, Acetylene is much safer than smoky, smelly oil lamps, which can easily be tipped over.

For this reason the Engineers of the National Board of Insurance Underwriters called Acetylene safer than any illuminant it commonly displaces.

In addition to all these advantages, Acetylene light is inexpensive.

An Acetylene light of 24 candle-power costs only about 4 cents for ten hours' lighting, while for the same number of hours regular oil lamps of equal volume cost about 6 cents in kerosene, chimneys and wicks on the average.

* * *

Consider this carefully and you will hardly wonder at the fact that there are today no less than 185,000 town and country homes lighted with home-made Acetylene, made from "Union Carbide."

Once a month some member of the family must dump a few pounds of "Union Carbide" in a small tank-like machine which usually sets in one corner of the basement.

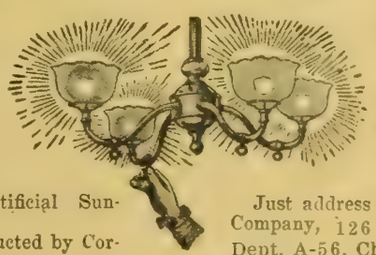
This little tank-like machine is automatic—it does all the work—it makes no gas until the burners are lighted and stops making gas when the burners are shut off.

The lights located in every room in your house, on your porches, in your horse and cow barns, or barnyards and chicken yards if you like, will all be ready to turn on with a twist of the wrist or a touch of the button at any time of the day or night.

No city home can be as brilliantly or as beautifully illuminated as any one of these 185,000 homes now using Acetylene.

* * *

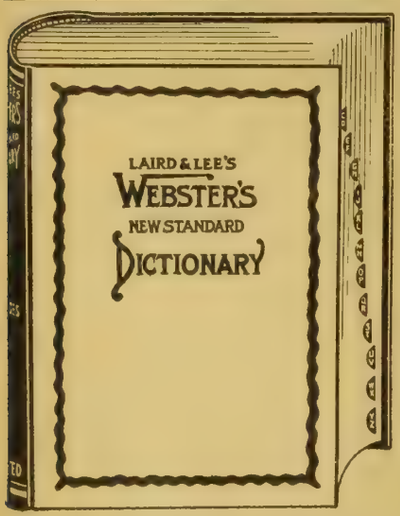
If you want to be up-to-date, enjoy modern conveniences, and keep the young folks at home, write us how many rooms and buildings you have. We will send you free an intensely interesting lot of facts, figures and booklets.



Just address Union Carbide Sales Company, 126 Michigan Blvd., Dept. A-56, Chicago, Ill.

WEBSTER'S DICTIONARY.

This is Laird & Lee's Webster's New Standard Dictionary of the English Language, a wonderful book, 756 pages in all, 840 illustrations, substantially bound, gilt title, red edges, patent thumb index. Special edition for office and general use on farms, estates, ranches, etc.; massive but handy; contains ten encyclopedic features, supplement of new words, dictionaries of biography, geography, musical terms, Biblical, classical, historical and mythological names, foreign phrases, English



word-building, rules in orthography, current abbreviations, metric system with conversion tables; weighs twenty-eight ounces. Our offer to you. Send us one dollar and we will send you The National Farmer and Stock Grower for two years and we will also send you, postage paid, safe delivery guaranteed, one copy of this great Webster's Dictionary. We also agree to refund money and pay return postage to anyone who is not satisfied with the bargain. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Natural Adaptability to Fruits.

It is of no use for one to expect to grow fruits on a large scale in a locality not adapted to them and compete with the same varieties of fruit grown in localities that are adapted to them, unless the adapted regions are at such a distance that transportation is too costly.

Thus, in the growing of certain fruits we see one country best adapted, and for other varieties of fruit we see other countries best adapted. Where a thing grows naturally is the best place to grow it under world conditions such as we have to-day.

Compare North America and Europe in this regard. Much of Southern Europe, where oranges and lemons grow, is as far north as the southern parts of New England. Yet we cannot grow such fruits for hundreds of miles south of New England. The same is true of many of the fruits that the South Europeans grow and ship to us.

The fact is, that the two continents are extremely diverse in the matter of fruit-growing conditions. Southern Europe is formed by nature to grow such fruits as are grown there. Look at a map of Europe and see how several towering ranges of mountains shut off the cold winds from the north. The Pyrenees north of Spain, the Alps north of Italy, the Apennines and the Balkans barring the winds from Italy, Southern Austria and Greece and some of the less important states. These four great ranges of mountains insure a semi-tropical climate for all the vast region south of them, a region extending from the Atlantic Ocean to the Black Sea.

But how about North America! Not a single range of mountains runs for any considerable distance east and west. They all run north and south. We have nothing between us and the Arctic Ocean. Its cold gales come sweeping down upon us from the Northwest and sometimes push way through to the Gulf of Mexico. Sometimes they have withered foliage even on the north shores of the Island of Cuba.

But these same cold winds make one fruit more successfully grown here than in Europe, and that is the winter apple, the apple that is so hard in texture when it is ripe that it can be kept till spring, if need be, and can be sent all over the world without spoiling. It is wise for our Northern orchardists to push the growing of the winter apple.

But the American continent has some great advantages over Europe and most of the Eastern Continent in the growing of fruits. The great sub-tropical and tropical region just beyond our frost line to the south is by nature so adapted to the growing of bananas that it can supply North America and Europe with bananas. It has the rich land, the moisture and the heat, and is in the track of commerce. South of Europe is the Mediterranean Sea, and south of that North Africa, mostly moisture depleted or a burning desert. No banana growing there worth mentioning!

North America, including its adjacent islands, has the advantage in the supplying of both apples and bananas, and the growing and selling of these two commodities will make this continent richer than our gold mines ever did.

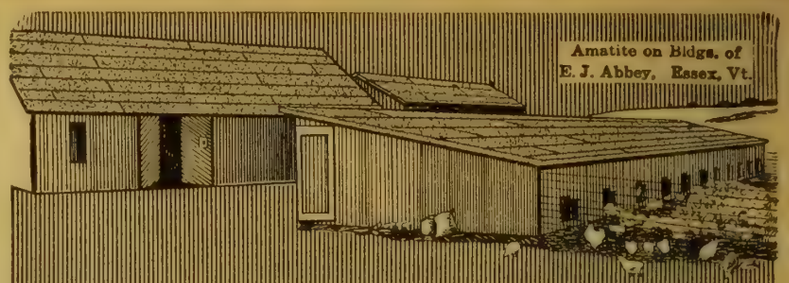
A Market Wheat Record.

On July 10, 1911, was recorded the consignment of the highest grade of wheat that ever reached the St. Louis market. There were two cars to the John Mullally Commission Company. It was hard winter wheat of the yellow variety, and was shipped from De Kalb county, Missouri. One car tested 66 pounds to the bushel and the other car 65½ pounds to the bushel. Old grain traders on the Merchants' Exchange marveled at this test. At first some of them refused to believe John Mullally's report on the test, and they formed a committee, which made a test and satisfied themselves.

It is of record that the Merchants' Exchange received some soft winter wheat in 1901 which ran 64½ pounds to the bushel. Samples of this were sent to the Pan-American Exposition that year and was awarded honorable mention. A few of the old timers on 'Change said they remembered some wheat back in the 70's which tested 65 pounds, but Mr. Mullally said there was some doubt about this. Sixty-two pounds to the bushel is considered exceptional wheat.

The De Kalb county consignment graded as No. 1 and was sold to the Sparks Milling Company, of Alton, for 91 cents a bushel. The wheat was of a very plump berry and remarkable for the absence of small-sized berries.

In high quality of the grain the 1911 wheat from Missouri is on a par or better than the famous crop of 1901. The main difference between the two years is that in 1901 the red winter wheat carried off the palm, while this year the hard wheat is the better. Nearly all the hard wheat which has come to St. Louis has graded No. 1. The No. 1 grade establishes the finest seed wheat, but the De Kalb county consignment is so superior to the average No. 1 hard wheat that it is really entitled to a special grade.



Amatite ROOFING
Needs No Painting

TRADE B MARK

AMATITE *roofing is weaned.* It doesn't need to be watched over and fussed with and cared for.

It takes care of itself from the start. As soon as it is laid on your roof, you can go away and forget about it.

You *don't have to paint* Amatite every two years as you do the "rubber" kinds. Amatite has a mineral surface which needs no painting.

The mineral surface is better and more durable than many coats of paint.

Back of the mineral surface is a layer of pitch, the greatest waterproofing compound known. Back of the pitch is a layer of felt (a whole ready roofing in itself), and behind this is another layer of pitch and another layer of felt. The result is a strong, durable roof which can take care of itself in any climate without painting.

We will be glad to send you free a sample of Amatite Roofing so that you can see for yourself just what it looks like. Address our nearest office.

Everjet Elastic Paint

Low in price. Great in durability. Invaluable for prolonging the life of ready roofings, fences, iron work, etc.

Imports of Raw Cotton.

During the year ending June 30, 1911, the raw cotton imported from foreign countries and admitted duty free into the United States amounted to 113,768,313 pounds, invoiced at $24,776,320. Of this imported cotton 7,577,549 pounds arrived from Great Britain; 4,708,413 pounds from Peru; 11,421,951 pounds direct from Asia; 88,366,861 pounds from Egypt; and 1,633,539 pounds from other countries. In addition to the raw cotton there came in 35,740,475 pounds of cotton waste also duty free.

At the farm of Wm. Bell, of Cortland, N. Y., eighty head of dairy cows sold at auction for an average of $75 per head. These were grade Holsteins and belonged to a milk-shipping herd.

On August 1st, 2,971,000 cases of eggs were reported in cold storage by thirty-five cold-storage houses belonging to the American Warehousemen's Association.

The Russian crop of wheat is not expected to be very heavy this year.

"EVERYBODY"
Can Afford a Gasoline Engine
With Galloway's New Low Prices

1½ HP
$27.50

You've never before heard of such startling values—I've never offered anything like them and you know full well that no one else has ever come anywhere near my regular prices. But this time I've a startling reason—*I want 10 men in every township in the county to own and operate a Galloway Engine*—I've decided to double my factory capacity by increasing the sales twice and sell two where I formerly sold one—this calls for unusual values—hence, the greatest offer I have ever made. I can save you from $25 to $300 on an engine according to the H. P. needed. It doesn't matter what sized engine you want I've got the one to fit your wants and do more work and better work at less actual cost than any other engine in the world. Write at once for full information of the Greatest Offer Ever Made To American Farmers—don't delay but send me your name and address now, before you do another thing. Let me prove to you in cold facts why I can put $25 to $300 in your pocket

Other Prices in Proportion

Pump Jack $3.95

No Such Quality in any engine - no matter what price you pay - the Galloway price saves you $25 to $300

THE SEWING AWL.

A Most Useful Premium For Subscribers to The National Farmer and Stock Grower.

A farm on which there is not a sewing awl is in difficulties when work is most pressing. It is surprising how useful this little implement is. It is the Myers Famous Lock Stitch Sewing Awl. It is the only sewing awl made with a groove running the full length of the needle and has what is known as a diamond point. In order to sew leather or any heavy, thick material without breaking or cutting the thread it requires a needle with the groove running the full length of the needle. You might just as well have no groove in the needle as to have it only part of the way. With the Myers Awl you can sew old or new harness, saddles, carpets, canvas, tents, rugs, quilts, shoes, grain bags, and many other things. You can use any kind of thread in the Myers Awl, and it makes a lock stitch same as a sewing machine. It is very simple; a woman can use it as well as a man. It is one of the most practical devices ever invented. They are put up with two needles—one is straight and one curved—with a small screw-driver and wrench combined; also a reel of waxed thread with each awl ready for use. Every teamster and farmer should own a Myers Lock Stitch Sewing Awl, as there is use for one in almost every household. The Myers Awl is nicely finished, the metal parts are nickel-plated, the needles and wrench are kept in the hollow handle, which has a screw top.

Anyone who will send one dollar cash to pay in advance for two-years' subscription to The National Farmer and Stock Grower can select one of Myers' Lock Stitch Sewing Awls, which we will send by mail, postage paid, as a free premium. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

To Club Raisers:—Anyone sending us four subscriptions and $4.00 to pay for same will be credited with two-years' subscription and one sewing awl free.

Alfalfa in Central Illinois.

A correspondent from Effingham county, Illinois, writes: "Will alfalfa do well in this county, and will the ground need to be inoculated?"

On the bottom lands in this county alfalfa will do well, but it is more of a problem to get it to thrive on the uplands. I believe there is some hard-pan in some localities in this county, and on this class of soil alfalfa will not do well. Inoculation is a much quicker and surer method of getting a stand of alfalfa; still, conditions are so nearly ideal along the river bottoms in this county that I would risk seeding without inoculation. Sow plenty of seed; say, fifteen to twenty pounds to the acre.—L. C. Brown.

Early Corn Not So Good.

A Clinton county (Indiana) correspondent asks these questions about corn: "For several years corn in this section has not matured, so last spring I planted my field with a 100-day variety and commenced planting on May 12. My crop is not near so good as late corn. Would you stick to the early corn, or grow something bigger?"

That very question will bother lots of corn growers this season. The dry weather hurt the early corn and has measurably cut down the yield, while the shooting period of the late varieties had the benefit of the fall rains, and consequently late fields will yield away above the early sorts. The man who changes his practice with every new condition will miss it more often than he hits it. I advise growing the corn which will mature in a normal season. If early corn has produced a bigger crop four years out of five, I would stick to it. One year Boone County White got ripe in latitude 42 degrees; still, no sane man would plant this variety so far north year after year.—L. C. Brown.

Packers in Uruguay.

Consul Frederick W. Goding sends the information from Montevideo that the contract for building the modern packing house in Uruguay for Chicago capitalists was given to Engineer Adolfo Shaw. The excavations for the foundations have been made, and the entire structure is to be completed in July, 1912. The manager states that it is to be the most up-to-date packing house in South America. Montevideo is the principal seaport of Uruguay, a country situated south of Brazil and bordering on the Atlantic Ocean, east of the Argentine Republic. Montevideo is on the sea route to Buenos Ayres.

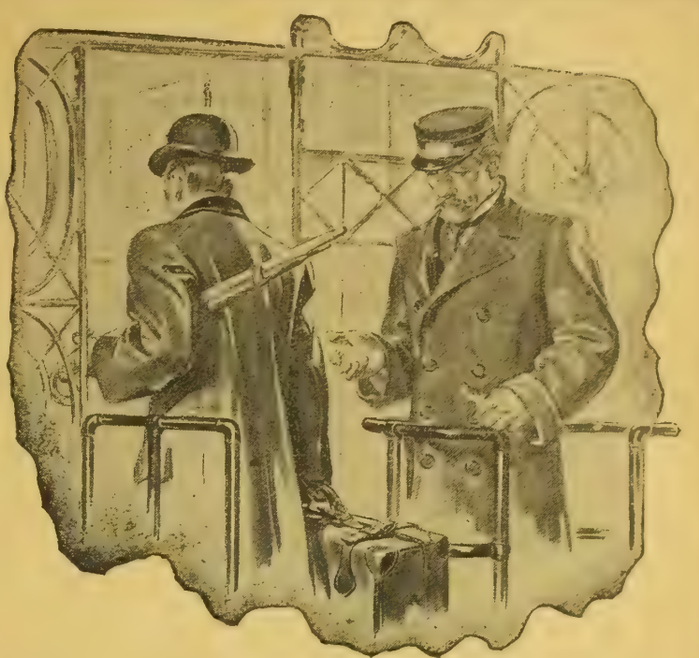
Time to Buy Sheep Feeders.

According to a calculation by Clay, Robinson & Co., the movement of sheep from the markets to be fed have decreased 278,292 head, or 40 per cent. below the total number taken out to be fed a year ago. Furthermore, when the calculation was made sheep suitable for feeding purposes were $1.75 per 100 pounds lower than a year ago. The argument advanced by Clay, Robinson & Co. was, that it is better to buy feeding sheep when they are low than to come in later when they are high. Clay, Robinson & Co. can buy sheep for you on any one of ten markets—Chicago, South Omaha, Kansas City, South St. Joseph, East St. Louis, Denver, Sioux City, South St. Paul, East Buffalo or Fort Worth.

New Zealand Chilled Beef.

As distinct from frozen beef the New Zealand shippers are now forwarding chilled beef, or, as we call it, "dressed beef," to London. The last shipment sold for 9½ cents a pound wholesale for hind quarters and 7 cents a pound for fore quarters. The shipment required fifty days from loading in New Zealand to delivery in London.

"The Eradication of Quack Grass" is the title of Farmers' Bulletin No. 464, issued by the United States Department of Agriculture, Washington, D. C.



The Howard Watch

The "Big Limited" moves out on the tick of the second—does its thousand-mile run and arrives *on time.*

Foreign railroad men marvel at the reliability of American train service. They do not realize the character of the American railroad employee—his acute sense of time—and the *watch* he carries.

The HOWARD Watch is *railroad standard*—officially certified and adopted by the Time Inspectors of 180 leading American railroads.

Its *adjustment* is so finely accurate—its special *hard-tempered* balance and its sturdy pivots run so true under jolt and vibration.

These are the crucial points where the ordinary watch goes back on its owner—the jar of driving over rough roads, or even of walking, knocks it out of true.

A HOWARD Watch is always worth what you pay for it. It is the only watch that has a *real investment value*—and about the only one there is any distinction in carrying.

The price of each watch—from the 17-jewel (*double roller*) in a Crescent or Boss gold-filled case at $40 to the 23-jewel in a 14K solid gold case at $150—is fixed at the factory and a printed ticket attached.

Find the HOWARD jeweler in your town. When a man makes a permanent investment like the purchase of a HOWARD Watch he naturally wants to *see* what he is buying—he wants to get the dealer's expert advice. The HOWARD Watch is sold only by legitimate jewelers—and not every jeweler can sell you a HOWARD. The jeweler who can is a representative merchant—a good man to know.

Send us your name on a postal card and we will send you—FREE—our pamphlet—THE STORY OF EDWARD HOWARD AND THE FIRST AMERICAN WATCH. It is a chapter of History that every man and boy in this country should read.

The National Farmer and Stock Grower.

(Title Registered in U. S. Patent Office.)

Published Monthly
By THE HALE PUBLISHING CO.
Philip H. Hale, Managing Editor.
Claude A. Cour, Advertising Manager.

Charles H. Hopkins, 150 Nassau street, New York City, Eastern Representative.

Entered at Postoffice at St. Louis, Mo., as second-class matter in January, 1901.

Subscription Price in the United States, 50 cents a year, or three years for one dollar.

Office of Publication, 3550 Vista avenue, St. Louis, Mo. Bell Phone: Grand 400.

PUBLISHER'S ANNOUNCEMENT.

On the 1st day of January, 1912, The National Farmer and Stock Grower will be published by The National Farmer Publishing Company, of St. Louis, Missouri. The National Farmer Publishing Company is being organized for the purpose, purchasing the business of the Hale Publishing Company, of St. Louis, with the avowed intention of increasing the real estate holdings, adding largely to the printing plant and to operate the enterprise on a magnitude of about four times the present basis.

The Hale Publishing Company owns and issues regularly several books and periodicals. The former include the Agricultural Blue Book, published annually, which is a directory of live stock breeders and of merchants and manufacturers who do business with stockmen and farmers. Another is the Book of Live Stock Champions. A new edition, now advertised, is to contain 1,000 pictures with records of each animal. The History of Agriculture by Dates is another book publication which is beginning to be used as a text book in schools and colleges. These books have always paid a profit to the publisher, although most of the printing, lithographing, engraving and binding has been sent out to other establishments.

The periodical publications of the Hale Publishing Company consist of The National Farmer and Stock Grower and the Universal Magazine. These are both issued monthly. The National Farmer and Stock Grower report to the Congressional Committee of Postoffice Expenditures accounted for an average of 250,000 pounds of paper used in twelve issues, weight six to the pound, average issue 125,000 copies, of which quantity 82 per cent. was mailed at second-class rate to subscribers. This has always been an influential farm publication.

The Universal Magazine was first issued in June, 1907, and is now over four years old. At the time it was entered at the postoffice as second-class mail matter so many new regulations were being put into force and effect that it was thought best to concentrate all efforts on The National Farmer and Stock Grower. But the Universal Magazine had literary merits, a good title and is increasing in value. This publication with economical management has never lost a cent and is forging to the front. It is now more than paying its way, and that without soliciting any advertising. With proper effort and capitalization the Universal Magazine alone will pay 10 per cent. annually on one hundred thousand dollars.

The Hale Publishing Company was capitalized at $35,000, and as the business enlarged the stockholders added $10,000 on a 6 per cent. interest basis for the purpose of buying machinery. The majority of this advanced money has since been repaid out of the earnings of the company. Outside of what is left of this obligation the Hale Publishing Company has no indebtedness. The business, printing plant, patents, copyrights, are all free and clear, and will be turned over to The National Farmer Publishing Company at actual value for the purpose intended and will be paid for in 6 per cent. bonds of the new company or in capital stock, as the seller may elect.

About fifty thousand dollars will be required for a new building. The site selected is 100 feet front on the south side of Park avenue, near Jefferson avenue and Lafayette Park, St. Louis, and the architect's plans provide for a six-story building, with about 5,400 square feet of floor space. This building is calculated on a basis that the amount of space available for rental to others will leave the company free of expense, and the rental of the tenants will be sufficient to pay a dividend on the investment. Several other publishing firms have indicated a desire to lease space in the building. The location is the best obtainable, being nearest available clear space to the new St. Louis postoffice at the Union Station, where all St. Louis periodicals must be mailed.

The Hale Publishing Company is paying dividends. For the year 1911 (last three months estimated) the earnings are sufficient to pay 6 per cent. on the small indebtedness and 10 per cent. on the capital stock. All the working money of the Hale Publishing Company on hand December 31st, 1911, will be turned over to the new company in exchange for stock in The National Farmer Publishing Company.

The capital stock of The National Farmer Publishing Company will consist of 1,000 shares of par value of $100.00 each. Every share will be sold at full par value, payable 10 per cent. with application, 25 per cent. January 1st, 1912, 25 per cent. April 1st, 1912, and 40 per cent. July 1st, 1912. This is an invitation to subscribe for the stock.

The bonds of The National Farmer and Stock Grower will consist of 100 of the denomination of $1,000 each. The bonds will mature in twenty-five years and bear 6 per cent. interest. The bonds will be dated January 1st, 1912, and the interest will be paid monthly if desired. Interest coupons will be issued, payable quarterly, but if the coupons are deposited with the Farmers' & Merchants' Trust Company, of St. Louis., the dividend checks will be forwarded monthly. Payment for bonds will be 10 per cent. with application, and the balance January 1st, 1912. The bonds will be secured by first mortgage upon the business and property of the company.

So far this is a brief, simple statement of the change to be brought about. The reason is easily made apparent. The profits of such publications begin at the unit of one hundred thousand copies. The first 100,000 copies of The National Farmer and Stock Grower cost 3 cents a copy, and the second 100,000 cost 1¼ cents a copy. There is twice as much profit in selling the second 100,000 copies that there is in selling the first. This applies to books and papers. While the small business staggers along touching bottom, the business with ample capital reduces cost to a minimum and organizes selling forces which are irresistible.

This publisher's notice is probably the only prospectus that will be issued. The reorganization changes the name of the corporation, but the men who have been successful in establishing the business will continue their investments. The money required is for expansion and enlargement.

Our Industrial Policy.

The National Farmer and Stock Grower is in favor of the United States collecting a reasonable range of customs duties upon all foreign farm products and on all manufactured goods admitted into the United States from foreign countries, said duties to be applied to the support of the national government.

Every farmer in the United States is taxed by his county and by the state, and he pays indirect taxation for the support of the federal government. We believe that the advantages of our own markets belong to the citizens of the United States, and that all foreign farm productions should pay a duty at the front door as the goods are admitted. By collecting these customs duties the government receives the income that is necessary and must be collected for the public service, and the farmer has a very moderate degree of what is called protection. In times of scarcity caused by drouth the foreign farm productions can come in on a fair basis, and in times of abundance the country thrives better without them.

We believe the farmer as a producer outranks all other people; the manufacturer is next; but without the farmers' products the manufacturer would have to shut his doors. Legislation against the farming interest is the height of folly, and special discrimination against the farmer is a political crime. It will cause more poverty in the cities than most people imagine. The non-producing, so-called consumers in cities will be the first to find it out.

Continue Raising Grain.

The grain farmers of the United States may just as well go on raising grain as fast as they can and as much as they can, otherwise Congress will very likely admit foreign grain free of duty from all countries, reciprocity or no reciprocity.

SATISFACTORY STEEL SHINGLES.

The manufacturers of Edwards Reo Steel Shingles have long given a bond against damage by lightning, and, so far as the roof is concerned, farmers state those steel shingle roofs are the best protection against fire, and anyone who knows the ease with which wood shingles burn will agree with them. This is a very important thing to consider on the farm where it is hard to prevent flames from spreading from one building to another.

A patent interlocking device protects the nails and prevents rusting or leaking. Anyone can put on the roof with hammer and nails.

Reo Steel Shingles are made of Bessemer steel in sheets five to twelve feet long and twenty-four inches wide. They come freight prepaid in either painted or galvanized steel and all ready to put on. They make a beautiful roof.

The Edwards Manufacturing Company is the largest manufacturer in their line in the country and have a special paying proposition to up-to-date farmers who will represent them.

Every reader of this paper is invited to write for the company's valuable roofing book and this special proposition. Address the Edwards Manufacturing Company, Lock street, Cincinnati, Ohio, and ask for Catalogue 1057.

Dried Fruit at St. Louis.

The following were wholesale prices for consignments of dried fruit at St. Louis on September 30th, 1911: Evaporated apples rings—Poor to fair at 5 to 6c; good at 6½ to 7c.; choice at 7½c.—fancy, suitable for facers, bring more; evaporated quarters from 5 to 7c.; cores and peelings, 1½ to 1¾c.; chops at 1 to 1½c. per pound; evaporated pears, choice at 7 to 7½c.; chopped not quotable. FRANKLIN INSTITUTE, Dept O 107, Rochester, N.Y. (Examination coaching free.)

This Free Book Will Save You $20.00 a Year

I want to tell you all about my *Celebrated Steel Shoes*—why one pair will outwear six pairs of leather shoes—how a pair will give you more foot-comfort than you ever had in your life. How they will keep your feet powder-dry all the time. How light and comfortable they are the year around.

I have told half a million others these facts. They have bought steel shoes of me and saved millions of dollars among them. More than that—they can be on their feet all day—at any work, without foot fatigue. And they have gained health protection.

Steel Shoes

N. M. RUTHSTEIN
The Steel Shoe Man.

prevent rheumatism, sciatica, lumbago, lame back and other troubles caused by wet feet. I want to show you the way to avoid these dangers and all such troubles as tender feet, corns, bunions, chilblains, and at the same time show you a saving of $20 a year in actual money on account of the extra wear you get from my shoes.

Will you write me a postal today and get full particulars? Let me send you this free book of mine by return mail.

Address

254 Seventh St.
Racine, Wis.

A Fine Animal Regulator.

Live stock and poultry books of useful quality are to be had free by addressing Pratt Food Company, Dept. 54, Philadelphia, Pa. Our readers will remember a few years ago the many stock foods, tonics and regulators that were advertised. Under close government scrutiny many of these have "petered" out because there was no merit in them. To-day Pratts Animal Regulator is a stronger proposition than ever. Read about it on page 10.

Dairy Show Veterinarian.

It is announced that the International Dairy Show, which meets at Milwaukee, October 10th to 18th, 1911, has appointed Dr. David Roberts, of Waukesha, Wisconsin, as official veterinarian. Dr. Roberts has also been appointed official veterinarian for the National Dairy Show, which holds its annual session in Chicago from October 26th to November 4th.

These are deserved honors for the eminent veterinarian, and both the dairy shows are to be congratulated on securing his services. This is not Dr. Roberts' first experience in matters of this kind. He has so frequently been called upon to serve as veterinarian at live stock shows that it has become something of a habit with him.

Dr. Roberts is advertising with us a fine live stock book free to stock owners. It is worth writing for. Address, Dr. David Roberts Veterinary Company, 90 Grand avenue, Waukesha, Wis.

LAND SALE BY UNCLE SAM.

Oklahoma Acres at Low Prices to Encourage Settlement by Good Farmers.

Uncle Sam is going to auction off about 1,650,000 acres of land in Oklahoma this fall. The sales will begin November 2d, 1911, and will run almost continuously for about two months. Absolute clear titles will be given. These lands are Indian lands. These are a part of the tract awarded by the government eighty years ago to the Five Nations—the Choctaws, the Chickasaws, the Cherokees, the Creeks and the Seminoles—and were the pick of the earth at that time.

The entire tract allotted to each tribe was originally held by the tribe and not by the individuals composing it. The individual Indians had merely a common property in the whole landed possessions of the tribe. The Indians were furnished with schools, were given instructions in farming and stock raising and horticulture, and their progress was unexampled in the history of the aboriginal peoples. So fast did they assimilate the ideas of the white man that nine years ago the demand was made that the tribal possessions should be broken up and distributed among the individuals composing the tribes. The Indian had arrived at the desire of individual holding. The demand was granted. The allotment of tribal lands to the individual Indians was made. It was not done in a day, for there were many problems to be worked out, but it was accomplished at length, and there remained some of the richest and best of the Oklahoma lands still unallotted. These unallotted lands are now to be sold by the several tribes under the direction of the Secretary of the Interior. There will be only two transfers of the record—first, from the government to the tribe, and, second, from the tribe to the purchaser at the coming auction sale.

Where These Lands Lie.

Take a map of Oklahoma and fold it edge to edge each way. It will crease into four quarters. Down in the southeast quarter adjoining Texas upon the south and Arkansas upon the east, lie the unallotted lands. They do not include all the land in the counties of that section—not by any means! But they do include some of the richest lands and much that has been splendidly improved by the tribes before the allotments were made. This sale will pass some of the greatest bargains in farming lands ever sold over Uncle Sam's counter. The whole section is webbed over with the Frisco Railway and its branches until it requires only a glance at the map to convince anyone that good and quick transportation, the greatest essential of them all to the development of any country, is already amply provided.

The lands are only about 400 miles from the Gulf of Mexico, with a down grade all the way. They are within easy shipping distance of Kansas City, St. Louis and Chicago. There will never be a time when they cannot find ready and profitable market for every ear of corn, every pound of alfalfa, every head of cattle, every bushel of wheat, potatoes, oats, barley or other cereal, every fowl, every barrel of apples, every box of peaches, every vegetable or other product they can produce, and it is hardly safe to state the bare facts of their productive capacity, for people who are unacquainted with the character of the soil and the quality of the climate of this favored region are more than apt to lift incredulous brows and ask: "Is it possible?"

Schools and Churches.

Oklahoma has, for its age as a state, the finest school system in the Union. Upon its becoming a state, the federal government appropriated the sum of $5,000,000 to its school fund, and this has been materially increased from other sources since. The people have all possible educational advantages.

Payments May Be Deferred.

Another feature of this great land sale makes it attractive to a great many people. It is not necessary to make the payment all in cash. Only 25 per cent. of the price need be paid at the time of the sale, another 25 per cent. within a year, and the balance in two years with 6 per cent. interest upon the deferred payments.

It is stipulated by the government that of the lands classed as agricultural lands no person may buy more than 160 acres in any one nation, and of other lands the limit is 640 acres. This includes land bought at any previous sale. The object of this provision is obvious. It is recognized by Uncle Sam that small holdings and large population make for the ultimate prosperity of the section. Possession is given immediately upon approval of the sale by the government, and no time is lost in this. The deed, conveying clear title, is given as soon as payments are completed, which can be done at once, if the purchaser prefers.

There are vast tracts of these lands that are not particularly adapted to agriculture, but which are rich in mineral deposits. It is a matter of general tradition that the older Indians knew and worked some very rich gold mines which have been lost sight of by the present generation. Coal and other minerals are present in many places in paying quantities.

Specific Information.

For the information of those who wish to benefit by this auction sale the government has had printed a large number of blue-print maps of each of the counties within which the sale will take place. These maps will be mailed to those interested for fifty cents each. Application for maps should be made to the Commissioner of the Five Civilized Tribes, Muskogee, Oklahoma.

The sale begins November 2, 1911, and continues almost daily with the exception of Sundays until January 15th, 1912. For further particulars address A. Hilton, G. P. A., 1418 Frisco Building, St. Louis, Mo.

No More Hog Sickness—Feed Merry War Lye

EVERY DAY, and more convincingly than ever before, MERRY WAR LYE is proving its claim to be the Greatest Hog Remedy, Conditioner and Fattener in the World.

When farmers in practically every hog-raising state in the Union declare that MERRY WAR LYE has done more for their hogs than any other remedy they ever used—that it prevents cholera, cures worms, puts their hogs in a fine, sleek, fat condition and INCREASES THEIR PORK PROFITS—YOU surely should be convinced that it will do the same for YOUR hogs. For hog diseases are the same in all parts of the country. Hundreds of farmers write us similar to this:

"It Cured Our Hogs"

Mrs. T. Akins, Hoxie, Ark., writes: "MERRY WAR LYE is all the lye that we use. Before we began using it we had a lot of hogs with Cholera. We used MERRY WAR LYE and it cured our hogs."

"Best Destroyer of Worms"

Mr. H. F. Gustoff, Coon Rapids, Iowa: "MERRY WAR LYE is the best destroyer of worms in hogs I ever used. It is all right."

Keep YOUR Hogs Healthy—Make Them Fat and Thrifty.

TRY MERRY WAR LYE at once. The cost is a trifle. Feed it night and morning EVERY DAY. You will notice that your hogs will begin to improve from the first feed. Makes them immune to disease—fattens them surer and quicker than anything else—tones the system, assists in the perfect assimilation of food and prevents scouring. It saves feed, because every pound of corn or other ration fed goes into flesh and fat and none of it is wasted.

IMPORTANT WARNING!

Don't infer that ordinary, or regular, lye can be used as a hog remedy.

MERRY WAR LYE is prepared ESPECIALLY as a hog remedy and it is the only lye that is guaranteed to be absolutely safe to feed to hogs.

Save These Directions

Follow these directions carefully: Mix one tablespoonful MERRY WAR LYE with slop for 10 hogs, or ½ can with barrel of swill. Stir well and feed night and morning. If your hogs are on a dry feed ration, mix ½ can MERRY WAR LYE to each barrel drinking water.

At All Leading Dealers

Most dealers handle MERRY WAR LYE. If yours can't supply you, write us, stating your dealers' names, and we will see that you are supplied and will also send you, free, a valuable booklet on, "HOW TO GET THE BIGGEST PROFITS FROM HOG RAISING."

MERRY WAR POWDERED LYE comes in 10c cans, full case of 4 dozen cans for $4.80, at Grocers', Druggists' and Feed Dealers'. There are no substitutes.

E. Myers Lye Co., Dept. 22 St. Louis, Mo.

FREE TO THE RUPTURED.

STUART'S PLAS-TR-PADS are a wonderful new treatment for rupture, curing as they do the worst forms in the privacy of the home. Being SELF-ADHESIVE, purposely to hold without straps, buckles or springs. No truss. Plapao Laboratories, Block 57, St. Louis, Mo., is sending FREE trial of Plapao. Write for this marvelous cure.

ELBERTA PEACH ORCHARD, on the line of the Frisco Railroad System, near Durant, Okla., and near the government lands to be sold. See article entitled "Land Sale by Uncle Sam," on this page.

25 YEARS SERVICE

is a common performance for the ECLIPSE WINDMILL

The Eclipse is designed for durability. There are only four wearing parts. One wheel turn gives a pump stroke. The side vane swings the mill into safety in storms. Material is ample and right. The head casting is thick and wide. Main bearing and pivot are long and rigid. Basswood is used for lightness, seasoned ash and "heart of oak" for strength. All parts are made exact and fit firmly together. For valuable information on windmill durability and efficiency write for Catalog number DH692

Ropp's Commercial Calculator.

This is a standard book, and a revised, enlarged and improved edition. There are millions in use. **Ropp's Commercial Calculator** is especially valuable to farmers. By its regular use many hard problems become easy. It will prevent mistakes, relieve the mind, save labor, time and money, and do your figuring in the twinkling of an eye. As handy as a watch, always ready and reliable. Anyone who will send 50 cents for one-year's subscription to this paper, The National Farmer and Stock Grower, can select one copy of **Ropp's Commercial Calculator** as a free premium. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

To Club Raisers:—Anyone who will send in four subscriptions and $2.00 to pay for same will be credited with one-year's subscription to The National Farmer and Stock Grower and one copy of **Ropp's Commercial Calculator.**

The Grain Dealer Surprised.

Farmer—Isn't No. 2 Corn worth more than 35c?
Grain Dealer—That is really the market price today, but I will make it 35½c. (Load weighs 2720 lbs.)
Farmer, opening Calculator—Amounts to $17.24; had on 48 bushels and 57 hundredths. (Page 13.)
G. D.—Well, I declare! Whose lightning Calculator is that?
F.—Why, Ropp's of course—the New improved edition. It comes handy indeed, couldn't get along without it.

National Dairy Show.

Important action was taken at the September meeting of the Board of Directors of the National Dairy Show. Plans for leading features of the approaching Show (Chicago, October 26th to November 4th) were approved and methods to round out the exhibition were discussed.

First of all, premiums for Brown Swiss and Dutch Belted cattle were each increased 20 per cent., and there was added to the classification a Breeder's Cow Herd, open to the best ten cows two years old or over. This is open to all breeds and will bring the best specimens of each breed against each other. Cows entering this contest must be bred but not necessarily owned by the exhibitor, who, if he is fortunate, will receive a thousand-dollar trophy and cash prizes of $250 and $100.

There will be on exhibition a model barn, and this with the government's elaborate photographic trips through the leading dairy districts will round out the agricultural architecture, so that the National this year will have the best exhibit in this line ever before attempted.

Another good move made by the Board was the assigning of banquet dates in advance of the Show, so that there will be no conflicting dates for the numerous entertainments offered.

A committee was appointed to devise a plan by which there may be gathered the leading cows of the country now on authenticated yearly test. Satisfactory progress has been reported in assembling this great working herd, which will prove the best example of dairy type and conformation ever witnessed in this country.

He who attends the National at Chicago this year will get more than his money's worth. The dairy cow is to be elevated to the position to which her importance entitles her.

The Show is the Court of Last Appeal, the Final Contest of the Show Yard Supremacy of the year. In its deeper meaning, the exhibition stands for soil conservation and the raising of conditions of country life in America. Dairymen and agriculturists in general should support the work.

The Breeding Plat.

Every farmer should have breeding plats in the most favorable spots on the farm, where, far enough removed from other crops of the same kind, to avoid crossing and contamination, one may breed up high-producing strains of the different kinds of seeds. The soil of this plot should be well prepared, the very choicest of seed should be used, planting should be done at favorable times and thorough cultivation should be maintained. From these plots seed for the general crops of the next cropping season may be chosen.—From Bulletin No. 3, Panhandle Agricultural Institute, Goodwell, Okla.

Cost of Filling Silo.

A Nebraska farmer figures on the cost of silage:

"The drouth has caused my hay crop to be very short, but I do not know whether I can afford to use the corn for silage or not. What does it usually cost per ton?"

The cost of silage per ton depends very largely on the value of the land and the kind of corn crop that is grown. We have known of instances where it required but eight acres to fill a hundred-ton silo, and other instances where it would take at least twenty-five acres. For this reason the cost of filling a silo depends on the amount of forage per acre more than on the cost of labor involved, which is one of the smallest items.

Prof. Haecker, of Nebraska Station, after carefully taking into consideration all the factors which enter into the production of corn, estimates the cost of putting up a ton of silage at $1.95. Some Iowa farmers have computed the cost as low as $2.15 per ton; others have gone as high as $2.49.

Prof. Mumford, of Illinois, has computed the cost of ensilage, figuring the value of corn at 35 cents per bushel, to be approximately $2.75 per ton. On an average it will cost you from $2.00 to $2.50 per ton for filling your silo. This is a very small price to pay for ensilage when compared with hay and other feeds, which will range from $10.00 and up per ton.—I. H. C. Service Bureau.

Pratts

Animal Regulator

by regulating the seat of all diseases—the bowels, blood and digestive organs—it thoroughly renovates the system, drives out cholera germs and worms. It is a great money-maker because it keeps hogs healthy, reduces feed bills and

Saves Time
Fattening Hogs

The quicker a hog is fattened, the sweeter the meat and the more profit to the owner. When Pratts Animal Regulator is used, you are sure of getting early pork and best prices.

PRATT FOOD CO., - - Dept., 54, Philadelphia, Pa.

Cream Tester Fined.

According to the Lincoln, Neb., Journal, A. P. Larson, of Minden, a cream tester employed by the Beatrice Creamery Company, was fined $50 and costs for manipulating cream tests and his license has been revoked. The Beatrice Creamery Company has announced that it will discharge him from its service. The prosecution was by the State Food Commissioner on evidence obtained by his inspector that Larson had made false tests of cream brought to him by customers of the creamery company. The inspector found that Larson had falsely raised the test of new customers to get their patronage and had made corresponding reductions in the test of old customers. In this way the amount of cream he sent to his company was the correct amount, but some customers were cheated and some received more pay for their cream than they were entitled to receive.

Cotton in Egypt.

In Egypt a new variety of cotton named Sacharalides, after the discoverer at Birket-es-Sadr, is now being planted in considerable quantities. This Greek cultivator, starting from a single boll, has succeeded in putting on the market an early-maturing cotton of good quality.

Things to Eliminate From Milk Production.

Dairying can be made successful largely through a process of elimination. The lack of success to-day comes very largely from retaining in the business things that make it unprofitable.

One of the great eliminations is the ignorance of what the cows are doing, collectively and individually. There are many herds to-day where a few cows are making all the profits, the other cows adding nothing to the profits or actually reducing them. It has been said that if one-third of all the cows in the country—the poorest third—could be struck by lightning, it would be a very profitable thing for the dairymen of the United States. Each farmer should know for himself just what each cow is doing. The only possible way to do this is by the help of the milk scales, the milk sheet and the milk tester.

One of the things to eliminate is the wrong kind of feed. The writer has known of men who during the entire winter fed their cows on timothy hay and cold water, and that, too, where that kind of hay could be sold a mile away at from $12 to $15 a ton loose. Yet because the hay was raised on the farm, no thought was taken of its real value. In fact, the farmers that did it had the mistaken idea that timothy hay must be worth more for feeding cows than clover hay, since it brought a higher price on the market. But the large amount of carbohydrate material in timothy hay makes it an inferior feed for dairy cows, which must have a ration quickly digested and fairly abundant in protein. Every farmer can buy books from which he can learn the values of different feed materials, and this only will enable him to eliminate the most wasteful methods of feeding.

Eliminate the useless labor. There are numerous farms to-day where there is no water running into the barns, but where the cows in the winter have to be turned out and driven to the watering trough, which often has to be chopped out, or else the water is carried in pails to the barn for the use of the cows. A farmer boy can be named who for ten years drew water with a well pole from a well eighty feet distant from the cows and carried the water to them for a period of six months every winter. When the snow was deep a path had first to be shoveled to the well. It would have been a simple matter to have laid a one-inch pipe from the well to the barn, below the frost line, and have put a suction pump onto the barn end of the line. Labor is money in the United States of America, and such useless labor is a waste of money.

Eliminate the ruts from the dairy business. What is a rut on one farm may not be a rut on another. The writer defines a rut as a "wrong practice persisted in from habit." Here is one milk producer that is selling his milk for city consumption whole when it would be more profitable for him to sell the cream and utilize the skim milk on his farm. Another man is making butter, when he could more profitably sell his milk or his cream to a creamery. One farmer that was selling his whole milk at a very unsatisfactory price got out of the rut by establishing an equipment for making ice cream, which he sold in a near-by city. Having his own cream, his own ice, his own power and his own labor, he could sell at any price that others could sell at and still make money; or he could, if occasion required, dip a little under the going price. The thing to do is to find if one is in a rut, for an old practice may be a good practice and not a rut.

Authenticated Test Work at Meridale Farms.

Ayer and McKinney, proprietors of Meridale Farms, located in Delaware county, New York (the banner county of the Empire State), have just issued a leaflet telling some of the results of their efforts to make every Meridale Jersey return a profit at the pail and churn.

There are now in this herd ninety-seven cows which have qualified for the American Jersey Cattle Club Register of Merit, in a year's authenticated work. These averaged for the year 7,596 pounds of milk, with an average of 5.306 per cent. of fat, and 462.33 pounds of butter per cow.

In these ninety-seven are included forty-four which are less than four years old, forty-two between the ages of four and ten years, and eleven animals ranging in age from ten to eighteen years. The forty-two cows in their prime averaged 8,497 pounds of milk and 510.7 pounds of butter per cow. The eleven cows over ten years of age, at the beginning of the test, averaged 7,979 pounds of milk and 491 pounds of butter. The forty-four youngsters averaged 6,640 pounds of milk and 409 pounds of butter. Of these forty-four, seventeen were heifers with first calf, and these produced 104,586 pounds of milk and 6,352 pounds of butter, an average of 6,152 pounds of milk and 373 pounds of butter each. Two of these were but two years old at the beginning of the test, and these produced 14,192 pounds of milk and 780 pounds of butter, an average of 7,096 pounds of milk and 390 pounds of butter. One of these was the first daughter of the imported Jap to complete a yearly authenticated test. Of the animals under four years of age, eighteen exceeded by 62 pounds per cow the highest Register of Merit butter-fat requirement for any age.

A large proportion of these ninety-seven cows are daughters of bulls bred or owned at Meridale Farms, and many of them are direct descendants of the noted bulls Matilda, 4th's, Son and Ida of St. Lambert's Bull, foundation sires of the Meridale herd.

In their year's work, sixty-nine Meridale Jerseys exceeded an average of 500 pounds of butter per cow. Their average milk production was 8,210 pounds per cow, with an average of 5.306 per cent. butter-fat.

Eleven Meridale Jerseys produced over 600 pounds of butter per cow during the year, their average being 10,017 pounds of milk and 603 pounds of butter per cow.

There are also significant records made by a nine-year-old, a ten-year-old, an eleven-year-old, a thirteen-year-old, a sixteen-year-old and an eighteen-year-old, respectively.

Messrs. Ayer and McKinney believe that the only right way to test a cow's value is in her all-year-round production and her year-by-year work.

The foregoing information is taken from a leaflet published by Messrs. Ayer & McKinney, 300 Chestnut street, Philadelphia, Pa., who will gladly send a copy to interested readers of this paper.

In the saloons of the city of St. Louis buttermilk de luxe; that is, buttermilk ice cold out of a refrigerator, is being retailed at 10 cents a glass. The glass holds something between a half pint and a pint. Ten cents a glass does not induce all the patrons of the bar to give up beer and take to buttermilk.

During the year ending June 30, 1911, the imports of lemons amounted to 160,214,785 pounds.

Make Your Fall and Winter Dairying Profitable

The wasteful losses of any "gravity" setting system or poor cream separator are always greatest when the milk is often cool or the cows are old in lactation, and under these conditions, with butter prices highest, the use of the best cream separator becomes even more important than at any other season, so that a

DE LAVAL
Will Save Its Cost by Spring

With any setting system you are wasting at least a quarter of your product at this season, with cream and butter values highest; while the superiority of the De Laval to other separators is always greatest under the difficult conditions of separation, particularly in the skimming of cool milk.

Why delay your purchase of a De Laval until another Spring. Put it in now and let it save its own cost meanwhile. And as to that you may either buy for cash or on such liberal terms that the machine will actually pay for itself.

You may prove all this by test to your own satisfaction. See the local De Laval agent or communicate directly with the Company.

FARMS WANTED. We have direct buyers. Don't pay commissions. Write describing property, naming lowest price. We help buyers locate desirable property FREE. **American Investment Association, 55 Palace Bldg., Minneaoplis, Minn.**

No wonder timothy seed is high in price. The Missouri yield is 2.4 bushels per acre.

Hog Cholera Spreading.

From the latest reliable reports it seems to be an undeniable fact that hog cholera is greatly on the increase this year, and that, moreover, in certain sections of the country it is rapidly spreading, despite the best efforts of government vaccination experts to check it.

A subscriber of a well-known live stock publication is quoted as saying that in parts of Western Missouri, Arkansas, Oklahoma and Western Illinois, through which he had recently traveled, making frequent stops, he found hog cholera spreading very rapidly, and that in a single township in a certain county through which he passed it was his opinion that the death loss from hog cholera had already amounted to $200,000.

Should the farmers and hog raisers be called upon to sustain such enormous losses? Assuredly they should not. But is there any way by means of which such losses can be prevented? Just as assuredly there is. Thousands of farmers throughout the country have learned that a small quantity of Merry War Lye with swill or drinking water cures hog cholera, promptly checks its spreading where once it has broken out and is a positive preventive of that disease. It is also recognized as the best hog conditioner and destroyer of lung and intestine worms on earth. It keeps hogs on their feed, in prime condition and constantly adding to their weight. Therefore every farmer, regardless of whether or not his own hogs have cholera or whether or not it is prevalent in his neighborhood, should at once use this one sure precaution which, in numberless instances, has been proved so successful. As a single instance, the experience of Mrs. Verna Thiston, of Fortuna, Mo., strikingly proves the efficiency of Merry War Lye when used according to directions. She writes: "We never had any sick hogs since using Merry War Lye."

Merry War Lye is for sale at all dealers. It is the only lye which is guaranteed to be absolutely safe to feed to hogs—the only lye, in fact, which is prepared especially as a hog remedy and conditioner. For this reason great care should be exercised against the acceptance of any other brand of lye for hog-feeding purposes. Disappointment in results and possible injury to the hogs would more than likely attend the administering of any other brand than Merry War Lye. E. Myers Lye Company, Dept. 22, St. Louis, Mo. Write for free book on Profitable Hog Raising.

The Market For Corn.

The corn market has advanced somewhat recently, as will be seen from the following cash prices on the St. Louis market: January 31st, 1911, 44½ cents a bushel; February 28th, 44 cents; March 31st, 45½ to 46 cents; April 30th, 52½ cents; May 30th, 52 to 52½ cents; June, 30th, 60½ cents; July 31st, 64 to 65 cents; August 31st, 63¼ cents; and September 30th, 68½ cents.

In the speculative market for corn, of which Chicago is the leader, the September option of 1911 was started February 28th at 49½ cents; March 31st the quotation was 50½ cents; April 30th, 52⅜ cents; May 31st, 53⅞ cents; June 30th, 61¼ cents; July 31st, 63¾ cents; August 31st at 65¼ cents, and was closed out at 68⅛ cents a bushel. On the close of September 30th the December option closed at 64 cents, against 48⅝ cents a year ago.

The May corn option (which of course means next May) was quoted on September 30th at 65½ cents, a strong 13 cents higher than the last May option was closed out for. It appears frm this that the enormous crop of 3,125,000,000 bushels last year has been decently cleared away and there will be no difficulty in disposing of the crop of 2,620,221,400 bushels estimated as the crop of 1911. There is absolutely no question concerning the independence of the farmer who is able to raise plenty of corn.

Improvement in Cattle Breeding.

On page 11 there appears an article concerning the authenticated test work at Meridale Farms, Delaware county, New York. This is a dairy establishment started twenty years ago with a few Jersey cattle and by associates engaged in business in the city of Philadelphia. Messrs. Ayer & McKinney are partners as advertising agents and as farmers. The most astonishing item concerning their operations is, that of all the breeding establishments in the United States of America this farm, probably more than any other, has made permanent improvement in foundation stock and actual improvement in a cattle breed.

Foreign Prices For Wheat.

On September 30th, wheat was selling in Paris at $1.31⅜ per bushel; December at $1.32⅜. In Berlin, October wheat was quoted at $1.31⅝, and December at $1.36⅝. The only way that American wheat can be sold in Europe is by contracts for future delivery.

Barley in St. Louis.

At St. Louis, on September 30th, barley prices declined two to three cents, due to larger arrivals and a lighter demand. A majority of the offerings of low and medium grades which were carried were unsold. Screenings ranged at 40 to 70c., mixing feed at 75 to 85c., heavy feed at 85 to 95c., and malting at 95c. to $1.24. Receipts at St. Louis, eighty-four cars.

The Best Farm Locations

Productive lands, favorable climate, and abundant rainfall make farm locations in the Southeast the most profitable.

Land from $10 to $50 an acre close to the best markets. Wheat, corn, hay, all truck crops, give best returns. Conditions unsurpassed for dairying and live stock, hog and poultry raising. **Beef and pork produced at 3 to 4 cents a pound.**

Five to six crops of alfalfa per season grown. Good farmers make 60 to 100 bushels corn per acre. Home markets near at hand pay highest prices for dairy products and demand is undersupplied. **Apple orchards pay $100 to $500 an acre,** and orchard lands cost only a fraction of those in other sections.

The Southeast Has Locations for Every Kind of Farming

The climate assures the finest results from intelligent agriculture, and makes the region unsurpassed as a pleasant and healthful home location. It is an open winter country, and its summers are enjoyable. You can locate where there are good schools, churches, roads, rural delivery, and all other advantages. The Southern Railway and associated lines will help you find the location you desire. Our several publications, free on application, give full information. Address,

M. V. RICHARDS, Land and Industrial Agent, Southern Railway, Room 71, 1820 Pennsylvania Ave., Washington, D. C.

500 ACRES

A magnificent tract; rich corn, alfalfa and blue grass land. It has been in blue grass for years; in corn and alfalfa now. The corn has stood a torrid drouth for over two months and much of it will make 60 bushels to the acre. It fronts rock road in Jackson county, Missouri; near three railroad stations; due south of this city, in line of best development and high prices; fine stock farm; fine grain farm; fine dairy farm. Better still, it is an elegant suburban home proposition; only thirty minutes by auto from business center; will make an elegant home for one or a dozen gentlemen who wish to stay the strenuous business life; location high and surroundings beautiful; lay of land susceptible to highest class artistic improvement; price, it is a shame, only $150 an acre. It is worth that at Salina, Kan. In Illinois it would sell for $400 an acre. It will pay good interest on the investment and increase in value for fifty years at a rate better than 10 per cent. money. It has a perfect cement shale and stone in greatest abundance near the railroad.

Also 800-acre fancy farm in Lafayette county, Missouri, at $100 per acre, one-third cash, balance five years at 5 per cent. annual interest.

Also 3,280 acres, fine stock ranch, on main line of Rock Island Railroad between Kansas City and St. Louis. Good improvements; 11½ miles of new first-class woven-wire fencing. $22.50 per acre. Easy terms.

For fancy cheap small tracts out south, see me.

HOG BOOK FREE.

Dr. D. C. Snoddy, President of the D. C. Snoddy Company, of Nashville, Tenn., has written a book on the pig and his diseases. This book explains Snoddy's whole method of curing hog cholera and preventing disease. It also tells how to destroy worms and keep hogs healthy and growing. It tells how to manage young pigs and how to make the hog business a certain success. This book is mailed free to all who write Dr. D. C. Snoddy Company, Dept. H, Nashville, Tenn.

Grain Market Influences.

The influences upon the markets for grain come from every direction. The number of private dispatches that cost money is astonishing. Cables from India, China, Liverpool, Buenos Ayres come thick and fast. Just in one day the following influences were mentioned: "Improvement in New York;" "private report of frost in Argentine;" "Minneapolis was higher;" "Winnipeg, bad weather;" "heavy offerings in Liverpool;" "favorable advices from India;" "Russian shipments smaller;" "United Kingdom, favorable weather;" "slow milling demand;" "wheat seeding favorable." All these related to wheat, and in addition thereto, there were many more of a minor character relating to the local and general markets. These telegrams were received at St. Louis. In Chicago telegrams arrive by the hundreds. Dealing in grain is not done by guesswork but in response to world-wide information and calculations.

Prices Paid For Hay.

The best way to quote the hay market is to publish a list of sales. The following sales were made at St. Louis, September 30th. On the St. Louis side of the river—Part car clover-mixed at $18; two cars do. at $20; one do. at $20.50; two do. at $21; one light do. at $22; one car part clover-mixed at $21.50 and part old timothy at $22; one car part clover at $17.50, and part No. 1 timothy at $23.50.

Timothy—One car common at $13; one No. 3 at $18.50; one No. 2 at $19.50; two do. at $20; one do. at $21; one do. at $21.50; two do. at $22; one No. 1 at $23; two do. at $23.50; three do. at $24; one high No. 1 at $24.50.

Prairie hay—Two cars No. 2 at $12; one do. at $13; one do. at $13.50; two No. 1 at $14.50, one delivered to East Side; one high No. 1 at $16. Alfalfa—One car No. 1 at $18.

On East Side—Part car clover-mixed at $17. Timothy—Part car No. 3 at $17; part car do. at $18; one No. 2 at $20.50, delivered to St. Louis; one do. at $21.50 do.; one scant No. 1 at $22.75; two No. 1 at $23, one delivered to St. Louis; two do. at $23.50, one do.; nine do. at $24, mainly do.; three high No. 1 at $24.50 do. Alfalfa—One car good No. 2 at $17. Clover—No. 2 quotable at $14 to $16; No. 1 at $17 to $18.

Grass Seeds at St. Louis.

Grass seeds are sold by the 100 pounds on the wholesale market of St. Louis, and the following prices were quoted September 30th, 1911: Timothy—Average run at $12 to $13.50; clean, bright, at $14 to $14.50; high grade at $15.25 to $15.50. Clover, weedy, at $9.00 for badly to $16 to $17 for slightly; prime, clean, $18 to $18.50. Redtop—Fancy clean at $17; poorer lots in proportion. Spot offerings included 110 sacks timothy, which sold from $13.95 to $14.85 for fair grade; forty sacks clover, three at $14; five at $17.30; fourteen at $17.50; five at $14.85; and balance at quotations; sixty sacks Redtop in lots at from $1.50 for tailings up to $16.25 for the best lot; and one lot of alfalfa at $18.

In St. Louis, on the wholesale market, sorghum is quoted at 18 to 25 cents a gallon.

At wholesale, prime beeswax is quoted at 30 cents in St. Louis.

Get It All!

After working and worrying to get a bunch of stock ready for market, don't sacrifice any of the profit. You cannot afford to consign to any but the best salesmen. You cannot afford to experiment. Ship to the firm whose name for a quarter-century has been the synonym for

Top-Notch Salesmanship
Financial Responsibility
and the "Square Deal."

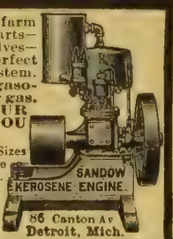
Detroit Motor Car Supply Co., 86 Canton Av Detroit, Mich.



A German co-operative creamery handled 2,862,919 pounds of milk in 1910, of which were retailed 31,475 pounds and the balance made into 223,372 pounds of butter. The average yield of milk per cow was 6,223 pounds. The net price, including the bonus, paid for milk was $1.08 per 100 pounds.

THREE-YEAR SUBSCRIPTIONS.

Orders For The National Farmer and Stock Grower Solicited.

Kindly Sign the Blank Form Below and Become a Regular Subscriber.

We desire to invite attention to our three-year subscription proposition. We hope to obtain one hundred thousand additional subscriptions during the present year to continue for three years. It is practically a trial subscription and payable at the end of the first year. The subscription can be stopped at any time by paying for the period the paper is taken. This method of taking subscriptions is the invention of Uncle Piper, our subscription editor, who has guaranteed that every one of them will be paid when they are due. The subscription price of this paper is $1.00 for three years, and the bill for the subscription is sent to the subscriber at the end of the first year. When the bill goes out Uncle Piper slips in a list of handy premiums for the subscriber to select one from, providing he pays the bill promptly, and the general result is that the bill is soon paid. When it comes to getting subscriptions from intelligent, high-class farmers, Uncle Piper is at the head of the class.

Uncle Piper.

SUBSCRIPTION BLANK.

To the Hale Publishing Co., 3550 Vista Ave., St. Louis, Mo.:

Gentlemen: — You are hereby authorized to enter my name as a subscriber to The National Farmer and Stock Grower for three years. At the end of the first year I will pay one dollar for the three-year period. This order is given with the understanding that I am at liberty to stop the paper at any time by paying the subscription to that date.

Fire-proof Things.

So far as possible we should be working toward a fire-proof condition of our material existence. The loss of the world from disastrous fires has been continuous and enormous. No matter how small the locality, it has its histories of fire tragedies. In cities and on farms the list of casualties is a long one.

Fire has been the great destroyer of our forests. When a boy, the writer watched forests ablaze, and since then there has not been a year when many great forest fires have occurred. An officer of the Forestry Department at Washington once said in the presence of the writer: "I have seen a single fire destroy more timber than all the timber consumed in the United States in that year, and I have seen several such fires."

For this reason the first great work of the government after it has set apart each forestry reserve has been to establish corps of fire wardens. These have laid out great treeless roads through the preserves, where incipient fires could be halted, if they get started. The same wardens are perpetually on patrol and act as police in enforcing the rules against fires.

In this respect the millions of trees that are growing all over the country on farms and by roadways have a far greater opportunity to escape fire than did the great forests. First, being man-planted, they are further apart and have less dry, dead, burnable wood than is to be found in any forest, for in thick forests the making of dead trees is part of the scheme of growth. An acre of land may start with a thousand of seedlings and in a hundred years have less than a hundred trees. The rest have died and become fuel for any spark that might come along.

So the government has been putting in systems of lumbering by which trees on the point of being eliminated may be taken out before they die and make a way for flames. It is a great work and should be a suggestion to every farmer that has a piece of forest or a wood lot.

We ought to get around to building fire-proof barns. Every year many domestic animals are burned to death in barns and stables. One of the saddest sights the writer ever saw was when he looked into the ruins of some large stables in an Eastern city. There were the bones of the horses that had been burned in their stalls with no chance to escape. Penned in by man, they had been forced to undergo the terrible torturee of being roasted alive. For convenience sake we compel the farm animals to live in the same buildings with tons of fire-ready material. It would perhaps cost a little more to have the hay, straw and other inflammable stuff in a separate building from the stock, but it would be an act of humanity to do so.

We have fire-proof building materials in abundance and we ought to use them in the erection of public buildings of all kinds and in the construction of our residences and also in the construction of the places in which we place our farm animals, lock them in and leave them for the night.

Cane Too Coarse For Hay.

A Wayne county, Illinois, correspondent writes: "Last June I drilled in about five acres to cane, using about twenty pounds of seed to the acre. I wanted it for hay or forage, but it is too big and coarse to make good hay."

This is one of the commonest errors made in sowing cane seed. In order to get good hay at least one bushel of seed per acre should be sown. Fine, leafy growth makes a splendid article of feed, but when the stalks are coarser than pipe stems it is not so good. Thin seeding naturally produces heavier stalks, and then if the crop is left until late in September before it is cut, the crop is apt to be past its best feeding stage. The only thing to do now is to cut the crop as soon as possible and cure it in shock. Cattle will eat most of the heavy stalks, but obviously there is more waste than there would be if the crop had been sown much thicker.—L. C. Brown.

Don't miss *this* Oklahoma Indian Land Sale

Never, since Oklahoma was *first* opened, have you had such a chance to get good land at *rock bottom* prices. *One million, thirty thousand* acres of fine farm and mineral lands to be *auctioned* by U. S. Government; with over 13,000 separate tracts to bid on—*13,000 chances* to get just what you want at *your price.*

Your title will be *perfect—guaranteed* by the Government, and immediate possession is given on first payment of only 25%—balance, 25% at end of first year, 50% in two years.

There is but *one way* to take *full* advantage of this wonderful sale . . *get on the ground.* It will not cost much, for there are

Round trip excursion fares via Frisco Lines

from Chicago, St. Louis, Kansas City, Memphis and other points. The Frisco Lines have 1,500 miles of track in Oklahoma, reaching most every point of sale. Your ticket, via Frisco Lines, gives you the privilege to **go one way and return another** so that, *at no extra cost*, you can attend *many* more sales than would be possible on a trip going and returning the same way. You must act *now*. This is an opportunity that won't wait on *anyone*—first sale begins Nov. 2nd, at Chickasha, Okla.

Get our free book today!

It contains full facts about character of the lands (with pictures of crop scenes, etc) locations, dates of sales, terms, acreage at each point, cost of fares, and a *big colored county map of Oklahoma*, from which you can see just how to arrange a trip via Frisco Lines to take in the sales you want to attend. *We haven't many copies of this book*—to get your free copy—

Selecting Apples For Show Purposes.

[By Prof. R. S. Herrick, Colorado Agricultural College, Fort Collins.]

The demand for better fruit on the part of the consumer is increasing, and, on account of this, competition between the different fruit-growing sections is quite keen.

This competition is not only found in the different fruit markets, but is shown at our Fairs and Apple Shows. The people in every apple-growing section like to see their fruit win the highest recommendation and approval wherever it is found on the market or on exhibition.

The lack of knowledge in selecting fruit on the part of the apple grower is often the reason why the best representative specimens are left, while some overgrown, poorly-colored ones are expected to win the premiums. For this reason it would be well for every orchardist to study the different points upon which apples are scored and judged.

The following score card for plate exhibits is one that will be used at the "American Apple Exposition," Denver, Colorado, November 13-18, 1911:

For Perfection.....100 points.
Size (normal)..... 10 points.

It will be noticed that size counts for but one-tenth of the points given for all requirements. The apples should be of good size but not overgrown for the varieties. It is much better to have five apples of medium, uniform size than it is to have them of different sizes, even though part of them are large.

Uniformity and Trueness to Type.... .....25 points.

These two conditions are very important ones and should receive special attention.

The five apples should be so uniform in size that they resemble so many peas in a pod; one should compare one apple with another and see if they are exactly alike in form and size.

A pair of measuring compasses will facilitate in securing uniformity of size.

In selecting for trueness to type, one should know what the correct type is for the variety. Look over carefully the different trees of the same variety and fix in mind the prevailing type.

Color.. .....25 points.

The color should be the best obtainable for the variety. Do not rub or polish the apples, as this destroys the natural bloom and many judges will disqualify apples when thus treated.

Texture and Flavor..20 points.

The time of picking, care and manner of handling have much to do with texture. If the apples have to be kept for any length of time they should be picked when they reach maturity and stored where a uniform temperature of 34 degrees Fahrenheit can be obtained.

With the proper management of the orchard as regards pruning, thinning, spraying, irrigation and cultivation, much good can be obtained in securing better texture and flavor of the apples.

Freedom from Blemish.20 points.

This means that the apples should be free from all worm holes or bites, frost and hail marks, limb bruises, spray burns, etc. The stems and calyxes must be intact and they should be of the correct size and length for the variety.

Be very careful in picking and packing not to bruise nor unnecessarily to rub the specimens, as this may have much to do with determining the decisions.

Feeding Good Cattle or Scrubs.

A good chapter on cattle feeding is contained in Animal Industry Bulletin No. 128. For three winters the Bureau investigated the difference between the results obtained by feeding pure-bred cattle of the recognized beef breeds and cattle that, being of no particular breeding, are classed as scrubs. They fed them alike and they fed them fairly; they studied them scientifically. The experiments show clearly an economic superiority of the pure-bred over the scrub steer, due, first to his relatively smaller maintenance requirement, and, second, to his ability to consume a larger surplus of feed above the requirement. Both of the facts tend to make the actual production of human food in the form of meat and fat per unit of total feed consumed by the animal notably greater by the pure-bred animal.

When they came to the butcher block they found the scrub was still a scrub and the pure-bred steer was still a "thoroughbred." The scrub was rated as "common," and the pure-bred was graded as "prime." The total dressed weight and the weights of the several wholesale cuts show the considerably higher percentage of dressed weight in the case of the pure-bred, which is characteristic of the beef animal, and likewise the predominance of the loin cut, over the less valuable cuts of the forequarter in the beef animal as compared with the scrub, and the marketable meat of the retail cuts show that the proportion of more valuable cuts was notably greater in the pure-bred.

Cattle feeders who are interested in the fine points of their business will find it to their advantage to write to the Chief of the Bureau of Animal Industry, Department of Agriculture, Washington, D. C.

Golden Arrow Seed Catalogue.

The A. W. Schisler Grain Company, St. Louis, Mo., will send a catalogue of vegetable, flower, field and garden seeds to any of our readers who will write for it. It is called the Golden Arrow Seed Catalogue and is named after their Golden Arrow Seed Corn, after their very prolific yielder and the cleanest and brightest yellow corn on the market. Quotations will be furnished on any and all seeds in season in any quantity. Address, A. W. Schisler Grain Company, 708 North Fourth street, St. Louis, Mo.

ECONOMIZE

A THOUSAND DOLLARS, we will say, is your yearly income. Maybe it's $600 or $800 or $2000—but $1000 will do for an example. Now suppose that out of this $1000 you spend $600 in a year and put $400 in the bank. That means $400 saved, doesn't it? But suppose you start buying the necessities of life in an economical way like 2,000,000 other people are doing. Suppose that this year you cut your expenses down to $400 and put $600 in the bank. That means $600 saved, doesn't it? You can do it, you can cut one-third off of your living expenses and it's the easiest, most agreeable thing to do that there is. Send to us for one or more of these books which contain the articles you are going to buy this winter. You will find as all of our 2,000,000 satisfied customers have, that our prices are the very lowest and the quality of our merchandise is the very highest. The reason our prices are low is this—we buy in tremendous quantities and trim down the price on each article to the lowest possible figure. We give you the advantage of these extensive and economical business methods.

THROUGH THESE BOOKS WE OFFER YOU THE OPPORTUNITY TO SAVE 20 PER CENT TO 50 PER CENT OF THE MONEY YOU MUST SPEND IF YOU TRADE ELSEWHERE.

We guarantee every article we sell to give you full satisfaction. Without dispute, without question, we will take it back at our own expense, if it does not, and refund your money or make any fair exchange or adjustment.

The New Furniture Book

You will enjoy this book. It is crowded from cover to cover with attractive offers that will delight you. A couple of pretty chairs or an attractive, substantial couch will make a home much more comfortable.

Whatever you need, from the Kitchen table up to the furniture for the guest chamber, you will find just what you want in the pages of this Furniture Book. You have read of our economical business methods. They enable us to sell you furniture at prices that often mean a saving to you of 50 per cent on what you had intended to pay to the retail dealer. Your copy is waiting for you. Let us send it today. Ask for book number 7.

Carpets and Rugs at Factory Prices

A new carpet or perhaps a rug will "brighten up" that room you think does not look quite inviting or cozy enough. Don't imagine you can't afford one. Our carpet and rug catalogue, book No. 15 contains some price surprises for you.

SPEND THIS MUCH $ IN THE RIGHT PLACE AND IT WILL BRING YOU AS MUCH AS THIS $ WOULD IN THE WRONG MARKET

A Saving on Clothing

A well dressed man or woman makes a splendid impression everywhere. Good clothes are a recommendation in themselves. "Clothes do not make the man" the old saying goes, but we all know they often help a lot. It is easy to be well dressed and not expensive either. Let our new clothing book show you how to dress well at a small expense. It brings right into your home a wonderful collection of clothes, weaves, patterns, and colors from which to select.

Every style is new, nobby and up-to-date. Remember it costs you nothing to get this book. Better have us mail you one today. The women's book is No. 30, the men's book is No. 33.

HERE IS A BOOK THAT WILL

Save 1-2 of Your GROCERY Money

The Grocery List is a mighty interesting little catalogue. You're going to spread it out under the lamp and turn its pages and just delight in comparing the money-saving prices it quotes, with the high prices that small dealers ask. Before you know it you'll have your pencil out figuring up how many Christmas presents you can buy with the money you saved on your grocery bills. But the thing that's going to give you real satisfaction is this: For less money you are getting better quality and more food! Then, of course, you know that everything is so clean and pure and absolutely reliable.

The number of the Grocery Book is 11.

When we receive your request we will put your name on our mailing list to receive the new Grocery List every two months.

Save Enough on Winter Farm Necessities to Clothe the Family

A feed cooker—a good one—that's what you need this winter. Perhaps you stand more in need of a tank heater or an incubator or a brooder or some other winter farm necessity.

Whatever you need, we have it. We carry a big variety of every farm necessity. The prices on these are of course the very lowest just as they are on all the rest of our merchandise. Send for book 8.

Stoves at 1-2 the Usual Cost

When the wind howls and the boards creak and the windows rattle and the snow sifts in under the door sill think of the comfort a warm stove and a good range are going to give you. It's going to be mighty comfortable to toast your toes on the edge of your stove or baseburner, read and talk and then doze off into a little nap in the pleasant warmth from the glowing coals.

In the morning you'll be glad that you thought about getting that good range in time when you sniff the aroma of piping hot coffee, and batter cakes browning on the griddle.

It's going to be cold this winter. You must have a good stove. You must have a good range.

Send for book No. 23, our new Stove and Range Book that has just been printed.

Check the Book You Want

Let us show you, free of all cost, how you can save money on everything you buy to eat or wear or use in any way.

This Book is for Mothers

It's the "Baby Book." There are some of the daintiest, prettiest little dresses and caps in it you ever saw. Then there are snug, warm "nighties" and stockings—and everything else the baby needs. Beds and cribs, go-carts, high chairs, toys, rattles--well, you'll just be delighted when you see it.

And everything is so reasonable! Without even knowing it you will have bought everything for baby and have a neat sum left—maybe enough to buy a rug or a pair of shoes, or to "put away for a rainy day."

The "Baby Book" is a beautiful book. You'll like it. The number is 27.

Men's Fur Coats

When the mercury in the thermometer plays tag with the zero mark—then is the time that the man in "the big fur coat" is the envy of all eyes. Nothing takes the place of a good fur coat for protection from cold, stormy weather.

There's one in our new Fur Coat Catalogue (Book No. 18) for you.

Women's Furs

Dressy, silky, soft furs—the kind every woman admires—are fully shown in catalogue No. 34.

Our forty years' experience in expert fur buying is at your service.

Sewing Machines

A reliable, smooth running sewing machine will soon save its cost in time, strength and labor saved.

Our years of experience enables us to offer you by far the best machines on the market at the prices quoted.

The sewing machine book is No. 19.

Raincoats and Rubbercoats

Rainy weather has no terrors for you if you have a good raincoat. You rather enjoy splashing around in the wet, when you are warm and dry. Damp—rainy—snowy weather will soon be here. Better get your raincoat now and be ready for it.

Send for book No. 31

Underwear Samples

A suit of soft, warm, well fitting underwear will be mighty fine to jump into when those cold, frosty mornings come. Our underwear samples book shows you one of the finest, and most complete lines of knitted underwear that you ever saw.

Write today for book No. 24.

Pianos and Organs

Purity of tone and best quality of materials are the distinguishing marks of our pianos and organs. Cost, plus one small profit is all we ask. See catalogue No. 2 for pianos; No. 3 for organs.

Evans-Montague Commission Company

THE MEASURE OF SUCCESS
attained by a
SHIPPER OF LIVE STOCK
depends largely upon
THE COMMISSION HOUSE
to which he consigns his
CATTLE, HOGS AND SHEEP.

If you wish to receive
TRUSTWORTHY AND RELIABLE
SERVICE,
and have your consignments
SOLD BY CAPABLE AND CONSCIENTIOUS SALESMEN,
you cannot do better
THAN PATRONIZE OUR HOUSE.

The Shippers' Interests
ARE OUR INTERESTS,

IS THE STRONGEST TESTIMONIAL
of our ability
TO PLEASE OUR CUSTOMERS.

Evans-Montague Commission Company

P. O. Box 68,
NATIONAL STOCK YARDS, ILL.

A First-class Commission House.

In consigning live stock for sale at the St. Louis National Stock Yards, remember the Evans-Montague Live Stock Commission Company. It is a successful firm, highly competent and persevering in the interest of their customers. The Evans-Montague Commission Company solicit consignments of cattle, hogs and sheep for sale on the market, and desire stockmen to take notice that the company has special buyers who select and buy stock and feeding cattle for their customers. S. T. (Tom) Boothe, who has been on the market for fifteen years, is native cattle salesman. Colonel James H. Campbell is with this house as Vice-President, in charge of the Southern cattle department. His presence adds strength to the organization. The firm is equally well equipped to sell hogs and sheep. Stockmen requiring market information should address Evans-Montague Commission Company, Box 68, National Stock Yards, Ill.

Hogs at St. Louis.

At the St. Louis National Stock Yards, October 1st, some fine light hogs, weighing 162 to 196 pounds, sold at $6.80 per 100 pounds. Heavier weights, choice hogs, averaging 226 to 242 pounds, sold at $6.75 per 100 pounds. The bulk of the mixed hogs sold at $6.45 to $6.65 per 100 pounds.

Don't Have a Blind One

$2.00 per bottle, postpaid on receipt of price.
VISIO Remedy Ass'n, 2472 Calumet Ave., Chicago, Ill.

No Benefit, No Pay.

You ought to try a 25-day trial treatment of Bodi-Tone on its no benefit, no pay plan. This plan is fully explained in the large Bodi-Tone advertisement on the last page in this issue. If you have not yet tried Bodi-Tone, you can get a dollar box on trial, without a penny in advance, simply in writing for it. Read the offer.

A Quarter-Centennial Souvenir.

Of more than passing interest to live stock feeders and shippers is the announcement of the recent twenty-fifth anniversary of the founding of the greatest live stock commission firm in the world, Clay, Robinson & Co., an event which that ever-enterprising concern has fittingly commemorated by the publication of a "silver souvenir" pamphlet depicting the rise and expansion of their business since 1886. This book, which is now being distributed to the patrons of the firm and other interested persons, is a most beautiful specimen of the engraver's and printer's art, profusely illustrated and worked in two colors, with a specially designed silver embossed cover. The booklet opens with fine portraits of the two original members of the firm, Mr. John Clay and Mr. Charles O. Robinson, who are still active in its management and control. The other three partners, Messrs. J. G. Forrest, F. H. Connor and C. A. Kleman, are also shown. A brief but intensely interesting sketch, entitled "After Twenty-five Years," traces the development of the firm from 1886 to 1911, and in doing this many an interesting side-light and valuable historical fact is interwoven. From the official statistics presented in the book the reader learns that the business of Clay, Robinson & Co. has almost trebled in the past ten years, the annual cash turnover for 1910 being in round numbers $105,000,000, against $37,000,000 in 1900. This is an amazing showing and indcates beyond cavil that the firm's methods and service bear the stamp of popular approval.

The matter and illustrations included in the silver souvenir under the heads "After Twenty-five Years," "Facts and Figures," "Some of the Veterans," and "The Live Stock Report," reveal clearly the intelligence and aggressiveness with which the Clay-Robinson organization has been developed to its present high state of efficiency. There are portraits of the leading salesmen at the firm's Chicago, South Omaha, Kansas City, South St. Joseph, South St. Paul, Sioux City, East St. Louis, East Buffalo, Denver and Fort Worth houses; views of the splendidly-equipped offices at Chicago and other markets; portraits of the officers and data of the twelve banks controlled by the firm; a page devoted to John Clay & Co., which business, although operated as a separate organization, is really a part of Clay, Robinson & Co., and whose operations in the loaning of money to cattle and sheep feeders runs into millions annually, while a complete roster of the 219 employes complete the story of the quarter century in review. It is a record of which any man or set of men may well be proud, and we add our hearty congratulations to America's greatest live stock house. "May they live long and prosper."

Imports and Exports of Horses.

During the year ending June 30, 1911, the imports of horses were 6,331 for breeding purposes, duty free, and 3,262 that paid duty. From Great Britain there came 1,187; from Belgium, 1,465; from France, 2,024; from Canada, 2,977; and from other countries, 1,940. During the previous year imports were 7,867 free of duty and 3,753 paying duty.

During the year ending June 30, 1911, exports of horses to Great Britain amounted to 563 head; to Canada (including mules), 21,743; and to other countries, 2,839 head. During the previous year 28,910 horses (and mules) were exported from the United States.

Western Range Horses and Mules.

The sales of Western range horses and mules by Campbell & Reid and Western Sale Stables Company are rapidly drawing to the close. One sale on October 5th will be over before this paper is distributed and the next sale is scheduled for Thursday, October 19th. This will be followed by another sale on Thursday, November 2d. Whether there will be any sales later depends upon circumstances. All who desire to own good, young horses that can be rapidly developed into domestic sale ring horses should take advantage of the sales that remain. The sales are held at the St. Louis National Stock Yards. Further particulars can be had by addressing J. J. Searcy, Sale Manager, National Stock Yards, Ill.

Recommends Missouri Horses.

In a report to the Quartermaster General of the Army, just received, Maj. Letcher Hardeman, who is in command of the remount station at Fort Reno, Okla., paid a compliment to horses purchased in Missouri.

During the past year 834 horses were received at the Fort Reno Station. They were purchased in Missouri, Oklahoma, Texas, Montana, Wyoming and Virginia.

Most states have been willing to concede to Missouri the palm for the excellency of its mules, but to have an army expert, an officer who is attached to the cavalry arm and knows a good horse when he sees one, also give her horses first place, is rather more than some other states will be willing to stand for without protest.

With 642 horses on hand July 1, and the purchase of 834, Maj. Hardeman reports there were a total of 1,476 animals at Fort Reno during the fiscal year. Of this number, 841 were issued to various posts, 60 died and 61 were sold to officers. Of the horses issued, 602 went to the cavalry, 98 to the artillery and 136 were riding horses. The percentage of loss was greater than last year by about two per cent.

The Bushnell Horse Show.

At the Bushnell, Ill., Horse Show to be held October 12th and 13th, there will be $4,000 awarded in prizes. The officers are Jno. M. Brandt, President; Lute J. Barber, Secretary; Bert Roach, Treasurer; and J. G. Truman, General Manager. Last year there were seventy-four classes with over 700 entries. Bushnell is a great center of horse-breeding territory, and the Show is an exhibition of horses that excels in dignity, numbers and purses any of the State Fairs and compares favorably with national events.

At St. Louis, on September 30th, rye was in good demand and one-half cent higher; No. 2 fresh receipts sold at 96 to 96½c., and No. 3 at 94 to 95c.

On October 1st the best price for cattle in the Southern division at St. Louis was $5.15 per 100 pounds for steers averaging 1,114 pounds.

HORSE AND MULE SALESMEN.

HOLLAND, NUGENT & MAXWELL BROTHERS.

NATIONAL STOCK YARDS,
EAST ST. LOUIS, ILLINOIS.

HORSE AUCTIONS EVERY MONDAY AND TUESDAY.

Horse and Mule consignments are solicited for sale by the most competent firm on the Best Market in the United States. Every consignment given personal attention. Keep in touch with us. Let us sell your Horses and Mules on commission.

HORSE DEPT.—Nugent Bros., Maxwell Bros.
MULE DEPT.—Ed. Conway, Lan Morris.

Don't Cut Out A SHOE BOIL, CAPPED HOCK or BURSITIS FOR

ABSORBINE

will remove them and leave no blemishes. Cures any puff or swelling. Does not blister or remove the hair. Horse can be worked. $2.00 per bottle delivered. Book 6 E free.

ABSORBINE, JR., liniment for mankind. For Boils, Bruises, Old Sores, Swellings, Goitre, Varicose Veins, Varicosities. Allays Pain. Price $1 and $2 a bottle at druggists or delivered. Will tell more if you write. Manufactured only by W. F. YOUNG, P.D.F., 106 Temple St., Springfield, Mass.

KENDALL'S SPAVIN CURE

"ONLY SURE REMEDY"

Gadsden, Ala., Apr. 26, 1909.
Dr. B. J. Kendall Co.
Gentlemen: Please send me copy of your TREATISE. I have been using your Spavin Cure for 20 years, and find it is the only sure remedy. It is the best liniment I can get for horse and man. Yours truly, W. J. McBee.

That tells the whole story, and it is the experience that hundreds of thousands have had in the past 40 years, and it's the experience you will have—"It is the only sure remedy"—

For Spavin, Ringbone, Curb, Splint, Swellings and All Lameness

Sold By Druggists—$1.00 a Bottle, 6 bottles for $5.00. Keep it on hand always. Be ready for the emergency. Kendall's stops the pain, starts the circulation, penetrates and removes the cause of the disorders. Ask for a free copy of "A Treatise on the Horse." If not at dealers write to—

DR. B. J. KENDALL CO., Enosburg Falls, Vt.

Traveling Salesmen and Saleswomen Wanted

Earn While You Learn. We now have on file letters from thousands of Wholesale and Manufacturing firms who are anxious to employ Salesmen and Saleswomen capable of earning from $1,000.00 to $10,000.00 a year and expenses. No former experience needed to get one of these good positions. We will teach you to be a high grade Salesman or Saleswoman in eight weeks by mail and our Free Employment Bureau will assist you to secure a position where you can earn good wages while you are learning Practical Salesmanship. Write today for full particulars, list of good openings and testimonials from over a thousand persons we have recently placed in good positions.

Address, Nearest Office, Dept. 161.

WESTERN

RANGE HORSE SALES.

Horse raisers are advised that sales are being conducted by

Campbell & Reid and Western Sale Stables Co.,

NATIONAL STOCK YARDS, ILL., As usual, during the season of 1911. The Eleventh Sale will be held on

Thursday, Oct. 19th,

And every two weeks thereafter until the close of the season. The Twelfth Sale will be held on

Thursday, Nov. 2d.

We will be glad to hear from Ranchmen having Horses for sale, also from buyers who wish to have splendid Horses to finish up for the domestic sale ring.

Please address

J. J. SEARCY, Sale Manager,
NATIONAL STOCK YARDS, ILL.

Mid-winter Sheep Show.

In connection with the Forty-eighth Annual Meeting of the National Wool Growers' Association there will be held at Omaha, Neb., December 13th to 16th, inclusive, a National Mid-winter Sheep Show.

Cash premiums will be provided by the Show Committee which will exceed those offered at any other Sheep Show ever held. Every effort will be put forth to make this Show really attractive to exhibitors of any class of sheep. All who are interested should address the Secretary, National Mid-winter Sheep Show, care Commercial Club, Omaha, Neb.

TRAPPERS GET READY
BIG MONEY IN FURS

Over ten million dollars will be paid to trappers of fur bearing animals during the coming winter. Any man or boy living in the country can add a goodly sum to his earnings by trapping during spare moments. We furnish ABSOLUTELY FREE a complete Trapper's Guide which tells you the size of trap and kind of bait to use for the different animals, how to remove the skins and prepare them for market. We also furnish the best traps and baits at lowest prices. We receive more furs direct from trapping grounds than any other house in the world, therefore can pay the highest prices for them. Our price lists, shipping tags, etc., are also FREE for the asking. If you are a trapper or want to become one, write to us today. We will help you.

F. C. TAYLOR & CO.
GREATEST FUR HOUSE IN THE WORLD
315 Fur Exchange Building, St. Louis, Mo.

RAW FURS.

St. Louis is the largest and best market in the world for Raw Furs. This includes all Skins and Pelts of animals obtained by trappers in any section of the United States. All Furs require careful grading in the interest of the owner and shipper.

We Handle Furs and Pelts Strictly On Commission,

selling them to the best possible advantage. We grade to suit the requirements of buyers and sell for the highest quotations. Large or small consignments given careful attention. We solicit the Furs of hunters, traders and trappers. Reference: Any bank or merchant in St. Louis. Send for price list.

J. C. Crowdus & Company,
104 North Main Street, ST. LOUIS, MO.

Cattle Importations.

During the year ending June 30, 1911, breeding cattle to the number of 2,441 head were admitted into the United States free of duty, and 180,482 paid duty, because they were for grazing or slaughter. The year before the breeding cattle imported amounted to 2,611 head, and the others to 193,327 head.

Government Buys More Morgan Horses

The Bureau of Animal Industry of the United States Department of Agriculture has just purchased in Meade county, Kansas, four additional horses for use in the government breeding work that is being carried on in Vermont with the object of preserving and improving the Morgan breed. These animals are the seven-year-old Morgan mare Fanny P. (Vol. III, A. M. R.), two yearling fillies by Headlight Morgan (a son of Ethan Allen, 2d), and a colt foal out of Fanny P. by Headlight Morgan. One of the fillies is out of Fanny P., and the mare is again in foal to Headlight.

Fanny P. is by Julian Morgan, the sire of Roy Morgan, champion Morgan stallion at the principal State Fairs of the Central West in 1910. Fanny P.'s dam was by Flying Morrill, and her second dam by a son of Billy Root.

The pedigree of Headlight Morgan is well known to Morgan breeders. The horse was foaled in Southwestern Kansas, and has a well-deserved reputation in that vicinity as a sire.

These horses are among the descendants of a large consignment of selected animals purchased in Vermont and Illinois in the early nineties by the Morgan Horse Company, of Carpentersville, Ill., and sent to Southwestern Kansas to take advantage of cheap pasture there. Unfortunately, however, and partly on account of the depression in the horse market several years ago, the venture was not a success, the company disbanding and the horses being scattered over a wide territory. Some of this stock still remains in Kansas and Oklahoma.

The animals bought by the government will be taken to the Morgan Horse Farm at Middlebury, Vt.

New Records in Horse Sales.

In the matter of selling domestic horses at auction Messrs. Holland, Nugent & Maxwell Bros., at the St. Louis National Stock Yards, are making new sale records. Mr. T. H. Holland advises us that the last auction was the best in some time. Good, big horses were selling strong and will sell strong right along. The trade on chunks was better than it has been. The Southern horses all sold well, but people are expecting too much for small 1,000-pound mares. Messrs. Holland, Nugent & Maxwell Bros. hold the Monday and Tuesday auctions every week in the year. Shippers who are not acquainted should send in a car-load and try the market.

The Mule Trade at St. Louis.

Holland, Nugent & Maxwell Bros., successful salesmen of mules at the St. Louis National Stock Yards, advise that for two weeks preceding October 1st the mule trade was all anyone could reasonably expect. The dealers bought them readily at satisfactory prices. The market is in good condition. Good cotton mules, sugar mules and draft mules are the best sellers. Common, plain, thin stuff is selling bad.

Our Wheat Importations.

It will be a good idea to keep track of our wheat importations. During the year ending June 30, 1908, the imports amounted to 364,307 bushels; the next year 41,082 bushels; the next, 164,201 bushels; and during the year ending June 30, 1911, the imports amounted to 509,439 bushels.

Average Windmill Service.

The Eclipse Windmill is the durable one and the average life is twenty-five years. Of all the wind engines that have ever been sold by the manufacturers of the Eclipse none has ever failed to give satisfactory service. The particular windmill approved for farms and ranges is described in Catalogue D H 692. Be particular and write for it to Fairbanks, Morse & Co., at Chicago, or St. Louis, or Kansas City, or Omaha, or St. Paul, or Denver, whichever is nearest to you.

Light on the Farm.

Darkness has driven more boys and girls off the farm than all other influences combined. It is impossible to enjoy life with dark surroundings. Darkness is no longer fashionable. The cleanest and best light is the most economical. The first cost is moderate—the running cost is nominal. Turn to page 5 and read about "The Home-made Gas Light From Crushed Stone." Then write to Dept. A—56, Union Carbide Sales Co., 126 Michigan Blvd., Chicago, Ill., for booklets and particulars.

The Angus Herd Book.

Volume 20 of the Aberdeen-Angus Herd Book, just received, indicates a high degree of prosperity for the breed. It contains record of Aberdeen-Angus cattle from 136,501 to 148,500, with list of breeders and animals and matters relating to prizes won at different shows by Aberdeen-Angus cattle. The price of the volume to members is $1.00 and to non-members $3.00. Only a small edition was printed this year, thus it behooves every member to send in for his copy promptly. Address, Chas. Gray, Secretary, 817 Exchange avenue, Union Stock Yards, Chicago, Illinois.

"The horse market calls for full-aged, big horses and chunks with good middles. The market does not call for short-aged green chunks or leggy big horses with no rib." This information is taken from a market circular addressed to horsemen.

The St. Louis Horse Show for 1911 will be held at the Coliseum from October 30th to November 4th, inclusive. Mr. G. Lacy Crawford is President, and James H. Bright, Secretary and Treasurer. The headquarters of the Horse Show Association will be at the Planters' Hotel.

Mr. Alexander Gemmel, one of the foremost horsemen of Great Britain and in his day owner of many stylish horses, stated recently that Nala, a bay stallion owned by J. W. Harriman, is the geatest harness horse he ever saw. Nala is an American trotting-bred carriage horse.

Choice Heavy Cattle.

On the 1st of October, at the St. Louis National Stock Yards, twenty-nine head of 1,815-pound steers were sold at $8.00 per 100 pounds. They were shipped by J. R. Wesson, of Moniteau county, Missouri, and sold to the United Dressed Beef Company of New York. It is seldom that any better cattle are sold on any market.

I Cured My Rupture

I Will Show You How To Cure Yours FREE!

I was helpless and bed-ridden for years from a double rupture. No truss could hold. Doctors said I would die if not operated on. I fooled them all and cured myself by a simple discovery. I will send the cure free by mail if you write for it. It cured me and has since cured thousands. It will cure you.

Fill out the coupon below and mail it to me today.

Free Rupture-Cure Coupon

CAPT. W. A. COLLINGS, Inc.
Box 27 Watertown, N. Y.

Dear Sir:—Please send me free of all cost your New Discovery for the Cure of Rupture.

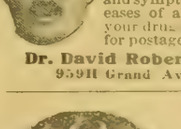
Sales of Sheep and Lambs.

On Tuesday, September 26th, at the St. Louis National Stock Yards, Clay, Robinson & Co. reported the sale of sixty Illinois lambs, seventy-seven pounds average, at $6.30 per 100 pounds, which was the top sale on the market; also 185 Missouri lambs at $6.00; twenty Missouri ewes, 115 pounds, at $3.85 per 100 pounds; twenty Illinois ewes, 120 pounds, at $3.85 per 100 pounds; and ten Indiana ewes, 100 pounds average, at $3.75 per 100 pounds. These sales give a fair idea of the market.

Live Stock

Every owner can now get free Dr. David Roberts Practical Home Veterinarian. 184 pg book, reg. price $1. Posts you on ailments and symptoms, enables you to treat diseases of all animals. Call for it at your drug store. If not there, send 10c for postage and receive a copy direct.

Dr. David Roberts Veterinary Co.,
959H Grand Ave., Waukesha, Wis.

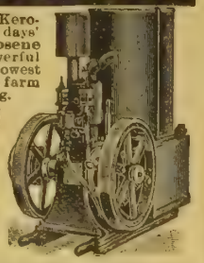


SICK HOGS

Cured and disease prevented with Shoddy's Powder. Clears hogs of worms. Makes hogs thrifty. Will send man and treat sick hogs on insurance. Treatment is simple. Any one can use it. 25c case cures 40 hogs. Book and test reports free. Agents wanted. DR. D. C. SHODDY CO., Dept. H, NASHVILLE, TENN.

Use KEROSENE Engine FREE!

Amazing "DETROIT" Kerosene Engine shipped on 15 days' FREE Trial, proves kerosene cheapest, safest, most powerful fuel. If satisfied, pay lowest price ever given on reliable farm engine; if not, pay nothing.



Gasoline Going Up!

Automobile owners are burning up so much gasoline that the world's supply is running short. Gasoline is 9c to 15c higher than coal oil. Still going up. Two pints of coal oil do work of three pints gasoline. No waste, no evaporation, no explosion from coal oil.

Amazing "DETROIT"

The "DETROIT" is the only engine that handles coal oil successfully; uses alcohol, gasoline and benzine, too. Starts without cranking. Basic patent—only three moving parts—no cams—no sprockets—no gears—no valves—the utmost in simplicity, power and strength. Mounted on skids. All sizes, 2 to 20 h. p., in stock ready to ship. Complete engine tested just before crating. Comes all ready to run. Pumps, saws, threshes, churns, separates milk, grinds feed, shells corn, runs home electric-lighting plant. Prices (stripped), $29.50 up. Sent any place on 15 days' Free Trial. Don't buy an engine till you investigate amazing, money-saving, power-saving "DETROIT." Thousands in use. Costs only postal to find out. If you are first in your neighborhood to write, we will allow you Special Extra-Low Introductory price. Write!

Detroit Engine Works 383 Bellevue Ave., Detroit, Mich.

The Chicken Mite.

[By B. F. Kaupp, Colorado Agricultural College, Fort Collins.]

There are two kinds of chicken mites—first the common chigger, scientifically known as the Trombidium holosericeum; and, second, a mite about the same size but with an ovipiriform-shaped body instead of an oval one, as in the case of the first. There are also some other microscopic differences. This latter parasite is scientifically called the Dermanyssis gallinae.

There has been considerable trouble with this first-named parasite during the present summer, which will extend into the fall. The hot, dry weather is most favorable for their multiplication and development. Many birds (principally hens) infested by the chigger, have been brought to this laboratory during the season. The statement from these poultry people invariably being that the birds die suddenly, and, when opened, all organs appear normal, at least so far as they could tell. Those examined in the laboratory have proved the same. Further examination reveals the fact that the cracks and crevices of the poultry houses, as well as the cracks and crevices of the roosts and the nests, were literally alive with these little pests, which are about the size of a pin head. When full of blood they appear somewhat red or bluish.

These chiggers are blood suckers. Their piercing apparatus is cone-shaped, and with this they wound the skin and suck the blood. Imagine 500 to 1,000 (as we have found them) of these, and imagine the irritation, and you will readily understand why the birds die. The irritation which each produces at the point of attack is considerable.

The birds often die suddenly without many visible symptoms.

The parasite lays its eggs in the cracks, crevices and in the filth of the hen house, where they hatch out, first into an asexual, six-legged state, later moults and develops into the eight-legged or mature state.

To rid birds and premises of these mites it is necessary to thoroughly clean the building, including nests. Repeat this every two or three days, if not every day. Spray with two per cent. solution (in water) of kreso, creolin or zeoleum, forcing the solution into cracks and crevices and repeat twice a week. Pour coal oil on the roosts twice a week. Place one inch of air-slacked lime in the nests before placing new straw. Place in dusting wallow a small quantity of tobacco dust, sulphur and pyrethrum (insect powder). Dust hens with same if found necessary, or dip with five per cent. solution creolin, kreso or zenoleum.

Some Fruits of This Year's Experience in the Poultry Yard.

In this year's experience in poultry raising, the most satisfactory thing has proved to be the little yards in which a few hens were set and in which all raised their broods.

These yards were made out of material lying around, four-inch boards, inch-mesh wire and two-inch mesh wire. It required about two hours to make each one, and this expenditure of time was the only expense connected with the pens.

To make each pen, thirteen strips of board were used, each strip being six feet long and four inches wide, with eight pieces of board of about any width, but eighteen inches long. Each pen was made with the idea of being easy to knock down and pile up under a shed to keep it through the winter. So each side was made by itself.

In the making, two of the six-foot strips were laid down just ten inches apart. An eighteen-inch cross piece was nailed across the ends about one and one-half inches from the extreme ends. This space at the ends has to be left so that the four sides will fit tightly and the fit not be interfered with by the cross pieces.

Several nails were put in each end of the cross pieces instead of the one or two absolutely needed. This gave the side greater rigidity.

Then a strip of one-inch wire was nailed over the space left in the side. Two-inch mesh would permit the small chickens to get through.

When the four sides were completed, they were set up and nailed together with one or two very large nails in each corner. It is an easy matter to pry these nailed sides apart, when knocking down is desired. In previous years the writer has used hooks and eye-screws instead of the big nails, but the nails are simpler and hold the structure more firmly. This gives a square box that needs to have pieces of lath, say a foot long, nailed diagonally across the corners, to stiffen the box.

The cover is made of four pieces of the board, forming the outer four edges, with a fifth across the middle to prevent the wire from sagging. Two-inch mesh wire is nailed over the aperture in the cover.

At first the writer used leather hinges to connect the cover and box, but finally found that hinges are in the way and a nuisance. No hinges are needed, as the weight of the cover will keep the chickens in and other things out.

For watering, a gallon bottle in one corner of the pen is inverted in the saucer of a flower pot. A piece of wood in the bottle neck keeps the month of the bottle half an inch above the bottom of the saucer and the saucer fills with water to that depth. A gallon of water will thus supply a brood for a long time.

In this way all loss of little chicks from cats and rats is avoided. Almost any kind of a box in the little yard is good enough for the mother hen to brood her chickens in.

When a hen is placed on eggs in this kind of a yard she sits steadier than when given unlimited liberty. The writer has had several experiences this summer where hens were off so much that many of their eggs were chilled. In one case not a chick hatched, though nearly all the eggs were fertile. The hen would be off for hours at a time hunting bugs and dusting herself.

Winter is a good time to make such things as pens of the above character, for in the busy season even two-hours' time will be found hard to get, and several of these yards will be found useful, even with a small flock.

They can be moved a few feet daily, and so fresh grass and fresh ground be always secured for the growing chicks.

From Farm to Consumer.

Mr. Walter B. Franklin, of Clint, Texas, in El Paso county, writing to the Petaluma Journal, gives an account of marketing eggs direct from the ranch to the consumer.

Mr. Franklin is manager of a poultry plant that last year produced an average of 152 eggs per year per hen from 2,000 laying hens. Naturally, having plenty of eggs for sale and with a railroad running direct from his farm into El Paso, he was pretty close to market, and he placed the fresh eggs on the train daily and in cartons labeled "Perfection Eggs."

Notwithstanding the eggs were excellent quality, guaranteed fresh and put up in a most attractive manner, the dealers in the city did not offer the owner satisfactory prices. The consequence was that Mr. Franklin abandoned his railroad shipments and he also abandoned the city salesmen. Mr. Franklin bought an automobile delivery wagon, and, having a good pike road direct to town from his farm, commenced selling eggs direct to the cousmer.

The first introduction to the El Paso consumer was a full-page advertisement in a daily paper, asking the people how they would like to get eggs absolutely fresh, not over twenty-four hours old, that were large, full of nutriment, palatable and healthy, that could be relied on.

The consequence was that the automobile goes in as often as necessary, and the ranch is paying automobile and hired man expense out of 35 and 40 cents a dozen for eggs, instead of railroad express charges and selling commissions out of 20 and 25 cents a dozen for eggs. By reason of having a large number of eggs to sell the automobile expense is justified, and in any community farmers co-operating on the same plan will be able to sell eggs direct to the consumer. According to railroad mileage, the station at Clint is twenty-two miles from El Paso, but by wagon road it is longer, as the road distance mentioned by Mr. Franklin is thirty-five miles.

Poultry and Farm Paper Club.

Two first-class papers can be had for the price of one. **The National Farmer and Stock Grower** is one, and the **American Poultry Journal** is the other. There are other excellent poultry papers, but the one we take home to read and one the family is determined to read is the **American Poultry Journal.** We have made arrangements whereby we can send **The National Farmer and Stock Grower** and the **American Poultry Journal,** both papers, one year, for fifty cents. This is a bargain that is good now, but this advertisement may not appear again. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

The Standard Watch Case.

In buying a watch, be sure to obtain the Keystone Watch Case. In order to understand this subject, see page 23. It is easy to obtain the benefit of the guarantee, for the reason that it is engraved inside every case. If you will take the trouble to examine the case you will then know exactly what you are buying, just the same as you know a gold coin issued by the United States Mint. The subject is worth investigating by all who buy watches.

Geo. Langlois, of Sebastapol, Calif., reports to the Petaluma Poultry Journal that four white Indian Runner ducks laid for him in April, thirty days, 116 eggs; May, thirty-one days, 115 eggs; total, 231 eggs in sixty-one days, or 57¾ each in the sixty-one days.

I raise 60 bu. of corn—

per acre, said Mr. Gray, of Piggott, Ark. I grow anything here that we could in Indiana—wheat, clover, timothy, oats, corn and all kinds of garden stuff and fruit. I don't see any difference in this land, unless I may say it is better. In Indiana, my farm was eight miles from a railroad. I sold it for $105 an acre and got this *improved* place, just a *quarter of a mile* from the station for $57 per acre.

There are hundreds of places in these sections where the finest kind of corn lands—lands that will easily make 40 to 75 bushels to the acre, can be bought at $10 to $25 per acre, and the best improved places at $30 to $60 along the

Cotton Belt Route in Arkansas and Texas

There are many sections in Arkansas and Texas that are *just suited* for your line of farming—where you can buy *many* acres with the price of every *one* you now own—get the benefit of the *big* boost in land values sure to come—live in a mild climate where you can do money making work *every* month—without sacrificing *anything* in living conditions that you now have. Telephones, good schools, rural delivery, modern towns, close markets—you'll find them all through Arkansas and East Texas.

On the 1st and 3rd Tuesdays of each month there are very low round trip excursions to Arkansas and East Texas via Cotton Belt Route, allowing 25 days for trip and *free stop overs.* Plan to go on the *next* one.

Get our free books today!

(new)—they show examples of successes in Arkansas and Texas in your line of farming—by people from many states—some of them likely from your own State. Nothing will convince you like these statements from "home folks." Scores of illustrations. Write for free copies today.

COTTON BELT ROUTE

WEATHER FORECASTS

For the Month of November, 1911, by the Famous Prognosticator, Prof. W. Wadsworth Marsh.

[Copyright, 1911, by W. W. Marsh.]

We publish the weather predictions by Prof. Marsh one month in advance. This is the October edition of The National Farmer and Stock Grower, and the following are the predictions for the month of November. The success of Prof. Marsh is phenomenal.

November will be a tempestuous month, the precipitation high, rain and snowfall at times quite heavy.

November 1st to 3d.

Between these dates storm over Michigan and Lake Huron, its area covering the entire country east of the Mississippi river, with heavy rain over Ohio, Indiana, Kentucky and Tennessee, covering the entire Ohio Valley, Pittsburg, Pa., Pennsylvania, the Alleghany region, the rain area extending to the Atlantic coast.

Rain at Lynchburg, Va., Charlotte, Asheville, Atlanta, Wilming, N. C., Charleston, S. C., Augusta, Ga., Jacksonville Fla., Tampa, Mobile, Montgomery, Vicksburg,New Orleans, Little Rock, Galveston, San Antonio, Memphis, Chattanooga, and storm, wind and quite heavy rain at Corpus Christi, Nashville, Knoxville, Louisville, Paducah, Evansville, Indianapolis, Cincinnati; rain at Columbus, O., Parkersburg, Pittsburg; rain. probably snow, at Buffalo, Milwaukee, Cleveland, Detroit, Toledo, Grand Haven, Grand Rapids, Sault Ste. Marie, Marquette, Chicago, Duluth, St. Paul, Davenport, Des Moines, Keokuk, Peoria, Springfield, Mo., and Springfield, Ill., St. Louis, Mo., and storm quite heavy at Cairo, Ill.

Light rain at North Platte, Fort Worth; rain at Tacoma, Portland, Ore., San Francisco, Cal., Scranton, Pa., Washington, D. C., followed by colder weather.

November 7th to 10th.

Damaging storms, changeable temperatures, mild weather to cold wave, high cyclonic winds, rain and snow alternating, from Colorado, New Mexico and Texas northwestward, to New England, and in the North Pacific States. These storms will be severe, covering the Ohio Valleys, Middle Mississippi Valleys and the Southwest, and throughout Ohio, Indiana, Kentucky, West Virginia, Tennessee, Pennsylvania, the Alleghany region, the entire state of Pennsylvania, and along the Ohio river and tributaries, from the Alleghany Mountains to the Mississippi river, causing suddenly rising rivers, the cyclonic winds damaging floating property.

Violent storms covering the South, heavy rainfall and cyclonic winds covering the entire Gulf States, with high gales and heavy rains on the Gulf of Mexico, sweeping the entire coast from New Orleans to Maine; much damage by wind and water, affecting the states of Georgia, Alabama, Florida, Mississippi,Louisiana, Texas, and over the Carolinas and Virginias and their coasts, the temperature changing from thunderstorm conditions to almost freezing temperatures; snow at times over Northern Texas and northern sections of North Carolina. Vessels should be protected along the coasts. Heavy frost will follow the storms over Western Florida, Alabama and Mississippi.

Storms will sweep the Great Lakes and lake region.

Storms, changeable temperatures, mild weather to cool wave with high cyclonic winds, heavy rain, sleet and snow alternating, covering the states of Kansas, Iowa, Nebraska, Missouri, Dakotas and Illinois, and the entire Upper Mississippi and Missouri Valleys, these storms severe with heavy precipitation, rain, sleet and snow alternation.

Storms, rain, wind and snow at Dodge City, Oklahoma, and heavy rains at Abeline, Tex.

November 11th and 12th.

Generally fair and frosty weather may be expected.

November 13th to 17th.

Between these dates another storm will cross the country, affecting the entire United States.

Quite severe storm with high winds and rain turning to snow, and cold wave covering the Northwest and the Western States and the upper lake region, extending southward over the Central Valleys to the Gulf States. Heavy rains and wind over the Gulf States and coasts, on the Gulf of Mexico, extending eastward, covering the Ohio Valleys and the states of Ohio, Indiana, Kentucky, West Virginia, Pennsylvania, Alleghany region, followed by colder weather.

Rain, turning colder, with snow and high winds over Missouri, and rain turning to snowstorm in the Middle Rocky Mountain region and the Upper Missouri Valley.

Rain and wind covering the Carolinas and Virginias and their coasts, and rain to snow with high winds covering the Upper Mississippi Valley and the states of Kansas, Iowa, Nebraska, Illinois, and cyclonic storm with heavy rainfall over Arkansas.

Wind and rain from the lower lakes southward to Texas. Snowstorm over Colorado, Wyoming and Montana and along the Rocky Mountain slope. Snow quite heavy at Salt Lake City, Utah.

Storm over the East, high wind and rain covering the states of New York, New England, New Jersey, Maryland, and along the North Atlantic coast, with storm and rough sea on the Atlantic. This storm will affect the cities of the East.

High gales on the Great Lakes, especially Lakes Erie, Huron and Michigan. Wind, rain and snow at Chicago, Milwaukee, St. Paul, Duluth, Cleveland, Detroit, Toledo, Marquette, Sault Ste. Marie and the lake towns, followed by frost.

Rain to snow over Oregon, Idaho, and rain over Washington state and California.

Rain and snow over New Mexico and Northern Arizona. Snowstorms over Manitoba and Canada.

Rain at Eastport, Me., Father Point, Que., Honolulu, H. I.

November 18th and 19th.

Generally fair, frosty weather may be expected.

November 20th to 25th.

Between these dates severe storms over the United States and foreign countries.

Storms, heavy gales, rain turning to snow and severe blizzard along the coast of Newfoundland.

Severe storms, changeable temperatures, heavy rains and snow alternating with cyclonic winds, from Texas northward to Southern Minnesota, and snow to the northwest of this belt, and rain and snow with cyclonic winds from the Rocky Mountains to the Mississippi river.

Cyclonic winds, changeable temperatures, heavy rains, sleet to snow covering the states of Kansas, Missouri, Iowa, Nebraska, Illinois and the Upper Mississippi and Missouri Valleys.

Storms, rain turning to heavy snow and blizzards, covering Montana, Wyoming, Colorado and the Dakotas. Stock should be protected from the sudden changes and blizzard from mild to cold waves and zero temperatures.

Heavy snowfall and high gales over the Lake Superior region. Travel will be impeded over the entire lake region and the Northwest.

Storms, changeable temperatures, rain to sleet and snow, alternating with high winds, at Cleveland,Toledo and over Northern and Northwestern Ohio. Damaging storms, high gales, heavy rainfall, covering the South. Severe gales and heavy rains on the Gulf of Mexico and Gulf States, affecting Texas, Mississippi, Georgia, Alabama, Louisiana, Arkansas, and along the Gulf coast, floods following the storms, the wind and water causing damage over West Tennessee, Northern Mississippi and Arkansas, causing washouts, etc.

General storms of cyclonic force originating in Tennessee and Mississippi, with heavy rains and snow alternating, covering the Ohio Valley, Ohio, Indiana, Kentucky, West Virginia, Pennsylvania, Carolinas and Virginias and their coasts, Ohio river valleys, Eastern and New England States, North Atlantic coast and ocean, the entire Eastern States and cities, causing much damage to property.

These storms will extend from San Francisco, Cal., on the West, to New York cities on the East, and from the lake coast on the North, to the Mississippi on the South.

Heavy rains will fall over Washington state, Oregon and Nevada. These storms will be the worst that the United States has experienced for years. Rain, sleet and snow will cover the Southwest.

November 26th and 27th.

Generally fair weather may be expected in most sections of the United States.

November 28th to 30th.

Between these dates another storm will cross the country. Belt of rain and snow extending from Texas to New England and in northern districts and east of the Rocky Mountains and along the northern borders of the United States, eastward to the lake region.

Storm, central off the North Pacific coast, and rain over the northern plateau and North Pacific States.

Rain at Fresno, Sacramento, San Francisco, San Diego, San Luis Obispo, Seattle, Spokane, Tatoosh, Island.

Unsettled, stormy weather general over the Rocky Mountains and Central Valleys, with snow along the Rocky Mountains, and quite heavy, wet snow over Colorado, Southeastern Wyoming, Southern Utah, Northern New Mexico and Arizona. Snow quite heavy at Pueblo and Colorado Springs, followed by cold wave. Snowstorm and cold wave in Northern Nebraska and Southern South Dakota.

Heavy gale and damaging storm along the coast of Newfoundland. Storm, rain and snow from the Rocky Mountains to the Appalachian Mountains.

Rain followed by cold and snow covering the Ohio and Mississippi Valleys, southern lake region, and snow and cold in northern lake region, Minnesota and Eastern South Dakota and the Middle and Southern Plateau.

Below-zero temperatures with snow over the Dakotas, Colorado and Wyoming. Rain and snow over the West, Northwest and Southwest, with quite heavy snow and cold covering the Northern States.

Rain and snow covering the Upper Mississippi and Missouri Valleys. Storm, wind and rain over the South, covering the Gulf States and coasts. Snow over Canada, Manitoba.

Rain at Eastport, Me., Elkins, West Virginia.

Certain Proof Will Be Made That Stuart's Dyspepsia Tablets Cure Stomach Trouble.

A Trial Package Sent Free.

Stuart's Dyspepsia Tablets are made to give to the system, through the digestive tract and the stomach, the necessary chemicals not only to digest food, but to enrich the fluids of the body so that it may no longer suffer from dyspepsia or other stomach trouble.

We will send you a quantity of these tablets free, so that their power to cure may be proven to you.

Thousands upon thousands of people are using these tablets for the aid and cure of every known stomach disease. Know what you put into your stomach, and use discretion in doing so.

Stuart's Dyspepsia Tablets contain fruit and vegetable essences, the pure, concentrated tincture of Hydrastis, Golden Seal, which tone up and strengthen the mucous lining of the stomach, and increase the flow of gastric and other digestive juices; Lactose (extracted from milk); Nux, to strengthen the nerves controlling the action of the stomach and to cure nervous dyspepsia; pure aseptic Pepsin of the highest digestive power and approved by the United States Pharmacopoeia.

One of the ablest professors of the University of Michigan recently stated that this Pepsin was the only aseptic pepsin he had found that was absolutely pure — free from all animal impurities; Bismuth, to absorb gases and prevent fermentation. They are deliciously flavored with concentrated Jamaica Ginger — in itself a well-known stomach tonic.

Liquid medicines lose their strength the longer they are kept, through evaporation, fermentation and chemical changes, hence Stuart's Dyspepsia Tablets are recognized as the only true and logical manner of preserving the ingredients given above in their fullest strength.

If you really doubt the power of these tablets, take this advertisement to a druggist and ask his opinion of the formula.

It is due your stomach to give it the ingredients necessary to stop its trouble. It costs nothing to try. You know what you are taking, and the fame of these tablets prove their value. All druggists sell them. Price 50 cents. Send us your name and address and we will send you a trial package by mail free. Address F. A. Stuart Co., 253 Stuart Building, Marshall, Mich.

Don't Wear a Truss

FREE

STUART'S PLAS-TR-PADS are different from the truss, being medicine applicators made **self-adhesive** purposely to hold the parts securely in place. **No straps**, buckles or springs—cannot slip, so **cannot** chafe or compress against the pubic bone. Oats Market Situation.

We do not like the idea of shipping a thirty-two-pound bushel of oats to market, and, after paying freight and commissions upon it, to sell that thirty-two-pound bushel of oats for 30 cents; that is exactly what we were doing last February at St. Louis, and on September 30th at the same market the price was 46½ cents. This paragraph applies to cash oats, which means sales by sample and delivery by car-load on track. In our opinion 46½ cents is not more than a fair price for a bushel of oats.

We will now compare three oats quotations, each a year apart. A year ago (September 30th) at Chicago, the September option was closed out with oats at 31½ cents a bushel. This year at Chicago the September oats option was closed out at 45⅜ cents. That is the past—14⅛ cents a bushel difference one date with another.

The next option traded in is December. It is not an excitable option, but it helps to fill out the year. A year ago (September 30th, 1910,) the December oats option was quoted at 31¼ cents a bushel. This year (September 30th, 1911,) the closing quotation was 47¾ cents, a difference of 16½ cents in favor of the present year.

The future is brought before us with the May option. A year ago (September 30th, 1910,) the May option was quoted at 34 cents, whereas this year (September 30th, 1911,) the May option was quoted at 50¼ cents, establishing a gain of 16¼ cents a bushel in one year.

Our readers are reminded that there is not usually any more speculation in oats than is necessary to keep up a certain amount of active trading. The foreign oats admitted to this country pay a duty of 15 cents a bushel, and this serves to keep the market from settling down to a point below the cost of production, except when crops are enormous. Oats are now on a level to encourage a large crop for 1911.

Not Sure of the Age.

"See here, Rastus," said the new arrival at the hotel, "do you mean to tell me that this egg is fresh?"

"It was when hit was laid, suh," replied the waiter.

"And when was that, pray?" demanded the guest.

"Ah dunno, Boss," replied Rastus. "Diss yere is mah first season at diss yere hotel, suh."—Harper's Weekly.

Southern Live Stock.

The three Southern States—Alabama, Louisiana and Mississippi—reported to the census a combined total of 2,746,326 cattle, 3,879,773 hogs, 515,422 sheep, 532,110 horses and 632,533 mules. As compared with ten years ago, there is an increase of 402,982 cattle, 377,521 hogs and 82,278 mules. There is also a decrease amounting to 234,107 sheep and 44,216 horses.

ABSORBINE FOR SIDE BONE.

Absorbine is a very efficient remedy in overcoming the lameness and allaying inflammation from a side bone or bone spavin, used as directed on page 17 in pamphlet with bottle. The following report from F. G. Warner, Placerville, Calif., under date of February 1, 1911, will be of interest: "A very valuable saddle horse started a side bone, went very lame, and one-half bottle of your Absorbine absolutely cured him." Use Absorbine for bog spavins, thoroughpins, wind puffs, rheumatic deposits, lameness and inflammation, swollen glands, etc. On sale at druggists, $2.00 per bottle, or sent direct upon receipt of price, express prepaid. Write to-day for descriptive pamphlet, sent free upon request. W. F. Young, P. D. F., 106 Temple street, Springfield, Mass.

PILES Quickly Cured

Instant Relief, Permanent Cure—Trial Package Mailed Free to All in Plain Wrapper.

We want every man and woman suffering from the excruciating torture of piles to just send their name and address to us and get by return mail a free trial package of the most effective and positive cure ever known for this disease, Pyramid Pile Cure.

The way to prove what this great remedy will do in your own case, is to just fill out free coupon and send to us and you will get by return mail a free sample of Pyramid Pile Cure.

Then after you have proven to yourself what it can do, you will go to the druggist and get a 50-cent box.

Proof of Sobriety.

Boys will be boys—and Scotch is an even more unstable element than sea water—so that it sometimes occurs that naval officers get back to their ships listing heavily to port, says the New York correspondent of the Cincinnati Times-Star. When that happens the offender is due for a good wigging. But, for the honor of the service, he is given every chance to prove that he did not offend against the regulations. The other day a young lieutenant was called before an examining board, charged with intoxication on a certain day. He pleaded not guilty, and called as a witness the colored attendant in the messroom.

"Nossir," said that witness, "de lieutenant was pufficklv sober when he went to bed dat night. I remember it, because he gib me an order."

"He ordered me to call him ve'y early de nex' day," said the attendant. "He said he wanted to get up early."

The members of the board were delighted. They never like to put an official blot on a young man's record. And so it was in order to transmute conviction into certainty that one of the examiners asked a further question:

"You have testified," said he, "that the lieutenant said he wanted to get up early on the morning following the night of his alleged offense. Now, do you recall what he said he wanted to do the next morning, which required him to rise so early?"

"Oh, yes, sah," said the darky. "I remember that pufficklv well. He said, suh, that he was to be queen of the May."

$1 Worth of Mayr's Wonderful Stomach Treatment FREE

It is a positive remedy for all Stomach, Liver and Intestinal Trouble, Gastritis, Indigestion, Dyspepsia, Pressure of Gas around the Heart, Sour Stomach, Distress After Eating, Nervousness, Dizziness, Fainting Spells, Constipation, Congested and Torpid Liver, Yellow Jaundice, Sick Headache and Gall Stones.

Extensive Poultry Fattening.

A bulletin entitled "Fattening Poultry," describing successful methods of fattening poultry on a large commercial scale and giving complete data on the feeding of over 100,000 birds, has just been issued by the United States Department of Agriculture. It gives information of operations on an extensive scale, and, so far as known, is the first publication showing the cost of producing a pound of gain in poultry.

"The successful feeding of poultry depends largely on the ability of the feeder to notice the condition of the chickens on feed," is one of the fundamentals laid down by the bulletin. "The common practice in poultry packing houses is to feed each lot seventeen days or less. Most of the milk-fed chickens are fed fourteen days. Practically all of the special feeding in this country involves the use of milk, which produces the 'milk-fed chickens' of the market. Milk, while the least expensive, seems to be the most essential constituent of the ration, and when a feeder cannot get milk in some form he generally does not attempt to fatten poultry commercially.

"Crate feeding from troughs is the method employed in this country by most of the large fattening establishments, with six to ten fowls in a crate. Birds fed only for a short time may be forced on highly concentrated feeds, whereas if fed longer they may need a ration containing a greater variety and less concentrated.

"Milk seems to be a very important influence on the digestive process, keeping the fowls in good condition under forced feeding. Beef broth is used to some extent, but it is not as good as milk. At the beginning fowls should be fed lightly for two or three feeds, gradually increasing the amount until they do not clean up all that is given to them. The main object should be to keep their appetites keen and at the same time have them consume as much feed as they can assimilate. By feeding a small amount often they will eat a greater quantity, and their appetites will remain keener."

The conclusions reached by the investigation show that general-purpose fowls make more economical gains in fattening than the Mediterranean class. The average person will get better results in fattening by feeding three times rather than twice daily. It was found that the average cost of feed and labor per pound of gain for a large lot of poultry was 9.09 cents, and the cost of the feed alone was 7.10 cents. It was also observed that hens made less gain than chickens, in crate fattening, and that low-grade wheat flour was a more economical feed than oat flour at the present prices of grain.

A copy of this bulletin may be obtained by addressing a request to the Secretary of Agriculture, Washington, D. C., for Bulletin 140 of the Bureau of Animal Industry.

The Style Books and Samples.

Our lady friends should remember the Style Book issued by the National Cloak and Suit Company, as advertised on page 3. Stylish clothes, good material and easy prices go together here. You can also get samples of material used in made-to-measure tailored suits by asking for them. Address, National Cloak and Suit Company, 280 West 24th street, New York City, N. Y.

GET THIS FREE BOOK ON KEROSENE'S AMAZING POWER.

Farmers everywhere have come to appreciate the amazing power as well as astonishing economy of ordinary kerosene for use in stationary engines.

No one ought to actually purchase any engine until they read the simple facts on this subject which have been proven by thousands of farmers almost everywhere who have been using the Detroit Kerosene Engine. A book has been written on this subject, fully illustrated in colors, which will be sent postage paid and free to our readers who will write a postal card or letter for it. Get your copy and then consider how you can save $40 to $200 cash on the first price of a Detroit Kerosene Engine direct from the factory on most liberal free trial. You will find that kerosene is the world's cheapest power when used with a Detroit—a permanent economy on the cost of fuel, added power and time saved, to say nothing of the recognized value every day in the year of having a power plant on your place. You can have a Detroit of from two to twenty-four horse power to use to your satisfaction, or, under the company's liberal guarantee, send it back without a dollar charged you for the trial. Write a postal or letter for this book to-day to Detroit Engine Works, 383 Bellevue avenue, Detroit, Michigan.

To Club Raisers:—Anyone sending in four subscriptions and $2.00 to pay for same will be credited with a two-year subscription to the Universal Magazine and one box of Initial Stationery.

Around the Garden.

No matter how carefully the weeds are kept out early in the season, if there has been a resting for even a couple of months they will have taken possession again. It will pay, if your time next season is of value, to choose a time after a rain, when the ground is soft enough for them to pull easily, and free it of the great plants which are perfecting weed seeds by the thousand to keep you busy next year. Besides, they will interfere seriously with the harvesting of the crops.

Especially clean out the rows of salsify and parsnips, leaving the ground not only free from weeds but light, for these will remain in the ground over winter, growing during the milder weather.

Winter onions may be set to advantage any time during the fall. While a bed once established will live year after year, the small bulbs formed at the top of the stems dropping and planting themselves, it is much better to plant each separately. They not only have more room, but they can be regularly worked and are thus more thrifty and of better quality.

Keep the strawberries free from weeds and cut out any plants which tend to stray across and interfere with other rows. These plants will mat as nothing else will or can, if left to their own sweet will. If the chickweed strives for a place with them, fight it as you would the plague. It is an innocent enough looking plant, but it will smother out almost any other vegetation. It grows even in mid-winter if there comes a mild bit of weather, thriving nicely under the snow. Only a persistent severing from the roots will master it, and as it blossoms and seeds freely, even a very few days of inattention may require a repetition of the battle.

Those who have used tile in the blanching of celery are loud in praises of it. While the first cost may seem a bit of extravagance, when the tile are once purchased they may be used year after year. And the method is easy, while the danger of rust is lessened, especially in a wet season.

While the results are fresh in the mind it is well to review the work of the season and note the improvements which may be made. You were annoyed, perhaps, early in the season, because in the long rows you had sown parsnips and peas—the one ready to cultivate, while the other, slow to germinate, was scarcely above the ground. Next time you will profit by this experience and plant species which grow uniformly in the same row.

If the cut worms have proved an annoyance, they may be avoided another year by fall plowing. This will also render the soil very light and easily worked, the only objection being that the ants enjoy it for this very reason; and to avoid the one pest you thus court another. The question must be recognized, which, to you, is the worse of the two evils?

When cleaning out the poultry house through the winter, bury the refuse on the plot designed for cucumbers or melons. Many are afraid of the concentrated strength. And while we have never had bad effects, even when it is applied during the growing season, used in this way there will be no danger. By spring the fertilizer will be so much decomposed and mingled with the soil that the application cannot possibly do harm, and the tillage necessary to fit the ground for planting will insure against any chance of too concentrated an application.

Before winter it will be quite an advantage to collect all dead stalks and refuse which the stock will not eat and make a bonfire of them. Not only is the process a neat one, making the plowing easier, but the ash thus contributes a bit of fertilizer to the land.—Bessie L. Putnam.

Don't Rub in the Truth.

At the Pen and Pencil Club in Philadelphia an editor told a story about Mayor Gaynor of New York.

"While I was working in New York," he said, "I had occasion to interview the Mayor about a story I had written—a story exposing certain municipal defects. In the course of the interview I complained bitterly that the story had made me very unpopular, though it was true in every line, and all men admitted it to be true.

"The Mayor smiled at my complaint and told me the anecdote of the one-eyed cadi:

"He said that a one-eyed cadi sat in his hall of judgment on a certain day, when a man entered, made obeisance and began:

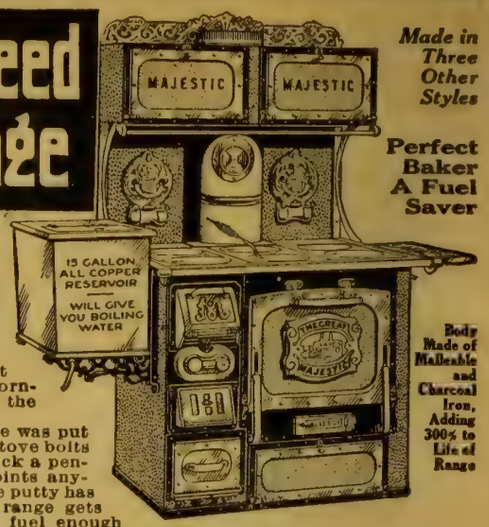
"'Hail, O one-eyed cadi! May your days, O one-eyed cadi, be blessed! The fame of the one-eyed cadi's nobility of character has penetrated even to my obscurity; yea, the impartial justice meted out by the one-eyed cadi is known to all; and hence, O one-eyed cadi, I beg—'

"'Stop!' the cadi interrupted. 'Suppose I am one-eyed, do I want to be reminded of it every minute? Get out of my sight!'"

Imports of Oats.

The United States imported 107,318 bushels of oats in the year ending June 30, 1911; 1,034,511 bushels the previous year; 6,666,989 bushels during the year ending June 30, 1909; and only 364,307 bushels during the year ending June 30, 1908.

Why You Need a New Range



Made in Three Other Styles

Perfect Baker A Fuel Saver

Body Made of Malleable and Charcoal Iron, Adding 300% to Life of Range

Some housewives who display a remarkable amount of broad, sound, common sense along other lines, persist in the delusion—and it is a delusion—that they are really practicing economy by trying to get along—to get results—out of an old, worn-out range merely to save the price of a new one.

Your old range or stove was put together with putty and stove bolts and probably you can stick a penknife in the seams and joints anywhere on it where the stove putty has crumbled away. When a range gets in that condition, it takes fuel enough to warm all outdoors in order to get your oven hot enough for baking—and then you run the risk of burning whatever is in the oven. You can soon burn up the price of the best range ever made in a useless waste of fuel in an old, worn-out stove or range—and that's neither practical economy nor good management.

If you would practice real economy in your household management, it will pay you, the next time you are in town, to call on the dealer who handles it and examine closely into the perfect baking and remarkable fuel saving qualities of the

Great Majestic Malleable and Charcoal Iron Range

Outwears Three Ordinary Ranges

It is the only range made entirely of malleable iron and charcoal iron. Charcoal iron won't rust like steel—malleable iron can't break, and while the first cost of a Great Majestic may be more than some other ranges, ***it outwears 3 ordinary ranges.***

Half The Fuel

The *Majestic* is put together with rivets (not bolts and stove putty) making it absolutely air tight, like an engine boiler. The joints and seams will remain air tight forever as neither expansion nor contraction can affect or open them.

Pure Asbestos Lining

In addition, it is lined with pure asbestos board, covered with an open iron grate—you can see it. No heat escapes—no cold air gets into the oven—saves half the fuel and assures perfect baking.

Movable Copper Reservoir

The reservoir is *all copper,* heated like a tea kettle through copper pocket (stamped from one piece of copper) setting against left hand lining of fire box. It boils 15 gallons of water in a jiffy and, by turning lever, the frame—and reservoir—moves away from fire. This feature is patented and can be used only on the *Majestic.*

Ask your Dealer to show you the greatest improvement ever put into a range—makes Majestic 300% stronger where other ranges are weakest.

Other Exclusive Features

It's the best range at any price, and should be in *your* kitchen. It is for sale by the best dealers in nearly every county in 40 states. If you don't know who sells them in your vicinity, write us and we will tell you, and send you our booklet, ***"Range Comparison".*** Every farmer's wife should read this booklet.

Majestic Mfg. Company, Dept. 131 St. Louis, Mo.

The Range with a Reputation

Universal Magazine Baby Spoon.

This is the attraction of the present day. An elegant baby spoon. This spoon is finished with velvet handle in a beautiful carnation pattern and is guaranteed to be heavily plated with silver on a German silver base; something real good that will be kept a lifetime. Great Market For Poultry.

Philadelphia prices for dressed poultry in the middle of summer: Fresh killed fowls, ice packed, fancy, weighing 4½ to 5 pounds apiece, per pound, 17c.; fancy, 4 to 4½ pounds, 16 to 16½c.; smaller size, as to quality, 13 to 15c.; old roosters, dry picked, 11c.; broilers, nearby, as to size and quality, 18 to 20c.; Western, fancy selected roasting or broiling chickens, 18c.; good to choice, 16 to 17c.; Western, common to fair, 12 to 15c.; squabs, white, per dozen, $1.75 to $5.00; dark and No. 2, 50c. to $1.25.

Our Subscription Department.

This office will quote subscription prices upon any regular publication issued in the United States. We do business direct with the New York Publishers' Clearing House, and all our orders are filled on the day of arrival. All who wish to subscribe for periodicals, magazines or class publications should send their orders direct to the Hale Publishing Co., 3550 Vista Ave., St. Louis, Mo. Write for quotations on any list of papers.

THE BOOK OF LIVE STOCK CHAMPIONS.

We are actively engaged in preparing the new edition of the Book of Live Stock Champions for publication.

We have published several editions of this valuable book and intend to make the new edition far superior to all others.

We already have illustrations of seven hundred different champions, and in each case the picture occupies a half page in the book. We are now gathering the remaining three hundred pictures.

Each illustration is a special demi-tone engraving from a photograph taken from life. No drawings or fancy pictures appear in the book.

First and second-prize winners are not eligible unless they have also won championship prizes. It is a Book of Live Stock Champions, not simply a book of ordinary prize winners.

Champions of the beef cattle breeds are admitted by their show-ring honors. We have enough pictures of beef cattle champions to make a book by themselves.

Dairy cattle are admitted by show-ring honors, also by officially tested dairy records. We have the finest selection of dairy cattle in the world.

Draft horses are admitted on show-ring honors. Trotters and pacers are admitted on track records or as noted sires. We have all the famous horses, going back thirty years.

Thoroughbred horses are admitted on account of track honors or as sire or dam of champions. Saddle horses and ponies are admitted as championship winners.

Jacks and jennets, also mules, are admitted on show-ring or market honors.

Hogs, sheep and Angora goats are admitted as winners of sweepstakes prizes at State, National or International Fairs.

Numbers of famous car-loads of cattle, horses and sheep which have won show-ring and market honors will be published in the book.

Every live stock champion is entitled to entry providing a first-class photograph can be obtained. We do not intend to disfigure the book with poor pictures. It is better to leave out the poor pictures than to apologize for an inferior book.

We do not charge the owner for publication of his animal, but we do ask his co-operation in furnishing first-class photographs and the records of said animals.

It is worth something to a publisher to know how many books to print and bind. We therefore offer the first ten thousand copies of this edition at one dollar per copy, including a two-year subscription to The National Farmer and Stock Grower. The first ten thousand copies will be handsomely printed and elegantly bound in red cloth, with gilt title. This is an extraordinary offer. After publication the cloth-bound copies will cost two dollars a copy without the subscription.

HERE IS A SUBSCRIPTION BLANK.

Hale Publishing Co., 3550 Vista Ave., St. Louis, Mo.:

Gentlemen:—Herewith please find one dollar to pay for two-years' subscription to The National Farmer and Stock Grower, for which please give me credit. You will please send me as a Souvenir Supplement, post free, safe delivery guaranteed, one copy of the The Book of Live Stock Champions, cloth-bound edition of 1911, immediately after publication.

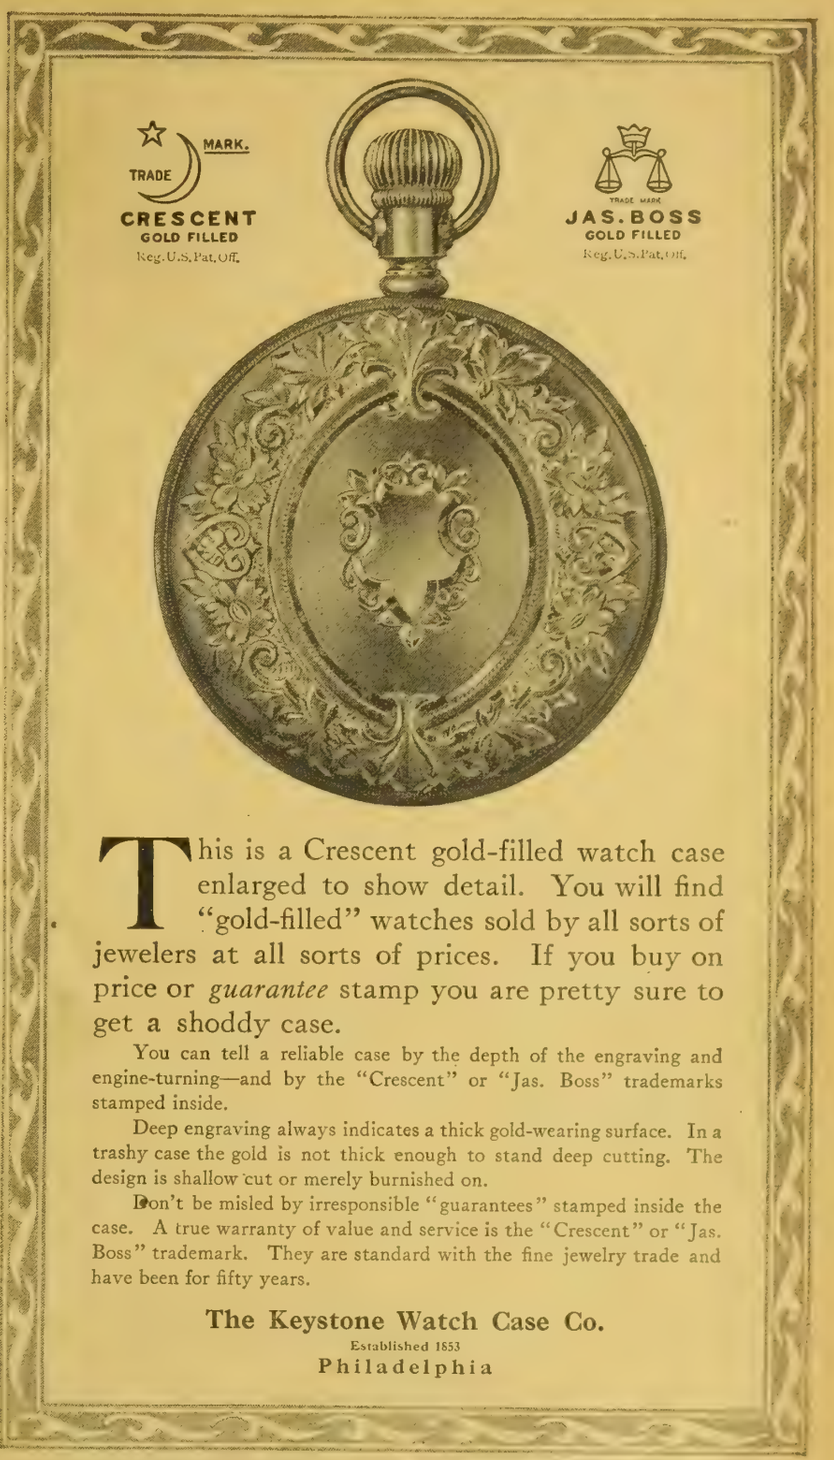
My occupation is.....



This is a Crescent gold-filled watch case enlarged to show detail. You will find "gold-filled" watches sold by all sorts of jewelers at all sorts of prices. If you buy on price or *guarantee* stamp you are pretty sure to get a shoddy case.

You can tell a reliable case by the depth of the engraving and engine-turning—and by the "Crescent" or "Jas. Boss" trademarks stamped inside.

Deep engraving always indicates a thick gold-wearing surface. In a trashy case the gold is not thick enough to stand deep cutting. The design is shallow cut or merely burnished on.

Don't be misled by irresponsible "guarantees" stamped inside the case. A true warranty of value and service is the "Crescent" or "Jas. Boss" trademark. They are standard with the fine jewelry trade and have been for fifty years.

The Keystone Watch Case Co.
Established 1853
Philadelphia

To Buy Groceries Right.

On page 15 will be found an advertisement of Montgomery Ward & Co., relating to their pure-food grocery catalogue. This firm is well and favorably known as a strictly reliable house, and hundreds of thousands of farmers will testify to this from having bought of them for many years. To get this catalogue, all you have to do is to write a postal card, saying: "Please send us your grocery catalogue as advertised in The National Farmer and Stock Grower." Address, Montgomery Ward & Co., Chicago Avenue Bridge, Chicago, Ill., or to Montgomery Ward & Co., Nineteenth and Campbell streets, Kansas City, Mo. The service is equally as good from either establishment.

Town and Country Population.

According to the census, there are 42,623,383 people who are classed as living in towns and cities and 49,348,883 who live in villages and in the country and classed as the rural population.

Best Watch in the World.

One hundred and eighty of the leading railroads have adopted the Howard Watch as the standard of excellence. It is because the Howard Watch has no actual competitor. There is an interesting story about this watch which our patrons will take pleasure in reading. Just write a postal card to Dept. 122, Howard Watch Works, Boston, Mass., and ask for the story of The First American Watch. See page 7 and read about the best watch in the world.

According to Hon. L. C. Dyer, there are twenty-four establishments in St. Louis classed as meat packing houses. This, of course, includes East St. Louis.

MAY MANTON EMBROIDERY.

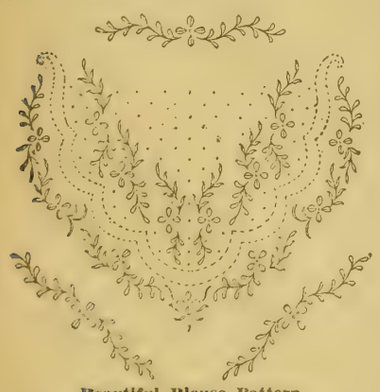
These paper patterns require only a hot iron to insure a perfect transfer on cloth. The way to do it is to lay the material to be stamped on a padded ironing board or table, place the pattern over it with the printed side down and press over the entire surface of the paper with a hot iron, when a perfect outline will result. Please order by embroidery number.

A Satisfactory Border.

No. 598.—Design for an embroidered border in cross stitch style. The border is one and five-eighths inches in width. Four yards and four corners are given. The price of the pattern is 10 cents.

Infant's Pillow.

No. 600.—Design for embroidering an infant's pillow, seventeen inches square. Upper and under portions are given, the under portion with scallops and eyelets only. The two are designed to be laced together through the eyelets. The price of the pattern is 10 cents.



Beautiful Blouse Pattern.

No. 599.—Design for embroidering a blouse with lace insertion. The price of the pattern is 10 cents.

Beaded Braid Border.

No. 601.—Design for a beaded or braided border. The border is one and two-eighths inches in width and four yards are given. The price of the pattern is 10 cents.

Cross Stitch Border.

No. 602.—Design for an embroidered border in cross stitch style. The border is one and five-eighths inches in width and four yards are given. The price of the pattern is 10 cents.

Please send all orders for these embroidery patterns to the **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

A Village Playground.

A suitable playground for children has long been accepted as a definite need in our cities and larger towns. But it is only recently that the need of the country child for regulated play has been recognized. It has been assumed that boys and girls who live in the country among the many resources that nature offers need nothing further in their play development. But the fact has to be faced that the country child knows often less than the city child how to play, and needs equally direction and guidance if the play life is to have its greatest value.

The solving of this problem in a small Vermont town is full of suggestiveness.

The village is a small one, having a few thousand inhabitants. There was no park or public square of any kind, but there was an energetic Village Improvement Society. In June, 1910, this society voted ten dollars to begin a playground fund, and the matter was put in the hands of one of the members, a bright college girl of resources and sympathy. The use of a vacant lot was donated and the enterprise began. A kind-hearted carpenter gave his work, charging only for materials. Other necessities were given by generous citizens. An organization of workingmen in the town voted twenty-five dollars for lawn swings, and the village newspaper gave the movement enthusiastic publicity. The entire equipment the first season was unsolicited.

The playground was located near a Soldiers' Home, and the old veterans became so interested watching the children's happiness that they contributed five dollars out of their scanty pension money.

The first year the play was supervised by volunteer workers. Once a week folk dancing was taught, and there was a story-telling afternoon. Much to the surprise of everyone, the first season closed with an equipment valuing nearly one hundred dollars, consisting of a sand box, two lawn and two rope swings, horizontal bar, trapeze, two rings, a high and broad jump, flag and flagpole, slide, tooter and basket ball and base ball fields.

The playground was closed in the fall, when the public school opened, but the young girls who had supervised the play organized a Girls' League as a branch of the Village Improvement Society for the study of local problems and practical work.

The following spring, without a dissenting vote, three hundred dollars were appropriated for the playground. A large part of this money was used to obtain a trained Supervisor, additional funds were solicited and the equipment of the previous year was greatly increased. Raffia work and a class in sewing were started. Once a week there is a field day, and the boys formed a Base Ball League.

Two evenings a week the grounds are open for the younger working people in the village. In this way the entire population who need recreation are served.

This is almost an ideal community enterprise, growing from very small beginnings, and enthusiastically supported by the entire community. The plan of the playground is so ample that it is a good model for anyone desirous of developing recreation in a country village.—Anna B. Taft.

The condition of Missouri pastures is 92 out of a possible 100.

Not Bad Milk.

There has been considerable milk agitation at St. Louis recently, but it has not touched the receivers and distributers of milk from the country farms. The milk sold by the principal distributers at St.Louis is very good. Some of the milk retailed over the counter at cheap restaurants is thin and some of the city dairies are dirty. A general clean-up is the result of the disturbance and the agitation is doing no harm.

High-scoring Butter.

At the Wisconsin State Fair, the first premium for creamery butter was awarded to H. H. Whiting, of Cedarburg, Wis., on a score of 98; the second to R. P. Christensen, of Milltown, Wis., score 97.5; and the third to A. L. Radke, of Plato, Minn., on a score of 97.

At wholesale, in St. Louis, sunflower seed is quoted at $3.65 to $3.75 per 100 pounds.

$1.00 a month Buys this Machine

30 days free trial

For Lovers of Flowers.

Park's Floral Magazine is the oldest and best floral monthly in the world. Forty-first year. Illustrated. Bright as a Marigold and published at 25 cents a year.

The **Universal Magazine** is a bright, cheerful, illustrated monthly magazine of thirty-two pages, three columns to the page, containing home reading, stories, fashions, patterns and poetry—a splendid publication for the money; also published at 25 cents a year.

We have made arrangements whereby by clubbing these two papers together and adding twelve fine tulip bulbs we are enabled to make the combination for 30 cents. The tulips are imported from Holland; the bulbs are all blooming size, and if planted now or before the ground freezes will bloom in early spring. They are hardy and will remain in the ground, increasing in size from year to year.

Send 30 cents and we will send both papers one year and the bulbs post free by mail. To Club Raisers:—Anyone sending us four subscriptions in accordance with this advertisement and $1.20 to pay for same will receive both papers one year and an extra dozen tulips for getting up the club. Address, **THE HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

For the Sick Room.

Cleanliness is the foremost agency in destroying disease germs, and it should be constantly practiced from the beginning to the end of an illness.

A chimney taken from a lighted lamp is one of the best and most quickly-prepared "hot" applications, and the best way to use it is to slip the hot chimney into an old stocking and apply to the pain; but it is a good plan to keep several sand bags ready for use. Make the bags of soft white linen or cotton and of any size wanted and fill with clean sand, and they are soft and yielding if not filled too full, and, when wanted, warm in the oven, and sand holds the heat for a long time. These bags can easily be pressed up close to the back or wherever it is needed.

Carbolic acid is a fine disinfectant for the sick room, and ground coffee or sugar burned on hot coals, and vinegar boiled with myrrh and sprinkled around the floor and edges of a sick room are excellent deodorizers, but they are not disinfectants.

All clothing should be put into hot carbolized water as soon as it is removed from the body of a sick person, because it absorbs the poisonous matter thrown off by the skin, and a teaspoonful of the acid to two gallons of water is about right; and in contagious diseases they should be allowed to soak in this water for six hours, then they should be boiled for an hour and they will be safe for anyone to use after that.

Ventilation is of great importance, and more fresh air is required for the sick than for the well, as there are many sources of impurity in the atmosphere of the sick room, such as the breath of both patient and attendants, the odor of perspiration and the foul air produced by burning gas or lamps.

In the sick room a bottle of strong boric solution will be found very useful, and this can be weakened as desired, and the strong solution is prepared by dissolving two heaping tablespoonfuls of boric powder in a quart of hot water. When you have a bottle of this boric solution you have one of the best home remedies for weak eyes, and a little salt added makes a fine gargle for sore throat, and there is nothing better to use as a douche for a cold in the head or for catarrh. The boric solution used as a douche for bowel trouble is extremely beneficial, and a little of the solution added to the water for bathing a sick person is very soothing and refreshing and will remove any odor from perspiration or from any other cause.

Every precaution should be used in cleaning a sick room to keep the dust down, as it is annoying and unsanitary for the sick person, and a good way to clean the room without having any dust is to put a little ammonia in warm water, then wring a mop as dry as possible out of this water and go all over the carpet, then sweep with a broom. When this is done, go over the furniture with a damp cloth and polish with a soft, dry cloth, and no dust need be stirred up at all, and it is a good plan to open the windows wide to let in fresh air and let out any unpleasant odors; and the face and head of the patient should be covered with a light covering when the windows are open.—Martha.

Tomato Salad For Winter.

A most delicious way to keep tomatoes for winter use is to put them up in what is sometimes known as cold catsup or winter salad. The tomatoes being uncooked, they have the delicious flavor of freshly-picked tomatoes. The salad keeps for many months, probably indefinitely, though we have never had any left after the first of May to prove it. This is the recipe for the salad:

One peck ripe tomatoes, two cupfuls chopped celery, two cupfuls brown sugar, one cupful chopped peppers, one cupful chopped onion, one-half cupful mustard seed, one-half cupful salt, vinegar.

Slice the tomatoes, add the above ingredients and mix. Then pour over enough vinegar to amply cover the mixture. Put into Mason jars and seal with rubber ring and screw top, or put in a stone jar and cover by tying a cloth over it.—Janet Thomas Van Osdel.

Payment in Advance.

Charles F. Murphy, the political leader, was talking at a luncheon in New York about loyalty.

"The loyalty of some men," said Mr. Murphy, grimly, "reminds me of the Chicago waiter.

"A Chicago man, as he ended his pork lunch, said to his regular waiter:

" 'George, I won't give you your usual dime to-day.'

" 'No, sir?' said George, with a surprised look.

" 'No, George,' said the Chicago man. 'I want to inculcate saving habits in you, and so I'm going to give you your tip in a lump sum as a Christmas present.'

" 'Thank you, sir,' said George, gratefully. He hesitated, looking rather worried, and then he ventured. 'But I wonder if you'd mind paying me in advance, sir?'

"The Chicago man frowned, but took out his wallet.

" 'Why, no, George, I guess not," he said, 'though it seems rather a strange request to make. What's the matter? Are you hard up, or is it just that you mistrust me?'

" 'Oh, no, sir,' said George, as he slipped the money in his vest pocket. 'It's nothing of that kind, sir; only I'm leaving here to-day, sir. I've got a New York job.' "

A gasoline engine is surely worth one extra man on a farm and maybe more. Make your own calculation in regard to running expenses.

SisterWoman!

READ MY FREE OFFER

My Mission is to make sick women well, and I want to send **you, your daughter, your sister, your mother, or any ailing friend,** a full 50-cent box of Balm of Figs Compound **absolutely free.** It is a remedy for the treatment of **woman's ailments,** and I want to tell you **all about it**—just how to use it yourself—right **at home** without any inconvenience—and the best of it is that it will not in the least interfere with your work or pleasure. Balm of Figs Compound is a remedy that has made sick women well and weak women strong, and I can prove it—**let me prove it to you,** and I will gladly do it, for I have never heard of anything that has, according to the abundance of testimonials at hand, so **quickly** and **surely** cured women's ailments. No internal dosing necessary—it is a local treatment, yet it has to its credit some of the most extraordinary cures on record. Therefore I want to place it in the hands of every woman suffering with **any form of female weakness or diseases so common to women.**

This 50c box of Balm of Figs Compound will not cost you one cent

I will send it to you **absolutely free,** to prove to you its splendid qualities, and then if you wish to continue further, it will cost you only a few cents a week. I do not believe there is another remedy equal to Balm of Figs Compound, and I am willing to **prove** my faith by sending out these **50-cent boxes** free. So, dear reader, irrespective of your past experience, write to me **at once — today** — and I will send you the treatment **entirely free** by return mail, and if you so desire, I can readily refer you to many, who can personally testify to the great and lasting cures that have resulted from the use of this remedy. But after all, the **very best test** of anything is a **personal trial** of it, and I know a 50-cent box of Balm of Figs Comcound will **convince you** of its merits. Nothing is **so convincing** as the **actual test** of the article itself. Will **you** give Balm of Figs Compound this test? Write to me today, and remember I will gladly send you a **50-cent box of this remedy absolutely free.** Address,

MRS. HARRIET M. RICHARDS, Box C 223, JOLIET, ILLINOIS

I Guarantee to Cure

ECZEMA

TO STAY CURED!

It is also called SALT RHEUM, SCALD HEAD, TETTER, ITCH, WEEPING SKIN, MILK CRUST, PRURITUS—these are different names, but all mean one thing—ECZEMA.

DR. J. E. CANNADAY, THE DOCTOR WHO TREATS NOTHING BUT ECZEMA.

I prove every word that I have said—I give to every sufferer

A FREE TRIAL

Just to show you that you need my treatment. It is yours for the asking. If you have been to other Doctors, if you have taken patent medicine, and used lotions and salves till you are disgusted, write to me—I will send you ABSOLUTELY FREE OF CHARGE, A TRIAL TREATMENT. There are no strings to this statement. There is not one cent to pay—not a penny accepted. I know what my trial treatment will do; I know that it will convince you more than anything else on earth that you need my treatment.

Don't Miss This Chance for a Cure

If you are SUFFERING FROM ECZEMA you can only be cured one way—REMOVE THE CAUSE. What is the cause? ACID IN THE BLOOD. How do you remove it? By cleansing the blood of the ACID.

My treatment is soothing—relieves the dreadful itching at once and cures the disease quickly. You don't have to take treatment for months and months. ONLY ONE CASE IN TEN needs the second treatment—ONE IN FIFTY needs the third—think of that!

What Eczema Is

Eczema is a disease of the blood and affects all parts of the body—the face, lips, ears, hands, feet, genital organ, etc.

SYMPTOMS.—Yellowish red eruption; the pimples or patches may swell and the itching is so great the person will scratch the top off, then they bleed and dark scales form; there is an oozing of matter. In some the skin cracks and bleeds. Itching is terrible; a person suffering will scratch till they bleed. Scales form on parts of the body, where the clothing comes in contact.

Reliable Beyond Question

This is a statement from the bank of my home town, where I have done business for years.

THIRD NATIONAL BANK

Sedalia Mo Jan. 2 1913.

TO WHOM IT MAY CONCERN:—Dr. Cannaday, of our city is a physician, making a specialty of ECZEMA. We have handled his business exclusively for one year and eighty four days. His patients deposit their money with us, in their OWN NAME, to be paid to the doctor, if his treatment is satisfactory. If we remember correctly, we have been called upon by only FOUR of his patients for their money, and it seemed then, that the fault was more with the Express Companies than with the treatment failing.

Considering the number of cases he treats, we regard his success as remarkable. We consider him perfectly reliable, and assure those placing their money with us a fair, square, business deal.

Yours truly,

Ten Years Guarantee

I positively Guarantee that every case cured by me will stay cured 10 YEARS! It must be good or it could not be sold this way.

Strong as Rock of Gibraltar

I am a graduate from two leading medical schools. I am the holder of a GOLD MEDAL taken in Competitive Examination. Does this not show that I am fully qualified? I will send you my book, showing endorsements of business men of all classes. Also testimonials and pictures from cured patients everywhere. Some of them may be YOUR NEIGHBORS.

MY BOOK

Is the most complete book ever sent out. I explain every form of the disease plainly and fully. I show pictures of many severe cases, which are extremely interesting. I send you names of thousands who have been cured and are grateful.

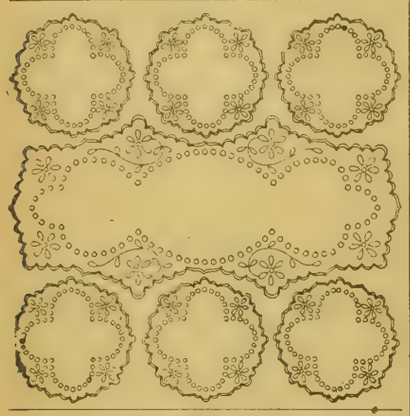
UNIVERSAL EMBROIDERY SET.

A Subscription Premium in Connection With the Universal Magazine.

The most beautiful of all trays and doilies are those which display a great deal of eyelet work; there is nothing more attractive on the dining room table than white linens embroidered in open work through which the polished wood may show.

The pretty Universal Embroidery Set illustrated below shows a dainty pattern that should be carried wholly in eyelets, both ovals and rounds. This set was made especially for us and consists of one large tray, size 8x17 inches; six doilies to match, size 5½x5½ inches, all stamped on fine white imported linen.

Send us Thirty Cents and we will send you this dainty set for a short time only, absolutely safe delivery



guaranteed, and the Universal Magazine for one year. The Universal Magazine is a nice, thirty-two-page, three-column magazine, issued monthly. It contains illustrated reading matter of interest to all the family. There are nice stories, historical sketches, selected poetry, a splendid line of patterns, and has a number of original household articles. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

To Club Raisers:—Anyone who will send in four subscriptions and $1.20 to pay for same will be credited with one-year's subscription to the Universal Magazine and one Embroidery Set.

Are You Nervous?

Nervousness is often merely a sign of physical weakness, an indication that the body is out of Tone. Bodi-Tone, which is offered on trial to every reader, has proven of immense value in nervous exhaustion, tired nerves, jangling nerves and shattered nerves, because its action in toning the body is just what is needed in the big majority of these cases. See trial offer on last page.

Housecleaning Helps.

If the cleaning was done thoroughly in spring the work now will be comparatively light. In many cases a mere sweeping and washing of windows will suffice. Again, insect pests must be fought, and the pests of the house, when they do exist, are most persistent.

Many never allow old clothes to accumulate, giving them away or making them into carpets and rugs as soon as they have passed the original stage of usefulness. Happy are they who can thus do, being assured of something better to replace them and thus having no bother with the accumulation. But there are others less fortunate who never let anything go without soon feeling the need of it, who must cut over and remodel until thoroughly tired of it. Those cannot thus easily make a wholesale clearance, but must save up the odds and ends to be used later.

It is such who have most trouble with moths. The old-fashioned kind that make a case of the cloth they infest and then remain as if dead until the miller emerges; the larvae-like moth that looks like a worm, these two infest woolen goods, and may best be kept out of them by rolling the goods very tight and by using lavender leaves or oil freely. Some prefer cedar chests; tobacco leaves or moth balls also tend to keep the pest at bay. The buffalo moth is never in a dormant state, and the larvae care little whether the goods are all wool or half cotton; they even delight in gathering at the base of a pile of papers. The larvae are small black, pumpkin-seed-shaped bits of down. The minute one is touched it literally slides away with a motion almost imperceptible. Crush it and it crumbles into dust.

Just a day or two ago I saw the query as to whether the lady bug causes the buffalo or carpet moth. It would be about as sane to say that bats breed bedbugs—a belief equally spread among the people and believed. This little spotted lady bug is one of our real friends and has nothing in common with the moth-producing insect. The latter is smaller, black and white, with a dash of dull brick red along either side, while the coloring of the lady bug is bright scarlet. Both are commonly seen in spring on the windows of infested houses.

Every year sees more and more banishing of carpets, and the vacuum cleaner is the only thing that can rescue them from oblivion. The oiled or varnished floor, with a plain rug, is so much more easily kept in order that it forces itself into the good will of the housewife. If you cannot afford the expensive art square, have rag rugs woven to take its place. Three strips woven with a plain center and fancy ends may be placed side by side and thus make a very good substitute for a real rug, even though the stripes are only carried out in the ends; or with burlap and a hook or needle your own handiwork may be used.

Ammonia is useful in cleaning in place of soap; and after you are through with the water containing it, pour around some plant; it is an excellent plant food.

A small amount invested in paint or varnish will freshen a dilapidated piece of wood wonderfully. But if you have a really choice piece, an heirloom in the family, do not venture to cover the beautiful wood with paint or varnish. A careful restoration of the natural wood is much more satisfactory.

Cover the broom with a bag of Canton flannel before sweeping or brushing down the ceiling. Save the old tissue paper for polishing lamp chimneys and windows. Clean mica with vinegar; rub up the zinc with a cloth moistened with kerosene.—Bessie L. Putnam.

Utilizing the Waste.

In visiting one of the largest steel mills in the world recently, emphasis was placed by the guide upon the fact that every rail which did not stand the test marking completeness was worked up again in the mill or sent to another plant to be made into salable products. "There is no waste here," he repeated, with pardonable pride.

In the cities all discarded household materials are sent to the rummage sale or placed personally where they will do some good. But on the farm, in spite of our efforts at economy—and few know better how to economize than the farmer's wife—there are many bits here and there for which there is no sale and seemingly no place.

But a few weeks ago we had nice cucumbers going to waste, and tried in two or three instances to give them away, but were unsuccessful; yet it chanced that a friend had been buying those not so nice, and was really glad of the chance to buy those for which there seemed to be no place. And so it often is. The early sweet apples may make very good pig feed, and yet we can rivet the bonds of friendship by treating our city friends, who are paying good prices for apples not nearly as good, with this waste; at least it is only waste to us.

In a few weeks we will be racking our brains to think of something nice to send Aunt Jane for Christmas. Nothing would please her better than dried corn from the garden or a few glasses of jelly from the apples and plums that are going to waste in the orchard; or a pillow stuffed with fragrant evergreens, hops or sweet clover. In the garden are beds of sage and summer savory, more than any one family can use. Try to pair off the left-overs to suit those who want them. There are always some who can use every useful product. It is a study which pays big in the end to unite the surplus and the wanting.—Bessie L. Putnam.

YOU **$5 to $10 a Day Easy Money** **YOU**

MAKES no difference if you never sold a dollar's worth of goods in your life---big money comes easy taking orders for our famous made-to-order union made suits, pants and overcoats. Prices so low, quality so high, they sell on sight.

REGAL TAILORING COMPANY, 323 Regal Building, Chicago, Illinois

Not a Patent Medicine.

Bodi-Tone, the tablet medicine which is becoming so popular through its cures, is not a patent medicine. Its ingredients are not a secret. It contains Iron Phosphate, Gentian, Lithia, Chinese Rhubarb, Peruvian Bark, Nux Vomica, Oregon Grape Root, Cascara, Capsicum, Sarsaparilla and Golden Seal. Such ingredients guarantee its merit. Read the trial offer on last page.

Opportunities to Save Money.

On page 15 will be found the advertisement of Montgomery Ward & Co., of Chicago, the original mail order house, and one that in every department is ahead of the times. There are two establishments—one at Chicago and the other at Kansas City. Note the coupon on page 15 and mark the item you are interested in and send it to the nearest address.

On the peach orchard farm of E. W. Mirable, near Roswell, New Mexico, bees are taking honey from ripe peaches. This is claimed to be a new product and samples will be shown at the Roswell Exposition this month.

Personal To Rheumatics

I want a letter from every man and woman in America afflicted with Rheumatism, Lumbago or Neuralgia, giving me their name and address, so I can send each one ***Free A One Dollar Bottle*** of my Rheumatic Remedy. I want to convince every Rheumatic sufferer at my expense that my Rheumatic Remedy does what thousands of so-called remedies have failed to accomplish—***ACTUALLY CURES RHEUMATISM.*** I know it does, I am sure of it and I want every Rheumatic sufferer to know it and be sure of it, before giving me a penny profit. You cannot ***coax*** Rheumatism out through the feet or skin with plasters or cunning metal contrivances. You cannot ***tease*** it out with liniments, electricity or magnetism. You cannot ***imagine*** it out with mental science. ***You Must Drive It Out.*** It is in the blood and you must ***Go After it and Get it.*** This is just what Kuhn's Rheumatic Remedy does and that's why it cures Rheumatism. Rheumatism is Uric Acid and Uric Acid and Kuhn's Rheumatic Remedy cannot live together in the same blood. ***The Rheumatism has to go and it does go.*** My Remedy cures the sharp, shooting pains, the dull, aching muscles, the hot, throbbing, swollen limbs, and cramped, stiffened, useless joints, ***and cures them quickly.***

I CAN PROVE IT ALL TO YOU

If you will only let me do it. I will prove much ***In One Week,*** if you will only write and ask my Company to send you a dollar bottle ***FREE*** according to the following offer. I don't care what form of Rheumatism you have or how long you have had it. I don't care what other remedies you have used. If you have not used mine you don't know what a ***real*** Rheumatic Remedy will do. ***Read our offer below and write to us immediately.***

D. D. Kuhn

A FULL-SIZED $1.00 BOTTLE FREE!

We want you to try Kuhn's Rheumatic Remedy, to learn for yourself that Rheumatism can be cured and we want no profit on the trial. A fair test is all we ask. If you find it is curing your Rheumatism or Neuralgia, order more to complete your cure and thus give us a profit. If it does not help you, that ends it. Only one bottle free to a family and only to those who ***send the 25 cents for charges. Address***

KUHN REMEDY CO., Dept. N. 2100 NORTH AVE., CHICAGO, ILLS.

Ribbon in Fashion.

Louis Moray, expert fashion writer, says:

"In both the millinery and dressmaking field ribbon is more used at the present time than it has been for several seasons. It is considered superior in every way to piece goods for trimming hats and for many other purposes. It will be largely used for garnitures, as well as for girdles and sashes.

"The use of ribbon roses and other flower effects on evening gowns and hair dressings, or hair ornaments has superseded almost everything else. The double width is as often seen in ribbons as it is in fabrics. Bows, rosettes, muffs and entire hats are made with double width ribbon in enormously full plaited loops. It is also largely used instead of cord or silk for embroidering marquisette, chiffon and other materials in raised flower designs. This work appears on evening dresses and on tunics of other dresses.

"Extremely costly ribbons will be used in costume designs instead of garniture bandings. Messaline ribbons will be much used, and the East Indian effects in sash widths seem to be quite apparent in some of the high grades. Pecots are in plain, striped and shot. Velvets have velvet centers with Roman striped borders, tinsel, or satin in contrasting colors."

How Pets Are Dangerous.

Probably slowly, but very surely, the unscientific masses are being educated to the fact that germs are real, vital, result-producing organisms and not a product of the brains of over-fussy, would-be reformers. Even though she cannot see the germs walking around the edge of the common drinking cup, the mother who reads at all knows that scientists say they are there—evil, disease-producing germs—and so she does not allow her child to put the cup to the lips, but produces a folding drinking cup or perhaps a glass that she carries in her satchel. If neither of these are obtainable, the child probably goes thirsty until it reaches home. By the same process of education the mother no longer allows her child to use the common soap or the common towel supplied at the school, the railway station or any other public place.

But all of these are easy as compared with telling the child that he must no longer hug his little hairy, furry or feathery pets and half squeeze the life out of them with a demonstration of the affection that is bottled up in every normal child. Or suppose he is thus commanded, how long will he remember to keep his hands off the beloved objects?

But physicians say that the germs of nearly every known disease are hidden in the fur of the family cat. This does not mean that the cat is ill. It may be perfectly well and still be carrying the germs in its fur. And it must be remembered that many of these germs would have no effect on the health of the cat, for it is not subject to all of the diseases of humans. So when the little one cuddles down to its furry pet the child may be inviting scarlet fever, measles, whooping cough, typhoid fever, tape worm and sometimes even smallpox. An Ohio physician, who suspected that one of his patients had contracted tuberculosis from a cat, examined a number of cats in the town and found that every one of them had the disease.

And the dog and the canary bird are also known to carry disease germs in their coats.

Of course, frequent and thorough bathing of the pets and perfect cleanliness of their living quarters will help some, but even all of this care will not kill the disease germs. The only safe course is to teach children the danger of fondling their pets. A "Don't touch the cat!" without any explanation will mean that pussy will be still secretly hugged at times. But a simple and forceful explanation of the why of it will make many children remember to obey out of a sense of self-protection. — Janet Thomas Van Osdel.

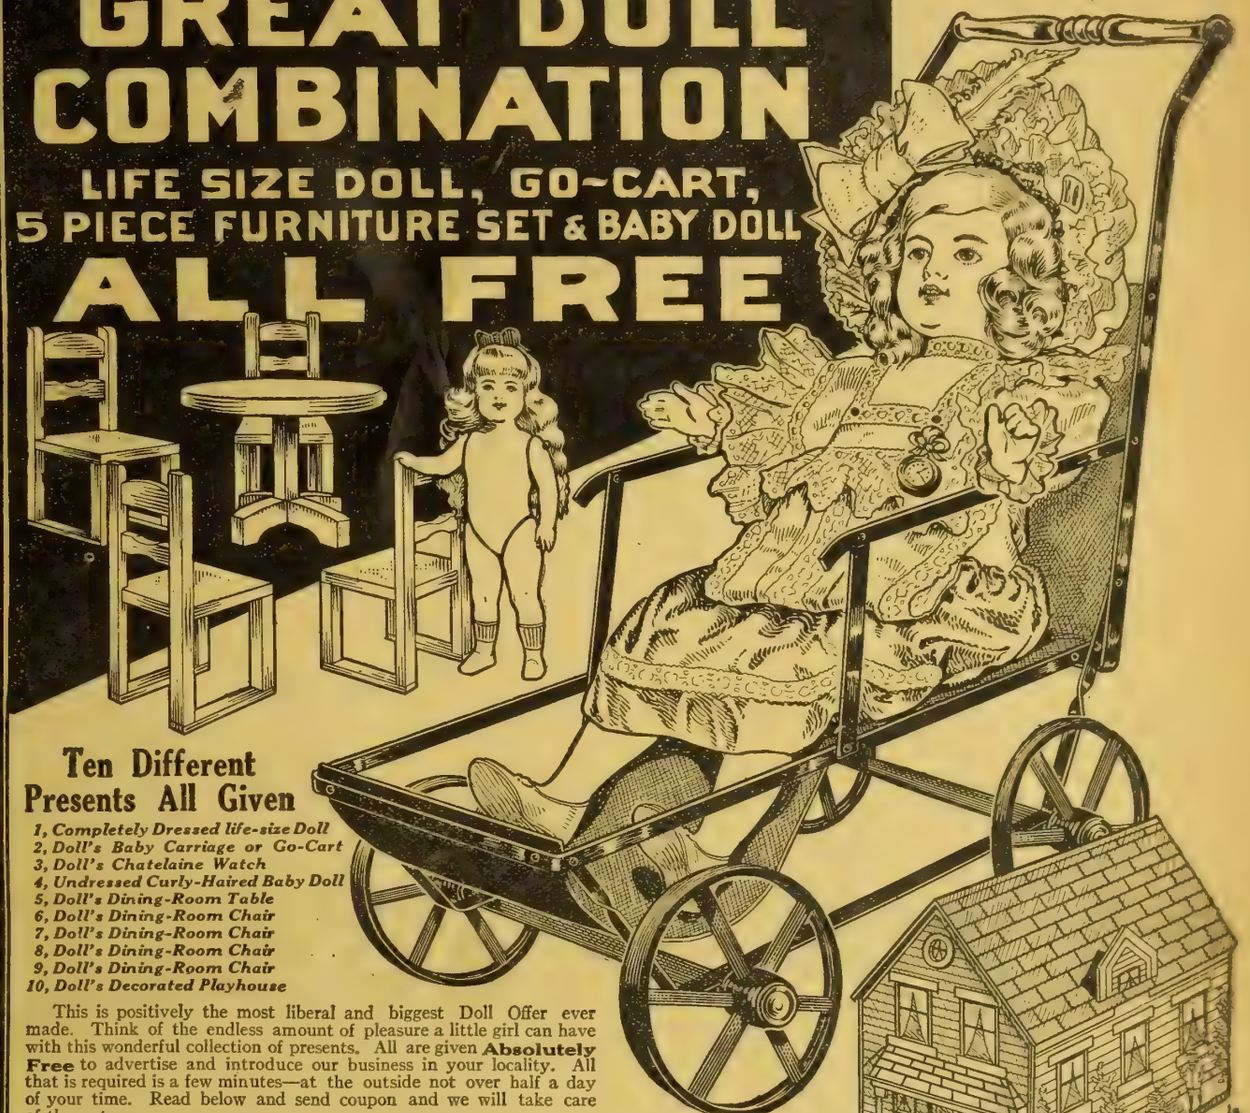
Farmers who will read the sample copies of this publication that we are sending out will find that it is worth the money to them. The subscription price is 50 cents a year, or three years for one dollar.

The acreage in Argentine devoted to wheat growing is now two million acres more than it was five years ago.

GREAT DOLL COMBINATION

LIFE SIZE DOLL, GO-CART, 5 PIECE FURNITURE SET & BABY DOLL

ALL FREE



Ten Different Presents All Given

1, Completely Dressed life-size Doll
2, Doll's Baby Carriage or Go-Cart
3, Doll's Chatelaine Watch
4, Undressed Curly-Haired Baby Doll
5, Doll's Dining-Room Table
6, Doll's Dining-Room Chair
7, Doll's Dining-Room Chair
8, Doll's Dining-Room Chair
9, Doll's Dining-Room Chair
10, Doll's Decorated Playhouse

This is positively the most liberal and biggest Doll Offer ever made. Think of the endless amount of pleasure a little girl can have with this wonderful collection of presents. All are given **Absolutely Free** to advertise and introduce our business in your locality. All that is required is a few minutes—at the outside not over half a day of your time. Read below and send coupon and we will take care of the rest.

Description of Presents

Our life-size doll is bigger than the ordinary baby—a foot and a half high. She is beautifully and stylishly dressed from head to toe, including large picture hat, trimmed with plume, lace, etc., fancy sateen dress with yoke, complete underwear, stockings, slippers with buckles, etc. Bisque body, jointed arms and legs, long, curly, waxen hair; opens and closes her eyes.

Dolly's buggy or go-cart is substantially made and amply large enough for dolly to sit in, as shown in the above picture. It is guaranteed to run smoothly. Dolly's little chatelaine watch looks just like a real watch, and she is very proud of it.

Our little baby doll is very sweet and lovely, with long hair.

The five piece furniture set is the cutest doll set you ever saw—regular dining-room table already set up and four upright dining-room chairs.

Just imagine the good times the little girl can have dressing dolly, making clothes for baby doll, and taking both out riding in the go-cart, serving dinner and tea, etc., etc.

Do not forget our little doll's playhouse, which is given extra for promptness, as explained elsewhere in this offer.

How to Secure All

If you want my ten grand doll premiums, simply sign your name on the coupon below and send to me promptly. I will then send you twelve of my new-style, large, 16x20 inches, all **gold** illuminated text pictures, with decorations. These pictures are brand new and made especially for me, none like them on the market. You distribute these gold text pictures free on my special plan—collecting 25c with each picture. Then you send me the $3.00 collected and the same day received, I will ship you the big dressed doll, go-cart, five-piece dining-room set, baby doll, doll's chatelaine watch, and also doll's house for promptness—not one, but **all ten presents.**

If you do not care to distribute my new gold text pictures on my easy plan, after receiving them, they can be returned at my expense. Nearly everyone, however, who sees my new pictures and hears about my new plan, will jump at the offer, and you can do the distributing in a very little time. All you need to do now is to send the coupon without delay.

EXTRA!

DOLL'S HOUSE

This handsome little Doll's House is decorated in colors, with painted chimney, windows, porch, etc. It is given extra and in addition to the other nine presents included in this offer, **just for promptness.** Send the coupon below **promptly**—at once, and get this nice little Doll's House as an extra present to complete the combination.

FREE TO YOU—MY SISTER

Free to You and Every Sister Suffering from Woman's Ailments.

I am a woman.
I know woman's sufferings.
I have found the cure.
I will mail, free of any charge, my home treatment with full instructions to any sufferer from woman's ailments. I want to tell all women about this cure—you, my reader, for yourself, your daughter, your mother, or your sister. I want to tell you how to cure yourselves at home without the help of a doctor. Men cannot understand women's sufferings. What we women know from experience, we know better than any doctor. I know that my home treatment is safe and sure cure for Leucorrhoea or Whitish discharges, Ulceration, Displacement or Falling of the Womb, Profuse, Scanty or Painful Periods, Uterine or Ovarian Tumors, or Growths; also pains in head, back and bowels, bearing down feelings, nervousness, creeping feeling up the spine, melancholy, desire to cry, hot flashes, weariness, kidney, and bladder troubles where caused by weaknesses peculiar to our sex.

I want to send you a complete ten day's treatment entirely free to prove to you that you can cure yourself at home, easily, quickly and surely. Remember, that, it will cost you nothing to give the treatment a complete trial: and if you wish to continue, it will cost you only about 12 cents a week or less than two cents a day. It will not interfere with your work or occupation. Just send me your name and address, tell me how you suffer if you wish, and I will send you the treatment for your case, entirely free, in plain wrapper, by return mail. I will also send you free of cost, my book—"WOMAN'S OWN MEDICAL ADVISER" with explanatory illustrations showing why women suffer, and how they can easily cure themselves at home. Every woman should have it, and learn to think for herself. Then when the doctor says—"You must have an operation," you can decide for yourself. Thousands of women have cured themselves with my home remedy. It cures all old or young. To Mothers of Daughters, I will explain a simple home treatment which speedily and effectually cures Leucorrhoea, Green Sickness and Painful or Irregular Menstruation in young Ladies, Plumpness and health always results from its use.

Wherever you live, I can refer you to ladies of your own locality who know and will gladly tell any sufferer that this Home Treatment really cures all women's diseases, and makes women well, strong, plump and robust. Just send me your address, and the free ten day's treatment is yours, also the book. Write to-day, as you may not see this offer again. Address

The price of each pattern is 10 cents.

Please address all pattern orders to **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Abnormal Vegetables.

A pumpkin, squash and eggplant several times their normal size were exhibited in Edwardsville, Ill. The pumpkin weighs 185 pounds and is so large that it takes two men to load it into a wagon. One man was unable to roll the pumpkin up a skid. It is three feet long and seven feet two inches in circumference. The pumpkin was raised by John Schmidt, of Wanda.

The squash was raised by H. H. Stahlhut, of Fort Russell. It weighs fifty pounds and is thirty-three inches long and three feet in circumference.

The eggplant was raised by Mrs. Julia Rohrkaste, of Edwardsville. It weighs four pounds and two ounces and is twenty-three inches in circumference.

Farming Not Slavery.

Prof. H. J. Waters, formerly Director of the Missouri Agricultural College, and now President of the Kansas Agricultural College, does not believe that in order to raise excessive farm crops intensive farming should degenerate into slavery. He refers to the slavery of the man, woman and child on the farm. He said at the Missouri Rural Life Conference:

"The increased acre yield must not come at the cost of man yields. We must not sacrifice our manhood and womanhood, as they have been sacrificed in European countries on the altar of high acre yields to support the people in the cities."

Notwithstanding the drouth that was, Missouri corn is three-quarters of a full crop.

UNITED PUBLISHING CO., DEPT. NO. 45 KANSAS CITY, MO.

Charming Little Courtesies.

What is more charming than a well-bred girl with the agreeable manners that show social training and a desire to please? Yet there is danger of overdoing even in courtesy.

It is the fashion just now to decry the manners of the present day; to say that boys and girls have no bump of reverence and less breeding. This may be true for the boys—there seems to be an alarming increase of cubbism—but girls are punctilious almost to a fault.

Manner should be spontaneous, not artificial, to be really pleasing. It should also be tactful. The girl who will charm is not she who is ostentatiously polite; who jumps to her feet with a bound and stands at attention with a smirk of conscious self-satisfaction whenever a woman a few years older than herself appears.

It is polite, a sign of right feeling, to show deference to older women, but many a girl is so painfully deferential to a girl who has been out but four or five more years than herself that it looks almost like "cattiness."

One woman who has been a belle for seven or eight years spoke slightingly of one of the season's debutantes. "I thought she was charming, noted for her good manners," replied a matron.

"Perhaps," was the reply, "but I don't like that kind of manners. She always tries to rub in my age by her tremendous punctiliousness. I'm sure she does it on purpose, as I overheard her say once she'd think those old girls would take up charity rather than try to rush society so hard when they were back numbers."

It should be easy to be attentive and courteous without obtrusiveness, and the sooner a young girl acquires this art the quicker her manners will seem natural.

Then there are courtesies that are too obvious. When a girl, usually careless and rude, even indifferent to the world at large, becomes overpoweringly good-mannered, the recipient is likely to go cause hunting.

The girl who is rude to her inferiors or to the women she thinks "cut no ice," gains little by her courtesy to those that do. They read her only too plainly, and are disgusted rather than pleased.

Then there is courtesy paid to the right person in apparently the right way that falls short of the mark because of a bored look or a wandering eye. Let a girl rise draggingly from her chair when an older person enters a room, or, while apparently listening attentively, gaze around the room on the sly or look blankly into space, and her manners will never make a hit with that person.

The courtesies that count are those that spring from a kind heart linked to a gracious manner and unselfish desire to be of use, to please. Anything more formal is quickly classified as surface good breeding and little appreciated.

FAT is Dangerous

Over-Fatness Shortens Life, Causes Heart Failure, Loss of Vigor, Kidney and Stomach Troubles. Spoils Figure, Is Uncomfortable, Unsightly.

Let Me Send You My Proof Treatment Absolutely Free.

WOULD YOU LIKE TO REDUCE YOUR FAT A POUND A DAY?

ILLUSTRATIONS SHOW REDUCTION OF 98 POUNDS.

My treatment is intended to make you look and feel years younger; to aid in giving you beautiful figure, skin, eyes, full womanly health and attractiveness, the kind that husbands adore and all others admire.

THOUSANDS OF TESTIMONIALS.

Lost 115 Pounds. Mrs. E. M. Reynolds writes: "When I began your treatment I weighed 285 lbs. I now weigh 170 lbs., and **never felt better** in my life. My bust measure is reduced from 54 inches to 38 inches; waist from 42 inches to 28 inches."

Permanent. M. E. King writes: "By the Dr. Bradford Method **I reduced 35 lbs.** eight years ago; haven't gained an ounce since. Rheumatism also cured."

Reduced 90 Pounds. W. R. Dennison writes: "I tried many so-called remedies, but got no satisfaction until I adopted the Dr. Bradford treatment, and have reduced 90 lbs. easily. Am now able to attend to my hotel business **without the feeling of being tired out** before evening comes on."

Weighs 60 Pounds Less. Mrs. Philip Fisher writes: "I was **a great sufferer from obesity,** it made me feel sick most of the time; had pains in back and **could hardly walk.** Am now able to tell another story; my **troubles have disappeared** and am **feeling fine.** Have lost 60 lbs. by your treatment."

Reduction 56 Pounds. Mrs. Alice Rouse writes: **"Health comes before everything else,** and your treatment has brought it to me; the loss of fat has been 56 lbs., and I have had many other benefits."

Lost 98 Pounds. Mrs. J. H. Wooldridge writes: "My figure and appearance have been wonderfully improved, have lost 98 lbs. **Friends amazed."**

Saved Her Life. A. G. Osgood writes: **"You saved Mrs. Osgood's life;** she was so fat that she had **fatty heart;** doctor said she could not live over a month, and **was liable to die** any moment. We got your treatment; loss of fat has been about 60 lbs. and her health marvellously benefited. No fear of dying now, doctors say."

Lost 112 Pounds. W. C. Newburn writes: "I have lost 112 lbs., am **wonderfully** benefited in heart and general vigor. Can climb mountains easily."

Full testimonials, from which above extracts were taken (with addresses), also many others, will be sent you.

I OFFER FREE PROOF TREATMENT

The testimonials printed in this advertisement are but a **few of thousands.** After you write me for my Free **Proof Treatment,** I will mail you a **legion** of testimonials, with names and full addresses of persons whose **weight has been reduced** and **perfect health restored.** You can write to or call upon former patients, who willingly, yea **gladly allow the use of their names.** My Treatment **reduces one pound daily** in many cases and is absolutely **safe, harmless, guaranteed.** My Method is intended to make you look **years younger, improves figure** and complexion. Gives surpassing **vigor,** ladies **cheerfulness** and **joy** in healthy living. READ MY FREE BOOK. *I believe you will say it is worth its weight in gold!*

Men and Women: Improve your health, become as active, physically and mentally as at age of 18 years! My treatment is **gentle,** wastes no time. Results noticeable daily. **No wrinkles,** no darkness under eyes, no flabbiness. **No starving,** no severe or time-taking exercising. Mine is absolutely the modern perfected method—the **triumph of therapeutics** and pharmacology in the cure of obesity. Beware of quacks who imitate my advertising.

You can place absolute confidence in me. I will treat you by mail as satisfactorily as if you were to come here. **You will be surprised and delighted** with the daily reduction and benefits to personal appearance, vigor and general health. Correspondence sacredly confidential. Plain envelopes used for my letters.

Get Rid of Your Needless Fat

It is dangerous, unsightly, uncomfortable and embarrassing to be too fat. Excess fat weakens the heart. The liver, stomach and kidneys become diseased, breathing is difficult, blood impure and congested, and end may come in **sudden death** by **HEART FAILURE, APOPLEXY, APPENDICITIS,** etc. You may save yourself from these **DANGERS; do not delay!**

Let me prove to you that my treatment will positively reduce needless fat, no matter where excess fat is located; stomach, bust, hips, cheeks, neck, double-chin; it will **healthfully, quickly, safely** and **lastingly** be reduced, without exercise or dieting; **your figure improved.** Would you like **clear, pure skin;** no wrinkles? **Lost vigor restored.** Rheumatism, asthma, shortness of breath, kidney and heart troubles, female ailments in women, often leave as the fat goes away. I will send you without a cent of charge to you, my **FREE PROOF TREATMENT.** You may reduce your fat a pound a day; others have done it.

FREE

SHOWING REDUCTION OF 112 POUNDS.

My treatment aims to give you perfect health with true, manly vigor. Women and men will be attracted to you. LIVE YOUR YOUTH OVER AGAIN!

Don't miss this offer. My PROOF TREATMENT is FREE. It will probably make you feel better at once. I also send you **Free** my Book of Valuable **Advice,** with testimonials from many well-known people. Everything mailed in plain wrapper. Keep this advertisement. **Write to-day. Address:**

DR. H. C. BRADFORD, 287C, Bradford Bldg, 20 E. 22d St, New York, N. Y.

NOTICE.—Dr. Bradford is a diplomated, registered, licentiate practising physician of the State of New York, with a long record of success in quickly, gently and safely reducing the weight of over-stout men and women. You can place your confidence in him. Your letter to the Doctor will receive prompt, friendly, confidential attention.

Woman and Secrets.

"The late William Rotch Wister, the father of American cricket, might also be said to have been a godfather of the feminist movement," said, at the Acorn Club in Philadelphia, a woman writer.

"Mr. Wister," she continued, "abominated that type of husband who treats his wife like a child, refusing to take her into his confidence. I once heard Mr. Wister tell a story about a Germantown man of that sort.

"The man came back from a business meeting wherein the future welfare of himself and his family was vitally involved, but he declined to tell his wife what had been the meeting's outcome.

"'Oh, no,' he sneered, 'I can't tell you anything. You'd repeat it if I did. You, being a woman, are constitutionally unable to keep a secret.'

"But the wife, with a quiet smile, retorted:

"'George, did I ever tell the secret of how you were led astray that summer the church conference met in Chicago, and got arrested in a saloon for biting off the bartender's ear?'"

The Weak Ones.

Police Chief Sebastian of Los Angeles was talking about a married man who had fallen before the charms of the beautiful flirt catcher.

George was always weak," said Chief Sebastian. "Once when he was a boy at school, his mother was apologizing for him to his school teacher.

"George is so easily led," the mother said.

"'Yes,' the teacher agreed, 'except in the right direction.'"

OFTEN IMITATED—NEVER DUPLICATED

Suesine Silk 39¢

Tens of Thousands of Women have Proved its Greater Reliability and value by Actual Use. They Buy it Again and Again, Year After Year, and They Tell Their Friends.

No advertisement we could write can speak half as strongly for Suesine Silk as the praise of these hundreds of thousands of fastidious women, and good judges of value, who know Suesine by **their own experience**—and who buy it again and again every season, year after year.

These women refuse all imitations and substitutes — they insist on buying genuine Suesine—with the name along the edge of every yard—like this

SUESINE SILK

Don't be talked into buying a substitute or you will be sorry—these imitations are adulterated with tin, glue and iron dust, which make them quickly fall to pieces—don't be coaxed or persuaded into buying them, for you will surely regret it.

We will send you, absolutely free, forty-two samples of Suesine Silk—more than 255 square inches altogether.

We ask only, that, when writing for these free samples, you will mention the name of your regular dry goods dealer, and say whether he sells Suesine Silk or not. Please be sure to give that information in writing to us.

No matter where you live, it is easy to get genuine Suesine Silk

We do not sell Suesine Silk except through regular retail merchants. But if we cannot send you the name and address of a Dealer in your vicinity who has Suesine Silk, we will see that your order is filled at the same price, and just as conveniently, by a reliable retail house, if you enclose color sample and price, 39c. per yard.

The price of Suesine Silk in CANADA is 50c. a yard.

Bedford Mills Desk 6

8 to 14 W. 3d St. New York City

SPLENDID SUBSCRIPTION PREMIUM.

Beautify Your Home With This Popular Stencil Outfit.

Stenciling has long been a popular form of home decoration and is today used more extensively than ever. Ladies are particularly apt at this work, and anyone can produce beautiful effects. From every standpoint stenciling is a very fascinating art of extreme usefulness. You can make

the most artistic pillow tops, curtains, portieres, centers, etc., in colors for yourself or for sale, without having any knowledge of painting, by using this up-to-date outfit. In fact, stenciling is so simple with this outfit that a child ten years old can do it.

This outfit is just the thing for beginners. It consists of six cut stencils on special oil board, six cups of water colors (something new, that will not spread, but dries instantly), two bristle stencil brushes, four thumb tacks, also full and explicit directions for mixing colors and using stencils.

Our Subscription Proposition.

Send us fifty cents by postoffice money order and we will send you the Universal Magazine for two years and you can select the Popular Stencil Outfit as a free premium.

The Universal Magazine is a nice, bright, cheerful, illustrated monthly magazine of thirty-two pages, three columns to the page, containing home reading, stories, fashions, patterns and poetry—a splendid publication for the money. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

To Club Raisers:—Anyone sending us four subscriptions and $2.00 to pay for same will be credited with one two-year subscription to the Universal Magazine and one Stencil Outfit free.

Flowers Worth Growing.

In reviewing our successes and failures in the floral world we are at the same time getting ready for better work another year and enjoying again in memory the pleasures of the summer just passed. There are old favorites renewed after being forgotten for years, and new ones grown for the first time. Some of these may have failed to equal our expectations, yet for the most part such failures may be traced to an unfavorable season or lack of care. The plant that is well grown is seldom disappointing. Even a carrot grown as a house plant may become a thing of beauty.

The old-fashioned morning glory is now seen winding up the trellis of the modern city home in the same loving way that it used to twine about the strings which made the trellis for the log cabin, and the same soft tints of blue and pink are seen. In rich ground this plant perpetuates itself from a self-sown seed in the more northern climes, though to keep it in just the place you want it a careful sowing of the seed is preferable.

The hollyhocks, with satiny petals, are another species which look out for themselves, becoming in a measure weeds unless watched. Yet as a border in the background they are especially valuable. Give them rich soil and they will flourish with very little care. Some of the double forms are exquisite in color as well as faultless in form.

If you have not grown them recently, resolve to have a bed of mixed poppies next year. The improved varieties are as rich in color blendings as a bed of rare tulips and equally showy. The first cost is small. It is less work to sow the seed than to plant bulbs, and the display may be kept up from year to year with very little trouble, the seeds being self-sown.

If you happen to have an old chip yard that is an eyesore, convert it into one of the most luxuriant growths of flowers. If conveniently located, plant bulbs this very fall. Hyacinths will grow to wondrous size in the rich soil and the flowering spikes next season will be the admiration of all beholders. There is no danger of getting the ground too rich, as with barn-yard fertilizers, and the decayed wood seems to suit bulbs exactly. If the spot is not the desired one, have the rich top dressing carried to some suitable place and make the flower-bed there. The ground can then be re-seeded to grass and the greatest fertility will be where you can quickly convert it into a beauty spot.

Do not omit to provide a large box of rich, fine soil for potting plants during the winter, when the snow prevents getting it outside. There are always emergencies requiring some extra soil. Sometimes the florist sends bulbs as a Christmas present to old customers; a friend offers you a prized plant; or something wants re-potting, despite your efforts to anticipate such demands in a more convenient season. Then when you want to start tomatoes or cabbage plants in the spring, it is very much easier.

There is no use in anyone who really likes flowers being entirely without them during the winter months. A petunia or nasturtium from the garden will brighten the window if you cannot afford to buy house plants; or even a wild flower, a clump of spring flowering native bulbs, a fern, or a thrifty parsley plant, will prove a thing of beauty when the winter reigns without.

If there is danger from freezing, remember that paper is better to keep out cold than cloth, especially if there is a little wind. One choice plant may be kept wrapped in paper and old carpet if necessary; and the pleasure of having some green in winter is certainly worth working for. If you have the facilities, do not be satisfied with less than a windowful; but have at least one.—Bessie L. Putnam.

How to Cook Potatoes.

Potatoes are low in protein and should be eaten with meat, fish and eggs.

The mineral matter lies next the skin and is quite largely lost when the potatoes are peeled.

The starch of new potatoes has not reached its maturity, so they are not so easily digested as old potatoes.

Potatoes have no pronounced flavor, as may be combined with many other foods.

A peck of potatoes weighs fifteen pounds and will average from fifty to sixty potatoes. One pound may be about four potatoes of medium size. One pound may cost from one to five cents in the cities.

If pared and all bad places removed the average loss is 25 per cent. The government experts report a loss of 11 per cent. Potatoes used were unusually good and great care given to removing as little of the potato as possible.

Soak old potatoes in water.

Change the water while cooking, if strong.

Never allow potatoes to stand in the sun.

Always pour off the water as soon as done and remove the cover to allow the steam to escape.

Potatoes cooked in their jackets should be pierced to allow the steam to escape.

Baked potatoes should be rolled in a cloth till the skins burst. This prevents the potatoes from cooking too long, which makes them sticky and soggy.

Potatoes should be simmered (not boiled). It is a waste of fuel and spoils the potatoes. The rapid boiling makes them a solid paste, which is both unpalatable and indigestible.

Cook potatoes with the skins on as often as possible. They are more nourishing and palatable. Mashed potatoes are delicious cooked in their jackets, peeled and mashed.

Potatoes may be kept warm a long time without spoiling if the skins are broken and the kettle well ventilated.

Potatoes well ventilated while cooking are more wholesome and of better flavor.—Eldora Lockwood, in Woman's World.

The Twice-a-Week GLOBE-DEMOCRAT

Is a magnificent newspaper, containing all the latest home, foreign and political news. It is unquestionably the best semi-weekly Republican newspaper in the United States, and is published at St. Louis, Mo.

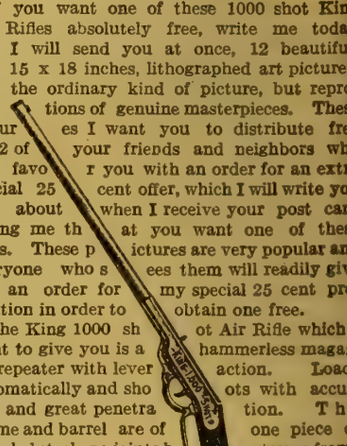
BOYS, THIS RIFLE IS FREE!

If you want one of these 1000 shot King Air Rifles absolutely free, write me today and I will send you at once, 12 beautiful, size 15 x 18 inches, lithographed art pictures, not the ordinary kind of picture, but reproductions of genuine masterpieces. These pictures I want you to distribute free to 12 of your friends and neighbors who will favor you with an order for an extra special 25 cent offer, which I will write you all about when I receive your post card telling me that you want one of these rifles. These pictures are very popular and everyone who sees them will readily give you an order for my special 25 cent proposition in order to obtain one free.



The King 1000 shot Air Rifle which I want to give you is a hammerless magazine repeater with lever action. Loads automatically and shoots with accuracy and great penetration. The frame and barrel are of one piece of nickeled steel—no joints between frame and barrel to work loose. Black walnut stock and splendid sights. All parts interchangeable. Shoots Air Gun Shot. Length 36 inches, weight 2½ pounds.

The hunting season will soon be in full swing, and I want you to have one of these rifles in time, so that you can bring down your share of the game. Don't delay, write that card today stating that you want a 1000 shot King Air Rifle, and by return mail, I will send you 12 of the pictures above mentioned and full information about my special 25 cent offer. Address:

Dept. D, Postoffice Box 155, Chicago, Ill.

SELECTED POETRY.

PASSING OF THE OLD WEST.

The West ain't what it used to be before the wire bands
Was stretchin' out on ev'ry side an' fencin' in the lands;
There ain't the elbow room there was before the nester came
An' squatted on the virgin soil to cultivate the same.

It used to be so big an' wide, so boundless an' so free,
As if a-reachin' out its arms an' sayin: "Come," to me.
An' we who had our cattle herds, we let 'em roam at will;
There wasn't any grazin' zone on valley, swale or hill.

The West was boundless; there was room for all, an' room to spare;
Each cattle man was free to say that he was treated fair.
Before the plow and reaper, why, we simply came an' went,
An' with our herds a-waxin' fat, the cowman was content.

But now it's changed: they've hemmed us in an' told us thus an' so;
An' they have fixed the boundaries where we may come and go.
We've got to hold our herds in hand an' fight for land to graze,
Becuz they ain't a-runnin' things as in the good ol' days.

The sunset of our day is gittin' dimmer in the skies;
They're forcin' us to leave the lands we won an' which we prize.
It won't be long till Cattle Land is just a memory—
A vision of the ol' frontier in days that Used-To-Be.

—E. A. Brininstool.

THE RANCH GIRL'S WAY.

The cowboy told how he asked polite,
A ranch girl fair to see;
"To the J B dance next Friday night
Kin I have your companee?'
"Kind sir," she pertly did reply,
"I has my companee,
An' his team kin easy pass yours by,'
An, so, 'Good night,' says she."

Then the puncher said: "Ag'in I try;
'Kin I have your companee
To the L X blowout next July?'
An' 'N-I-T,' says she.
'Besides,' she adds, 'you are too slow,
I has my companee
Fer that event. Do you have to go?
Well, 'Here's your hat!' says she.

Again he spoke: "But I hates to quit,
'Kin I have your companee
To the Christmas dance at Two Bit?
An' she says v-i-z:
'So fur as you're concerned I'll say,
I has my companee
Engaged from now till the judgment day,'
An' so, 'Good night,' says she.

"Now, tell me honest what you think,"
The cowboy asked of me;
"Would you not say—" he paused to wink,
"That I plumb frosted be?"
"I would," I sighed. He laughed, 'You miss!
Love's brand don't always show—
She'll go with me, for a 'Yes, sir,' kiss
Undid her woman's 'No.'"

—Robert V. Carr.

SONG OF THE SCYTHE.

One after the other the mowers pass,
With song of scythe through swaying grass,
Hush, ah, hush! 'tis the over word,
Which all the July day is heard
As the scythes swing low,
Clover and thyme and lilies tall,
Side by side are lying all.
Ribbons of beauty the long swaths seem,
Richest of gems the scythes agleam
As singing so:
"Hush, ah, hush!" and fall asleep
On sunlit mead, on hillside steep;
Hush and sleep,
And sleep.

A wreath of beauty the wild rose spray,
Where the bobolink sang his roundelay,
Thrilling sweet to his dainty bride,
Petals and songsters scatter wide
As the scythes swing low,
Daisies that hid the downy nest,
Cardinals with their fiery crest
Bow their heads as keen scythes pass
Over the clover, over the grass,
As singing so:
"Hush, ah, hush!" and fall asleep
On sunlit mead, on hillside steep;
Hush and sleep,
And sleep.

Held in amorous clasp of the sun,
Grasses sleep till day is done.
One by one their comrades fall,
A fragrant bed where they nestle all
As the scythes swing low.
Subtle mists from the fields arise,
They yield their soul till daylight dies;
And still the scythes through clover deep
Onward go with a ceaseless sweep;
As singing so:
"Hush, ah, hush!" and fall asleep
On sunlit mead, on hillside steep;
Hush and sleep,
And sleep.

—Winfield Lionel Scott, in Boston Evening Transcript.

THE PARTING.

"Well, since our young romance is dead,
There's naught to do but go;
But not without one kiss!" I said—
And the little girl said: "No."

"I leave my dreams of perfect bliss,
I leave my roses dust—
And must I go without one kiss?"
The maiden said: "You must!"

"One kiss!" was still my final plea—
"Ah, you have many such!
One little kiss to give to me—
Say, do I ask too much?"

"Nay—not too much," she breathed at last,
In tears at my rebuff;
"Nay, not too much! Our hour is past—
You do not ask—enough!"

Ah, mighty woman's feeble strength!
Ah, swift mankind, too slow!
Ah, easy riddle, guessed at length—
I'm never going to go!

—Cleveland Plain Dealer.

MY GARDEN.

There is a garden of my heart,
Where bloom the flowers of song;
At eventide, the world apart,
I walk my buds among;
Within me the deepening dark of night,
Flames forth the rose's red love-light.

The lily, on her slender stem,
Bends in the gentle breeze,
Caressed by waft of trailing hem
My vision never sees,
The filmy fringe of robe of day
Gilding into the far away.

When all my little urns of gold
Are brimmed with wells of sleep,
And shadowed bowls of verdure hold
The draught the moonrays steep,
I lie where nods, by murmuring streams,
My poppy from the Isle of Dreams.

—Samuel Abbot, in Boston Transcript.

Useful Helps in the Home.

An easy and safe way to start a fire is to dip a cob in coal oil, then roll in ashes and light with a match, and it is a good plan to keep the coal oil in a fruit jar with the top screwed down to keep it from evaporating.

Burn some small pieces of zinc in your stove once in a while to clean the soot out, and if the pipes are not much stopped up, burn potato peelings in the stove to clean out the soot.

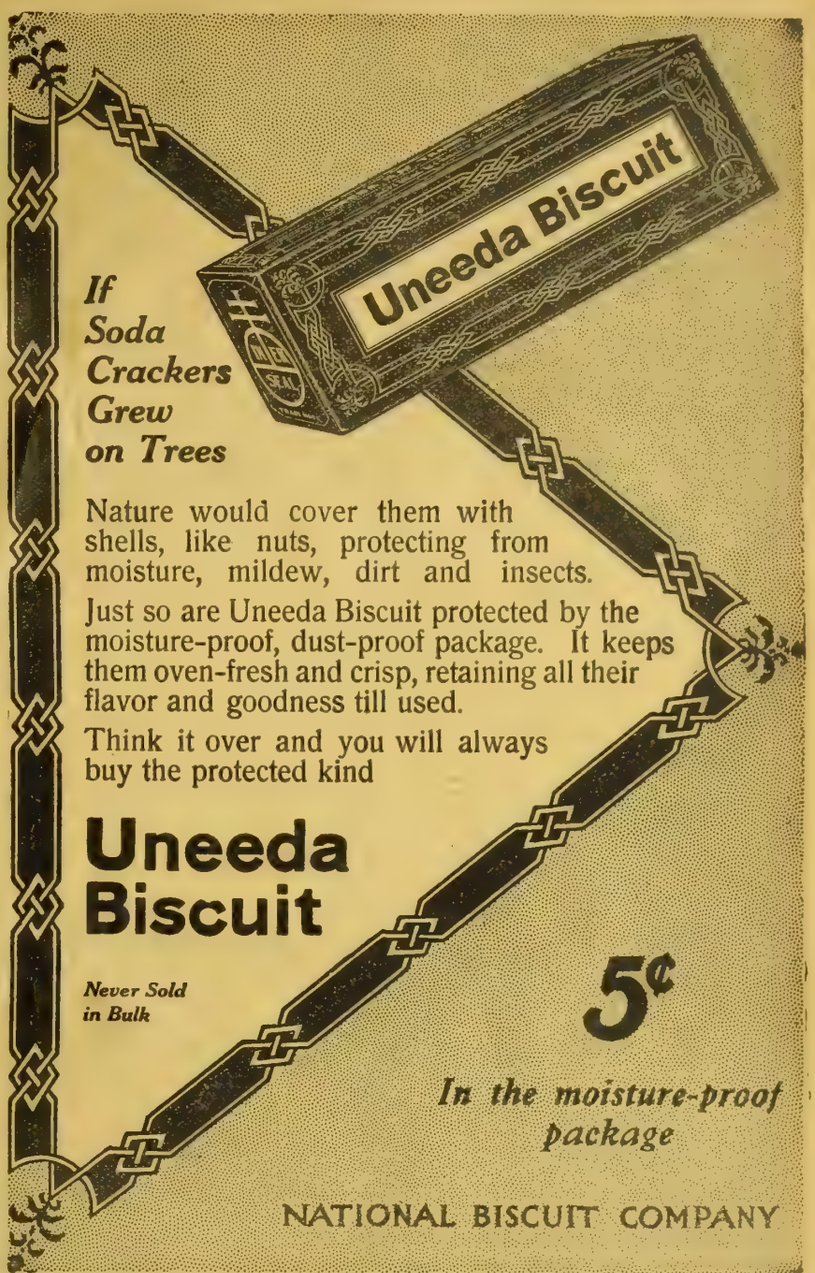
Save all the small pieces of toilet soap and you have collected a nice quantity, put them on the back of the stove in a little pan to heat slowly, and when all have melted, mould into a firm little cake, and when it becomes hard it is ready for use.

If a door hinge squeaks every time you swing the door open, dip a small brush or feather in coal oil and give the hinges a good oiling, but as this will run down the side of the door, a piece of thick paper should be placed on the floor.

A nice, warm lap robe for buggies and sleds in cold weather is made by cutting out the part of men's worn-out coats and pants and piecing them together into a robe of the desired size. First wash and press them nicely, then make a lining of any old material and baste the pieces to the lining and cover the seams with yarn in some simple stitch, and this yarn can be raveling of old gloves or socks, and the lining can be made of the best width of old dress skirts. Put in a thick interlining of old newspapers, then tie quite closely together and you will have a warm lap robe without any expense.

A nice way to make a soft bed side rug is to take pieces of old ribbons and silk, and cut them in strips about three inches wide, then lay four or five of these strips together, place them on a foundation and stitch through the center, then cut into fine fringe, and the strips should be stitched as close together as possible.

One of the most useful remedies in the house to use for small cuts, scratches and bruises is a good talcum powder, and it is best to bathe the part with warm water and dry with a soft cloth, then dust freely with Mennen's Talcum Powder, as there is nothing more healing or soothing than this prepared powder, and it is especially useful in a family where there are small children. This powder is excellent for any skin irritation, and if small cuts and hurts are cared for at once with the right remedy it may prevent blood poison and other serious troubles that often come from very slight wounds.—Aline.



Uneeda Biscuit
If Soda Crackers Grew on Trees
Nature would cover them with shells, like nuts, protecting from moisture, mildew, dirt and insects.
Just so are Uneeda Biscuit protected by the moisture-proof, dust-proof package. It keeps them oven-fresh and crisp, retaining all their flavor and goodness till used.
Think it over and you will always buy the protected kind

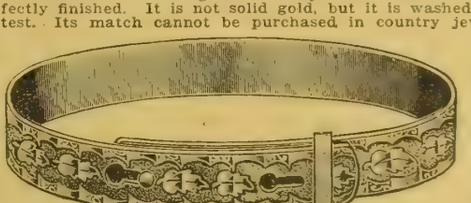
Ask Your Neighbor.

Many of your neighbors have used Bodi-Tone on its 25-day-trial-plan, for thousands have tested it in this way. Ask them what they know about it; ask them how it cures. Read the trial offer on the last page of this issue.

The farmers of the United States are under obligations to our good friends and brothers—the Canadians.

The Universal Magazine Bracelet.

This is all the rage. And Adjustable Bracelet. The most elegant design and perfectly finished. It is not solid gold, but it is washed and plated and will stand the acid test. Its match cannot be purchased in country jewelry stores for any price. It is a duplicate of the latest Parisian creation made expressly for the purpose of using it as a subscription premium to the **Universal Magazine**. The **Universal Magazine** is a nice, bright, cheerful, illustrated monthly magazine of thirty-two pages, three columns to the page, containing home reading, stories, fashions, patterns and poetry—a splendid publication for the money. To anyone who will send us a money order for 50 cents we will send the **Universal Magazine** for two years, and we will send one elegant **Universal Magazine Bracelet**, postage free, as a subscription premium. Money returned if not satisfied. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**



Universal Magazine Bracelet.

To Club Raisers:—Anyone who will get up a club of four two-year subscriptions in accordance with this advertisement and send us two dollars to pay for same will be credited with one extra two-year subscription to the **Universal Magazine** and we will also send one extra Bracelet for getting up the club.

RIGHT

You Can Prove It

It is offered *right*, on trial, to any man or woman who wants it, without a penny in advance. It is offered *right* to prove to every man or woman that it is *right* clear through, to prove that it is made in the *right* way, from the *right* things to set the body *right*. It goes to the *right* places in the body, gives them the *right* help and cures in a right way that *stays right*. We treat you *right* and want no money from you until you can write to us and say with gladness and gratitude

"It Is All Right"

If you do not find it *right* for your own case, for your own trouble, for your own condition, you don't pay a penny for it. It must be *right*, you must prove it *right*, or you get it absolutely free. You can prove it, without paying a penny until you are certain. This is the way we offer Bodi-Tone to the sick, this is the way thousands everywhere have already tried it, for Bodi-Tone is made to do *right work*, work that is sure and certain, work that will last, that the test of time will prove *right*. If you are not feeling right, if anything is wrong in your body, send for a dollar box of Bodi-Tone on this *right* plan, that is as fair to every sick person as it is to us, and give it a chance to set you *right* in the same right way it has done for thousands.

Bodi-Tone

does just what its name means—*cures disease by toning all the body*, and we want you to try a box at our risk and see what it will do for *your* body. Bodi-Tone is a small, round tablet, that is taken three times every day. Each box contains seventy-five of these tablets, enough for twenty-five days' use, and we send you the full box without a penny in advance, so that you can try it and learn what it is, so you can learn how it works in the body, how it *cures stubborn diseases* by helping nature to tone every organ of the body. Tone is a little word, but it means a great deal, everything in health. When all the organs are doing their part, when each is acting in a perfectly natural way, when all the functions are healthy and performed with natural vigor, when the energy, strength and power of resistance to disease are all at a natural point, then the body is in proper tone. When disease has attacked any part, the tone of the entire physical body should be raised to the highest possible point, to make all the body help in the cure. This is the power which underlies all of Bodi-Tone's great work for the sick, this is the power it offers you to help you get new health and strength.

What It Is

Bodi-Tone is not a patent medicine, for its ingredients are not a secret. It contains Iron Phosphate, Gentian, Lithia, Chinese Rhubarb, Peruvian Bark, Nux Vomica, Oregon Grape Root, Cascara, Capsicum, Sarsaparilla and Golden Seal. Such ingredients guarantee its merit.

When you use Bodi-Tone you know just what you are using, know it is good and safe and know you are taking the kind of medicine to provide real help for the body. It is a pure remedy that satisfies the most exacting. It contains no narcotics or habit-forming drugs, nothing that your own family doctor will not endorse and say is a good thing. It does not depend on killing pain with cocaine, opium, morphine, or other dangerous drugs. It does not excite the body with alcohol, but it tones the body and cures its disorders with remedies Nature intended to tone and cure the body when that power was given them. Thus, Iron gives life and energy to the blood, Sarsaparilla drives out its impurities, Phosphate and Nux Vomica create new nerve energy and force, Lithia aids in the Kidneys, Gentian does invaluable work for the Stomach and Digestive forces, Chinese Rhubarb and Oregon Grape Root promote vigorous Liver activity, Peruvian Bark raises the tone of the entire system, Golden Seal soothes the inflamed membrane and checks Catarrhal discharges, Cascara gives the Bowels new life in a natural way, and Capsicum makes all more valuable by bettering their quick absorption into the blood. *A remarkable combination that does wonderful work for health.*

All For Health

Each one of these valuable ingredients in Bodi-Tone serves to assist, to help, to build upon the others work. Each adds a needed element from nature to the body. Each has work to do and does it well. They are used because of this ability. We claim no credit for discovering the ingredients in Bodi-Tone, each of which has its own well-deserved place in the medical books of most of the civilized world. We simply claim the credit for the successful formula which we invented, for the way in which these valuable ingredients are combined, for the proportions used, for the curative force which thousands have found in Bodi-Tone, for the cures which make it different from other remedies. Most of these ingredients are as old as civilization itself, for the curative forces which Bodi-Tone ably uses are the forces which have always existed in nature for the restoration of the body's health. Many are regularly prescribed in some form by the medical profession for various diseases and irregular conditions, being used either separately or in combinations with such drugs as each doctor may favor, for there are wide differences of opinion among the doctors of various schools. The *exact combination used in Bodi-Tone* is what gives it the far-reaching and thorough curative and restorative power that makes possible the remarkable cures experienced by Bodi-Tone users, cures which prove the difference between Bodi-Tone and common remedies. That is why we want to send you a box on trial, for we know you will find it different and superior.

You Need It

If you are tired of ceaseless doctor bills and wearied of continual dosing without results, *you need Bodi-Tone right now.* If your local doctor has done you no real good, if you have given him a chance to do what he can and the ordinary medicinal combinations he used have failed, give this modern, scientific combination of special remedies a chance to show and prove what it can do for you. Its greatest triumphs have been among men and women with chronic ailments who had tried physicians and specialists at home and elsewhere without lasting benefit, and for this reason all chronic sufferers are invited to *try it at our risk.*

Bodi-Tone offers its valuable services to you right now, right from this page, if you are sick, if you need medicinal help, if your bodily organs are not acting as they should, if your body is not in right and natural tone. That is what Bodi-Tone is for—to restore health, vigor, vitality and strength by restoring tone to the body.

If there is anything wrong with your Kidneys, Bodi-Tone helps to restore tone to the Kidneys, helps to set them right. If there is anything wrong with your Stomach, Bodi-Tone helps to tone the Stomach, helps to set the wrong right. If there is anything wrong with your Nerves, your Blood, your Liver, your Bowels or your General System, the health-making ingredients in Bodi-Tone go right to work and keep on working day after day, exerting always a definite action that produces curative results of the kind sufferers appreciate. If you have Rheumatism, Bodi-Tone helps to eliminate the Uric Acid from the system while it restores tone to the Kidneys, Stomach and Blood, thereby preventing a continuance of Rheumatic poison and putting new activity into muscles, nerves and joints. Bodi-Tone should be used by all women suffering from any Female Ailment, for its toning properties have been found especially valuable in such ailments. Bodi-Tone should be used by all persons whose bodies are not up to the full maximum of natural vigor, strength and vitality, for its purpose is to restore the body to its highest plane by making health in every bodily function.

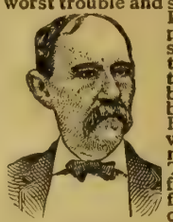
We Risk All

Why delay another day, when a trial of this proven medicine is yours for the asking. Why keep on suffering, when by filling in your name and address on the trial coupon and mailing it to us, you can get a twenty-five days' treatment of this great remedy which has already restored thousands to health. It just costs a two cent stamp, and you don't pay a penny unless it benefits you. You take no chances, for the value and curative powers of Bodi-Tone have been amply proven by two years of glorious cures. It is no longer a new remedy, but a remedy with a history—a history of cures that has astonished the doctors and delighted the sick. It has been tested in hundreds of thousands of cases, covering ailments in both sexes, at all ages.

Persons suffering from Rheumatism, Stomach trouble, Kidney, Liver and Bladder Ailments, Uric Acid Diseases, Female Troubles, Bowel, Blood and Skin Affections, Dropsy, Piles, Catarrh, Anaemia, Sleeplessness, LaGrippe, Pains, General Weakness and Nervous Breakdown, have tested Bodi-Tone and fully proven its right remedial value in such disorders.

Their experiences have proven beyond a shadow of doubt how the Bodi-Tone plan of *toning all the body* is a *right* plan that helps to *cure* these and other disorders, that it is *a right and to nature.* Many who have for years been in poor health and have tried most all of the prominent medicines, have found that *one single box of Bodi-Tone* did more good than *all* the others combined. Others who had suffered for many months, and many for years, trying many doctors and specialists, found their first real benefit in Bodi-Tone, after all else had failed and hope was almost gone. It goes to the root in the body and cures because its work is rational and thorough, the only kind that makes cures permanent. Read the reports on this page, showing how it makes new life, health and strength, and send for a trial box and see if it will not prove the *right thing* for you.

Bad Catarrh Cured at Sixty-Nine Years

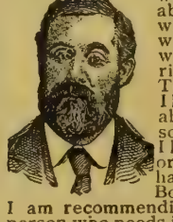


ROYAL, ARK.—I suffered for years with Stomach Trouble, Indigestion and Catarrh of the Bladder, as a result of Malarial Fever. For the past eight years my worst trouble and suffering has been with my Bladder. I had great difficulty at times in passing water, there being a painful smarting and burning, and at other times I would have difficulty in retaining it. My condition finally had become very serious, as slime and blood were passing, and I feared that Brights Disease had set in. I tried various remedies and doctors with no benefit until I read about Bodi-Tone in one of my papers and sent for a one dollar box. The results from this box were so satisfactory I ordered more Bodi-Tone and kept right on using it. I have now used three boxes, and with such great benefit that the Bladder trouble has entirely ceased. I am also much better in other ways. I am sixty-nine years old, and consider Bodi-Tone a remarkable medicine to do such good work for me at my age and in my serious condition. H. E. EVARTS.

Heart Trouble, Smothering Spells and Dropsy

BURNSIDE, KY.—I am fifty-six years old, and for a number of years have been bothered with Heart Trouble, Smothering spells and Heart Dropsy. I grew very weak and my legs and arms would swell very much larger than their ordinary size. In fact, my entire body would be swollen, but the swelling was the worst in my limbs. My Kidneys, too, were out of working order and gave me much trouble. My physician treated me and gave me medicine for awhile which seemed to make me worse instead of helping me, and I began to think my case was a hopeless one. But upon seeing the Bodi-Tone advertisement I decided to give it a trial. I got a trial box, and since I took the first dose I have never had a spell with my heart. I kept it up and the swelling left me and I continued to get better right along. I am now able to do all my work and am feeling better than I have for years. Other members of my family have used it with like good results. MRS. WM. VAN HOOK.

Its Effect in This Case Was Almost Magical



HARTFORD CITY, INDIANA.—When I commenced to use Bodi-Tone I had been laid up for about eight weeks with Rheumatism. Whenever I was able to get around at all, I had to walk with a cane. My flesh was so sore that whenever I would touch it the feeling was just like I was lifting the flesh right off the bone. The effect of Bodi-Tone was almost magical in my case. I had not used it a week before I was able to go back to work. It took all soreness and lameness out of me and I have not since had a Rheumatic ache or pain. I am fifty years of age, but I have never seen a medicine to beat Bodi-Tone. I am a railroad man, and I am recommending Bodi-Tone whenever I meet a person who needs it. ABE BRICKER.

Trial Coupon

Clipped from National Farmer and Stock Grower

Bodi-Tone Company,
Hoyne and North Ave., Chicago, Ill.

I have read your offer of a dollar box of Bodi-Tone on 25 days' trial, and ask you to send me a box by return mail, postpaid. I will give it a fair trial and will send you $1.00 promptly when I am sure it has benefited me. If it does not help me I will not pay one penny and will owe you nothing. Neither I nor any member of my family have ever before used Bodi-Tone.

A CURE IS WHAT YOU WANT

If You Are Sick of Experimenting—
Sick of Failures—Sick of Being Sick—

LET ME HELP YOU GET WELL

This Test Treatment And Medical Book FREE

My Reason For Making This Remarkable Offer

is a desire to increase my practice in your locality. I know there must be dozens of men and women near you and of your acquaintance who want to be cured, but who have given up in discouragement; local physicians have failed, patent medicines have proven worthless and they believe there is no hope for them. I want to make you a living testimony of my superior skill and remedies. I want you to prove to them there is a **CURE** when it is accomplished in your case. I want to brighten your cheeks with the bloom of health that others may see the wonderful value of my special remedies. This, dear friend, is why I offer you the Proof Treatment Free.

The Diseases I Specialize In Are:

Kidney and Bladder Ailments, Rheumatism, Stomach, Liver and Bowel Disorders, Heart Trouble, Nervous Weakness, Catarrh and all other diseases arising from Impure Blood, Uric Acid conditions, etc. The common symptoms of these ailments are given in the coupon below. **Mark the ones you have.**

INDICATE YOUR SYMPTOMS HERE for FREE DIAGNOSIS

Indicate Your Symptoms opposite Disease with an X and Your Worst Symptoms with two XX.

CUT OUT AND MAIL THIS COUPON TODAY

DR. F. W. JIROCH, Chicago.

DEAR DOCTOR:—I wish to avail myself of your offer to get a proof treatment free so I can test it in my own case. I have placed a cross X mark before the ailments for which I desire treatment.

- ___ If you have too frequent desire to pass water, or if there is dribbling or painful urination.

It is distinctly understood that I will never ask you to pay for the proof treatment, letter of advice, diagnosis, or for answering your special questions. I will also send you my Medical Book containing valuable suggestions, simple home rules, etc., all free—Absolutely Free—Write at once. Address,

Dr. F. W. Jiroch
Dept. 1051
533-535 So Wabash Ave., Chicago Ill.

FILL OUT This Application and Send in TODAY.

To Prove My Claims I'll Send a Treatment

Free to Test

I want you to try at my expense, not yours. All I want to know is what you want to be cured of. I have made it convenient for you to tell me this by simply putting a cross X mark before the symptoms you have on the attached coupon or write me a letter in your own words about anything of a private nature (man or woman) that you want me to know. I realize that I must help you and get your good will if I expect you to recommend me to others. And you must believe that my remedies are genuine, and that I do cure, otherwise I could not afford this expense of advertising.

The Vast Majority of Patients I Treat Are Those Who Have Failed With Other Treatments

You may feel discouraged on account of past failures; patent medicines may have proven worthless; your home doctor may have exhausted himself—even pronounced your case incurable—but this does not prove that I cannot help you. The worst cases come to me. My treatment may be a surprise to you. Set aside your doubts; try once more. **Try at my expense.** You have nothing to lose.

I Want to Prove to Those People at My Own Expense That I Have the Real Remedies

I have perhaps the most successful method yet devised for the permanent cure of diseases of which I have made a specialty. I do not ask you to accept my word for this. I am a Specialist and I do not have one remedy that cures everything; no patent medicines; no "dope." My special treatments are made up of my own private prescriptions perfected after years of successful practice. My great success is due to knowing what remedies cure and treating my patients honestly. I count my cures by the hundred where a doctor in ordinary practice counts but one.

Send No Money

This treatment will be delivered by Mail, Postage Paid, right to your own door without one cent of expense to you. Simply put a cross X mark before the symptoms that you have, two cross marks X X before your worst symptoms, cut out the coupon, sign your name in full and complete address, and I will do the rest.

When I say that my treatments cure quicker and are superior to anything ever before offered for restoring Health, Vigor and Vitality, I am only repeating what hundreds of men and women are saying for me voluntarily.

"I have improved wonderfully in all my ailments and feel like a new person."
—MRS. T. M. DAVIS.

"I have great faith in your medicine. I am feeling all right now. I have told several of my friends about it."
—MRS. ADA HENDER.

"The Doctor used me fine. The medicine worked fine. My case was a little of everything—stomach in bad and weak condition, poor digestion, liver and kidneys not right, head felt bad all the time, poor blood and weak nerves. These things are all fixed up nicely. I found the Doctor fair and square."
—N. V. KAY.

"I will say under oath that Dr. Jiroch used me alright and grand. He treated me for general debility and I feel like a new man now."
—HENRY LORD.

"I wish to say that the Dr. Jiroch Co., is as reliable as can be found. They treated me right and fair and I am willing to recommend them. The Doctor cured me of pain across the back, headaches, impure blood, debility, neurasthenia and nervousness."
—LEVI S. MESSERLL.

"I will say that the Doctor is a perfectly reliable man. They treated me fair and alright. My testimony is genuine. I am willing to recommend the Doctor to anyone. He cured me of rheumatism."
—MRS. MINA A. BARBER.

This limited space permits me to mention only a few patients who first heard of me through an announcement of this kind. They wrote for a proof treatment. Now they are well. I will give you their complete addresses when I send you your Treatment.

Accept My Liberal Offer!

It places You under no obligation whatever to Me

I repeat—you are under no obligation to accept this free offer. No contracts; no express charges. I will pay the postage myself and deliver the treatment right to your own door without one cent of expense to you. Do not delay; do not argue. Just say to yourself ***"If Dr. Jiroch has so much confidence in his ability and his treatment to go to all this expense I am going to let him try."*** Put a cross X mark before the symptoms you have, two cross marks XX before your ***worst*** symptoms, sign your name and address to the attached coupon, cut it out and mail it to me today. It will obligate you to nothing. Just let me try to help you. Address

Dr. F. W. JIROCH, *Dept. 1051 533 South Wabash Avenue* Chicago, Ill.

Dr. F. W. Jiroch, of Chicago, who is regarded by many as perhaps the best Specialist of modern times in his chosen field, makes you this liberal offer.

The Farm Problem of Constant Employment.

Partial idleness is a cause of much poverty both on farms and in towns. Few people can make headway financially unless they work most of the time.

With this thought in mind, one has but to look at the conditions in various rural communities to see the real cause of the decadence of many farm families.

Even in our thriftiest communities the problem eixsts and is more acute than it was a hundred years ago, when a good deal of small manufacturing was done on farms, and this gave profitable employment in the winter, when farming operations were at a standstill. This manufacturing consisted largely of the making of the material for the family's clothing. There was the working up of the wool into rolls, and the spinning of the rolls into yarn, and then the weaving of the cloth. In addition, there was the actual making of the suits of clothes and the bedding. Farm wagons and farm utensils of various kinds were made on the farms in large quantities. The winter evenings were also used for the work of cutting up a good share of the perishable apple crop and stringing the quarters preparatory for drying. Here and there was a ropemaker who had his own spinning wheels for the manufacture of small rope. Wood carving of household utensils was common.

We make less on the farms to-day and buy more. About all the things that used to be made on the farm are now purchased from the outside, and on the farm has come in nothing to take the place of the departed activities. This is a matter of large importance. Either profitable activities must again come in to assist the farmer to make money out of his waste time or farm operations must be adjusted to give more constant employment. It is safe to say that no ordinary man is going to get rich by working half of his time.

One-crop farming is proving a great time waster on many farms. Yet many farmers are said to enjoy this kind of farming because it gives them employment for but a small part of each year. But even some of the farmers that like this kind of farming have become desperately poor through it. This is especially remarked in the parts of the South devoted to the one-crop idea. The poverty is great, with houses dilapidated and everything out of repair. But in this case there is something more than enforced idleness—there is willful idleness—for if a man has the time he surely can keep his buildings in repair and painted and his land in suitable condition for working and free from weeds. But whether enforced idleness or voluntary idleness, the results are the same.

Mixed farming gives better opportunity to provide continuous employment than does special farming. Winter dairying as an adjunct to some other kind of farming helps provide work both summer and winter. A poultry department on the farm may be developed to a point where a large amount of winter work will be required, and this work will be profitable.

But however the problem is worked out, it is not one that can be ignored without poverty becoming the most striking feature of many homes.

Cultivation of Foreign Wheat in England.

A committee known as the Home-grown Wheat Committee, has for the past ten years been conducting experiments in England for the purpose of testing the suitability of foreign wheats for cultivation in Great Britain. The purpose of the committee was to ascertain what might be done "to improve wheat growing from the milling point of view in England."

Experiments were made with the best grades of wheat from the chief producing countries, and the results of the experiments have been published at intervals. The last report covers the years 1909 and 1910. Australian, Indian, South African, Hungarian, Sudan and Russian wheats have not prospered in England. The hard Canadian varieties have done better, but these, it is said, have not yielded so favorable results as the Squarehead Master and the other leading English varieties. The Canadian varieties bring a few shillings per quarter more than the English varieties, but what they gain in quality is more than offset by what they lose in quantity.

It is believed by the committee that the introduction of wheat will be of service chiefly for the purpose of crossing with native varieties.

This is from the official report to the Department of Commerce and Labor by the United States Consul in London.

Development of Bone and Muscle in Farm Animals.

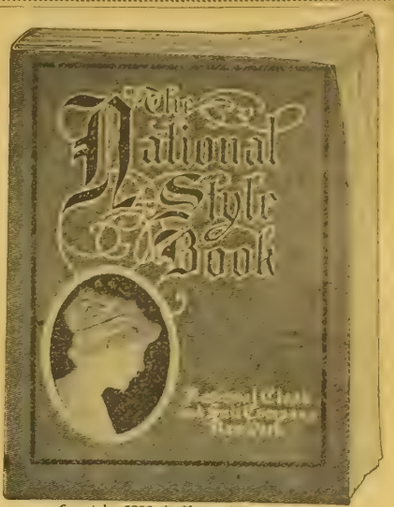
Good bone and good muscle are necessary in farm animals and count for a great deal in the service the animals render to mankind. The same kind of feeding that will produce good bone is very likely to produce good muscles, and these two go together in their development.

We find in the farm animals of the world a great variety of kinds of bone; some of them soft and spongy, some of them hard and compact and some adapted to about every condition existing in the world. On investigation it will be found that every particular kind of bone comes from a long time of feeding foods having certain compositions combined with certain conditions of living. Some cannot be greatly changed in one generation, but it requires many generations to develop some of the bones found in certain animals.

While bone cannot be greatly changed in a single generation, yet the difference can be made so great that it will be easily observable. Thus, the experiment has been made of feeding two groups of hogs, one on food rich in bone-making material and the other on food poor in bone-making material. After the hogs were slaughtered their bones were broken by the application of certain pressures. The bones of hogs fed on the food rich in bone-making material required much greater weights to break them than did the bones of the hogs otherwise fed. Yet the matter of brittleness is not all there is in the bone question. To modify its shape and size and the texture of the muscles and tendons attached to it is another question.

The wonderful bone and muscle developed in the Arab horses is the result of several thousand years in feeding, breeding and in exercise or activity. The forage of the deserts where they have been developed must be rich in the material that go to make good bone, good sinews and good muscles. Of course, their activities have always been of the intensest kind—galloping over arid plains, where no roads existed, but where the feet of the horse were forever encountering inequalities of ground that strained the sinews to their utmost, and so, in the course of centuries, developed them.

Fall Fashions are Very Beautiful



"The prettiest in years," "the most becoming fashions in a generation," "so very, very new"—this is the story of the fascinating, charming styles for Fall.

Never have you seen more becoming garments than the new "NATIONAL" coats, never were designed more grace-giving, fascinating dresses and waists than your "NATIONAL" Style Book shows.

And of hats Paris has sent us designs of unusual beauty.

Therefore, to know all these new styles, to see what is to be worn in New York, this alone is sufficient reason why you should, right now, send for your own free copy of the "NATIONAL" Style Book.

Copyright, 1911, by National Cloak & Suit Co.

But add to all this interest in the new and beautiful styles, add to this delight, the saving "NATIONAL" prices offer, and it becomes a matter of your own great personal advantage that you send for your Style Book pictured above.

Just say, Send me My "NATIONAL" Style Book, Free. It will be sent you gladly by return mail.

Your "NATIONAL" Style Book Shows:

Dresses .	$10 to $30	Hats . . .	$2.98 to $15
Coats . .	10 to 50	Skirts . . .	3.98 to 15
Furs . .	2.25 to 75	Waists . . .	.98 to 10

Also a full line of Underwear, Hosiery, Scarfs, Veils, Raincoats, Gloves, Sweaters, Leather Goods, Jewelry and a complete line of Boys', Misses' and Children's Wearing Apparel.

"NATIONAL" Tailored Suits

Made to Measure **$15 to $40**

Samples of Materials Sent Free

Each Made-to-Measure Suit is actually cut and made to order, and we guarantee each suit to fit perfectly and to be satisfactory in every way, or we will cheerfully refund your money.

The "NATIONAL" Policy

We prepay postage and express charges on all our goods to any part of the world. You may return any "NATIONAL" garment not satisfactory to you and we will refund your money and pay express charges both ways.

In writing for your Style Book, be sure to state whether you desire samples of materials used for "NATIONAL" Made-to-Measure Tailored Suits. Samples are sent gladly, but only when asked for—and they are well worth asking for.

NATIONAL CLOAK & SUIT COMPANY

280 West 24th Street, New York City

Mail Orders Only *No Agents or Branches*

As a general proposition, it appears to be true that plants growing in a semi-arid region contain much less starchy matter than plants growing in humid regions; consequently the forage of the deserts ought to be rich in nitrogen, phosphorus, lime, potash and silica.

The running feats of Arabian horses are remarkable. One American, having secured a horse on the edge of a great eastern desert, galloped him for thirty-five miles in about four hours, and the horse was not greatly exhausted. Those wonderful feet and powerful sinews and firm muscles had enabled the Arabian horse to take continuous bounds over a no-road country with perfect ease, when any other horse would have become exhausted long before his journey was done.

Such muscles and bones also prevent accidents, especially broken legs. Corn-fed animals develop weak, fragile bone and ultimately weak muscles. Overfed hogs frequently break down behind, which means that a bone has broken in the hind leg. This illustration used to be more common than at the present time, for formerly some hogs were fattened and fattened till they reached an age of eighteen months and a weight of 400 or 500 pounds. The marketing of them younger, as now done, does not permit the hog to attain the weight where he breaks down.

In breeding animals of all kinds, good bone and muscles should be worked for, by feeding foods not too rich in starchy matter, such as corn, corn fodder, sorghum and the like. Starchy foods have their place, but it is not in developing firm bone and powerful muscles.

Bullish Report on Wheat.

The last government report on wheat was midly bullish. It showed a total yield of spring wheat of 200,367,000 bushels, quality 79.8 per cent., and nine bushels to the acre. The total yield of spring and winter wheat was 655,516,000 bushels, as compared with 695,443,000 bushels last year, a decrease of 39,927,000 bushels. The average yield is placed at 12.6 bushels to the acre.

Increase in Cotton Ginning.

Up to October 25th, in Texas, the cotton ginning surpassed previous records by more than 600,000 bales, in Georgia by 428,00 bales, in Alabama by 138,000 bales, in North Carolina by 129,000 bales, and in South Carolina by 132,000 bales.

WITTE ENGINES
GAS—GASOLINE—DISTILLATE—NAPHTHA
Do the work at average cost of **One Cent** per horse power hour. Immense saving by our method of "pre-heating" the fuel. Built so perfectly that repairs cost less than $1 per year average. Every valve is **vertical** and will not wear on the stem or slip inside. Freezing cannot injure bed as **cylinder and base** are **separate.** Hammered steel cranks, cut gears, etc.
GUARANTEED FIVE YEARS
We are experts in engine building; have done nothing else for twenty-six years. Our reference is thousands of satisfied customers. Our prices are right. All sizes, 2 to 40 H. P. Special inducements to introduce in new localities.

Write for free catalog stating size wanted.

If it doesn't satisfy you in every way the trial costs nothing. Don't invest in any engine until you get our proposition. Write for it now.
THE MIDDLEDITCH ENGINE CO.
81 Melcrom Ave., Detroit, Mich.

Hereafter the commission firms will not send out free poultry coops.

The Corn Market Situation.

On October 31st, at St. Louis, Mo., cash corn was quoted at 71½ to 72 cents a bushel, the price being practically three cents a bushel higher than at the close on September 30th. This, from a shipper's standpoint, is pretty good, as we have to go back to July, 1909, to find such a quotation.

The speculative market does not show any such rosy conditions. The October cash corn market is a thing of the past, and the history of the December delivery and May option has yet to be developed.

And "they" say the farmer is the only man who cannot tell what his crop will sell for. And "they" are mistaken; the farmer can contract his No. 2 corn at 63 cents a bushel, December delivery, and at 64¾ cents a bushel next May delivery, so long as October 31st quotations remain. He will have to pay freight to Chicago, also the usual selling commissions; he will have to deliver No. 2 corn fully up to grade, inspected by proper authority, and to insure the contract being kept faithfully on both sides a cash consideration has to be put up to bind the bargain.

On October 31st B. W. Snow's crop report for November 1st estimated the yield per acre for corn at 25.2 bushels. Upon the basis of Snow's estimate of acreage, 105,465,000 acres, the total corn crop would figure 2,657,718,000 bushels. Yields in the principal states are reported as follows: Ohio, 38; Indiana, 35; Illinois, 32; Iowa, 33; Missouri, 25; Kansas, 15; Nebraska, 22; Oklahoma, 9; Texas, 15. Snow's estimate is the independent view of a statistical expert, and his estimate is that the corn crop of 1911 is 37,000,000 bushels more than the estimate of Uncle Sam's Department of Agriculture. B. W. Snow has a little more influence on prices than Uncle Sam, but very likely the Department of Agriculture reports from time to time are in possession of Mr. Snow and may form some of his material. Snow has been known to improve upon government reports.

We take it that corn is selling above average prices, and if 63 cents for December and 64¾ cents per bushel in market can be held to the close of each option, there ought to be no kick coming to the man who has corn to sell.

The Oats Market Situation.

The favorite grain crop of the editor of The National Farmer and Stock Grower is oats. At the breakfast table he begins with oatmeal and insists upon his wife doing the same, or there is trouble in the family; furthermore the editor never raised a bushel of wheat; has never surprised his neighbors with any extraordinary yields of corn, but he did once cause his neighbors to take notice of a crop of oats not less than sixty-five bushels per acre, although there were some oat-growing failures near by.

It is not proper for an editor to brag about what he has done or what he knows, neither is it advisable for him to know it all, because the "know-it-all" editors make the most mistakes, not so much in their farming as in their teaching. They don't usually fit the lesson to the pupil. They don't teach the farmer according to his understanding. They seem to give the lesson to one class that would better fit another class.

The editor of The National Farmer and Stock Grower does not hesitate to plead ignorance. One day, at an Agricultural Exposition, he talked with a college professor a long time, and the result was quite satisfactory, when, getting on another line of thought, he was brought up with the answer of the college professor, who said: "I really don't know, for you see I never took beef." Since that time the editor does not ask the dairyman about sheep, or the sheep raiser about soils, or the market reporter about the cost of production, and he doesn't hesitate to say: "My dear sir, I never took beef."

For twelve straight, long years the editor was a market reporter and was used to asking questions and getting the answers from buyers and sellers, and he fixed up those reports so that a stockman once said: "You do sure put a looking-glass on the market," which was quite a compliment.

However, to come back to oats, the healthiest food for man or beast —the market has declined a little, but not much. The St. Louis cash oats sold at 46½ cents on September 30th, and the price was the same a month later, on October 31st. There is no decline in that; it is, from one month to the other, practically a steady market.

But the Chicago market, that deals in oats for future delivery, has declined a little. On September 30th the December option was quoted at 47¾ cents, and on October 31st the market quotation on same option was 46½ cents. On September 30th the May, 1912, option for oats was quoted at 50¾ cents, and one month later, October 31st, the May option was quoted at 49 cents.

But we must remember that it is only six months ago that oats were selling around 30 cents a bushel. The advance has been remarkable, an achievement brought about to some extent by the salesmen in the market pushing the market up at every opening and resisting conditions that might force declines.

There is an idea that the Board of Trade is full of a lot of inactive people, who simply feed on the farmer in a leisurely manner; that the markets rise and fall by some inexplicable influence; and all these people have to do to make a fortune is to make out their accounts of sales by the blackboard.

One day a farmer was on the Board of Trade and, listening to the tumult, said: "What are those monkeys doing?" The answer was that they were buying and selling corn. The farmer said: "Anyone would imagine they were trying to put out a prairie fire." One thing the farmer can rely on, and it is that the "bulls" in market are working for him, and they have done some pretty good work in the oats market during the past six months.

The Argentine Crop Report.

Crop Expert B. W. Snow cabled from Buenos Ayres, October 31st: "Have had four days of heavy rain, with a minimum of two inches over the entire belt, which should be sufficient for the wheat crop in the north and carry the crop in the southern district another month. General opinion seems to be prospects are brighter than in 1907, when the yield was 192,000,000 bushels. Oats crop prospect seems satisfactory everywhere."

Onions Arriving in Market

On November 1st, onions in car lots arriving in St. Louis were sold as follows: Fancy Red Globe sold at $1.00 to $1.15 per bushel, but poor as low as 75c.; white, $1.40 to $2.00; yellow, 80c. to $1.00 per bushel.

The best farm engines are advertised in this paper.

An Enterprising Publication.

For the improvement of the grain crops of the United States and for the purpose of increasing the subscription lists of The National Farmer and Stock Grower, we have offered substantial prizes to be paid to successful exhibitors of corn and oats at every County, State, Interstate, National and International Show in the United States.

These prizes have been offered every year since 1908, the only condition being that the corn or oats winning any of the prizes must be grown from seed furnished by The National Farmer and Stock Grower as a free subscription premium.

All the seed sent out by The National Farmer and Stock Grower was grown by the most eminent agriculturists and prize winners at the greatest Exposition contests, including L. B. Clore, of Indiana. D. L. Pascal, of Iowa, and the Garton Bros., of England, notable crop improvers.

The consequence is that from the seed furnished by The National Farmer and Stock Grower not less than 25,000 experimental plots have been started on as many farms; there has been a general improvement on those farms in corn and oats, and many prizes have been won and paid.

This year (1911) the first prize won and the first State Premium paid by the paper is to Mr. J. M. Gresham, of Smyrna, Rutherford county, Tenn. He was furnished two pounds of Victor Black oats grown by the Garton Seed Company, of Warrington, England, and furnished us by the A. W. Schisler Grain Company, of St. Louis, Mo. From this seed Mr. Gresham raised and exhibited in Class 4, Lot 27, of the State Fair of Tennessee. Mr. Gresham won First State Fair Prize for the best exhibit of black spring oats, and this entitled him to our $25.00 Prize, promptly paid him by The National Farmer and Stock Grower.

The National Farmer and Stock Grower is published monthly at St. Louis, Mo., and has done much for the advancement of agriculture and the increase of grain crops in the United States. There are other good farm papers, but for the good it has done in the general improvement of stock raising and grain growing The National Farmer and Stock Grower is the best of them all. There is a saying that if you do not "blow your own horn, competitors will not blow it for you." We are entitled to advertising to the amount of twenty-five dollars for the money paid Mr. Gresham; so a little horn blowing can be excused.

Apples at St. Louis.

At St. Louis, in the month of August, 23,740 barrels of apples arrived; in September, 62,730 barrels arrived; and in October, 164,410 barrels arrived. The total thus far in ten months of the year 1911 is 271,203 barrels, against 248,615, the total for 1910, and 317,664, the total for 1909. There was a glut of apples when 22,000 barrels arrived in two days, mainly by boat, and apples sold very cheap. October 25th, on the levee at St. Louis, apples were sold at the following prices, quote by the barrel: Ben Davis at 75 to 90c. for poorest to $1.00 and $1.15 for No. 2, $1.20 to $1.50 for choice, $1.50 to $1.60 for fancy high-colored—bulk of sales at $1.25 to $1.50; Geniting at $1.40 to $1.80; Huntsman's Favorite at from $1.50 to $2.50; Missouri Pippin at $1.50 to $2.25; Willowtwig and Roman Beauty at $1.50 to $2.50; Winesap at $1.50 to $2.75. Bulk Ben Davis at 60 to 70c. per 100 pounds, and at 90c. to $1.00 per barrel measure, delivered, and wagon-loads home-grown bulk Ben Davis at 75c. per barrel measure.

On October 31st, according to market reports, most of the stock was soft or mellow Ben Davis (too ripe) and rough. On levee: Ben Davis at $1.00 to $1.15 for No. 2, $1.25 to $1.50 for choice and $1.60 for fancy high-colored; bulk of sales at $1.15 to $1.35; Geniting at $1.25 to $2.00; Huntsman's Favorite at from $1.50 to $2.50; Missouri Pippin at $1.50 to $2.50; Willowtwig at $1.50 to $2.00 for ordinary, to $2.75 for fancy; Roman Beauty at $1.50 to $2.75; Winesap at $1.75 to $2.75. Bulk Ben Davis at 40 to 60c. per 100 pounds and 75c. to $1.00 per barrel measure; wagon-loads Ben Davis sell at range of 85c. to $1.10 per barrel measure. If our readers will keep this paper and refer to it next April they will learn something about the price of apples that were put in cold storage in October, 1911.

The Wheat Market Situation.

There is not much to be said about wheat at the present time. The cash market at St. Louis was practically in the same notch on September 30th and October 31st—the prices paid being 98 to 99½ cents per bushel, according to grade and quality. Thus it will be seen that the cash wheat had neither gained nor lost in value one month with the other.

The speculative wheat market, with Chicago leading other centers, exhibited something like a two-cent decline. The December quotation, which had closed on September 30th at 98¼ cents, closed on October 31st at 96½ cents, a net loss of 1¾ cents a bushel. The May, 1912, option, which had closed the month previous at $1.04¼, was quoted at the close of October 31st at $1.02 per bushel.

It is pertinent to the subject to state right here that the wheat quotations in the month of October, 1911, were stubbornly contested. The United States situation being somewhat favorable to strong prices, was overshadowed by reports of another character from pretty nearly every wheat-growing country on earth. Cables from Argentine, indicating a full harvest or better, was one of the features of October 31st. Let alone by the outside world, the American wheat situation is strong, but it must not be forgotten that wheat is a world's crop, and the crop of one country has an influence upon the other, even if Canadian wheat pays a duty before it is sold in the Unied States, for which we are proportionately thankful.

Arrivals of Apples.

In October, 1909, apples arrived in St. Louis to the number of 96,695 barrels and 7,260 boxes; in October, 1910, 105,790 barrels and 50,410 boxes; and in October, 1911, the total was 164,410 barrels and 16,800 boxes.

Get this Genuine Alectride Tool

Grinder on Free Trial

Harman Supply Co., 160 Harrison St., Dept 3618 Chicago
Please send me free and prepaid booklets explaining your free trial offer of your Alectride Tool Grinder.
Name.....
Address.....
No letter necessary; merely send the coupon.

Sharpen your tools at my expense. I want to show you that the ancient grindstone is a back number and that the emery wheel is a menace. I want you to try positively free this genuine Alectride Farm Tool Grinder. Alectride is the only true abrasive. **It will not draw the temper from steel;** it will sharpen the dullest tool in from 3 to 5 minutes, when the grindstone would take half an hour. Alectride **never** wears out. It does not glaze over. I want to send a few of these machines out on **Free Trial** in every part of the United States. I want to put one in every locality. I want you to clip off and send the coupon at the upper right hand corner of this announcement and I will mail at once circulars explaining every detail of the ofler I am making here.

I Don't Want You to Send Me a Cent of Your Money. I Don't Want Any Promise

I merely want to place this Genuine Alectride Grinder on your farm for a few days. Sharpen your dull axe, your dull scythe, your dull corn knives, your dull cold chisels, or hatchet, or any dull tool you have. See how quickly and how easily it is done. See how Alectride (made of the substance of precious stones) sharpens your tools in from one-fourth to one-twenty-fifth of the time required by a grindstone and does not heat nor draw the temper. Do all this—give this machine the most severe tests—then unless you think that you positively cannot get along without this Alectride Tool Grinder, send it back at our expense. We'll ask no questions. We'll take it back without a word, and we'll pay the transportation charges. Now send the coupon. Let us tell you all about this wonderful abrasive and our free trial offer.

Remember—Alectride is really manufactured precious stones. It is even *harder* than the hardest diamond. Alectride will scratch a diamond and cut glass like a knife cuts an apple. Send the coupon today and get full explanation of our **Great 10 Day Free Trial Offer.** Do this now. Do not delay.

9 One Disc Grinding Attachment (New)
10 One Tool Rest

Fuel for Country Homes
Light for Country Homes

Imprisoned in Crushed Stone

CRUSHED STONE

And any country home owner can unlock the prison—with an ever-ready magic key made of nothing but plain water.

Touch the water-key to the stone prison and the miracle takes place.

Instantly and rapidly the stone changes into slacked lime—at the same time releasing great quantities of gas right before your eyes.

The gas is Genuine Acetylene—a perfect cooking fuel for the kitchen range and an unrivaled illuminant wherever light is needed. Anybody can use the water-key to release from its stone prison, Acetylene in any quantity required.

It is only necessary to regulate the release—and make only just enough gas to supply the stove or lights while they are actually in use—no more, no less.

COOKING

The process is mechanical — so much so and so simple that it is always left entirely to a little automatic tank-like machine.

With but a few minutes' attention once a month, this machine sends gas as required direct to the kitchen stove and to chandeliers and fixtures located in every room in the house, as well as the barns and all the outbuildings.

Such machines are so nearly perfect and so thoroughly reliable that there are no less than one hundred and eighty-five thousand of them installed on farms in this country alone.

In every case the machine is set up in a few hours in the cellar or outbuilding and connected with concealed pipes without injuring walls or floors.

Thereafter the housewife has the pleasure of cooking her meals in half the time on a fire that she can instantly turn on or off, up or down, with the twist of her wrist.

While the whole family can enjoy and be proud of a home lighted throughout with brilliant, pure white light shining from handsome brass or bronze fixtures.

For years our millions of city cousins who use gas for lighting and cooking have had all the best of it.

Now the tables have turned, for this rural gas "Acetylene" is ten times richer than the best city gas—is not poisonous to breathe and makes light even cheaper than kerosene.

We have several free books telling how the power of Niagara Falls is used to make this wonderful gas-producing stone.

LIGHTING

How the stone is distributed from warehouses all over the country under the trade name of "Union Carbide."

Why Union Carbide won't burn; how it can be stored as easily as coal; how Acetylene Light has been used to grow plants on a big scale, and how all the lights on a farm can be fixed to light with the pull of a small brass chain without matches.

We will be glad to send these books free, together with an estimate as to how little an Acetylene plant will cost for your home.

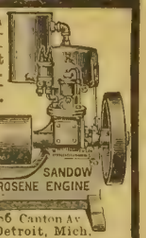
Just write us how many rooms and how many buildings you wish to light and receive our reply by return mail.

Address your letter to Union Carbide Sales Co., 126 S. Michigan Blvd., Chicago, Ill., Dept. C. —56.

Sandow $37.50
2½ H.P. Stationary Engine—Complete

Gives ample power for all farm uses. Only three moving parts—no cams, no gears, no valves—can't get out of order. Perfect governor—ideal cooling system. Uses kerosene (coal oil), gasoline, alcohol, distillate or gas. Sold on 15 days' trial. YOUR MONEY BACK IF YOU ARE NOT SATISFIED.

5-year ironclad guarantee. Sizes 2½ to 20 H. P., at proportionate prices, in stock, ready to ship. Postal brings full particulars free. Write for proposition on first engine in your locality. (116)



Detroit Motor Car Supply Co., 86 Canton Av. Detroit, Mich.

Concerning Seed Barley.

Wisconsin grew approximately 800,000 bushels of pedigree barley in 1911, according to Prof. R. A. Moore, of the Agronomy Department of the College of Agriculture of the University of Wisconsin. Through the work of the Wisconsin Experiment Association and the grain breeding work at the Experiment Station, Prof. Moore says the average yield of barley has been greatly increased during the past few years. During the past ten years pedigree barley has yielded an average of 50.7 bushels per acre at the Experiment Station, while the average of the state for common barley has been 28.7 bushels.

"Wisconsin will probably raise enough pedigree barley in 1914 to seed all of the barley fields in the world," says Prof. Moore. One-eighth of all of the barley grown in the United States is now produced in Wisconsin.

Cement Workers' Handbook.

This book is designed to teach anybody how to work with cement; how to mix mortars of all kinds for all concrete purposes; how to make building blocks; how to build walls, floors, ceilings, walks, joists, cisterns, troughs, tanks, etc. It gives estimates of the cost of all kinds of mortars and concretes and all methods of house construction. It is a cloth-bound book of 100 pages and covers more than fifty most important subjects on cement and its uses and construction. This is a diamond of a book for wide-awake farmers. The price of the book alone is 50 cents.

For 60 cents we will credit one-year's subscription to The National Farmer and Stock Grower and send a copy of the **Cement Workers' Handbook.** Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

To Club Raisers:—Anyone getting up a club of four subscriptions and sending in $2.40 will be credited with one book and one-year's subscription free.

Worms From Infected Ground.

"While a few swine can be raised in limited quarters, if such quarters are kept clean, they will do better, will keep in better health, and can be grown more cheaply if they have plenty of range for pasture. It is desirable to have the pasture fenced off into suitable areas so that the hogs can be shifted from one pasture to another, not only to provide fresh pasture, but also to afford an opportunity to disinfect the pastures, either by plowing and seeding to a forage crop or by exposure to sun and weather. Nearly all cases of intestinal worms, which are rather common to swine, are contracted from infected ground, and swine can be kept free from these parasites by frequent changes of pasture." This is from Farmers' Bulletin No. 465, issued by the United States Department of Agriculture.

Live Stock on Farms.

According to the census of the year 1910, the total number of farms in the United States was 6,340,367.

Of the total number, 94.9 per cent., or 6,017,142, reported domestic animals; 83 per cent., or 5,265,772, reported cattle; 73.7 per cent., or 4,671,441, reported horses or colts; 68.5 per cent., or 4,340,592, reported swine; 29.4 per cent., or 1,861,474, reported mules or mule colts; and only 9.6 per cent., or 609,323, reported sheep or lambs.

Number, Value and Average Value.

The total number of cattle reported in 1910 was 61,225,791.

Of the cattle, 20,580,845 were dairy cows, the total value of which was $704,612,000, and the average value, $34.24. The number of farms reporting dairy cows was 5,127,635, or 80.9 per cent. of the total number of farms in the United States; thus, there is an average of four dairy cows per farm reporting such cows for the entire United States.

Only 1,440,383 farms, or 22.7 per cent. of all farms, report cows not kept for dairy purposes, but these farms report 11,788,473 such cows, or twice as many per farm reporting as in the case of dairy cows. It is noticeable that about one farm in five report yearling steers and bulls and only about one in eight older steers and bulls, but farms with yearling steers and bulls report an average of only four per farm, while those reporting older beef animals show nine per farm.

The total number of horses and colts reported in 1910 was 19,731,060. Of these, 17,344,916 were classed by the census as mature horses; that is, horses born before 1909, and their value was $1,951,808,000, and average value, $112.53. It may be noted that whereas 73.3 per cent. of all farms reported mature horses, only 16.1 per cent. report yearling colts. This is a true measure of the extent to which farmers raise horses. Only 6.9 per cent. of the farms of the United States reported colts born in 1910, the small proportion being due to the early date of enumeration (April 15).

The total number of mules of all ages in 1910 was 4,183,572, which is slightly more than one-fifth of the number of horses and colts. The average values of mules are considerably higher than those of horses of the corresponding age groups.

The total number of swine in 1910 was 58,000,632, of which about three-fifths, or 35,015,408, were reported as mature hogs; that is, "hogs born before 1910." The total value of this class was $350,981,000, and the average value, $10.02. Spring pigs were reported by only 29.4 per cent. of all farms, the small proportion being due to the early date of enumeration.

The total number of sheep and lambs reported for 1910 was 51,809,068. Of these, 31,582,097 were mature ewes born before 1910, and their total value was $163,421,000, or an average value of $5.17. The number of spring lambs was 40 per cent. of the number of ewes, but the census was taken too early in the year to get a count of the full year's crop.

"I Shall Never Paint Those Roofs!

"I shall simply leave them alone. It will not be necessary to spend a cent on them." They are covered with

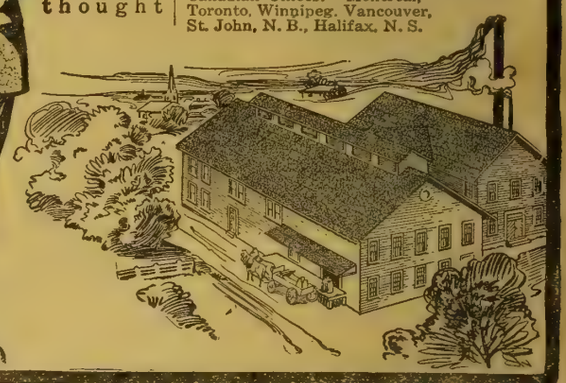
Amatite ROOFING

AMATITE has a real mineral surface and therefore needs no painting.

There have been other ready roofings in the past which had a mineral surface, but they were not practical.

Amatite, however, is successful because the mineral matter is embedded in *pitch*. Pitch is very tough and has great adhesive power. Year after year those roofs will give faultless service without anybody giving a thought to them. This is the kind of roofing to have! The day of these smooth coated roofings that require a heavy coat of paint every year or two is past. They cost too much to maintain. You can spend more money on the paint alone during the ten years than a new Amatite roof would cost.

A free sample of Amatite Roofing and a booklet can be obtained on request by addressing the nearest office.



Everjet Elastic Paint

A very low-priced black paint—very tough and durable. Stands heat so well that it can be used on boilers. For wood or metal, ready roofings, fences, iron work, farm implements, tanks, etc.

BARRETT MANUFACTURING CO.

Canadian Offices:—Montreal, Toronto, Winnipeg, Vancouver, St. John, N. B., Halifax, N. S.

Canadian Wheat and Oats.

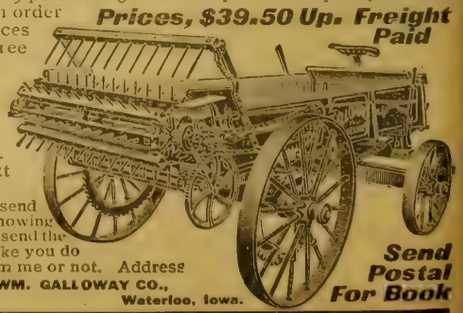
According to the United States Department of Agriculture, the Canadian crop of wheat in the year 1911 is estimated at 205,000,000 bushels, against 150,000,000 bushels last year, and the crop of oats in 1911 is 368,000,000 bushels, against 323,000,000 bushels in the year 1910.

The Pacific coast demand for beef cattle is cutting quite a figure in the ranch business of the Western States.

Let Galloway Save You $25.00 to $40.00 on a Manure Spreader

If you'll send a postal for my Special 1911 Spreader Offer, I believe we can make a deal. If we do, you'll save at least $25.00, perhaps $40.00, according to size and style you want. And you get a free trial and a guarantee that would break me if my Spreader wasn't *right*. I know I *have* to go *high on quality* and *low on price*, because I sell by mail. The other fellow is right on the ground to *persuade* you personally. My *quality* and price has to do all *my* persuading. Let me try it. Our capacity is 42,000 spreaders this year in order to quote the low prices I do—30 to 365 days free trial and my long time binding guarantee in writing. $25.00 to $40.00 saved—think of it! That's fair, isn't it? If you can think of a fairer proposition than I'll make you, I'll print it in my next advertisement.

Prices, $39.50 Up. Freight Paid



Get your pencil or pen right now, and send me a postal for my big Spreader Book, showing 5 styles and sizes, from $39.50 up. I'll send the book free and a proposition that will make you do some tall thinking whether you buy from me or not. Address

WM. GALLOWAY, Pres., THE WM. GALLOWAY CO., 1289 Galloway Sta., Waterloo, Iowa.

THE SEWING AWL.

A Most Useful Premium For Subscribers to The National Farmer and Stock Grower.

A farm on which there is not a sewing awl is in difficulties when work is most pressing. It is surprising how useful this little implement is. It is the Myers Famous Lock Stitch Sewing Awl. It is the only sewing awl made with a groove running the full length of the needle and has what is known as a diamond point. In order to sew leather or any heavy, thick material without breaking or cutting the thread it requires a needle with the groove running the full length of the needle. You might just as well have no groove in the needle as to have it only part of the way. With the Myers Awl you can sew old or new harness,saddles, carpets, canvas, tents, rugs, quilts, shoes, grain bags, and many other things. You can use any kind of thread in the Myers Awl, and it makes a lock stitch same as a sewing machine. It is very simple; a woman can use it as well as a man. It is one of the most practical devices ever invented. They are put up with two needles—one is straight and one curved—with a small screw-driver and wrench combined; also a reel of waxed thread with each awl ready for use. Every teamster and farmer should own a Myers Lock Stitch Sewing Awl, as there is use for one in almost every household. The Myers Awl is nicely finished, the metal parts are nickel-plated, the needles and wrench are kept in the hollow handle, which has a screw top.

Anyone who will send one dollar cash to pay in advance for two-years' subscription to The National Farmer and Stock Grower can select one of Myers' Lock Stitch Sewing Awls, which we will send by mail, postage paid, as a free premium. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

To Club Raisers:—Anyone sending us four subscriptions and $4.00 to pay for same will be credited with two-years' subscription and one Sewing Awl free.

Inspiration in Agriculture.

A few weeks ago the writer had the pleasure of visiting a great institution in the country where more than 500 delinquent boys were being cared for. The managers of this institution are experts in the work of reform. It was therefore interesting to learn that they set a higher value on agriculture as a remedial force than on any other industry taught at the place.

A dozen trades are taught,, but there are more boys learning agriculture than all the other trades put together. They find in agriculture an inspiration that they do not find in anything else. As a result, many of these boys, as soon as they have completed their terms at the institution, seek and find employment on farms, where they become approved laborers. A system of inspection follows these boys to their new homes. This makes it possible to know what they are accomplishing after they go out into the world. Of a few hundred that have recently thus gone to work on farms, over 150 have bank accounts of their own.

But how is it that these boys at this institution find such an inspiration in agriculture, while many of our farm boys grow up without finding anything lovable in the pursuit of agriculture?

The answer is, that at this institution the boys have both inspiring object lessons and inspiring teachers. The teachers are enthusiastic in the teaching of agricultural science and their spirit is imparted to their pupils. The object lessons are more perfect than are to be found on most farms and so make a uniformly favorable impression on the boys.

One of these object lessons is the model dairy, which has in it forty-five cows, all cows of such merit that they last year averaged 7,000 pounds of milk each. These cows stand, when in the stable, on cement floors which are continually being cleaned and where the light floods everything. No dirt is to be found. The milkers do their work in perfect conditions, and the milk is clean all the time. Milk so produced gives confidence to those that produce it. In his mind's eye every boy owns a dairy like this, if not so big.

The flocks of sheep are model flocks and are well kept. The cattle and horses are of the improved breed. The boys soon learn to feel a great interest in every phase of agriculture with which they come into contact.

The gardens overflow with vegetables and fruit, and the boys eat the results of their own labors. This is one of the most potent ways of giving an inspiration.

But on many farms no such object lessons are to be found. Nor are the inspiring teachers there. Scientific agriculture has not yet come with its inspiring ideals, and all the work is drudgery, both to the father and to his sons.

So long as many of our farms lack the elements of inspiration so long will the boys that grow up on those farms look forward to the time when they can break away from farming as an occupation.

The Outlook For Swine.

No matter how many questions may be raised in regard to the future market for agricultural products, the farmer is absolutely safe to continue to raise hogs. The total number of hogs in the United States in the year 1900 was 62,876,108 head, and in 1910, with a large increase in population, the hog total is 58,000,632 head. There will be no surplus of hogs at any time in the future in this or any other country.

Imports of Farm Products.

Bulletin No. 90, issued by the Bureau of Statistics of the United States Department of Agriculture at Washington, D. C., is an elaborate statement of imports of farm and forest products, giving quantity and value from each country for the years 1908, 1909 and 1910. All men who are intelligently studying agricultural problems will be thankful for the opportunity to read and study the eighty pages of this pamphlet, which is thoroughly indexed and easily referred to.

The Howard Watch

IN the matter of time every one defers to the man with the HOWARD. And right there is the best gauge of the HOWARD Watch—the standing and quality of the men who carry it.

Ask the average man what time it is and he hedges to save his self-respect. He tells you, *"My* watch says such a time," or *"I* have so and so."

A watch that has to be apologized for is not worth investing in. It does not represent value for its price. It can never be more satisfactory than any other makeshift.

The HOWARD Watch is *fundamentally right.* It is produced by the finest practical watchmakers in the world. It goes through months of the most exquisite adjustment—to heat and cold, to isochronism, to *positions.*

Every HOWARD Watch is fitted in its own case at the factory—timed and adjusted *in that case.* HOWARD movements and cases are never sold separately.

A HOWARD Watch is always worth what you pay for it.

The price of each watch—from the 17-jewel (*double roller*) in a Crescent or Boss gold-filled case at $40 to the 23-jewel in a 14K solid gold case at $150—is fixed at the factory and a printed ticket attached.

Find the HOWARD jeweler in your town. When a man makes a permanent investment like the purchase of a HOWARD Watch he naturally wants to *see* what he is buying—he wants to get the dealer's expert advice. The HOWARD Watch is sold only by legitimate jewelers—and not every jeweler can sell you a HOWARD. The jeweler who can is a representative merchant—a good man to know.

Send us your name on a postal card and we will send you—FREE—our pamphlet, THE STORY OF EDWARD HOWARD AND THE FIRST AMERICAN WATCH. It is a chapter of History that every man and boy in this country should read.

Our Industrial Policy.

The National Farmer and Stock Grower is in favor of the United States collecting a reasonable range of customs duties upon all foreign farm products and on all manufactured goods admitted into the United States from foreign countries, said duties to be applied to the support of the national government.

Every farmer in the United States is taxed by his county and by the state, and he pays indirect taxation for the support of the federal government. We believe that the advantages of our own markets belong to the citizens of the United States, and that all foreign farm productions should pay a duty at the front door as the goods are admitted. By collecting these customs duties the government receives the income that is necessary and must be collected for the public service, and the farmer has a very moderate degree of what is called protection. In times of scarcity caused by drouth the foreign farm productions can come in on a fair basis, and in times of abundance the country thrives better without them.

We believe the farmer as a producer outranks all other people; the manufacturer is next; but without the farmers' products the manufacturer would have to shut his doors. Legislation against the farming interest is the height of folly, and special discrimination against the farmer is a political crime. It will cause more poverty in the cities than most people imagine. The non-producing, so-called consumers in cities will be the first to find it out.

THE BOOK OF LIVE STOCK CHAMPIONS.

We are actively engaged in preparing the new edition of the Book of Live Stock Champions for publication.

We have published several editions of this valuable book and intend to make the new edition far superior to all others.

We already have illustrations of seven hundred different champions, and in each case the picture occupies a half page of the book. We are now gathering the remaining three hundred pictures.

Each illustration is a special demi-tone engraving from a photograph taken from life. No drawings or fancy pictures appear in the book.

First and second-prize winners are not eligible unless they have also won championship prizes. It is a Book of Live Stock Champions, not simply a book of ordinary prize winners.

Champions of the beef cattle breeds are admitted by their show-ring honors. We have enough pictures of beef cattle champions to make a book by themselves.

Dairy cattle are admitted by show-ring honors, also by officially tested dairy records. We have the finest selection of dairy cattle in the world.

Dairy cattle are admitted by show-show-ring honors. Trotters and pacers are admitted on track records or as noted sires. We have all the famous horses, going back thirty years.

Thoroughbred horses are admitted on account of track honors or as sire or dam of champions. Saddle horses and ponies are admitted as championship winners.

Jacks and jennets, also mules, are admitted on show-ring or market honors.

Hogs, sheep and Angora goats are admitted as winners of sweepstakes prizes at State, National or International Fairs.

Numbers of famous car-loads of cattle, horses and sheep which have won show-ring and market honors will be published in the book.

Every live stock champion is entitled to entry providing a first-class photograph can be obtained. We do not intend to disfigure the book with poor pictures. It is better to leave out the poor pictures than to apologize for an inferior book.

We do not charge the owner for publication of his animal, but we do ask his co-operation in furnishing first-class photographs and the records of said animals.

It is worth something to a publisher to know how many books to print and bind. We therefore offer the first ten thousand copies of this edition at one dollar per copy, including a two-year subscription to The National Farmer and Stock Grower. The first ten thousand copies will be handsomely printed and elegantly bound in red cloth, with gilt title. This is an extraordinary offer. After publication the cloth-bound copies will cost two dollars a copy without the subscription.

Lessons in Protection.

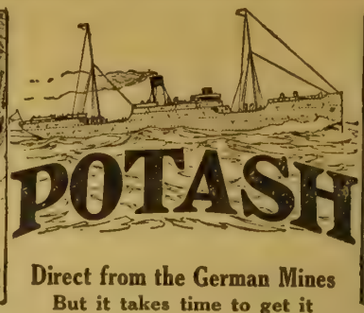
The first lesson in protection is to put the clothes on the new-born child; the next lesson is to close the door against the cold blasts of winter. Another lesson in protion is to build a levee to protect the land from the overflow. And yet it is said protection is iniquitous.

Protection of home industries by tariff laws constitutes the best policy for the welfare of the United States. This country collects three hundred million dollars tax on foreign goods as foreign goods are admitted, and if it was not collected on foreign goods it would have to be collected upon our own goods.

The benefits derived from this arrangement cannot be estimated by the amount paid to the government, because the duties also keep many goods out. For example, some wool is kept out. True, large quantities of wool come in, but if all the wool used in this country was foreign wool coming in duty free there would not be much wool raised in the United States.

If we admit Australian wool free of duty and send all our money to Australia for the raw wool, the wool money may buy automobiles in Australia, but it will not keep any factories going in the United States.

If we admit South American beef and mutton free of duty and send our beef money to Argentine for Argentine beef, the cattle raisers in the United States will not be in the market for nice furniture, pianos, etc. The manufacturers will have to move out or ship their goods out to get money for them.



POTASH

Direct from the German Mines
But it takes time to get it

See your dealer *now*, before he contracts for his goods, and urge him to get good up-to-date brands, containing 6 to 10 per cent potash, and to carry POTASH SALTS in stock.

There is profit in such goods both for you and your dealer.

You get more plant food for your money, your fertilizer is better balanced, your soil fertility is conserved, and your crops are larger and of better quality.

Potash Pays.

We will sell you or your dealer Potash in any amount from 200 lbs. up. Write now for prices and for free pamphlets giving just the facts you are looking for about improving crops and soils.

GERMAN KALI WORKS, Inc.
Continental Building, Baltimore — Monadnock Block, Chicago
Whitney Central Bank Building, New Orleans

If we admit wheat from Canada and other countries free of duty, thereby discouraging the farmers of the United States, our own farmers will not support any American industry with the money that went for wheat in Canada.

There are millions of people who will vote for free admission of foreign goods with the idea that the money sent abroad for these foreign goods will support the industries at home; but it will not. If you send the money abroad, there it will stick.

This simple article, which is a lesson in protection, is worth reading, and worth reading twice. We are in favor of the state protecting home industries upon the same principle that we expect the head of the household to protect his own family.

There is considerable difference between a farmer's farm and a rich man's plaything.

At the St. Louis National Stock Yards, two million and a half hogs have already been received and sold this year.

Sweet potatoes at St. Louis, October 31st: Yellow Virginia at $2.10 to $2.25 per bushel, delivered; home-grown Bermuda at 40 to 50c.; Queen and yellow at 50 to 60c.; Red Nansemond at 75 to 85c. per bushel loose.

Veal calves at the stock yards were selling at $6.50 to $8.50 per 100 pounds on November 1st.

Choice timothy at $23 per ton and choice prairie hay at $16 per ton looks high to the buyer.

Why Rent a Farm

and be compelled to pay to your landlord most of your hard-earned profits! Own your own farm. Secure a Free Homestead in Manitoba, Saskatchewan or Alberta, or purchase land in one of these districts and bank a profit from $10.00 to $12.00 an acre every year.

There's Nothing Cheap About Waterloo Boy Except the Price

The best thought of mechanical experts, best materials, best skilled labor, and the biggest factory, all combine to make the

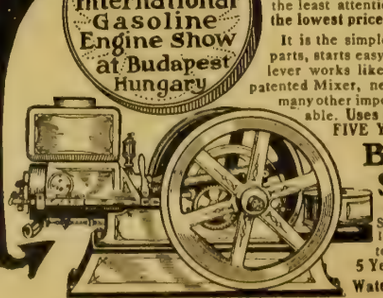
Waterloo Boy the best GASOLINE ENGINE in all the world—a fact which is proven by the recent winning of gold medal in World's Competition.

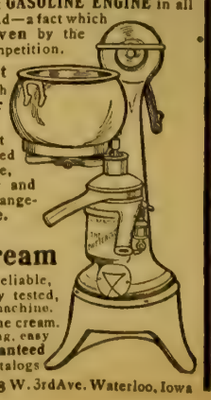
Gold Medal Awarded by International Gasoline Engine Show at Budapest Hungary

This great engine gives the most power at the smallest cost—the best service with the least attention—and the longest life for the lowest price.

It is the simplest engine made—has fewest parts, starts easy in coldest weather, its speed lever works like the throttle of a locomotive, patented Mixer, new, simple, positive Igniter and many other important features. Parts interchangeable. Uses either Gasoline or Kerosene.

FIVE YEAR GUARANTEE.





Buttercup Cream Separator is an old reliable, thoroughly tested, close skimming, standard machine. Skims down to 1-100 of 1% of the cream. Low, convenient, light-running, easy to clean, heavy base, etc. Guaranteed 5 Years. Write today for FREE catalogs

Waterloo Gasoline Engine Co., 228 W. 3rd Ave. Waterloo, Iowa

This Free Book Will Save You $20.00 a Year

I want to tell you all about my *Celebrated Steel Shoes*—why one pair will outwear six pairs of leather shoes—how a pair will give you more foot-comfort than you ever had in your life. How they will keep your feet powder-dry all the time. How light and comfortable they are the year around. I have told half a million others these facts. They have bought steel shoes of me and saved millions of dollars among them. More than that—they can be on their feet all day—at any work, without foot fatigue. And they have gained health protection.

Steel Shoes

N. M. RUTHSTEIN
The Steel Shoe Man

prevent rheumatism, sciatica, lumbago, lame back and other troubles caused by wet feet. I want to show *you* the way to avoid these dangers and all such troubles as tender feet, corns, bunions, chilblains, and at the same time show you a saving of $20 a year in actual money on account of the extra wear you get from my shoes.

Will you write me a postal today and get full particulars? Let me send you this free book of mine by return mail.

Address

The Steel Shoe Man
254 Seventh St.
Racine, Wis.

At Kansas City, late in October, some fancy native steers, 1,500 pounds average, sold at $8.85 per 100 pounds.

At the National Dairy Show, the President of the United States had an escort of dairy cows.

How to Handle Cotton.

United States Senator John Sharp Williams, of Mississippi, has suggested what is pretty near the right idea in regard to handling the cotton crop, which is for the cotton grower to hold the surplus of a fat year to fill the deficit of a lean year, just as Joseph, the son of Jacob, did in Egypt so many years ago.

There is some difference, however; Joseph was not a farmer, but a speculator, and, having cornered the crop, he waited for the lean year, and, being absolutely safe in control of the supply, he sold out at his own price. There is no record that Joseph paid the farmers a good price for the corn in the first place.

It will be seen in practice that to hold cotton for a stated price is not a business proposition. Cotton farmers usually owe money, and that has to be paid, and the cotton is the security; it is really the banker who would have to hold most of the cotton, and the banker has no right to use depositors' money to loan farmers money beyond certain well-defined limits, which are not high enough to suit the farmer.

The only way to handle the cotton crop in the interest of the planter is for the planters to systematically divide the crop into twelve equal parts and to sell no more than one-twelfth each month. That will relieve all concerned and strengthen the market at the same time. That is the only way it can be done. If one man had the right to order it done and the power to enforce the order, the available supply for the year would be divided by twelve and the market would at once assume a condition in favor of the producer instead of being in favor of the buyer. In fact, in lean years the prices would be on the highest basis and the result be all that any planter could expect. Such a plan as we suggest would encourage the manufacturers to buy supplies month by month and there never would be a glutted market, not even in the harvest months, when the surplus always depresses the market.

The only way to control the cotton crop appears to be by and through a Cotton Growers' Association that can agree upon the programme as outlined. All those who would not or could not join should be invited to dump their cotton on the market as quick and as cheap as they can and get it out of the way. All those who belonged to the association and who found it absolutely necessary to sell some cotton out of the regular order should be released from obligation on paying a penalty of a dollar a bale to the funds of the association.

This plan has been mentioned before, but it has not been acted upon. We are fully convinced, however, that the cotton crop will never be sold for all it is worth until some such arrangement is entered into and carried out in good faith.

We hold that no crop should ever be curtailed; no crop should ever be held in store to accumulate to depress another year; no more cotton should be sold at ginning time than at any other time of the year; no cotton should ever be sold by a grower for future delivery.

Poultry, Pigeons and Pet Stock.

Preparations for the annual exhibit of the St. Louis Poultry, Pigeon and Pet Stock Association at the Coliseum, November 27th to December 2d, have been made, and the exhibit will be limited to 3,000 head. An innovation at this show will be the giving of certificates instead of ribbons. The St. Louis Show is assuming the proportions of a National Exposition. Dr. Jules Baron is President of the Show, and W. E. Way, Secretary.

G. S. Byers, of Hazelrigg, Ind., has been selected to judge the English class and all game fowls. James H. Tucker, of Concord, Mich., will judge all Wyandottes and Rhode Island Reds. H. H. Cowan, of Virden, Ill., will pass upon Buff Plymouth Rocks. E. C. Branch, of Lee's Summit, Mo., will judge all Plymouth Rocks except Buff and all Asiatics. W. F. Brace, of Victor, N. Y., will judge all Mediterranean, Polish and Hamburgs. T. M. Campbell, of Darlington, Ind., will pass upon all water fowls, turkeys, bantams and the French class. The Coliseum is a fine building in which to hold a Poultry Show.

Government experts paid $4.80 a dozen for the eggs to start the experimental poultry farm at Beltsville, Maryland. They were eggs from established breeds; and the eggs produced on the experimental farm will probably cost $4.80 a dozen.

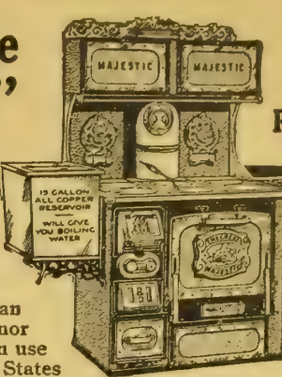
The Cost of the Army Ration.

The daily average cost of rations issued to soldiers of the United States Army during the past year was 22¾ cents. Notwithstanding the cry about the high cost of living the army is better fed now for less money than was paid for the ration thirty years ago.

Angus Cattle at Auction.

The booklet entitled "Supremacy of Aberdeen-Angus Cattle" is at the service of any of our readers who will ask for it. The merits and importance of Aberdeen-Angus cattle are set forth in history, statistics and illustrations. There will be an auction sale of Aberdeen-Angus cattle held on December 6th at the International Live Stock Exposition. Write for catalogue at once to Chas. Gray, Secretary, Union Stock Yards, Chicago, Ill., and at the same time ask for a copy of "Supremacy."

Don't Buy Any Range "Unsight, Unseen"



The Range With a Reputation

Made In Three Other Styles

If anyone should ask you to buy a team of horses "unsight, unseen," from a mere printed description you would think he intended to "sting" you. Now there is no more sense in buying a range "unsight, unseen" than there is in buying a team of horses—nor is it necessary. ***The Great Majestic*** is in use in almost every township in the United States west of the New England States. Possibly one of your neighbors has been using one for years—and is thoroughly satisfied.

If not, there is a dealer somewhere in your county who sells them—and it will pay you to drive an extra ten miles, if need be, to see and carefully examine the ***Great Majestic***—the range with a reputation—built on honor—of the best materials—before investing your money in a range of any kind.

You don't buy a range every day, or indeed, every year, and when you do, you want the best your money can procure—that's the

Great Majestic Malleable and Charcoal Iron Range

Outwears Three Ordinary Ranges

It is the only range made entirely of malleable iron and charcoal iron. Charcoal iron won't rust like steel—malleable iron can't break, and while the first cost of a ***Great Majestic*** may be more than some other ranges, ***it outwears three ordinary ranges.***

Economical—Saves Half Your Fuel

The ***Majestic*** is put together with rivets (not bolts and stove putty). The joints and seams will remain air tight forever.

The oven is lined with guaranteed ***pure asbestos board,*** covered with an iron grate ***—you can see it.*** No heat escapes or cold air gets in. Takes but half the fuel used in other ranges for perfect baking.

All Copper Reservoir—Against Fire Box

The reservoir is ***all copper*** and heats like a tea kettle through a copper pocket, stamped from one piece of copper, setting against left hand lining of fire box. It boils 15 gallons of water in a very few moments and is instantly moved away from the fire.

Ask Your Dealer To Show You The Greatest Improvement Ever Put In a Range

Increasing the strength and wear of a ***Great Majestic*** more than 300% at a point where other ranges are weakest—be sure to inquire about this feature—many other exclusive features.

For sale by the best dealers in nearly every county in 40 states. Write for our booklet, ***Range Comparison.***

MAJESTIC MFG. CO., Dept. 131 St. Louis, Mo.

Protect the Horse.

The Horse Protector advertised by the Trenton Spring Company, of Trenton, N. J., is worth investigating. The horse that can do an honest day's work is worth being fitted with all the modern appliances that will help lighten the load.

Missouri is famous for saddle horses and has much to do with bringing them towards the standard of perfection. D. S. Maddox & Son, of Monroe City, Mo., have a few stallions and fillies for sale of their own raising that are highly representative of the breed.

Last Elgin butter quotation in October, 31c., against 29½c. the previous week, 30½c. the corresponding week a year ago, 31c. two years ago, and 28c. three years ago.

The Best Farm Locations

Productive lands, favorable climate, and abundant rainfall make farm locations in the Southeast the most profitable.

Land from $10 to $50 an acre close to the best markets. Wheat, corn, hay, all truck crops, give best returns. Conditions unsurpassed for dairying and live stock, hog and poultry raising. **Beef and pork produced at 3 to 4 cents a pound.**

Five to six crops of alfalfa per season grown. Good farmers make 60 to 100 bushels corn per acre. Home markets near at hand pay highest prices for dairy products and demand is undersupplied. **Apple orchards pay $100 to $500 an acre,** and orchard lands cost only a fraction of those in other sections.

The Southeast Has Locations for Every Kind of Farming

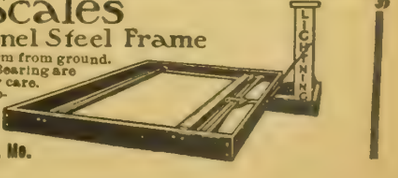
The climate assures the finest results from intelligent agriculture, and makes the region unsurpassed as a pleasant and healthful home location. It is an open winter country, and its summers are enjoyable. You can locate where there are good schools, churches, roads, rural delivery, and all other advantages. The Southern Railway and associated lines will help you find the location you desire. Our several publications, free on application, give full information. Address,

M. V. RICHARDS, Land and Industrial Agent, Southern Railway,
Room 71, 1820 Pennsylvania Ave., Washington, D. C.

Lightning Pitless Scales

New Pattern. Solid Channel Steel Frame

Channels are seven inches which is the height of platform from ground. Levers are octagon in shape giving greater strength. Bearing are Toolsteel. This scale will last a life time with ordinary care. Equipped with compound Beam Free. Furnished absolutely complete except platform planks. Guaranteed accurate and tested to more than its capacity. Write for our prices and description before buying.



KANSAS CITY HAY PRESS CO., 425 Mill St., Kansas City, Mo.

25 YEARS SERVICE

is a common performance for the ECLIPSE WINDMILL

The Eclipse is designed for durability. There are only four wearing parts. One wheel turn gives a pump stroke. The side vane swings the mill into safety in storms. Material is ample and right. The head casting is thick and wide. Main bearing and pivot are long and rigid. Basswood is used for lightness, seasoned ash and "heart of oak" for strength. All parts are made exact and fit firmly together. For valuable information on windmill durability and efficiency write for Catalog number DH692

THREE-YEAR SUBSCRIPTIONS.

Orders For The National Farmer and Stock Grower Solicited.

We desire to invite attention to our three-year subscription proposition. We hope to obtain one hundred thousand additional subscriptions during the present year to continue for three years. It is practically a trial subscription and payable at the end of the first year. The subscription can be stopped at any time by paying for the period the paper is taken. This method of taking subscriptions is the invention of Uncle Piper, our subscription editor, who has guaranteed that every one of them will be paid when they are due. The subscription price of this paper is $1.00 for three years, and the bill for the subscription is sent to the subscriber at the end of the first year. When the bill goes out Uncle Piper slips in a list of handy premiums for the subscriber to select one from, providing he pays the bill promptly, and the general result is that the bill is soon paid. When it comes to getting subscriptions from intelligent, high-class farmers, Uncle Piper is at the head of the class.

Uncle Piper.

SUBSCRIPTION BLANK.

To the Hale Publishing Co., 3550 Vista Ave., St. Louis, Mo.:

Gentlemen: — You are hereby authorized to enter my name as a subscriber to The National Farmer and Stock Grower for three years. At the end of the first year I will pay one dollar for the three-year period. This order is given with the understanding that I am at liberty to stop the paper at any time by paying the subscription to that date.

Difference in Tested Cows.

An illustration of the difference in the individuality of cows is shown in the records of a herd kept at the New York State Station. The best cow in the herd averaged 10,150 pounds of 4 per cent. milk annually for three years on $58 worth of food. The poorest cow averaged 3,350 pounds of 5.85 per cent. milk on $52.49 worth of food. If in one year the poorer half of the herd had been replaced by animals equal to those in the better half it would have increased the yearly station revenue $237.40, if the milk had been sold at current shipper's price, or $379.90 if the milk-fat had been sold, with an added expense of only $40, the cost of the extra food consumed by the better cow.

Handling Apples.

Few people realize the importance of handling apples with care while picking, packing and marketing. Apples are bruised very easily, and especially those varieties having a tender flesh or skin. Bruises mean not only an unattractive appearance, but a real waste of fruit by having to cut out the bruised tissue. Probably the greatest damage from bruises, however, results from the fact that the bruises furnish an entrance for fungus or rot spores. These spores, or "fungus seeds," are as fine as dust and float in the air. If they happen to lodge on a bruised or broken spot on the apple, they take root and grow and spread through the apple, causing it to rot. Wrapping or covering the apple may not always protect it, as the spores may have lodged on the apple before it was picked. However, if the skin and flesh of the apple can be kept intact and not bruised or broken, there is not much danger of the fungus or rot finding its way into the apple.

To prevent bruising, apples should not be dropped or thrown into a bucket, box or barrel, and in pouring from one vessel to another care should be taken that the apples are as close as possible to the bottom of the vessel in which you are placing them before the pouring begins. If a pail is used to pick in, it should be small enough to lower into the boxes and, even then, holding back the apples with the hands is a good idea, as it breaks the fall and lessens the bruising. No apple which falls from the tree should be allowed to go into the first-grade apples.

The degree of care it will pay you to exercise in handling your apples will be determined largely by the grade of fruit you are putting on the market and the care with which you guard your reputation as a fancy fruit producer.—S. Van Smith, Colorado Agricultural College, Fort Collins.

Shoulder Galls and Abscesses.

In the fall, after a hard summer's work, the shoulders of the work horse should be carefully examined for galls and abscesses. If they are neglected during the idle months of winter the animal is in no condition for spring work.

The causes of shoulder galls and abscesses are ill-fitting and dirty collars, also horses unaccustomed to work are put at hard, continuous pulling before the shoulders become toughened. The first symptom of a sore shoulder is that the hair stands erect in the location of the injury. Later, if the animal is continued at work with the same kind of collar, the skin and hair slough, leaving a raw, bleeding surface. The size of the sore may be from that of a silver dollar up to three inches in diameter.

The sore shoulder causes the horse considerable pain, and if not relieved the animal soon loses flesh and may cause a sound animal to become balky.

Many times a soft swelling appears just above the point of the shoulder. If opened at the outset a straw-colored liquid escapes. On the other hand, if not molested it becomes infected and an abscess forms.

These abscesses are often superficial, but may be deeply seated and require expert attention. The deep abscesses may be located six inches or more below the surface of the skin, between the shoulder joint and the chest wall. These abscesses often prove serious and should only be treated by a qualified veterinarian.

By way of prevention of shoulder abscesses and galls, give particular attention to the collar. See that it fits snugly at the top and only room enough between the neck and collar to admit the arm. Also remember that the collar should be kept clean. Wash the dried sweat off the collar at night, and bathe the shoulders with cold water after the horse is unharnessed.—C. L. Barnes, Colorado Agricultural College, Fort Collins.

Money-making Rations Shown by College.

That different rations may produce the same dairy products with different profits for the farmer, was graphically presented at the International Dairy Show at Milwaukee by the College of Agriculture of the University of Wisconsin. The ration for one cow for a day, producing 57 cents' worth of milk and butter and costing 32 cents, consisted of fifteen pounds alfalfa hay, five pounds corn stover, forty pounds beets, three pounds ground oats and four pounds corn meal. Thirty pounds skim milk, valued at five cents, were shown beside the feed. One and three-quarter pounds butter were also shown as the production of the ration and was valued at 52 cents.

Another ration, consisting of fifteen pounds alfalfa, thirty pounds corn silage, one pound oil meal, one pound dried distillers' grains and three pounds hominy feed, producing the same amount of milk and butter, but costing only 25 cents, made a neat profit of 32 cents. By means of these graphic methods of illustrating, the results of the scientific work of the College of Agriculture can be more readily appreciated by the farmers throughout the state.

Illinois Butter Contest.

At the Illinois State Fair, the September scoring for Illinois buttermakers was done. The highest scores were received by K. B. Carpenter, Mt. Carroll, 95.83; R. Coon, Mt. Carroll, 95.66; P. J. Peterson, Round Lake, 95.50; S. Grimm, Crete, 95.16; W. F. Moore, Watseka, 95.00.

The highest water content of the butter was 16.97 per cent.; the lowest 11.60 per cent.; the average 13.75 per cent. The highest scoring tub showed the following analysis: Water, 13.27 per cent.; fat, 83.54 per cent.; salt, 2.14 per cent.; curd, 1.50 per cent.

Milk in New York City.

According to the New York Produce Review and American Creamery, the price of milk delivered by producers in New York City was 3¾ cents a quart net to shippers in the 26-cent freight zone, or a cost of $1.81 per forty-quart can delivered in New York. This is the rate that went into effect October 1st and continued during the month.

At St. Louis, late in October, fancy little native heifers, 532 pounds average, sold at $6.75 per 100 pounds.

Animal Regulator

is just the tonic your horses and cattle need this winter—it will keep them in fine shape in spite of dry fodder and lack of exercise—will show you a handsome profit in the improved condition of your stock.

Pratts is a guaranteed grain saver (animals get every ounce of nourishment in the feed)—a sure preventive of serious illness because it keeps the bowels and digestive organs in perfect condition.

Mix a little *Pratts Animal Regulator* with the feed of all your live stock this winter, and you won't have to build them up next spring.

Satisfaction Guaranteed or Money Back

You don't risk a cent when you buy *Pratts Animal Regulator.* Every dealer is directed to promptly repay all dissatisfied customers the full amount of the purchase.

Get some Pratts Animal Regulator today. 25 lb. pail $3.50. Sold also in smaller packages and in 100 lb. bags.

CENTURY MANUFACTURING COMPANY, Dept. 849, East St. Louis, Ills.

Flavors in Milk.

[By B. F. Kaupp, Pathologist, Colorado Agricultural College, Fort Collins.]

The abnormal or injuring flavors in milk are of two kinds: First, those due to feed eaten by the cows; second, those due to contamination.

The first kind is scientifically spoken of as food flavors and is due to the cow eating large quantities of turnips, onions, ensilage, beets, ragweed, etc.

This ill flavor is due to volatile oils contained in the strongly-flavored feeds. Such flavors leave the animal through the different secretions and excretions of the body.

When feeding is done immediately after milking, these feed flavors largely pass off through other channels, or secretions, than the milk and are not noticeable. It is also maintained that if some rough forage be fed along with such feeds that produce ill tastes in milk, it assists in obviating such flavors.

It is within the power of the dairyman to obviate the second flavor of contamination. This class of ill flavor is largely due to contaminating bacteria. Of these there are many, each giving its peculiar flavor. Another contaminating flavor is due to the absorption of certain strong odors.

The cause of the contamination of milk is largely due to lack of perfect cleanliness with the milking utensils, surroundings, methods of delivery and personal cleanliness.

The udder and adjacent parts should be washed with clean water and wiped dry with a clean, dry towel. The hands and the clothing of the milkman should be clean. Bottles, buckets, etc., should be sterilized with live steam and turned upside down so as to prevent the collection of dust, which always contains germs and mold spores. Small-top pails should be compulsory by law.

Improvement in Holsteins.

"The practice of officially testing dairy cows has proven to be an efficient factor in weeding out the unprofitable members of the herd. The Wisconsin Station has published during the year results of official testing in that state for the past ten years. During the first five years of the decade the average production of aged Holstein cows on a seven-days' test was 397.5 pounds of milk and 13.9 pounds of milk-fat, while in the last five years of the decade the average production of this class was 432.9 pounds of milk and 15.3 pounds of milk-fat. This gain was due in large part to improved breeding, feeding and selection of the dairy stock." This is from Farmers' Bulletin No. 465, issued by the United States Department of Agriculture.

English Milk Rules.

The National Health Society of England formulated some rules regulating the handling of milk, which are more humorous than they are practical, says the Chicago Dairy Produce. The following is a part:

"The milker must wash his or her hands, using a nail brush, before milking. Soap, towels and water must be provided in a convenient place for this purpose. A clean linen smock should be worn while milking, and then only. Persons who are poorly, or have sickness at home, should have nothing to do with the cows without the sanction of a medical man.

"The cow-shed should be so light that every part of it is easily visible in the daytime with the doors closed.

"The cow-shed should be so ventilated that the air in it will not feel close or have a disagreeable smell. * * * Cows, like human beings, will not suffer from ample ventilation if it is steadily maintained throughout the whole year."

The Milk-inspection Crusade.

In St. Louis the city authorities and Dr. W. P. Cutler, State Food Commissioner, have been systematically arresting and prosecuting the city people who violate the laws relating to the sale of milk and cream. The net result of the crusade is the statement by Dr. Cutler that the actual cost of pure milk will advance in the cities.

He has discovered that the prevailing retail price of watered milk over the counter is seven cents a quart, and his view of the subject is that the pure and unadulterated article will finally cost the consumer ten cents a quart. His idea is that this increase in price will be more than offset in a lessening of doctor bills and elimination of epidemics.

It may be put down as a fact that eighty per cent. of all the milk adulteration with water is done by the small retail distributers, and that the larger city distributing companies deliver a grade of milk direct to families that is up to the proper legal standard of fat and solids and which is sanitary as milk can be. When it comes to getting pure and unadulterated milk over the counter of the cheaper class of restaurants or in the cheaper boarding houses, that can hardly be done; the money the boarding-house and restaurant keepers receive will not justify standard milk; they would rather put up the sign "skim milk" than be arrested for dishing out three cans of milk whereas only two were bought in the first place.

The purer and better the milk has to be sold in the cities the better it will be for milk producers in the country, because the city water works have usually furnished at least 20 per cent. of all the milk finally reaching consumers in the big cities, and when we speak of a consumer we refer to the man, woman and child who drinks the milk, and not to him or her who buys the milk to sell again.

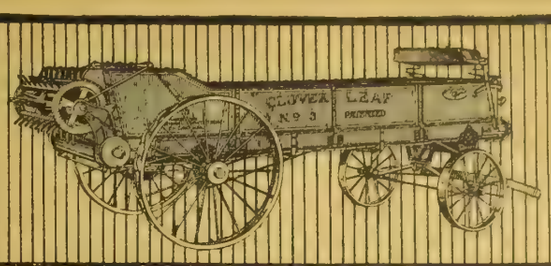
Export Grades of Butter.

Referring to the export trade in butter from New York City, a market authority states that the dealers do not buy the better grades of creamery. With the highest quality of butter selling at 28½ cents a pound the export grades of creamery cost the shippers 23 to 24 cents; then there are grades of process butter at 22½ to 23 cents, and ordinary factory butter at 18 to 19½ cents a pound. It appears to be a very good thing for all concerned that there shall be export outlets, but the export trade is more given to relieving low-priced, glutted markets than to causing advanced prices. when the prices are already at a high notch. It may as well be understood, however, that the highest scoring butter is consumed at home.

Dairy and Creamery.

It is estimated by competent authority that eight out of every hundred milch cows are boarding at the expense of the other ninety-two. Eight per cent. loss will put most any city business into bankruptcy.

At the Iowa State Dairy Show, held recently at Waterloo, in the whole-milk class the highest scoring butter was exhibited by G. Stuessi, of Manchester, the score being 97.5. In the gathered-cream class the highest score was 98.5, the exhibit being by Watson Shick, of Monona.



Don't Let The Soil Starve

YEAR after year, your crops take nitrogen, phosphoric acid, and potash out of the soil. These elements are absolutely necessary to the growth of plant life. What are you doing to replace them?

You can keep your soil from starving by spreading fresh manure, evenly, in proper quantities. Manure, spread in this way, puts back into the soil the very elements the crops have taken out. To spread manure evenly, you must use a manure spreader. When buying a spreader get a good one.

I H C Manure Spreaders

have proved their quality. Owners like I H C Spreaders because of their simplicity, strength, durability, and light draft. The superiority of these machines is due to the following constructive features:

The method of transmitting power from the wheels to the beater is simple and direct. There are no unnecessary parts to wear. The beater is larger in diameter and the teeth are long, square, and chisel-pointed. By using this style of tooth, the manure is thoroughly pulverized and is thrown out before it wedges against the bars. This reduces the draft.

The apron is supported by steel rollers and the slats are placed close together, so that manure does not sift between. The steel wheels have ample strength to carry many times the weight they will ever be called upon to bear. The rims are flanged inwardly to prevent cutting and rutting of meadows and accumulation of trash.

Corn King Cloverleaf Kemp 20th Century

are machines that will merit your heartiest approval. I H C manure spreaders are made in three styles and many sizes, for field, orchard, and vineyard.

Get complete catalogues and all information from the I H C local dealer, or, if you prefer, write direct.

I H C Service Bureau

The Bureau is a center where the best ways of doing things on the farm, and data relating to its development are collected and distributed free to every one interested in agriculture. Every available source of information will be used in answering questions on all farm subjects. If the questions are sent to the I H C Service Bureau, Chicago, they will receive prompt attention.

"EVERYBODY"

Can Afford a Gasoline Engine With Galloway's New Low Prices

1½ HP $27.50

Other Prices in Proportion

You've never before heard of such startling values—I've never offered anything like them and you know full well that no one else has ever come anywhere near my regular prices. But this time I've a startling reason—*I want 10 men in every township in the county to own and operate a Galloway Engine*—I've decided to double my factory capacity by increasing the sales twice and sell two where I formerly sold one—this calls for unusual values—hence, the greatest offer I have ever made. I can save you from $25 to $300 on an engine according to the H. P. needed. It doesn't matter what sized engine you want I've got the one to fit your wants and do more work and better work at less actual cost than any other engine in the world. Write at once for full information of the Greatest Offer Ever Made To American Farmers—don't delay but send me your name and address now, before you do another thing. Let me prove to you in cold facts why I can put $25 to $300 in your pocket.

FARM AND RANCH LANDS.

ALABAMA. — BARGAIN FOR QUICK SALE. Splendid place for truck, chickens, etc. Easy drive Birmingham, Ensley, Bessemer and Corey, on car line. Good five-room house, poultry and pigeon houses, etc.; city water; plenty fruit and shade trees. Easy living can be made off place. Price, $5,500; about $2,000.00 cash; balance easy. Address, **Owner,** Ppstoffice Box 691, Birmingham, Ala.

ARKANSAS.—For Sale: 1,200 acre stock farm, situated in Arkansas, 68 miles south of Memphis, on the Mississippi river, with landing on the place; several houses and commissary. This is counted by cattlemen as being one of the best all-round stock farms in the South. We have 700 acres of open land, about 400 acres in grass, balance in corn, cotton, etc., the land being all level and very rich. There is a small lake, about 100 feet wide and about one-fourth mile long, on one side of this tract. There is heavy cane all around the open land, which gives good protection in winter and makes excellent winter browsing. A better stock farm could not be found. We are offering this place at a sacrifice price of $20.00 per acre. Address, **St. John & Olcott (Owners),** 46 Porter Building, Memphis, Tenn.

ARKANSAS.—We also own 350 acres in Arkansas, 18 miles north of Memphis, of which 200 acres are in cultivation—seven houses and barn. We can show over a bale of cotton an acre from this land this year and 50 bushels of corn per acre. Price on this place, $20.00 per acre. These farms are entirely out of the boll weevil district. Terms can be arranged to suit purchaser. Send for full particulars and come and see same at once. You will not find two better bargains in the South. Address, **St. John & Olcott (Owners),** 46 Porter Building, Memphis, Tenn.

ARKANSAS.—Lands on the Cotton Belt Route in Arkansas are offered for sale at remarkably low prices. All farmers and "intend-to-be farmers" should post themselves. Write for free books showing the best locations. Address, **E. W. LaBeaume,** G. P. & T. A., 1419 Pierce Bldg., St. Louis, Mo.

ARKANSAS.—LOOK! LOOK! BAXTER COUNTY, ARKANSAS. Thirty-five improved farms, $10 to $25 per acre. Write for Land List and Literature. **T. G. Higgins Land Company,** Box 335, Cotter, Ark.

ARKANSAS. — SOUTHEAST ARKANSAS is the best farming section of the state. I have for sale several good places near Eudora, in Chicot county. Owing to age and ill-health of my wife, I will sell my property at bargains. Address, **Dr. S. A. Scott,** Box 99, Eudora, Ark.

FREE Literature will be sent to anyone interested in the wonderful Sacramento Valley, the richest valley in the world. Unlimited opportunities. Thousands of acres available at right prices. The place for the man wanting a home in the finest climate on earth. No lands for sale; organized to give reliable information. Sacramento Valley Development Assoc'n, SACRAMENTO. **California**

TEXAS.—Many of the very best farms and farm lands are to be found on the line of the Cotton Belt Route in the state of Texas. A reference to that country will be found on page 20 of this paper. Send in your name to receive free books concerning the rich land bargains to be had on this line. Address, **E. W. LaBeaume,** 1419 Pierce Bldg., St. Louis, Mo.

I BRING BUYERS AND SELLERS TOGETHER. If you want to buy, sell or exchange a farm or business, write me. Established 1881. **FRANK P. CLEVELAND, 7910 Adams Express Building, Chicago, Ill.**

FARMS WANTED. We have direct buyers. Don't pay commissions. Write describing property, naming lowest price. We help buyers locate desirable property FREE. **American Investment Association, 55 Palace Bldg., Minneapolis, Minn.**

953 F Street, Washington, D. C.

The Department of Justice is after a corner in wheat.

CHAMPION CAR-LOAD HEREFORD FAT CATTLE AT AMERICAN ROYAL. Bred by Adams & Robert in Meade county, Kansas, and fed by Horace G. Adams, Maple Hill, Kansas. Sold by Clay, Robinson & Co. at $9.40—average weight 1,376 pounds—to Armour & Co. for Weber, Kansas City's leading butcher; furthermore, Mr. Weber is the leading butcher in the United States.

Blooded Stock Notes.

At the Arkansas State Fair, most of the prizes for pure-bred breeding stock went to the exhibits of Texas cattle.

Mr. T. C. Kimber, of Pilot Knob, Mo., recognized the great demand for the bacon hog and hit upon Large Yorkshire swine as the breed which appealed to him as the best to raise for the prevailing market. His card is to be found with other breeders. He has pigs for sale.

Mr. Charles Ford, whose Tamworth swine advertisement appears in this paper, has returned to his home at Mortonsville, Woodford county, Kentucky, with 100 ribbons won in competition with the best herds of the United States and Canada. His aged stock won first and championship at every show. Mr. Ford has some 100 head of fine pigs for sale, including some aged stock. See his card.

Wilder Carpenter, of Marmaduke, Ark., is the owner of Master Meddler, 3d, 175,583, and we have a letter from the eminent breeder of Poland-Chinas, Frank D. Winn, who states that Master Meddler, 3d, is one of the best hogs he ever raised. Mr. Carpenter has the champion Poland-China sow at the Tri-State Fair at Memphis and a grand champion Duroc sow at Nashville, Knoxville and Memphis, Tenn. See his card. He has stock for sale of his own raising.

The Davis Jersey Farm advertising in this issue are located at Johnson, Washington county, Ark., on the St. Louis and San Francisco Railway, not far from the Oklahoma line. Prices are mentioned in this advertisement and the breeding of both hogs and cattle are superior, especially the Jersey cattle.

Charles Dorr, of Osage City, Kas., our ownly advertiser of Duroc-Jersey hogs in that state, has sold fifty pigs from a small advertisement in The National Farmer and Stock Grower. He is offering strong, healthy, pure-bred pigs for sale at farmers' prices during the next thirty days.

Mr. J. W. Kirby, breeder of superior Poland-China hogs at Marmaduke, Ark., writes as follows: "We have the best boars we ever offered for sale. Strictly big, long fellows with quality: also some very fine gilts that will weigh around 100 pounds that are the cream of our breeding; and then we have customers in almost every state who indorse the type of hog we send them."

Mr. J. P. Vissering, of Alton, Ill., formerly of Godfrey, is again advertising big-type, long-bodied, satisfactory Poland-Chinas. His stock is well known to our readers and his card will be found in the usual place.

Mr. E. L. John, of Broadway, Maries county, Mo., has fine, large-bone Berkshire hogs of his own raising for sale. He has advertised with us a number of years and he has the stock that has been well raised for robust constitutions and the breeding is up to high standards. Mr. John can ship on the Frisco System or the Rock Island Route. He is between the two and not far from either.

Barland, Miss., is named for Barland Bros., breeders of pure-bred Poland-China hogs of the best strains. The shipping point is Martin, in Claiborne county, on the Yazoo and Mississippi branch of the Illinois Central Railway, not far from Jackson or Vicksburg. Hogs can be shipped at reasonable expense to all points on all Southern railway systems. Fine hogs can be had cheap. See breeders' card.

Mr. H. H. Hofmann, of Route 1, Belleville, Ill., has fine Duroc-Jerseys for sale. They are spring boars that show their quality. He also has Wyandotte cockerels for sale that are well worth the price.

The Kerry Hill Flock Book, the record of a pure Welsh breed of sheep, is recognized by the United States Department of Agriculture. Recorded sheep of this breed can now be admitted into the United States for breeding purposes free of duty.

Mr. D. F. Beauchamp, of Meredosia, Ill., writes that he will not have any more Poland-China pigs for sale, but he wishes us to invite attention to his R. C. Brown Leghorns, also to his fine Rhode Island Reds. He has several hundred of his own raising for sale.

WANTED, RAILWAY MAIL CLERKS

Hundreds of Railway Mail Clerks, commencing at $800, with rapid advancement to $1,100 or $1,200, will be appointed from examinations to be announced everywhere January 15th, as it is a year and a half since the last examinations. Railway Mail Clerks usually have every second week off at full pay and very pleasant work, traveling continually.

Interested readers should write immediately to Franklin Institute, Dept. P 107, Rochester, N. Y., for examination schedule showing places, samples of previous examination questions, and for free coaching for coming examinations.

From Centralia, Ill., October 20th, it was reported that Timothy C. Dickerson, aged 75, was killed by a team of horses trampling him. Dickerson's body was found on his farm, north of Centralia. One of the horses, which had been attached to a plow, was lying beside him on the ground, entangled in the harness.

Farm Products Exhibition.

An exhibition car of farm products raised upon the line of the Cotton Belt Railroad left the Union Station, St. Louis, Mo., Sunday, October 22, 1911. The first stop for the car was at Carlyle, Ill. The trip will occupy sixty days and will go through Southern Illinois, Indiana, Ohio, Kentucky, West Virginia, Western Pennsylvania, Western New York, Michigan, Iowa and Missouri, to show what is actually grown and produced in the country traversed by the lines of the railroad. The car is in charge of Guy L. Stewart, Agricultural and Industrial Agent of the Cotton Belt Railroad.

Pure-bred Stock to Cuba.

The Cuban government has had three representatives in Kentucky for the purpose of purchasing stock to improve the native herds of their country. After spending ten days in search of what they wanted they proceeded to the well-known establishment of J. F. Cook & Co., at Lexington, Ky. This firm succeeded in selling them six saddle stallions, two two-year-old Kentucky mammoth jacks, thirty head of Tamworth and Hampshire swine, six Jersey heifers and three bulls, a number of saddle mares which were for breeding purposes, and a number of geldings for plantation use. The Cuban government's agents were Dr. Honore Francis Laine, of the University at Havana, Cuba; Dr. Emilio L. Lucas, Chief of the Department of Agriculture, at the Goverment Experiment Station at Santigo de Las Vegas; and Senor Perres, Assistant Secretary of Agriculture of Cuba.

Messrs. J. F. Cook & Co. also secured poultry for the agents as follows: Thirty Rhode Island Reds, thirty Black Langshans, thirty Barred Plymouth Rocks.

The stallions purchased were an unusually well-bred lot and they should do much to improve the horseflesh of that country. The Cuban officials would not buy any stallion unless he would go the single foot, a good fox trot or running walk. These stallions were two-year-olds with the exception of one, which was a three-year-old. J. F. Cook & Co. are very proud of this deal, as they bred partially all of this stock on their farms.

Opportunity For Cattle Feeders.

The cattle feeders of Indiana and neighboring states will have an opportunity to hear Mr. Humphrey Jones, of Ohio, on November 16th, when the Fifth Annual Meeting of the Indiana Cattle Feeders' Association meets at Lafayette. Mr. Jones was among the first feeders of the corn belt to make extensive use of corn ensilage as a roughage for fattening steers. Since beginning the use of ensilage he has greatly increased the feeding capacity of his farm and has found through years of experience the advantages and difficulties of silage for fattening cattle. The opportunity to hear the experience of such an old and experienced feeder should not be neglected. A cordial invitation is extended to every interested person.

Centralization of Creameries.

According to the United States Census, the number of establishments engaged in the manufacture of butter and cheese was 8,479 in the year 1909 and 8,926 in the year 1904. The capital invested is increased 51 per cent., the gross output is increased 63 per cent., but in five years the total number of creameries and cheese factories decreased 5 per cent.

Daniel Webster Said:

"Deal with the man who does the most business. You will find there is a reason for it."

Experience and common-sense confirms his words. CLAY, ROBINSON & CO. are the largest live stock commission firm in the world. : : : :

"THERE'S A REASON FOR IT."

Not Best Because Biggest-- But Biggest Because Best.

Sheep in Australia.

Our readers can get an idea of the extent of the wool-producing industry of Australia from a special report from the United States Consul in New Zealand to the Department of Commerce and Labor:

"The principal feature of the wool year of Australia was that a record clip was shorn, the oversea exports having amounted to 1,975,378 bales, or 646,838,877 pounds, from Australia, and 493,372 bales, or 173,173,572 pounds, from New Zealand, the total value being $150,377,380. The increase, as compared with the previous year, amounts to 34,107 bales. The size of the clip is all the more remarkable when it is considered that the 2,000,000-bale limit was reached for the first time in the year 1906-07, and the past year's figures are nearly double those for 1903-04. In fact, taking Australia separately, they are more than double. Considerably more wool was exported on the sheep skins than during the previous year.

"The flocks in Australia and New Zealand now total 116,034,173 head, having slightly increased during the past twelve months. A great many more sheep, however, are now depastured in Australia than at any period during the past seventeen years, the previous record having been in 1906, when the figures reached 124,991,920 head. The last clip was greater than that of any previous season.

"Dividing the number of sheep shorn into the net weight of wool produced, including that used for local manufacture, it will be seen that the average weight of wool produced per head works out at seven pounds and four ounces, which compares with previous years as follows: 1909-10, seven pounds and four ounces; 1908, six pounds and fourteen ounces; 1907-08, six pounds and nine ounces. The general demand for wool of all grades and descriptions for the past twelve months has been almost insatiable, although the United States, the greatest of all wool-consuming countries, bought very much less than usual on account of demoralization in its local trade, which was affected with uncertainty as to the continuation of the present tariff."

INDIAN RUNNER DUCKS.

A Few Facts Concerning Them by a Missouri Breeder.

Many farmers' wives and daughters want to make some money independently of the men of the family, and there is no way so sure and easy as through poultry.

Then the first question is, What is the best breed to take up? This question is asked perhaps oftener than any other. It is generally among the very first inquiries from beginners. Much depends upon the particular strain of any breed, also the location and fancy of the breeder. The poultryman should select the breed which suits him best in color and shape, for the reason that he will be more interested in it and will give it better attention.

In my opinion, the Indian Runner ducks are one of the best general or all-purpose breeds, for fancy, for market purposes and egg production. They are very popular and more extensively bred than they were a few years ago. They are comparatively a new breed and fast gaining friends wherever they are known.

They are hardy and easy to raise. They grow rapidly and are ready for market at nine weeks if properly cared for. They are great layers and the finest of table fowl.

The only time in the duck's life that it really demands close attention is from the time it is hatched until it is three weeks old. In the first place, there should be no feeding whatever for the first twenty-four hours of its life, as nature has amply provided for it for this period.

Feeding should be very light for about four days. They should be fed often, but little at a time. Feed hard-boiled eggs, cracker crumbs or bread crumbs moistened in sweet milk, also a little clean sand. Feed four times a day and give warm water to drink, especially when first turned out in the morning when young. The water should be deep enough in the fountain to enable them to plunge their heads entirely under. This is necessary to keep their nostrils open, which are otherwise liable to become clogged and closed, thereby causing death from smothering. When young, they should not be allowed to play in the water and get wet.

From five to twenty days feed wheat bran two parts by measure, corn meal one part, rolled oats 50 per cent., beef scraps five per cent. Mix with water or sweet milk to a crumbly state and feed four times a day just what they will eat up clean. They need a variety of feed and will thrive and grow faster by having it. Keep their bedding dry; don't allow them to sleep in damp quarters, as it is injurious.—W. M. Sawyer, Lancaster, Mo.

Caution For Hunters.

From the American Field: "As the time is near when the woods in several states will be filled with big game hunters and the fields and marshes with bird hunters, it is well for all hunters to bear these admonitions in mind: Never shoot at a moving object in the woods until you are sure it is not a human being. Never shoot when in the field with a companion without knowing where your companion is. Never point a gun at anything, whether loaded or not, unless you wish to kill said object. Never get over a fence with a loaded gun in your hands until you have placed the safety slide on your gun in a 'safe' position. Never draw a loaded gun through a fence with the muzzle toward you. Never put a loaded gun into a wagon, and never, no never, no matter what the excuse, carry a loaded gun into the house or camp. If these admonitions are respected and obeyed to the letter there will be few accidents to chronicle and few heartaches for having mutilated or killed a human being."

A Texas Corn Crop.

N. E. Tucker, a farmer of Hidalgo county, is reported to have gathered 636 bushels of corn from six acres of land near Mercedes, Texas, an average of 106 bushels to the acre. The Mercedes Times says it is also reported that this crop of corn was raised in ninety days.

Farm ALL Your Land —Pull the Stumps With the Hercules All-Steel Triple Power Stump Puller

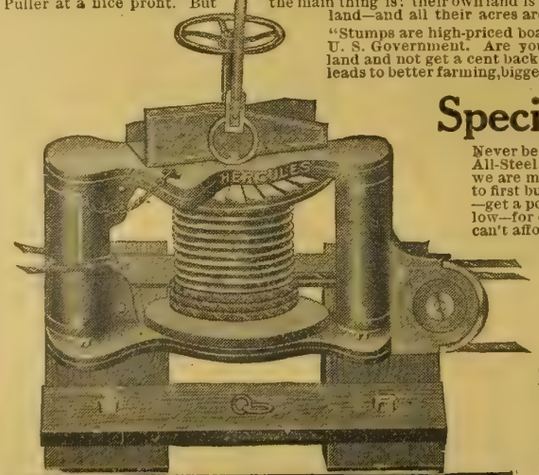
—30 Days' Free Trial—and 3 Years' Absolute Guarantee

Pull out every stump—roots and all—with the famous Hercules All-Steel, Triple Power Stump Puller, at the rate of an acre a day—so you can farm more acres and double the value of land now full of stumps.

The Hercules is the only puller that's **all steel.** It's 60 per cent lighter and 400 per cent stronger than any iron puller ever made. So strong and powerful, it pulls any size stump, green tree or hedge in 5 minutes, or less. And every part of the Hercules is guaranteed against breakage for three full years—all broken castings replaced free of charge whether the breakage is your fault or the fault of the machine.

Thousands of other progress men have pulled out the stumps on their land instead of buying new lands. They've taken advantage of the virgin soil that stumps kept away from cultivation. They've paid for their stump puller over and over again the first year with the profits from the extra crops and increased value of the land. And now they're doing contract stump pulling for their neighbors or renting their Hercules Stump Puller at a nice profit. But the main thing is: their own land is free from costly stumps—they farm all their land—and all their acres are at top-notch realty value.

"Stumps are high-priced boarders who never pay their board"—says the U. S. Government. Are you going to keep on paying taxes for stumpy land and not get a cent back? Or are you going to take the step **now** that leads to better farming, bigger profits and greater realty value of your farm?



Special Offer NOW

Never before have we made lower prices on the famous All-Steel, Triple Power, Hercules Stump Puller than we are making now on our special introductory price to first buyers in every locality. Don't wait another day—get a postal and mail to us at once—or the coupon below—for our price-proposition that will prove how you can't afford **not** to own a Hercules at once. Let us send you our fine free book that tells you the many advantages the Hercules has, not only over every other stump puller made, but also over every other known method of ridding fields of stumps. It tells about the dangers and inefficiency of dynamite—the expense and extra work. It tells how 40 acres of stumps can quickly be turned into $1330.50 net profit the first year and $750.00 profit every year after. There's a mint of information in the book that tells you how to

Boost Your Profits

and how to double the value of every stumpy field you have, and when you read about the materials, principles and construction of the Hercules, you won't wonder why so many thousands of farmers have made so many thousands of extra dollars by owning a Hercules. All-Steel, Triple Power, Self-Anchored or Stump-Anchored, Double Safety Ratchets, Perfect Turning and Machining of all parts, 3-year guarantee against breakage and our 30 days' free trial offer ought—at least—to induce you to

MAIL POSTAL FOR BOOK OF PROOF AND PRICE

This new special proposition of ours is going to get one Hercules Stump Puller in each locality, or we'll be sadly disappointed. We've cut the price to rock-bottom—taken off every cent of profit but a single small factory margin on 5,000 machines. We'll make our profit later, when your machine has introduced us in your locality and the other 4,999 have done the same in different parts of the country. Right now, all we want is your name and address so we can mail you all the facts and proof of how important it is for you to rid your fields of stumps—how necessary it is to your own profits—and then we want to prove how much better you can do it with the Hercules. Read, in this advertisement, what a few owners say and read the letters in our free book. Then ask yourself fairly and squarely whether or not you can afford to keep stumps when you can get such a wonderfully efficient, proven successful and economical machine at the price we are making now to introduce 5,000 Hercules Stump Pullers in 5,000 new localities—all sold on 30 days' free trial and backed by 3-year guarantee, the same as when these machines are sold at regular prices. Mail coupon or postal at once. Address

HERCULES MFG. CO.,
340 17th St., CENTERVILLE, IOWA

Read What Owners Say

John Rattler of Culpepper, Va., writes:
Hercules Mfg. Co.:
I think the Hercules All-Steel, Triple Power Stump Puller is the greatest machine that ever was put on the market. It is so easy to handle that my little boy twelve years old is handling it fine. The little boy and myself are clearing an acre a day of some of the thickest field pines and the land is being plowed. It certainly is a great machine.

D. S. Cade of Veedersburg, Ind., writes:
"We pulled about 400 stumps that had been cut about 7 or 8 years. We have raised almost enough corn on the field over other years to pay for it, as we could check the corn and plow with cultivator before we had to plow with double shovel."

W. O. Bodie of Batesburg, S. C., writes:
"I have pulled over 1,800 stumps in my spare time during the last month. It's a Hercules Triple Power for me every time."

W. J. Hatch of Grandy, Fla., writes:
"Many friends come from far and near to see my Hercules work. All are wonderfully pleased. Two men who came several miles to see it work went right back home and ordered one just like it for themselves. I pulled all the stumps in about 15 days. Some measured three feet in diameter. That was our first work and we were green hands with it. There were over 2,000 stumps, some tap roots measuring 15 and 16 feet."

Hercules Mfg. Co.,
340 17th St., Centerville, Iowa

Please mail me your free book and personal price proposition to first buyers in each locality for the Hercules, only genuine, All-Steel, Triple Power Stump Puller made.

State..... *R.F.D.*.....

National Horticultural Congress, St. Joseph, Mo., November 23 to December 2, Inclusive.

The National Horticultural Congress and big Apple Show will be held in St. Joseph, Mo., November 23 to December 2, 1911.

The National Horticultural Congress is an organization representing a national membership. It is national in its scope and permits entries of exhibitors from every state in the Union. Its organization was for the purpose of advancing and developing fruit growing and agricultural industries. States vie with each other in making agricultural displays, and the United States government participates to a large extent by sending representatives, lecturers and demonstrators from its Plant and Agricultural Departments.

Perhaps no Apple, Fruit or Agricultural Show ever held anywhere will equal this show, which occurs in St. Joseph, Mo., this month. Every fruit grower and agriculturist who attends these shows returns home far better equipped to produce greater results from his land than ever before. Each day of the show soil demonstrations, fruit-spraying demonstrations and demonstrations in the most modern ways of cultivation, constitute the largest part of the programme. The most prominent speakers, lecturers, demonstrators and experts, who are authorities on the agricultural and fruit-growing industries, will be heard throughout the show.

While the programme is not yet quite completed, it is expected that the majority of Governors of all the states of the Union will be present or represented by members of their State Agricultural Departments. Secretary Wilson, with representatives from the National Agricultural Department, is expected to be present, and such noted speakers as William Jennings Bryan, F. D. Coburn, Arthur Capper, of Topeka, Kas., Secretary Nagel, of the National Department of Commerce, Chief Galloway, of the National Bureau of Plant Industry, and many other men of national prominence.

One of the daily features of the show will be the demonstration for the prevention of diseases and the fight against insect enemies of vegetables, plants and orchards. This will be participated in by leading demonstrators from state and government institutions.

The women's interest in the show will center in a special department that will be arranged for a School of Domestic Science. Interest in this will be augmented by special premiums that have been provided for the best exhibits of preserved and canned fruits. Contests in the economical preparation of home dishes will also be a part of the School of Domestic Science.

Cash premiums aggregating thousands of dollars, besides numerous special premiums of valuable implements, etc., will be offered in the premium catalogue, which can be secured by addressing the Secretary of the National Horticultural Congress, St. Joseph, Mo.

Indian Crop of Cotton.

The first general memorandum on the East Indian cotton crop for the 1911-12 season, issued by the Director General of Commercial Intelligence, gives the total area in August as 11,360,000 acres, against 12,215,000 acres at the same date last year. This is exclusive of the United Provinces, which usually bear about 6.6 per cent. of the entire reported cotton crop of India. The condition of the crop is reported to be exceedingly bad in the Punjab and Rajputana, owing chiefly to drouth. Elsewhere the crop is reported to be fair.

Agriculture in Belgium.

The area of Belgium is only 11,373 square miles, about equal to that of the states of Vermont and Delaware combined, and with a population in 1900 of 6,693,548, equal to that of the six New England States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island and Connecticut. Of the entire area, there was in 1895 under cultivation 4,288,349 acres; in woodland, 1,288,092 acres; uncultivated, 470,396 acres; the remainder was in cities, roads, marsh land, rivers, etc.

About one-fifth of the people are engaged in agriculture. Their holdings are mostly small, varying from about one acre to 100 and over. In 1895 the number of holdings of less than 2½ acres each was 544,041; there were 190,833 ranging from 2½ to 12 acres; there were 50,065 from 25 to 50 acres; 12,951 holdings from 50 acres to 125; and 3,584 holdings of 125 acres and over. The agriculture of the country was in a much-neglected condition prior to 1885, at which time a method of improvement was adopted that has produced remarkable results. Under this system the average for wheat in Belgium has been raised from 24.54 bushels per acre in 1885 to 38.55 bushels in 1910, an increase of 14.01 bushels; the average for rye was increased from 23.86 bushels in 1885 to 36.69 bushels in 1910, an increase of 12.83 bushels per acre; oats from 49.75 to 81.48 bushels, an increase of 31.73 bushels; barley (winter) from 38.25 to 57.57, an increase of 19.32 bushels. The number of horned cattle increased from 1,382,815 in 1880 to 1,817,687 in 1907; hogs from 646,375 to 1,370,462. These figures are taken from a report issued by the United States Department of Agriculture.

A Butter Competition.

At the International Dairy Show held at Milwaukee, Wis., October 10th to 18th, eight states were represented in a butter contest. The state of Minnesota stood first, Iowa second and Wisconsin third. Each state was allowed to exhibit twenty of its best samples.

BE THANK-FULL

FOR THIS CHEER-FULL, HELP-FULL, MONEY-SAVING MESSAGE

The careful housewife can economize on her groceries and still get the best and purest supplies. Our spotless grocery department contains only the very best and purest goods. You can buy all your groceries here for two-thirds of the amount you are now paying. Write now for Book No. 11—the grocery book.

Madam, this fashion book will interest you. Your copy is here waiting for you. All the new fall and winter styles are shown and the low prices quoted will surprise you. Send for this book before you buy your winter outfit. It is book No. 30.

Every man needs a good, serviceable winter suit and perhaps an overcoat. Our catalogue 33 is the book that you must see. Whether you prefer ready-made or made-to-your-measure clothing, we will please you and save you money.

Perhaps you are among the host of good people who are saying at this season, "Yes, we have a lot to be thankful for, but I would be mighty thankful if it didn't cost so much to live. Everything is so high I hardly see what we shall do, another year."

We have a message for every man and woman who is in this frame of mind. We can and will solve this problem for you if you will let us. We have solved it for over 2,000,000 delighted and satisfied customers.

Let us clothe you, feed you, furnish your home and, in fact, supply your every need during the next year. We will do this and save you from twenty to fifty per cent on everything you buy. On *next* Thanksgiving Day (and probably this Thanksgiving Day, if you hurry) as you carve the turkey and the luscious aroma of freshly baked pumpkin pies reaches you from a busy kitchen, you will wear that "smile that won't come off."

Your Hardest Problem Solved

Your old, troublesome problem of "high cost of living" is successfully solved, and a peep at your bank book will show you that all we say about saving you money is the truest message you ever read.

Start in right now to save. Pick out the books from the list below, that interest you. We want you to have them, absolutely free of any cost to you.

CHECK THE BOOKS THAT WILL HELP YOU SAVE

Let us show you, free of all cost, how you can save money on everything you buy to eat or wear or use in any way.

W. F. YOUNG, P.D.F., 106 Temple St., Springfield, Mass.

Horse and Mule Notes.

In one of the circulars issued by the horse and mule dealers at the St. Louis National Stock Yards in the month of October they quoted Southern horses and cotton mules $10 to $15 per head lower than they were in September. It was also stated that no improvement was expected unless there is an advance in the price of cotton.

Abandoned the Horse Auction.

Messrs. Walcott, Beers, Grant & Co. have held regular auction sales of horses at an establishment on St. Clair avenue, East St. Louis, in connection with the purchase and sale of mules. The firm has announced their decision to discontinue the horse department at East St. Louis and to enlarge their facilities for handling mules. Messrs. Walcott, Beers, Grant & Co. are not located inside the National Stock Yards, where domestic horses are sold at auction four days in the week to the number of three to five thousand—Monday and Tuesday by Holland, Nugent & Maxwell Bros., and Wednesday and Thursday by Campbell & Reid and Western Sale Stables Company.

Native Steers at St. Louis.

At the St. Louis National Stock Yards, October 31st, J. R. Weesen, of Moniteau county, Missouri, marketed fifteen head 1,637-pound steers which sold at $8.75 per 100 pounds. On the same day thirty-five head of native steers, 1,496 pounds average, sold at $8.00; twenty-two head 1,061-pound steers at $7.50; twenty-seven head 914-pound steers at $7.25; forty head 1,076-pound steers at $6.50; and forty head 1,341-pound steers at $6.25.

Average Windmill Service.

The Eclipse Windmill is the durable one and the average life is twenty-five years. Of all the wind engines that have ever been sold by the manufacturers of the Eclipse none has ever failed to give satisfactory service. The particular windmill approved for farms and ranges is described in Catalogue D H 692. Be particular and write for it to Fairbanks, Morse & Co., at Chicago, or St. Louis, or Kansas City, or Omaha, or St. Paul, or Denver, whichever city is nearest to you.

Shorthorn Cattle at Auction.

Whenever a Shorthorn cattle sale is held at the International Live Stock Exposition the offerings are always choice selections from fine herds. This year the Shorthorn cattle sale will be held on Thursday, December 7th. For catalogue please write at once to Mr. B. O. Cowan, Assistant Secretary, Union Stock Yards, Chicago, Ill.

St. Louis Mule Trade.

At the St. Louis National Stock Yards, Holland, Nugent & Maxwell Bros. issued a circular Novemer 1st, continuing as follows:

"The mule trade is about the same as it has been the past two weeks; plain, thin, common, cotton mules are selling bad, and good cotton mules are not selling as well as they did. Miners, sugar mules and big draft mules are selling fairly well. All other kinds are a drug on the market. Dealers don't seem to be able to get an outlet for common, plain mules. They don't like to fill their stables up with that class."

Oklahoma Cattle at St. Louis.

On October 1st, at the St. Louis National Stock Yards, J. J. Page, of Osage county, Oklahoma, marketed twenty-two head of 1,143-pound steers at $5.25 per 100 pounds; also sixty-nine steers averaging 1,008 pounds, at $4.90. James Keese, also from Oklahoma, marketed twenty-six head, weighing 907 pounds, at $4.85 per 100 pounds, and 138 head, averaging 927 pounds, at $4.80 per 100 pounds.

Winfield Scott, of Texas.

Winfield Scott, a Texas cattle raiser of standing and reputation, died suddenly at Fort Worth, Texas, in October. He was born in Kentucky in 1847, and arrived in Texas at the age of 21 and went to work on a farm in Tarrant county. After his arrival in Texas in 1868 he became a "free-grass" cattle raiser, a cattle driver, later on a cattle feeder and cattle breeder. Probaby his fortune began to expand in the year 1880, when he bought several thousand cattle in Western Texas. Although many cattle men who had been used to the open range failed to become reconciled to land ownership, or jumped in too soon, Winfield Scott appeared to be on hand to do the right thing at the right time. He died wealthy. In his later life, as he became in a position to do so, he became a public-spirited citizen, doing his part towards the development of the state and for the live stock center in which he was most interested.

Horses Lower in the East.

According to the New York Herald, horses in general have declined sharply in New York City. Said Mr. J. D. Carroll, General Manager of the Fiss, Doerr & Carroll Horse Company: "Prices of ordinary horses are off $25 a head this fall. This applies to everything except the very toppers. Yes, fresh country horses as well as second-hand ones, are affected. You can buy an A 1 delivery horse at from $175 to $240 that a year ago would have cost you from $200 to $275. Prices for plain wagon horses range from $100 up to $175, and you can buy a blemished or a thin one for $50 or $100. Contractors, truckmen, manufacturers, retailers and everybody else are complaining of dull times, and whenever they suffer the horse market is bound to reflect the stagnation in lower prices."

The Chicago International.

The International Live Stock Exposition at Chicago will be held this year December 2d to December 9th. The opening day is Saturday, 2d, and the closing day is Saturday, 9th. All farmers and stockmen are entitled to attend this show. It is the greatest educational pleasure that farmers and stockmen can obtain. There are always reduced rates on railroads, and it is worth the money the trip will cost to take a look through the stock that is on sale in the Chicago market. The Chicago International Live Stock Exposition furnishes the grand clearing-house contest between the winners of the state exhibits and the American Royal Show. Remember, December 2d to December 9th.

Circular on Swine.

The Agricultural Experiment Station at Urbana, Ill., has issued Circular No. 153, containing facts in swine feeding, with special reference to developing swine for breeding purposes. It is by Prof. Wm. Dietrich, Assistant Chief in Swine Husbandry. The ration table on page 4 is worth sending for.

Evans-Montague Commission Company

Fakers Exposed!

In keeping with its policy of service to the farmer, Farm Journal is distributing broadcast a book which exposes the worst class of swindlers that prey upon the farmer.

"Horse Secrets"

by Dr. A. S. Alexander, famous veterinarian, is a complete give-away of all the slick tricks the smoothest horse-trading swindlers are up to. Exposes the "widow dodge," the "ginger" and "bishoping" tricks. Tells the secret of "plugging a roarer," "shutting a heaver" and affords absolute protection to the farmer against all such roguery. Besides, it gives the most expert advice for feeding and conditioning of stock, together with the best remedies for diseases and vices of horses. We want every farmer to have this valuable book, because

Farm Journal

is the sworn enemy of all fakers, quacks and swindlers. They are strictly barred from exploiting their grafts through our columns, and we take every opportunity of exposing them. Therefore, we are making it easy for everyone to own this book by offering it, with a four years subscription to Farm Journal, the most helpful, practical, widest-read and best loved farm paper in the world,

Both For $1.00

The wisdom of this paper and the protection of this book will save and earn you many dollars. You never invested a dollar to better advantage.

Farm Journal, 257 N. Clifton St., Philadelphia

Fistula and Poll Evil

Fully ten thousand horses are cured every year with
Fleming's
Fistula and Poll Evil Cure
and many of them are bad old cases that skilled doctors have abandoned. Easy and simple; no experience needed; no cutting to be done; just a little attention every fifth day—and your money refunded if it ever fails. Cures most cases within thirty days, leaving the horse sound and smooth. Valuable information and full particulars given in
Fleming's Vest-Pocket Veterinary Adviser
Best veterinary book for farmers; 192 pages, 69 illustrations. Copy mailed free.

Wednesday and Thursday, Nov. 15th and 16th,

And the Range Horses will be sold after the sale of Domestic Horses on November 16th or 17th, according to circumstances. This "Last Chance Sale" will close the most successful season in the Western Range Horse trade. Buyers who wish to have splendid Horses to finish up for the domestic sale ring should be sure to attend this sale.

Please address

J. J. SEARCY, Sale Manager,

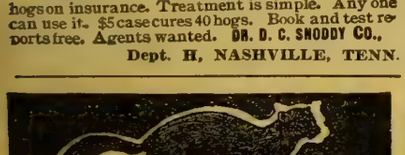
NATIONAL STOCK YARDS, ILL.

Hereford Cattle Sale.

Every year at the Chicago International Exposition there is an auction sale of Hereford cattle under the management of the Secretary of the Hereford Cattle Breeders' Association. This year the sale will be held on December 8th. Be sure to get a catalogue at once by writing to R. J. Kinzer, Secretary, Kansas City, Mo. The entries are sure to be good, and sometimes there are bargains.

SICK HOGS

Cured and disease prevented with Snoddy's Powder. Clears hogs of worms. Makes hogs thrifty. Will send man and treat sick hogs on insurance. Treatment is simple. Any one can use it. $5 case cures 40 hogs. Book and test reports free. Agents wanted. DR. D. C. SNODDY CO., Dept. H, NASHVILLE, TENN.



TRAPPERS GET BUSY BIG MONEY IN FURS

Over ten million dollars will be paid to trappers of fur bearing animals during the coming winter. Any man or boy living in the country can add a goodly sum to his earnings by trapping during spare moments. We furnish ABSOLUTELY FREE a complete Trapper's Guide which tells you the size of trap and kind of bait to use for the different animals, how to remove the skins and prepare them for market. We also furnish the best traps and baits at lowest prices. We receive more furs direct from trapping grounds than any other house in the world, therefore can pay the highest prices for them. Our price lists, shipping tags, etc., are also FREE for the asking. If you are a trapper or want to become one, write to us today. We will help you.

F. C. TAYLOR & CO.

GREATEST FUR HOUSE IN THE WORLD

315 Fur Exchange Building, St. Louis, Mo.

Sale of Fine Horses.

The catalogue of the offerings at the sale of fine horses at Milan, Tenn., to be held on November 16th and 17th, can be had by writing for it. Most of the horses to be sold are registered in the American Saddle Horse Register and were bred by the best breeders of Kentucky. There will be sold at auction a number of stallions, mares, fillies and fine business horses and by reliable people who have been improvers of horse stock for many years. Address Barham Son & Butler, Milan, Tenn., for catalogue, and remember that Milan is in Gibson county, at the junction of the Illinois Central and Louisville and Nashville Railways.

Keep Brood Mares Working.

Breeders in France, says a correspondent of the Breeders' Gazette, not only make their mares perform all the work of the farm under the most trying conditions, but compel them to keep it up to foaling time. When the mare is nearing her time she is treated more gently, but there is no letting up in the work. This, in the opinion of this correspondent, is the chief reason why colts imported into the United States from Europe are larger than the home product. They possess that vigor and growthy quality which come from the fact that while in the foetal state they were nurtured by a strong circulatory system consequent to the rational regime to which the dam was subjected.

The Eastern Horse Trade.

Mr. T. H. Holland, of the firm of Holland, Nugent & Maxwell Bros., has just completed his third year at the St. Louis National Stock Yards. He has full charge of the horse auctions on Monday and Tuesday of each week. Mr. Holland came here from Kansas City and immediately took front rank in the horse market. Being interviewed in regard to the St. Louis horse market, he said: "I am more than satisfied with the market here, notwithstanding recent considerable decline in the price of all grades of horses. This is the best market on the continent, and the principal increase in business since I came here has been in the Eastern trade. This market is shipping more horses eastward every year, and the most gratifying feature of the business is that we send them horses that will sell again. If we are properly advised in regard to the class of horses that will suit a dealer's trade this market can furnish the goods. Just now is a fine time for Eastern buyers to open an acquaintance with the St. Louis market." Mr. T. H. Holland can be addressed care Holland, Nugent & Maxwell Bros., National Stock Yards, Ill.

Champion Draft Horses.

Mr. J. H. Truman shipped the eighth importation of draft stallions and mares for the year 1911 from London on October 23d. This shipment included several Shire stallions and mares that were bought expressly for exhibition at the International Show and also a few of the best Belgian stallions procured in Belgium. In addition to 100 imported stallions and mares exhibited by Trumans at the Bushnell Horse Show, it makes the largest and best supply of stallions and mares ever seen in this country, with Shires in the majority. For catalogues please mention this paper and address Trumans' Pioneer Stud Farm, Bushnell, Ill.

In a recent communication Messrs. Truman write as follows: "Surely we have again earned the title that we have held for the past thirty years of Champion Stud, as we have accomplished what no firm in America has ever done before, and that is, that we have won champion on both stallions and mares, with one exception, and that mare was imported by us, at the Iowa, Minnesota, Wisconsin, New York and Illinois State Fairs, and we have these champion horses on hand and they are all for sale, as we expect to exhibit practically a different lot of horses at the International Show. We have also been very successful at some of the leading Fairs with our Percherons and feel sure that we can show one of the most select lot of imported stallions from two to four years old to be found in the United States."

Last Chance For Range Horses.

The sales of Western range horses and mules by Campbell & Reid and Western Sales Stables Company at the St. Louis National Stock Yards are nearly over for the season of 1911. The last sale is scheduled for November 16th or 17th. This firm sell domestic horses at auction in the "bull ring" at the National Stock Yards on Wednesday, the 15th, and Thursday, the 16th, and if the sale of domestic horses occupies the two full days, the range horses will be sold on Friday, the 17th. In any event, the range sale will be held on Thursday, 16th, or Friday, 17th. There will be a fine lot of horses. They have already several hundred engaged for the sale with the probability of greatly increasing the number before the sale date arrives. Mr. J. J. Searcy is Sale Manager, and his post-office address is National Stock Yards, Ill.

A First-class Commission House.

In consigning live stock for sale at the St. Louis National Stock Yards, remember the Evans-Montague Live Stock Commission Company. It is a successful firm, highly competent and persevering in the interest of their customers. The Evans-Montague Commission Company solicit consignments of cattle, hogs and sheep for sale on the market, and desire stockmen to take notice that the company has special buyers who select and buy stock and feeding cattle for their customers. S. T. (Tom) Boothe, who has been on the market for fifteen years, is native cattle salesman. Colonel James H. Campbell is with this house as Vice-President, in charge of the Southern cattle department. His presence adds strength to the organization. The firm is equally well equipped to sell hogs and sheep. Stockmen requiring market information should address Evans-Montague Commission Company, Box 68, National Stock Yards, Ill.

St. Louis Prices For Hogs.

At St. Louis, October 31st, the best hogs, averaging 243 and 264 pounds, were sold at $6.50 per 100 pounds. In addition to the top loads, coarse to choice heavy hogs sold at $5.75 to $6.45 per 100 pounds. Mixed hogs sold largely at $6.00 to $6.35 per 100 pounds. Light-weight shippers, 100 to 150 pounds, sold at $5.20 to $6.00, and lots of little pigs at $5.00 per 100 pounds.

Gasoline Going Up!

Automobile owners are burning up so much gasoline that the world's supply is running short. Gasoline is 9c to 15c higher than coal oil. Still going up. Two pints of coal oil do work of three pints gasoline. No waste, no evaporation, no explosion from coal oil.

Amazing "DETROIT"

The "DETROIT" is the only engine that handles coal oil successfully; uses alcohol, gasoline and benzine, too. Starts without cranking. Basic patent—only three moving parts—no cams—no sprockets—no gears—no valves—the utmost in simplicity, power and strength. Mounted on skids. All sizes, 2 to 20 h. p., in stock ready to ship. Complete engine tested just before crating. Comes all ready to run. Pumps, saws, threshes, churns, separates milk, grinds feed, shells corn, runs home electric-lighting plant. Prices (stripped), $29.50 up. Sent any place on 15 days' Free Trial. Don't buy an engine till you investigate amazing, money-saving, power-saving "DETROIT." Thousands in use. Costs only postal to find out. If you are first in your neighborhood to write, we will allow you Special Extra-Low Introductory price. Write!

Detroit Engine Works 383 Bellevue Ave., Detroit, Mich.

Notes From the Poultry Yard.

Winter eggs are the most profitable. Some have tried to argue that summer eggs are the most profitable, because feed in summer costs much less than in winter. But this argument falls short when it is remembered that a hen must be fed winter and summer, whether she produces eggs or not. Therefore the earlier in the winter the hens can be induced to begin laying the larger will be the net yearly profit from the eggs.

The right kind of fall feeding helps the production of winter eggs. The feeding must be of a kind to prevent fat formation on the old hens and hasten the maturity of the last spring pullets. The time of beginning to produce eggs is a matter of maturity more than anything else. When a pullet has reached the point in her maturing process that is coincident with the development of the eggs within her she will begin to produce eggs and she cannot help doing so. The feeding of artificial stimulants, such as red pepper, cannot induce egg production if the required maturity has not been reached.

Little corn should be fed the fowls that are expected to do the laying, except in the coldest weather. Fowls being fitted for market may receive corn in large quantities, because the public is willing to pay for fat to throw away. To the eater it means tenderness of flesh and good flavor. But it will not serve the fowl that is getting ready for egg production. The writer has seen fowls so heavily fed with corn in the fall that they did not begin to lay till along into March.

As the fowls are thrown on dry feed, the matter of keeping off indigestion should be considered. Once a day soft feed should be given or the fowls should have access to green food, such as chopped cabbages, chopped carrots and the like. The fact is that most farmers do not supply their fowls with green stuff daily throughout the winter, and the next best thing is the soft food. This is easiest made by scalding ground grain at night and letting it cook in its own heat during the night. It will be cold enough in the morning and will be stiff enough for the fowls to eat it easily.

The great danger in the poultry house in the fall is the broken window that has not been repaired and that will permit wet drafts to blow on the fowls. Whether a dry cold draft will injure a fowl is a matter largely dependent on the temperature of the fowl, but a wet draft during a rainy night may begin troubles that it will be difficult to get rid of. It is the part of wisdom not to neglect the making of such repairs.

Damp poultry houses are always dangerous. Dampness is one of the conditions under which poultry cannot be successfully raised. Draining or filling in with coal ashes will help matters, but a naturally dry location is best.

Light is of great importance in the poultry house, especially in winter. It does not require much work to put in the necessary windows.

Missouri Fruit Exposition.

At Columbia, Mo., January 9-12, 1912, on the occasion of the Fifty-fourth Annual Meeting of the State Horticultural Society, there will be a great Fruit Show, at which about three hundred dollars will be offered in cash prizes. Premium lists are now being sent out by Secretary W. L. Howard, Columbia, Mo. Fruit should be selected and sent by express to the Board of Horticulture, care of A. J. Stillwell Cold Storage Co., Hannibal, Mo. It will be kept free of charge. Many persons prominent in the fruit business of the state will read papers and take part in the discussions. This is a good opportunity for beginners in fruit growing to acquire a lot of valuable information from experts.

Comfort Among Poultry.

It has been truly said that fine feathers do not make fine birds; but it is equally true that you cannot have really fine birds without the fine feathers. Show us the rough fowls and we at once suspect neglect, lack of cleanliness. And this means not only discomfort to the birds but lack of profit to their owner.

The expensive poultry house is unnecessary. It may even lack the warmth which we are accustomed to think necessary, and yet if it is dry and draughts can be avoided there will be a fair amount of profit. The muslin curtain is generally preferred to glass windows, as solving the problem of ventilation together with that of light. But do not think that any old piece of cloth will do, for light tends to rot cloth, and it will take a fair piece of muslin to last through the winter. Of course you do not want that so frail that the blustering winds will tear a hole in it on the very coldest night. To be compelled to repair at such a time costs more than good cloth in the first place.

Leaves have more value in the scratching shed than most people realize. If you save those raked from the yard instead of burning them there will be no blackened and bare spots on the lawn, telling the story of useless fires, and the hens will rustle among them, singing the lay which precedes the laying of the egg. The insect eggs they contain will be carefully hunted out by the fowls, and leaves do not gather moisture in the poultry houses like straw.

Oyster shell is so cheap that no one keeping poultry can afford to be without it in winter. The hens will leave corn every time for it, and it is a constituent which their systems demand. But do not think it a substitute for grit. They must also have gravel or some equivalent to thrive. And if we fail to cater to their physical necessities they will as surely fail to cater to ours.—Bessie L. Putnam.

Get Your Share of the Profits on Holiday Poultry

Millions of dollars are spent for poultry during the holidays. What will be your share depends on the condition of your fowls. Give Pratts Poultry Regulator to your turkeys, geese, ducks and chickens and you will have heavy fowls that bring top prices.

Pratts Poultry Regulator

aids digestion, thus enabling the fowls to get every bit of nourishment from their feed and to put on weight quickly. It also prevents and cures the common poultry ailments.

Satisfaction Guaranteed or Money Back

Our dealers will promptly refund purchase price if Pratts Poultry Regulator does not show you a handsome profit. Test it with all or part of your fowls, and remember that it is an unequalled egg producer also.

25 lb. pails $2.50; also in smaller packages and 100 lb. bags. If your dealer cannot supply you, write us.

Pratts Roup Cure *in 25c. and 50c. packages is a positive preventive and cure of this terrible disease.*

Our 1911 edition Poultry Book mailed free.

PRATT FOOD CO., - - Dept., 54, Philadelphia, Pa.

Pratts Animal Regulator *invigorates horses, cows, calves, hogs and sheep.*

The Bulgarian Exposition.

An International Exposition will be opened at Sofia, Bulgaria, next June and continue until the middle of September. It will embrace all products of industry, especially agriculture. Full particulars may be had on application to the Organization Committee of the International Exhibition, 1912, No. 5 Alexander Place, Sofia, Bulgaria, in Europe.

OF GREAT INTEREST TO HOG RAISERS.

A. J. Adams Drove Hogs Through Cholera-infected Hogs Without Ill Effect After Using Merry War Lye.

From Searchlight, Redding, Calif., September 1, 1911:

Editor Searchlight:—I read an article in your paper on August 30, 1911, relative to "Ravages of Hog Cholera Stayed," about the Government Experiment Station at Berkeley having, after years of study, finally found a hog-cholera serum that will prevent the spread of the farmers' dreaded disease, at an expenditure of $16,000.

Now, I wish to state to the public, and most especially to those who make hog raising a specialty, that it did not take many thousands of dollars for me to find a remedy that will prevent and cure the hog cholera. We have the Government Experiment Station skinned a mile, and it only takes 10 cents to accomplish the purpose. "Merry War Lye" will positively prevent and cure the worst case of hog cholera and we have good proof to that effect.

A. J. Adams, the hog raiser, drove a bunch of "Merry War Lye" hogs right through where the dead and dying hogs were laying thick along the road on his way up to Manton, and he has never lost a single hog, nor not even one has showed any signs of cholera. If you or anyone of your neighbors have any sick hogs, come to see us, and we will save every one of them for you.

D. B. NATHAN, of the Nathan Hay and Grain Co., Redding, Calif.

Merry War Powdered Lye is for sale by all dealers, everywhere, at 10 cents per can, and should be mixed one tablespoonful with slop for ten hogs, or one-half can with barrel of swill or barrel of drinking water. Stir well; feed night and morning.

The Farm Work Joke.

A farm hand had worked in the field from dawn till darkness, doing the chores by lantern light. "I'm going to quit," he said to the farmer at the end of the month. "You promised me a steady job."

"Well, haven't you got one?" was the astonished reply.

"No," said the man, "there are three or four hours every night that I don't have anything to do and fool my time away sleeping."—Success Magazine.

Poultry and Farm Paper Club.

Two first-class papers can be had for the price of one. **The National Farmer and Stock Grower** is one, and the **American Poultry Journal** is the other. There are other excellent poultry papers, but the one we take home to read and one the family is determined to read is the **American Poultry Journal.** We have made arrangements whereby we can send **The National Farmer and Stock Grower** and the **American Poultry Journal,** both papers, one year, for fifty cents. This is a bargain that is good now, but this advertisement may not appear again. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Favorite Corn Husker.

Clark's Corn King with its new self-shedding hook. The spear point enters the husks easily. The slant bend turns the husks for shredding, and the rounded, curved and beveled edges throw out the husks and prevent clogging. As this is the most approved husker on the market, we have selected it as a seasonable subscription premium. The hook sets at any angle; two positions for a thumb hook and five positions as a palm hook. Opening and closing the small end of the plate makes the adjustment perfect for any width of hand and prevents chafing. The

strap passes through the leather tongue and the first ring and over the hand to the opposite ring and back through the first ring. Be sure and have the strap enter the ring from the outer side. It brings the pulling strap underneath, forms the sinch draw and gives you the full benefit of the sinch-lock, which is the same as a half-hitch. The strap then passes to the last ring and then to the buckle; the half-hitch forms one fastening and the buckle holds the end of the strap. We will send The National Farmer and Stock Grower for one year and Clark's Corn King Husker for 50 cents. The Husker is a free premium. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

WEATHER FORECASTS

For the Month of December, 1911, by the Famous Prognosticator, Prof. W. Wadsworth Marsh.

[Copyright, 1911, by W. W. Marsh.]

We publish the weather predictions by Prof. Marsh one month in advance. This is the November edition of The National Farmer and Stock Grower, and the following are the predictions for the month of December. The success of Prof. Marsh is phenomenal.

December, 1911.

This month will be quite tempestuous, quite heavy rains, sleet and snow storms, alternating, delaying traffic in all sections of the country.

December 1st and 2d.

General unsettled weather covering the greater portion of the country. Storm, cold wave and snow over Montana, Dakotas, Wyoming, Colorado, Northern Arizona, Utah, Idaho and New Mexico and covering the entire lake region, Upper Mississippi and Missouri Valleys, the West, Northwest, Southwest, Eastern and New England States, and along the North Atlantic coast and cities of the East, rain turning to snow.

Rain to frost over the South, and snow along the Rocky Mountain slope.

Cold, snowy weather covering the Ohio Valley, Ohio, Kentucky, Indiana, Tennessee, Pennsylvania and water sheds of the Ohio.

December 3d to 8th.

Between these dates storms will cross the country. Cold wave, high winds, rain, sleet and snow covering Central Valleys, delaying traffic, and in the Middle and Northern Districts, from the Missouri Valley eastward, covering the Ohio Valley, Tennessee, Ohio, Kentucky, Pennsylvania, Indiana, West Virginia, Alleghany region, Pittsburg, and water sheds of the Ohio, along the tributaries from the Alleghany Mountains to St. Louis, Mo., delaying traffic. High winds, damaging floating property, unless protected.

Storms, wind, sleet, rain and snow from Iowa and Nebraska southward to Texas. Rain and snow in Northern Texas and Northern Louisiana, and rain, sleet and snow, high gales from the Rocky Mountains to the Mississippi river, delaying traffic.

Storm, high winds, heavy rains overspreading the Gulf States and coasts, affecting the entire South. Damage done by wind and water in Mississippi, Georgia, Alabama, Texas, Louisiana, Arkansas, Virgina and Carolinas and coasts.

December 9th to 12th.

Between these dates there will be unsettled weather without much action.

December 13th to 17th.

Between these dates storm, rain, sleet and snow, followed by colder weather, throughout the entire country, quite severe from the Mississippi river eastward, covering the Ohio Valley and Tennessee, Ohio, Pennsylvania, Kentucky, West Virginia, water sheds of the Ohio, Western Pennsylvania and Ohio river tributaries.

Storm, heavy rain in the South, covering the Gulf States, coasts and cities of the South, followed by colder weather and frost. This storm will be severe, overspreading the Carolinas and Virginias and coasts.

Storm, rain, sleet and snow, followed by cold wave, covering the Upper Mississippi and Missouri Valleys, covering Kansas, Missouri, Iowa and Nebraska, also Oklahoma and Texas.

December 18th and 19th.

Generally fair weather in most sections.

December 20th to 24th.

During this period there will be storms, changeable temperatures, rain to snow, followed by cold wave, high winds, covering the Ohio Valley, Tennessee, Ohio, Indiana, Kentucky, West Virginia; also storm, high winds, heavy rains on the Gulf of Mexico, and from Tennessee to the Gulf, covering Gulf States, affecting Mississippi, Texas, Arkansas, Florida, Louisiana, Alabama and entire Gulf coast, followed by colder weather.

Storm, rain and wind changing to blizzard, cold wave and heavy snow, forming blizzard, over North and Central Texas and plains country in the Pan Handle of Texas, rain and snowfall quite heavy at Fort Worth, the cold wave causing low temperatures over the state of Texas as far south as San Antonio. Protect stock.

Rain, snow, cold wave forming a blizzard over the Upper Pan Handle and Southern Oklahoma.

December 25th and 26th.

Generally quiet, fair weather in the interior of the United States.

December 27th to 31st.

Between these dates cold wave, rain, sleet to snow storm forming blizzard, crossing the country. Blizard, cold wave, sleet and snow storm, quite severe, delaying traffic, covering the Upper Mississippi and Missouri Valleys, the Southwest, Kansas, Missouri, Iowa and Nebraska, storm extending into Oklahoma, the traffic delayed in all these states and cities, wire service badly crippled.

Storm over the South covering the Gulf States and coasts, Texas, Mississippi, Alabama, Louisiana, Georgia, Carolinas, Virginias, their cities, followed by colder weather.

PROF. W. WADSWORTH MARSH.

I Will Prove To You That Merry War Lye Will Cure Your Sick Hogs

E. Myers, President, E. Myers Lye Company

You, and every other Hog Raiser, know that if hogs can only be kept on their feet and on their feed and free from worms and cholera, there'll be no cause to worry about your hog profits.

When I, personally, say to you, Mr. Hog Raiser, that MERRY WAR LYE is the greatest Hog Remedy, Conditioner and Fattener, the world has ever known, I know whereof I speak, because I have spent more than 20 years with MERRY WAR LYE, making untold tests before I ever offered it to progressive Hog Raisers, and proved it the most remarkable Hog Remedy the world has ever known.

Hundreds of Hog Raisers write telling how glad they are that I ever told them that MERRY WAR LYE was the very best remedy they could find to kill worms, hog cholera and put pigs in prime condition quickly for highest market prices.

Read What Adam Schultz, a Kansas Hog Raiser, Writes

This is but one out of the big daily mail and it's mighty interesting reading for up-to-date Hog Raisers.

"Before I began feeding MERRY WAR LYE my hogs did not eat as they should. Some of them would not eat at all, but after I had fed MERRY WAR LYE about 8 or 10 days, I could see a marked improvement in my drove and they now look sleek and thrifty. I consider MERRY WAR LYE the best remedy I have ever used—and the cheapest. I have spent a good deal of money at times but I never got the results from any of the so-called Hog Cholera and Worm Cure Remedies as I have from MERRY WAR LYE."

And that's the general testimony of Hog Raisers—and I just want to say to you that the very best way you can insure big, fat pork profits is to

Feed Merry War Lye Every Day

—and feed it just as regularly as you do their daily ration—you will find it a profit-earning investment, because it not only prevents hog losses from Cholera, Worms, etc., but it will turn your golden grain into more golden dollars and more quickly than anything else you know of and it costs so very little, 10c a can.

Heed My Warning

It's mighty important for your hog profits that you don't make any mistake about this matter—because some makers of ordinary commercial lye are trying to persuade dealers and hog raisers that their product is just as good as Merry War Lye as a hog remedy.

Don't you be led astray by such talk—no other lye maker knows the secret process that makes Merry War Lye safe to use in your hog feed—they never will find out the combination in Merry War Lye that keeps your porkers right on the road everyday to a profitable market.

Save Directions—Follow Them

Mix one tablespoonful Merry War Lye with slop for 10 hogs, or a half can with barrel of swill. Stir well and feed EVERYDAY, night and morning. If your hogs are on a dry feed ration, mix a half can Merry War Lye to each barrel drinking water.

At All Leading Dealers

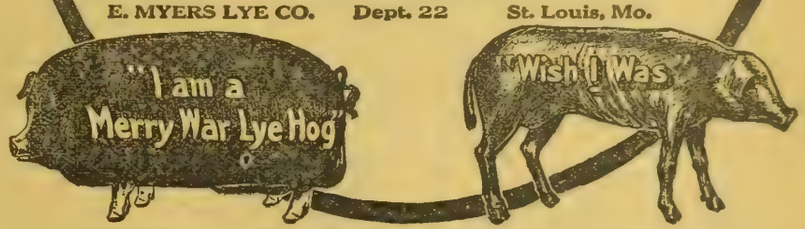
Most dealers handle Merry War Lye. If yours can't supply you, write us, stating your dealers' names, and we will see that you are supplied, and will also send you, free, a valuable booklet on, "HOW TO GET THE BIGGEST PROFITS FROM HOG RAISING."

Merry War Powdered Lye comes in 10c cans; full case of 4 dozen cans for $4.80, at Grocers', Druggists' and Feed Dealers'. There are no substitutes.

Kettle Powdered Lye For Soap Making

If you want the best lye, exclusively for Soap-Making, scouring, cleaning, disinfecting, etc., use my famous Kettle Powdered Lye—it makes the best soap you ever used—BUT DON'T FEED IT TO YOUR HOGS. FEED ONLY MERRY WAR LYE TO YOUR HOGS.

E. MYERS LYE CO. Dept. 22 St. Louis, Mo.



The Profitable Litter.

In our herd of brood sows is one that has averaged to raise more than ten pigs to a litter, twice a year for three years. Another sow has averaged only seven. Now it would seem apparent to most readers that the first of these sows is the most profitable, yet this cannot be said to represent the fact of final profit and loss. The first sow is of the semi-razorback type, that can always be picked out at sight as prolific and motherly stuff. When fattened out in the same lot, from first to last, everything the same, the pigs of the second sow far outstrip the pigs of the first, and make the gains that cause the feeder to wish that his whole drove were the same blood.

This is not at all because they had a better start, owing to being a smaller litter, but is due to different blood. Both sows are of the same breed, but the type is entirely different. It is a regrettable fact to the writer that our most ideal sows that produce the very best litters for profitable fattening are not the most prolific nor the most careful mothers. Unqualified credit must not be given to the sow that raises the largest litter; on the other hand, there is a limit to be set for small litters. With us, the sow that farrows or raises less than six soon gets her start toward the slaughter-house.—George F. Williams, in the Ohio Farmer.

Horses' Cloudy Eyes.

White specks, bluish rings, ulcers in your horse's eyes all point to one thing—the fact that his sight is impaired and rapidly failing. If your horse has any of these symptoms, or any signs whatever of imperfect sight, don't neglect him a day longer, for the ailment may quickly become too acute to be cured. Write at once to the Visio Remedy Association, 2472 Calumet Ave., Chicago, and ask them about Visio—the wonderful eye remedy that has cured so many cases of blindness. This remedy has a startling record of success, and has cured many horses pronounced incurably blind. It is guaranteed to cure over 90 per cent. of the many ailments that attack a horse's eyes, and if it fails, the purchase price is promptly refunded by the makers. They have a most interesting advertisement on page 16 that tells more of Visio.

Fasig-Tipton Company will hold the annual "Old Glory" auction of fine horses at Madison Square Garden, New York City, November 27th to December 2d.

LIVE STOCK BREEDERS' CARDS.

POLAND-CHINA HEADQUARTERS.

Ten big-bone, long-bodied ready-for-service Boars. You need one and the price is reasonable. Write.

KIRBY STOCK FARM, Marmaduke, Ark.

BLUE RIBBON HERD POLAND-CHINA HOGS.

Home of Royal Meddler, 50,111, and Hutchinson Sensation, 53,000, two of the greatest Boars in the Southwest. Hutchinson Sensation was grand champion at Missouri State Fair, 1909. Long Distance Phone, Main 1326.

Light and Heat on the Farm.

Some of our readers will be surprised to learn how simple a matter it is to have light and heat on the farm—light for the house and barn and heat for the cook stove. Our readers may also be surprised to learn that already 185,000 farms have been equipped with this light and heat and not one will ever think of giving it up again. We refer to acetylene light, which is generated from a gas-producing stone. It is a very interesting subject. Read about it on page 5.

Grass Seeds at St. Louis.

On October 31st, at St. Louis, Mo., quote (per 100 pounds): Prices were ruling comparatively high and firm. Timothy—Average run at from $14 to $15.50; high-grade worth up to $15.75, and inferior $10; clover at from $9.00 for weedy and poor up to $18 for clean—large purple pure grain at $20. Red Top sells on basis of $16 for fancy clean seed. Only a few small lots timothy and clover offered.

Death of George H. Morgan.

On October 31st, George H. Morgan, Secretary of the St. Louis Merchants' Exchange, ended his earthly labors and entered his rest. He was Secretary of the Merchants' Exchange forty-seven years. He was born in 1838, and as a man was never known to fail in the performance of his duty. The services which he rendered his fellow-man were too many to be recounted.

Pears by the Barrel.

In St. Louis, October 31st, 1911, pears were selling as follows: Illinois and Missouri Kiefer in barrels at $1.25 to $1.75 for sound (specked and inferior less); bulk at $1.00 to $1.25 per barrel measure, delivered; New York Kiefers, $2.00 to $2.25 per barrel, delivered; home-grown and nearby Kiefer at 25 to 35c. per half-bushel basket and 40 to 75c. per bushel box, as in quality; New York Bartletts at $1.50 to $1.75, and Duchess at $1.00 per bushel basket, delivered.

Golden Arrow Seed Catalogue.

The A. W. Schisler Grain Company, St. Louis, Mo., will send a catalogue of vegetable, flower, field and garden seeds to any of our readers who will write for it. It is called the Golden Arrow Seed Catalogue and is named after their Golden Arrow Seed Corn, after their very prolific yielder, and the cleanest and brightest yellow corn on the market. Quotations will be furnished on any and all seeds in season in any quantity. Address, A. W. Schisler Grain Company, 708 North Fourth street, St. Louis, Mo.

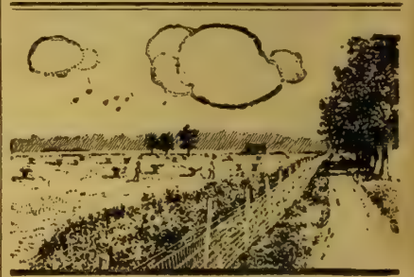
Cash Grain at St. Louis.

On October 31st, 1911, cash grain sold at St. Louis at the following range of prices:

Wheat—No. 2 red wheat, 98 to 99½c.; No. 3 red, 97 to 97½c.; No. 4 red, 95½c.; No. 2 hard, 99c. to $1.11½; No. 3 hard, 98c.; No. 4 hard, 95 to 98c.

Corn—No. 2 corn, 71½ to 72c.; No. 3 corn, 71c.; No. 2 yellow, 72c.; No. 3 yellow, 71c.; No. 2 white, 73 to 73½c.; No. 3 white, 72c.

Oats—No. 2 oats, 46 to 46½c.; No. 3 oats, 45½c.; No. 4 oats, 45c.; No. 2 white, 47¼ to 47½c.; standard, 47¼ to 47½c.; No. 3 white, 46½ to 47c.; No. 4 white, 46c.; No. 2 rye, 99c.



Rich, level land — $6 per acre!

G. W. Myers & Son, formerly of Litchfield, Ill., went down near Fordyce, Ark., and bought for $6 per acre land that *beat his $150 Illinois land.* They are raising fine crops of corn, milo, peanuts, potatoes, etc. Mr. Myers says that he likes this country because the *climate is better* and the land is *easier to work.*

Maybe you couldn't buy it quite that low now—land values have been going up in leaps lately—but, with your knowledge of farm values, you would be surprised at the *bargains* you can buy along the

Cotton Belt Route in Arkansas and Texas

Improved farms such as a man of small means couldn't touch in the older States can be had in that country for $2,000 to $3,000. A man can actually buy 160 acre farms at many points there for what he would have to *advance* for rent on some Illinois or Iowa farm.

There are many sections in Arkansas and Texas that are *just suited* for your line of farming—where you can buy *many* acres with the price of every *one* you now own—get the benefit of the *big* boost in land values sure to come—live in a mild climate where you can do money making work *every* month—without sacrificing *anything* in living conditions that you now have. Telephones, good schools, rural delivery, modern towns, close markets—you'll find them all through Arkansas and East Texas.

On the 1st and 3rd Tuesdays of each month there are very low round trip excursions to Arkansas and East Texas via Cotton Belt Route, allowing 25 days for trip and *free stop overs.* Plan to go on the *next* one.

Get our free books today!

(new)—they show examples of successes in Arkansas and Texas in your line of farming—by people from many states—some of them likely from your own State. Nothing will convince you like these statements from "home folks." Scores of illustrations. Write for free copies today.

COTTON BELT ROUTE

THE UNIVERSAL DESK.

This elegant desk is a splendid subscription premium for club raisers. It is Golden Oak. The height is 41 inches, width 26½ inches, and in the shipping crate the weight is 52 pounds. It is packed in sections but easily put together.

The interior has two pigeonholes and two compartments. The picture is an exact reproduction of the desk. Anyone who desires to do so can earn one of these desks by taking a few subscriptions for our own publications, the Universal Magazine and The National Farmer and Stock Grower. For particulars address **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Great Jack and Jennet Exhibit.

The following article is from the Daily Herald of Columbia, Tenn., and it relates to the jacks and jennets bred and owned by our advertiser, Mr. Thos. H. Ezell, whose breeder's card has been in this paper for five or six years. The Herald says:

"Probably the finest and certainly the largest exhibit of live stock by any individual at the Fair is being shown by Thomas H. Ezell, proprietor of the Mill Creek Stock Farm, Nashville, Tenn. Some of the stock would take first money at any show in the country. Mr. Ezell has twenty head with him, fourteen jacks and jennets and six horses. The latter are entered in all the show rings.

In the jennet line Mr. Ezell has two of the finest in the world. For one of them he has refused $1,000, and values the pair at $2,500. Competent judges say that they are the best pair that has ever been on the Fair Grounds. One of them, Tennessee's best, is four years old and 15½ hands high. She has been shown thirty-nine times at different Fairs all over the South, and of this number she has won thirty-four firsts, sweepstakes and championships. Her mate, Annie May, is a five-year-old and stands 15 hands 3 inches under the standard. She has been shown only six times, but has gotten the blue ribbons every time she has stepped in the ring. He has two other jennets with jack colts at their sides. One of the colts is pronounced to be unbeatable. He has a seventeen-months-old jack colt that his owner thinks is the best jack of his age in the world. He measures 35 inches from ear to ear, and is 15 hands high. He calls him "the Leading Star."

"In the horse line he has several good ones. Red Sigler, a five-year-old trotter with a trial of 2:23, is entered in all the show rings of his class. One of the prettiest things to be seen in his stable is a cob mare that he calls Miss Bill Smith. She has been shown for three years and has never been out of the money.

"But the animal that attracted most attention from the large crowd that visited the stable was a four-months-old mare mule colt that was pronounced by everyone who saw it the best ever seen in this county, the home of the mule and mule colts. It is a bay, and without speaking too strongly, we do not believe that an artist could give wing to his imagination and paint anything that would do it justice. Wednesday afternoon Mr. Ezell sold it to Laurice Moore, of Glendale, for the sum of $200, possession to be given to him of her on October 1. She is entered in several Fairs, and Mr. Ezell does not want to part with her until he has filled all of his engagements."

For Better Crops.

We have received a copy of a new booklet entitled "For Better Crops," issued by the International Harvester Company. This booklet comprises 160 pages, and it contains contributed articles by the best authorities in the United States on such important subjects as "increasing fertility," "small grain growing," "the corn crop," "alfalfa culture in America," "the wheat crop," etc. This booklet is issued for free distribution, but it cost more money to secure the articles than would buy a farm. Each of our readers should write to the International Harvester Co., Chicago, Ill., and ask for a copy.

Market For Potatoes.

On November 1st, the arrivals of potatoes at St. Louis were selling in car lots as follows: Choice Northern Ohios in bulk, 93 to 95c.; sacked, 95c. to $1.00, the latter price for extra fancy Red River stock; Wisconsin Rurals, 70 to 78c.; Michigan Rurals, 75 to 78c.; Burbanks, 75 to 80c.; bulk Minnesota, 65c. per bushel on track.

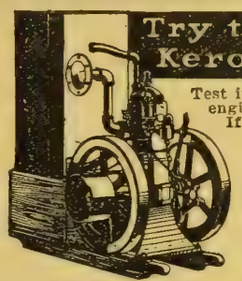
Cape Cod cranberries, early black, at $7.75 to $8.00 a barrel, is one of the recent market quotations at St. Louis.

SHERWIN-WILLIAMS PAINTS & VARNISHES

FOR THE FARM

Use Sherwin-Williams Roof and Bridge Paint for painting bridges, structural iron work, metal and tin roofs, barns, rough lumber, etc. It is durable, covers well and works freely under the brush. Sold by dealers everywhere. Ask for color cards.

Address all inquiries to The Sherwin-Williams Co., 689 Canal Road, N. W., Cleveland, Ohio



Try the Wonderful Columbia Kerosene Engine at our Risk

Test it out on your own place for fifteen days. Give it the hardest engine test you can think of. Compare it with any other engine. If the Columbia doesn't develop more power at less cost, send it back quick. No conditions. We are willing to let you be the judge and jury. Kerosene (common lamp oil) is by far the cheapest fuel today. The price of gasoline is climbing all the time, while kerosene remains the same, and in the right engine, it lasts longer and produces more power per gallon than gasoline. You get ALL the power when you use a Columbia, because it is the right engine. It is the one really simple and perfect kerosene engine. It never bucks when you need it most. It is always on the job.

Write for Particulars of Our Big Special Offer.

Size 2 to 16 H. P.

We are going to double our output for next year. We can do it easily. It is just a matter of getting engine users to test the Columbia for themselves. So we are making a great special money saving offer on Columbia Kerosene Engines. This offer is liable to be withdrawn at any time, so write today for full particulars, for it is a money saver you would hate to miss. **Free Book No. 84 full of engine facts you need to know, sent free.**

COLUMBIA ENGINE CO., 84 Fuller St., Detroit, Mich., U. S. A.

Sheep and Lamb Trade.

At St. Louis, opening day of November, on the St. Louis market, quite a number of strictly good native lambs sold at $6.00 per 100 pounds, which was the top of the market. Other good lambs went at $5.35 to $5.75; fair grades brought $4.75 to $5.25, and the culls $3.75 to $4.25. Mutton sheep sold at $3.35 to $3.50. On Thursday, the 2d inst., Clay, Robinson & Co. sold a car-load of seventy-two-pound Southwest lambs at $6.10. They were from Christian county, Missouri, and put another top on the market.

W. H. McMaster, of Clarksville,, Texas, is reported as having raised eight and one-half bales of cotton on four and two-fifths of an acre of ground. He obtained seven full bales. The cotton is of the Lone Star variety and the original seed was furnished by the goverment.

T. J. Coggin, of Merkel, Texas, recently purchased a 50,000-acre ranch in the state of Sonora, south of Douglas, and is now receiving 1,500 head of cattle to stock his range. D. Easterwood, of Oklahoma, and Jesse Scarborough, of Abilene, are closing a deal for a 50,000-acre ranch, also located in the state of Sonora.

In the census year the state of Mississippi raised only 4,670 bushels of wheat, but did produce 4,427,988 bushels of sweet potatoes.

We also agree to refund money and pay return postage to anyone who is not satisfied with the bargain. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Gowns of Suesine Silk.

The smartest evening gowns and dressy frocks for this fall and winter season are made of soft, clinging fabrics.

One of the most practical and beautiful materials for the development of gowns of this sort is Suesine Silk. Because of its light sheer texture, it lends itself gracefully to the charming draped effects now so much in vogue.

The home dresser can easily work Suesine Silk up into the most fascinating little frocks by using it in contrasting colors or combining it with chiffons, marquisettes or other veilings. The delicate colorings and beautiful lustre of Suesine Silk lends a richness and individuality which will make your gowns at once the envy and admiration of all your friends. And there is nothing pays better in matters of dress, after all, than a study of your own individual style. You can produce an admirably becoming gown of Suesine Silk in any of the up-to-date styles for very trifling cost. Ten to twelve yards at only 39 cents a yard produces a beautiful gown suitable for the most dressy occasions.

The economy of Suesine Silk is not alone in the low cost of the material, but in its durability as well.

No matter where you live, you can obtain samples of Suesine Silk free, forty-two shades, simply by writing to the manufacturers, Bedford Mills, 8-14 West 3d street, New York City, and mentioning this paper.

Save the Birds.

Recent legislation in New Jersey makes it unlawful to kill or have in the possession any except game birds, millinery goods being evidently uppermost in mind by the framers of the law.

One prominent naturalist has predicted that in ten years at the present rate of destruction this country will be birdless; and without the check of our feathered friends there would speedily replace them a reign of insects with which man could not cope successfully, despite the best insecticides. We positively need the birds for protection.

What do they do for us? Let us note the bill of fare of a few, remembering that there are many varieties in our midst, the very names of which we do not know unless we have given the subject special study; that many others would join them if we but give a bit of timely protection; and that some species have been hopelessly exterminated within a generation because of the cupidity of man.

Of the latter there is no more striking illustration than the fate of the passenger pigeon, the single living specimen now known to exist being in the Cincinnati Zoological Gardens. Large rewards are offered this year by a group of naturalists, including John Burroughs, for a single nesting pair with eggs or young, undisturbed, at any place within the limits of North America, with but little hope that even a stray pair may still be in existence.

Yet many of our older residents can recall the days when pigeon roosts covered vast acres, and large branches were broken from the trees by the mere weight of the birds. Yet, like the bison of the plains, they were slaughtered without mercy and the protecting hand probably lifted too late.

One scientist figured the value of each quail to the farmer at $5.00, but more recent computations have trebled this amount. Certain it is that as a destroyer of insects and weed seeds it does the farmer an inestimable amount of good. It is one of the few birds that eat the potato beetle, and as a destroyer of the moth which produces the cutworm it is certainly entitled to our protection.

The robin is an indefatigable worker from the time the first furrow is turned in spring unitl late autumn, and if it does demand a toll in cherries, has it not well earned them in providing for its youngsters, every one of which a specialist has found out requires sixty-eight worms a day while still in the nest? If you doubt this statement, watch for yourself the many daily visitations with the proverbial worm. And then, if not satisfied, recall the fact that most insects reproduce by the thousand!

Three-fourths of the diet of the bluebird is insects. The oriole, which builds its hanging nest in our orchards, feasts upon the six-footed which would devour our fruit. The swallows have a habit of catching insects when on the wing, and, when they have folded their wings for the night, the queer whip-poor-will, with its lonesome call, continues the work. The tabooed bee-bird or kingbird, condemned for its depredations about the hives, has been found to consume many noxious insects in addition to the few drones which it picks up about the hive.

No one can alone stay the elimination of our useful birds, but everyone can help both by protecting them on his own farm and in his own community. It is wonderful how rapidly certain species will increase locally when given a chance, and many of them return year after year to the same nesting spot.

A study of the habits of the birds in our own neighborhood is sure to prove interesting, beneficial. It can be done with little time or expense, the time being taken when at regular work, but with the eyes constantly alert; the expense, a good book on birds as a guide.—Bessie L. Putnam.

The Keystone Watch Cases.

We want to call special attention to the advertisements of The Keystone Watch Case Company which are now being published in this paper. These Crescent and Jas. Boss cases are the only gold-filled watch cases that are advertised to the men and women who buy them for their own personal use. It certainly does produce confidence in an article when the manufacturer comes right out over his own signature and prints the facts about his goods. See page 23.

Farm Boy's Own Room.

Too many times the boy's room is the last to be considered. Any corner that will hold a bed and a chair will answer, for "he isn't around the house much anyway, and what does he need of anything more?" may be one reason, perhaps, why he prefers the barn.

Sister's bright front chamber, with its new curtains, pretty carpet, and dainty furnishings, makes quite a contrast to the back bedroom fitted up with the lame-legged tables and decrepit chairs that have been retired from active labors, where Johnny spends his leisure.

This is manifestly unfair. Sister thinks she owns the parlor, too, and that ought to do for her. A boy usually feels that the only place in the house where he is free to do as he likes is his own room. Then let it be as bright and attractive and as much to his taste as possible.

A boy likes a large room. He may want to swing Indian clubs or even wrestle a little in a quiet way on a rainy day, and he wants plenty of space. "Flummadiddles," such as girls delight in, are in the way of such recreations and should be omitted.

But it is possible to have a tasty, cheery, homey room, without a surplus of ruffled cushions or such fancy trumpery.

A painted floor with a large rug is the ideal arrangement for any room. Any floor covering will do that is fresh, clean and not dark or dull colored.

The bed should be light and easily movable. A substantial iron bed, enameled to correspond with the rug or carpet, is best. As he is sure to abominate "shams" and fancy spreads, plain white slips and Marseilles covers are to be preferred. His initial embroidered on the slips is sure to please him.

The dresser should be roomy, but not loaded with trinkets. He will like it best to make his tie and collar boxes himself, and then if mother or sister understands pyrography, they may be finished in a dainty way. The use of initials on such articles always suit him best.

He may also make his own book shelves to fit any convenient space. If he does not choose to fit them with glass doors a pretty curtain will do.

Indian arrow heads and similar relics should always find a place in a boy's room.

A three-cornered cabinet that will fit into a corner is easily made and may be finished like the shelves.

In one boy's room an unused window was turned into a case for guns and fishing rods. It was backed with thin boards and lined with dark red calico fastened with a border of brass tacks. Glass doors were used for closing and it made a very pretty appearance when filled with the shining implements of sport.

A good-sized writing desk or table, a covered shoe box, a closet with books and shelves and plenty of good books and magazines will finish a room that any boy might be proud of.

If there is no place for his tools, of which every boy needs a supply, a neat chest may be added for these.

With such a room for his very own, what boy will want to spend his evenings away from home? He will be more likely to ask his friends in to help him enjoy it.—Kansas City Journal.

The Letter and the Spirit.

"These people obey the letter, perhaps, but they don't obey the spirit of the law."

The speaker, Commissioner Rhinelander Waldo, of New York, was discussing certain troublesome and wily transgressors. He continued:

"And they don't even interpret the letter of the law correctly. They and their attorneys quibble like the young man in Pike county.

"A young man and his girl were strolling in a Pike county meadow last month when a bull dashed down upon them."

"'Stay here and protect my retreat,' cried the girl. 'You know, Reggie, you've often said you'd face death for my sake.'"

"But Reggie, who had already sprinted fifty yards, called back over his shoulder:

"'Do you call that bull dead?'"

PILES, FISTULA, BLEEDING, RECTAL, ULCER, Etc.

Cured without surgical operation. Cures guaranteed. All protruding stopped in one or two treatments. Do not continue to suffer when you can be cured without an operation. Consultation free. Call or write, inclosing 2c. stamp for 172-page Book on Rectal Diseases.

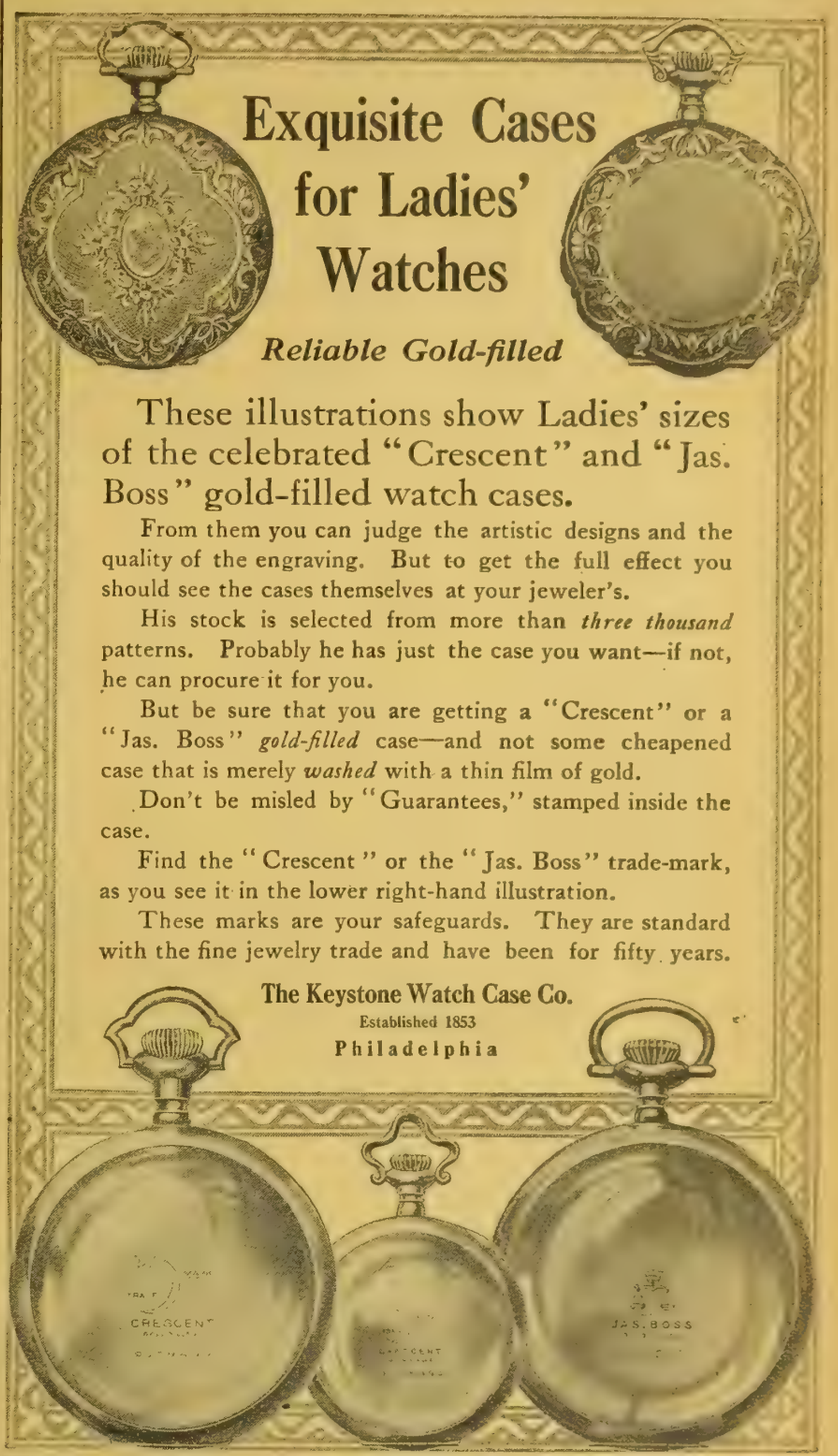
The Buffalo Days.

In an article upon the subject of the Santa Fe trail, written by Mr. Walter Williams, he mentions interesting stories relating to buffalo as follows:

"At Hutchinson, Kas., is the Bisonte Hotel, which takes its name from the Spanish word meaning buffalo. Where the hotel is built was formerly a pile of buffalo bones killed along the trail and collected there for shipment and sale. The Santa Fe trail ran through the very center of the buffalo's range. The figures given of the number of buffalo to be seen along the trail are so large as to stagger belief. These figures run up into the millions. In Kansas $2,500,000 was paid in thirteen years for buffalo bones at an average price of $8.00 a ton. It required the bones of 80 to 100 buffalo to weigh a ton. "I have walked miles on the carcasses of dead buffalo," said Capt. Smith H. Simpson, of Taos, N. M., "and never put my foot on the ground. I have seen ox-trains and even railroad trains compelled to wait for hours and sometimes days for great herds of buffalo to get off the trail. Buffalo were killed ruthlessly, slaughtered without cause. They were slain for their hides by the thousands. Buffalo wallows were to be seen all along the trail. Generally the buffalo went to their drinking places but once a day, and that late in the afternoon. Then they ambled along, following each other in single file, which accounts for the many trails on the plains always ending at some stream or lake. They frequently traveled twenty or thirty miles for water, so the trails leading to it were often worn to the depth of a foot or more. The huge animals would paw and lick the salty, alkaline earth, and when once the sod was broken the loose earth beneath drifted away under the constant action of the wind. Then, year after year, through more pawing and licking, rolling and wallowing by the animals, the wind carried more earth, and there was a hole in the prairie called a buffalo wallow."

An Enormous Herd.

"In May, 1871," said Robert M. Wright, pioneer merchant of Dodge City, Kas., "I drove in a buggy from old Fort Zarah to Fort Larned, on the Arkansas river. The distance is thirty-four miles. At least twenty-five miles of that distance was through an immense herd of buffalo. The whole country was one mass of buffalo, apparently, and it was only when actually among them that the seemingly solid body was seen to be an agglomeration of countless herds of from 50 to 200 animals, separated from the surrounding herds by a greater or less space, but still separated. Old plainsmen and the Indians aver that the buffalo never returned south, but that each year's herd was composed of animals which had never made the journey before and would never make it again. All admitted the northern migration, that being too pronounced for anyone to dispute, but they refused to admit one southern migration. Thousands of young calves were caught and killed every spring that were produced during this migration and accompanied the herd northward, but because the buffalo did not return south in one vast body, as they went north, it was stoutly maintained that they did not go south at all. The plainsmen could give no reasonable hypothesis of this 'no return theory' on which to base the origin of the vast herds which yearly made their march northward. The Indian was, however, equal to the occasion. Every plains Indian firmly believed that the buffalo were produced in countless numbers in a country under ground; that every spring the surplus swarmed, like bees from a hive, out of the immense cave-like opening in the region of the Staked Plains of Texas. In 1879, Stone Calf, a celebrated Indian chief, assured me that he knew exactly where the caves were, though he had never seen them; that the Great Spirit had provided this means for the constant supply of food for the Indian, and that, however recklessly the white man slaughtered the buffalo, they could never wholly exterminate them as long as there are here Indians to need them. Perhaps Stone Calf was right—for the Indians and the buffalo disappeared together from along the trail."



Exquisite Cases for Ladies' Watches
Reliable Gold-filled
These illustrations show Ladies' sizes of the celebrated "Crescent" and "Jas. Boss" gold-filled watch cases.
From them you can judge the artistic designs and the quality of the engraving. But to get the full effect you should see the cases themselves at your jeweler's.
His stock is selected from more than three thousand patterns. Probably he has just the case you want—if not, he can procure it for you.
But be sure that you are getting a "Crescent" or a "Jas. Boss" gold-filled case—and not some cheapened case that is merely washed with a thin film of gold.
Don't be misled by "Guarantees," stamped inside the case.
Find the "Crescent" or the "Jas. Boss" trade-mark, as you see it in the lower right-hand illustration.
These marks are your safeguards. They are standard with the fine jewelry trade and have been for fifty years.

All-the-year-round Products.

The question that is agitating the cotton grower is also disturbing the fruit grower to a greater extent. A glut in the market for apples has cost the producer several dollars a barrel, because he must sell a perishable product before it perishes or place the apples in cold storage at considerable expense.

"Just think," says the apple dealer, "how easy it would be if all I had to store was cotton!"

To spread farm products over twelve months of the year in market is the difficult problem. Apples were plentiful in October, 1910, notwithstanding the Missouri crop was a failure, there arriving 105,790 barrels at St. Louis alone; but in June of the same year not one barrel arrived. In the year 1910 only sixty barrels of apples arrived at St. Louis by boat, yet seven steamers in October, 1911, dumped 22,000 barrels on the levee at St. Louis in two days.

There are many men who know all about everything in their minds who are able to settle the apple marketing in a few words, but year after year the conditions remain the same. Where they fixed up to hold apples last year they have but few this year, and the shipments that are so abundant this year come from where they had no apples last year. Yet in the end the entire control of all perishable crops will be secured by cold storage at or near the farm. The consumption of apples at St. Louis is not over 150,000 barrels a year, and sometimes that number arrive in one month. To regulate apple distribution in the interest of the producer it must be done on the farms or in owners' hands in nearby towns, and the sure way to do it in the interest of the speculator is to consign them at harvest time to be sacrificed in the big cities. The only way to provide all-the-year-round markets is to furnish the products from the farm in regular quantities all the year round to fit the market.

Conservation of the Soil.

The United States Department of Agriculture has issued in pamphlet form the address of President Taft before the National Conservation Congress at Kansas City, Mo. It contains a large amount of scientific data taken from the best authorities and prepared for the occasion; it is therefore a lesson in agriculture which any farmer can study to advantage. It is too long for us to reproduce in this issue, but is a handy pamphlet to carry in the pocket to read at convenient moments. Write to the Hon. Secretary of Agriculture and ask for a copy of Circular No. 38, entitled "Conservation of the Soil."

The poultry selling combination in New York City is being charged with offenses against the Sherman Anti-Trust law. There are twenty-nine commission merchants involved in the suit.

MAY MANTON EMBROIDERY.

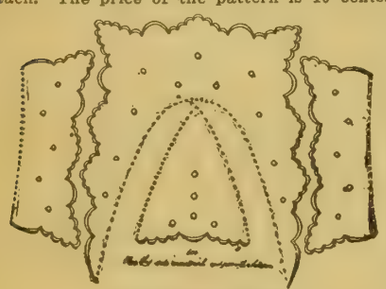
These paper patterns require only a hot iron to insure a perfect transfer on cloth. The way to do it is to lay the material to be stamped on a padded ironing board or table, place the pattern over it with the printed side down and press over the entire surface of the paper with a hot iron, when a perfect outline will result. Please order by embroidery number.

For Blouse or Waist.

No. 603.—A conventional design for embroidering a blouse or waist. Patterns for stamping front, sailor collar and sleeves are given. The work can be done in Bulgarian embroidery or outline; or the design can be couched. The price of the pattern is 10 cents.

Attractive Panel Design.

No. 606.—A design for braided panels. The panels are fifteen inches deep and ten inches wide at the lower edge. Two transfers are included in each pattern. Ten and one-half yards of braid will be required for each. The price of the pattern is 10 cents.



Embroidered Collar.

No. 604.—Design for an embroidered collar with cuffs and shield. This combination is elegant in appearance. The price of the pattern is 10 cents.

Embroidery For Child's Dresses.

No. 605.—Design for embroidering the yoke, collar and sleeves of a child's dress. The price of the pattern is 10 cents.

Please send all orders for these embroidery patterns to the **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Washing the Fannels.

It is a good plan to wash the flannels of the household in nice, clean suds prepared especially for them, and when they are washed by themselves it saves time on wash day, and no kind of undergarment can be kept nice and soft unless special care is given them.

Nice, soft flannels should never be trusted to the laundress unless you know she will launder them right, for when they are shrunk and discolored it is too late too save them. By doing the work intelligently it is not hard, and one is amply repaid for the small amount of labor expended by the soft, clean garmens.

Flannels will always shrink if they are washed and rinsed in water of different temperatures, and if they are not well stretched during the cleaning process. The temperatures of the waters in which they are washed and rinsed and of the place in which they are dried should be practically the same, and they should never be wrung or twisted, as this will cause the wool fibres to knot.

Stretch wool flannels thoroughly while wet and the fibres separate easily, then keep them well stretched until they are carefully pressed and they will keep soft as long as they last, retaining a new appearance and scarcely shrinking at all.

The woolen garments should be ironed on the wrong side over the fuzzy threads, which are so irritating to a tender skin.

Have ready a tub of warm, soft water and stir in enough dissolved borax soap chips to make a strong suds, then wash the woolen garments one by one, so they will not soak in the water, and the cleaning should be done by lifting up and down and pressing and squeezing between the hands. Rinse through water with a little of the dissolved soap chips added to make a light suds, then fold smoothly and put through a wringer, as this expels the water with the least possible friction, and dry in a warm room and pull them in shape several times while drying to keep them from shrinking.

There is nothing better than the Twenty-Mule-Team Soap Chips for washing the cotton and wool flannels, any color or quality, as they soften the water and a very light rubbing gets them clean and leaves them soft, and if the housekeeper wants the flannels of the household properly cared for she should have the work done under her direct supervision unless it is done with her own hands, and this is not a difficult task when one has learned how to do the work in the right way.—M. H.

Won the Bet.

It was a country tavern where a newly-arrived commercial traveler was holding forth.

"I'll bet anyone five dollars," he said, "that I've got the hardest name of any one in this room."

"An old farmer in the background shifted his feet to a warmer part of the fender.

"Ye will, will ye?" he drawled, "Well, I'll take ye on. I'll bet ye ten again your five that my name'll beat yours."

"Done," cried the commercial. "I've got the hardest name in the country. It is Stone."

The old man took a pull at his beer. "Mine," he said, "is Harder."—Ideas.

What the Cook Was Doing.

While a certain Richmond family were in Europe the dusky housemaid acted as caretaker, and more than once she received in the dining room an admirer in the person of one Henry Morgan, cab driver.

One evening, as the maid and the Jehu were making merry, there came from the kitchen a painful scratching sound.

"What's dat noise in de kitchen?" demanded the maid's admirer. "Must be a dawg tryin' to git in."

"Don't yo' worry," answered the maid; "dat ain't no dawg a-scratchin' at de do'. Dat's de cook a-writin' a love letter to her honeysuckle."—Lippincott's.

Too Fat, Refused to Work After 2 P.M.

Here is an interesting case. This good woman had become so fat that she was utterly exhausted after the midday meal. Her temper became so irritable that she finally refused to do any work after two o'clock in the day, feeling that she was rapidly becoming an invalid. If she climbed up stairs or had other slight exertion, it became almost impossible to get her breath. The doctor told her that she could do nothing unless she reduced her weight by some system of strenuous exercises and semi-starvation, but this she could not do, as she was already very weak.

Finally, a friend told her that she could obtain wonderful benefit by a simple home treatment. She was advised to write to Dr. H. C. Bradford, 287 D, Bradford Building, 20 E. 22d street, New York City, to obtain a very interesting, helpful book and a proof treatment, which the able physician sends completely free, postpaid, to all over-stout men and women who write and ask him for them. The woman in this hypothetical case did so and has lost 89 pounds speedily and easily. She walks sprightly now, feels as well and lively as a young girl and enjoys every moment of the day. If this should reach the eyes of any person who is over-stout, let him or her write to Dr. Bradford at above address and obtain, without cost, something which may do worlds of good.

What's Time to a Hog.

A Northerner riding through the West Virginia mountains came up with a mountaineer leisurely driving a herd of pigs.

"Where are you driving the pigs to?" asked the rider.

"Out to pasture 'em a bit."

"What for?"

"To fatten 'em."

"Isn't it pretty slow work to fatten them on grass? Up to where I come from we pen them up and feed them on corn. It saves a lot of time."

"Yaas, I s'ose so," drawled the mountaineer. "But, h—, what's time to a hawg?"

"It's a grand thing to find joy in one's work; if you have found that, you have found the heart of life."—James Buchanan

A GENUINE VICTOR-VICTROLA FOR $15.

GREATEST TALKING MACHINE ON EARTH.

425 Liberty Street, KANSAS CITY, MO.

Heating Two by One.

There is no more important problem confronting the home-keeper to-day than that of home heating. The time is past when the farmer could go out into the wood-lot beyond the pasture and cut all the firewood he could burn during the cold winter weather. And no longer is it considered a necessity of rural life to shiver and freeze through the long winter months, having only the kitchen stove and the open hearth for warmth.

THE HOOSIER HEATER.

The picture presented herewith represents the perfect Base-burner manufactured by the Hoosier Stove Company, showing how the heat is conveyed to the room above. Any of our readers who wish to be informed on the best method of heating farm homes should write for catalogue of the Hoosier Stove Company, 169 State street, Marion, Ind.

A 32-PIECE DINNER SET FREE.

Anyone who desires to obtain a splendid 32-Piece Dinner Set free of charge, but in return for obtaining a few subscriptions for a farm paper or magazine, can get full particulars by writing to EVANS SUBSCRIPTION AGENCY, 3552 Vista Ave., St. Louis, Mo.

Coffee Going Up.

Coffee is not produced on farms in the United States, and is admitted free of duty. Coffee was cheap, but since coffee is admitted free of duty it has become dear. The import price of raw coffee by the ship-load has advanced from 6½ cents a pound in December, 1908, to 13½ cents a pound in January, 1911, and since January it has advanced again. Free trade in coffee is fattening all except the consumer, who is paying higher prices than ever. But very likely the consumer voted for free trade and is the innocent cause of his own troubles.

For Lovers of Flowers.

Park's Floral Magazine is the oldest and best floral monthly in the world. Forty-first year. Illustrated. Bright as a Marigold and published at 25 cents a year.

The **Universal Magazine** is a bright, cheerful, illustrated monthly magazine of thirty-two pages, three columns to the page, containing home reading, stories, fashions, patterns and poetry—a splendid publication for the money; also published at 25 cents a year.

We have made arrangements whereby by clubbing these two papers together and adding twelve fine tulip bulbs we are enabled to make the combination for 30 cents. The tulips are imported from Holland; the bulbs are all blooming size, and if planted now or before the ground freezes will bloom in early spring. They are hardy and will remain in the ground, increasing in size from year to year. Send 30 cents and we will send both papers one year and the bulbs post free by mail. To Club Raisers:—Anyone sending us four subscriptions in accordance with this advertisement and $1.20 to pay for same will receive both papers one year and an extra dozen tulips for getting up the club. Address, **THE HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Horse Dealers' Secrets.

The Farm Journal of Philadelphia is a publication that has stood the test of time until it is the most widely-circulated agricultural journal in the United States. The Farm Journal has also caused to be published a book entitled "Horse Secrets," which is the work of Dr.

A. S. Alexander, of Wisconsin, who is famous as a veterinarian. On page 16 will be found the offering of the Farm Journal and Horse Secrets on advantageous terms to the subscriber.

Hampshire Swine Auction.

The American Hampshire Swine Association will hold a public sale at the Union Stock Yards, Chicago, on Thursday, December 7th, at 1 P. M. The catalogues are to be had right now by writing to Mr. E. C. Stone, Secretary, Peoria, Ill. The Hampshires have a white band around the middle like Dutch Belted cattle, and no man who breeds them is ever ashamed of them. In all practical tests and competitions where the best hogs come together the Hampshire is to be found contending for championship honors and often getting the award. Don't forget the catalogue.

This is the experience of N. P. Hansen, a native of Denmark, who went to Fresno County, California an emigrant.

One *lives* in California, life is so pleasant out there.

When you have made up your mind to sell your farm in the East and go to Southern California and buy a small piece of ground, so that you may live in luxury and enjoy life while working your farm, travel on the Los Angeles Limited over the

Annual Meeting of Stockmen.

The American-National Live Stock Association is called to meet at Denver, Colorado, on Tuesday and Wednesday, December 12th and 13th, 1911, at 10 o'clock A. M. Previously the annual session was held in January, but owing to the fact that Congress meets in December, it was decided to advance the meeting.

There are fourteen important subjects to come before the meeting, and the first one, which is "Import duties on live stock, meat products, wool and hides," is sufficient to occupy the whole session.

A copy of the call for the convention can be had of T. W. Tomlinson, Secretary, 909 Seventeenth street, Denver, Colorado.

WHY HE WENT TO COLLEGE.

"Why did you come to college anyway? You are not studying," said the professor.

"Well," said Willie, "I hardly know exactly myself. Mother says it is to fit me for the Presidency. Uncle Bill says to sow my wild oats. Sis says to get a chum for her to marry, and pa says to bankrupt the family."—National Monthly.

A DISCOURAGED AUTHOR.

"Why did you quit writing books on how to make a fortune raising chickens?"

"It didn't pay. So far as money is concerned, a man might almost as well raise chickens."—Washington Star.

The small steak at 15 cents at the cheap Chicago restaurants is now called "single sirloin" at 25 cents. This is going one better on the butcher who has raised the price without changing the name.

On October 1st, Fennewald Bros., of Audrain county, Missouri, marketed seventy-eight beef steers, 1,472 pounds average, at $8.50 per 100 pounds. This was at the St. Louis National Stock Yards.

Best Watch in the World.

One hundred and eighty of the leading railroads have adopted the Howard Watch as the standard of excellence. It is because the Howard Watch has no actual competitor. There is an interesting story about this watch which our patrons will take pleasure in reading. Just write a postal card to Dept. 122, Howard Watch Works, Boston, Mass., and ask for the story of The First American Watch. See page 7 and read about the best watch in the world.

International News Items.

Owing to the constantly-increasing number of entries in the car-lot division it was decided to divide the task of judging car-lot classes into two divisions, one judge to pass on the yearlings and another on the two and three-year-olds. These two judges will then jointly select the best load in their respective divisions and also award the grand champion prize. In case they should not find it possible to agree, a third one will be called in to act as referee.

Mr. Wm. Leavitt has this year been selected to pass on the yearlings and Mr. James Brown on the two and three-year-olds.

On account of the death of Richard Gibson, Robert Miller, of Stouffville, Ont., was selected to fill his unexpired term as a Director of the International Live Stock Exposition, and was also appointed Superintendent of the Sheep Department, with the power to select his own assistant.

The two Cattle Superintendents, Messrs. Clark and Forbes, were selected to constitute a "Sifting" Committee, whose duty it will be to pass on the single steers entered before the work of judging begins and to reject such animals as in their opinion may be unworthy of consideration.

I Cured My Rupture

I Will Show You How To Cure Yours FREE!

I was helpless and bed-ridden for years from a double rupture. No truss could hold. Doctors said I would die if not operated on. I fooled them all and cured myself by a simple discovery. I will send the cure free by mail if you write for it. It cured me and has since cured thousands. It will cure you.

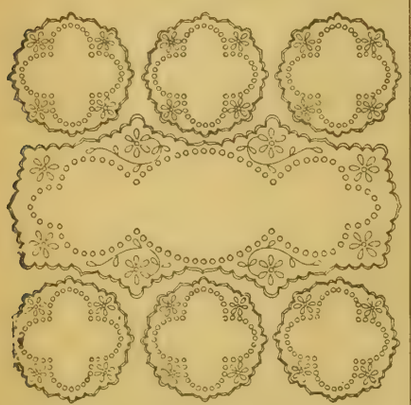
UNIVERSAL EMBROIDERY SET.

A Subscription Premium in Connection With the Universal Magazine.

The most beautiful of all trays and doilies are those which display a great deal of eyelet work; there is nothing more attractive on the dining room table than white linens embroidered in open work through which the polished wood may show.

The pretty Universal Embroidery Set illustrated below shows a dainty pattern that should be carried wholly in eyelets, both ovals and rounds. This set was made especially for us and consists of one large tray, size 8x17 inches; six doilies to match, size 5½x5½ inches, all stamped on fine white imported linen.

Send us thirty cents and we will send you this dainty set for a short time only, absolutely safe delivery guaranteed, and the Universal Magazine for one year. The Universal



Magazine is a nice, thirty-two-page, three-column magazine, issued monthly. It contains illustrated reading matter of interest to all the family. There are nice stories, historical sketches, selected poetry, a splendid line of patterns, and has a number of original household articles. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

To Club Raisers:—Anyone who will send in four subscriptions and $1.20 to pay for same will be credited with one-year's subscription to the Universal Magazine and one Embroidery Set.

Sherwin-Williams Paints.

On page 21 will be found the advertisement of Sherwin-Williams Paints and Varnishes. They issue a booklet entitled "Paints and Varnishes for the Farm." This booklet is a wonder; it gives instructions that you need in the business of painting implements, houses, vehicles, fences and outbuildings. In addition to helping you to use the right paints in an economical manner they will see that you are directed to the dealer who will furnish their guaranteed paints, and that is worth something, for country stores are full of trash in the disguise of paint that will not preserve the surface for thirty days after it is brushed on. The same firm furnish Paris green, arsenate of lead and lime-sulphur to kill insects in orchards, etc. Write for the paint book anyway, and address Sherwin-Williams Company, 690 Canal Road, N. W., Cleveland, Ohio.

The Profit in Bees.

According to a statement by the Statistician of the United States Reclamation Service, the average price of bees in the West is probably about $5.00 a hive. The manager of a large apiary on one of the irrigated tracts gives the average production of his hives as seventy-six pounds of surplus honey per annum. At 10 cents per pound the returns would be $7.60. In addition to that the increase averages 100 per cent. from year to year, doubling the original investment and making a total of about 150 per cent. profit each year on the original investment.

Christmas Preparations.

We once heard of a girl who said a big word when a letter came from a friend, stating that her name had been placed on the subscription list of a popular magazine as a Christmas present. On being questioned regarding her ungracious reception of the gift she replied: "Oh, just another dollar gone, for of course I shall have to get her something of equal value."

When the scheme of Christmas resolves itself into an affair of borrow and lend, a mere barter, it is high time to call a halt upon the whole practice. We hear the sound of reform in this matter. And certainly, when housewives are worked to the border of nervous prostration over Christmas preparations, reform is needed. But the great need is for the little things among those nearest which are lasting proof of loving thoughts. In the little home circle there will ever be a chance for remembrances which mean more than those of greater money value, just because they are proof of personal attention.

One dainty seamstress buys remnants of fine lawn and converts them into the daintiest of hem-stitched handkerchiefs, the hand work making them nice enough to carry on any occasion. The threads are pulled and the basting done with the utmost precision. Then when a few spare moments come or Milady wishes some light work for visiting, the hemming is done. And almost without missing the time she has a nice collection made. On the very nicest ones an initial is embroidered in one corner; and these she is not afraid to put beside the expensive store products. Besides, the recipient is sure to value the hand work of a friend.

The embroidery patterns in the papers which enter her home are all clipped out and saved for future use. The remnant of fine muslin with a graceful pattern transferred becomes a beautiful corset cover. A pair of fine pink lisle hose, picked up cheap at a bargain counter, with another of those transfer patterns, become more beautiful than the expensive ones in the store, and will make some girl friend happy, though representing comparatively little time or money.

Those handy with the crochet hook will find in the various forms of Irish crochet an abundance of material for dainty gifts. A small piece of fine cloth with a bit of this decoration is the delight of any woman of refinement. The fancy collar for the young girl has many forms, and there is unused material in almost every home from which to evolve one for school wear. Aprons come in so many forms that one can scarcely fail to get beautiful ones out of leftovers. And there are bags and bags, for many purposes, which will be acceptable gifts.

The farmer's wife is most afraid in serving her city friend that with scant means her gift may not be nice enough. If she could only realize how the little basket of fresh eggs or the can of fruit appeal, she would never worry again about what she would give. A roll of fresh butter will be welcomed if the work which lasts is not so convenient to give.

But do not slave yourself in making presents which do not carry with them the finer sentiments of the season. The round of gifts is in many instances burdensome. Cut out all but the nearest friends. The holiday season should cease to be one of mere drudgery. Give as you can afford and enter into the true Christian spirit. Take time in advance to evolve the neat remembrance for the real friend, and eliminate from your list names of those who will not appreciate these personal favors and for whom you have no special friendship.—Bessie L. Putnam.

SisterWoman!

READ MY FREE OFFER

My Mission is to make sick women well, and I want to send you, your daughter, your sister, your mother, or any ailing friend, a full 50-cent box of Balm of Figs Compound absolutely free. It is a remedy for the treatment of **woman's ailments**, and I want to tell you **all about it**—just how to use it yourself—right **at home** without any inconvenience—and the best of it is that it will not in the least interfere with your work or pleasure. Balm of Figs Compound is a remedy that has made sick women well and weak women strong, and I can prove it—**let me prove it to you**, and I will gladly do it, for I have never heard of anything that has, according to the abundance of testimonials at hand, so **quickly** and **surely** cured women's ailments. No internal dosing necessary—it is a local treatment, yet it has to its credit some of the most extraordinary cures on record. Therefore I want to place it in the hands of every woman suffering with **any form of female weakness or diseases so common to women.**

This 50c box of Balm of Figs Compound will not cost you one cent

I will send it to you absolutely free, to prove to you its splendid qualities, and then if you wish to continue further, it will cost you only a few cents a week. He Was Not Superstitious.

Scientists are not the only ones who occasionally lay the ghost of an ancient superstition.

Bill Hicks, an unlettered but garrulous authority on all subjects, was discussing with some old cronies in the postoffice of a North Missouri town the best time to plant potatoes. One old fellow maintained that Good Friday is the right time.

"Now, I tell you, boys," said Bill positively, "there ain't nothing to this Good Friday superstition. I used to think I couldn't raise potatoes unless I planted them on Good Friday. But I remember one year Good Friday came on Sunday, so I had to plant the next day; and I raised as fine potatoes as you ever saw."—Mack's Monthly.

The automobile is used considerably in the delivery of farm products to families in St. Louis, the farm products referred to being mostly butter and eggs.

The Army and Navy Needle Book.

A TEN-CENT PROPOSITION WORTH TEN TIMES AS MUCH. The Army and Navy Needle Book contains five packages of Peerless Steel Needles, warranted; sizes, 3 to 9, 5 to 10, 6 to 7. It can be done in a few days. For particulars address, EVANS SUBSCRIPTION AGENCY, 3552 Vista Ave., St. Louis, Mo.

With the Nuts.

Once nut-gathering was considered only a nice amusement for children, and the results only for entertainment during the long winter evenings. We are fast learning that the food stored away to feed the forest tree in its beginning has also nutriment which is equally valuable to the human race, and that nuts are more than a source of enjoyment; they are nutritious and wholesome.

They admit of various combinations and uses, new forms being every day evolved, and the more they are used the more completely will we realize the possibilities in various directions. As a substantial part of the meal they serve well, while for desserts there are all sorts of appetizing and dainty foods using them as a basis.

As the sandwich is the foundation of the lunch, so are nuts a substantial filling for the sandwich. Hickory nuts ground with the finest food chopper attachment make a delicious butter, which, if too dry to spread easily, may be moistened with sweet cream; or, chopped with an equal amount of celery and used with French dressing, they make another substantial filling, a bit of salt being added in either case.

When baking bread, take out enough dough for one loaf, add a bit of lard, a teacupful of sugar and a teacupful of nuts ground fine. This is a cheap, nourishing addition to the school lunch. The little folks will enjoy preparing the nuts, and, this done, the extra work of making is almost nothing.

A teacupful of chopped nuts added to any plain cake renders it quite another dainty. The same added to frosting or cream filling is also an improvement. They are fine combined with fudge or other plain candies. And the nut habit is one which may be extended in many directions, gaining every time in the variety.—Bessie L. Putnam.

Ways With Vegetables.

A dainty way of canning tomatoes is to select those of small enough size that they will go into the can whole. Pour boiling water over and remove the skins in the usual way. Then place them in cold water enough to cover. Heat slowly until they reach the boiling point and then seal. It is said that they will keep as perfectly as though cooked in the old way,, and when one wants to serve a dainty salad, there are the whole tomatoes, almost as handsome as when picked.

Many do not care for the great pepper mangoes save as a can in which to store away cabbage, which will preserve its fresh taste much better for the protection. One woman whose taste for the pepper flavor exceeded the supply of this vegetable made her mangoes in the usual way, taking the stuffing out before serving it. Then when enough of the empty peppers had accumulated, she chopped them up fine and used as a flavoring for more cabbage pickle.

Baked hubbard squash has a rich flavor, quite beyond that possible when boiled. Cut the squash into halves, remove seeds and core and fill into the cavity of each piece a tablespoonful of sugar, a small piece of butter, salt and pepper to taste. Bake until so tender that it can be easily scooped out from the shell, basting frequently during the process with the butter and sugar. Treated in this way it is more mealy and closely resembles sweet potato.

Frosts usually catch some green tomatoes on the vines. These may be ripened in the house or worked up green. For a change, this way of cooking them is usually relished: Slice one small onion and three tomatoes into water enough to cook without scorching and boil until soft. Season with salt and pepper and add a tablespoonful of butter. Just before serving, put in one or two slices of bread and work it up fine. This method appeals to some who never touch ripe tomatoes in any form.—Bessie L. Putnam.

$1 Worth of Mayr's Wonderful Stomach Treatment FREE

It is a positive remedy for all Stomach, Liver and Intestinal Trouble, Gastritis, Indigestion, Dyspepsia, Pressure of Gas around the Heart, Sour Stomach, Distress After Eating, Nervousness, Dizziness, Fainting Spells, Constipation, Congested and Torpid Liver, Yellow Jaundice, Sick Headache and Gall Stones.

Rabbits in Market.

At St. Louis, towards the end of October, rabbits were selling at $1.35 per dozen. They are undesirable and little call for them as yet. The weather was not cold enough and the receipts were mainly of stock that hunters shot for sport.

Put a Rivet in Your Future

Go into business for yourself and insure your own success and comfort. Here are some fresh instances showing how to succeed on small investments. The facts given are substantiated by our agricultural commissioner, Mr. L. A. Markham, formerly with the United States Government as an expert on agriculture:

THE Oakland Fruit Company has 18 acres in Elberta peaches four miles east of Van Buren, Arkansas. Last year that 18 acres yielded 6,000 crates of peaches. Those peaches sold for $6,000. Mr. G. A. Howell, of Van Buren, Arkansas, had 3½ acres in cantaloupes last year. The yield was 472 crates. The 472 crates sold for $603.32. Then he followed the cantaloupes on 1½ acres with beans. The beans sold for $85. Total income from 3½ acres, $688.32.

Mr. J. G. Nordin, of Russellville, decided to plant 2 acres in Nancy Halls. Nancy Halls are a particularly luscious and succulent variety of sweet potatoes. He got 1140 bushels and sold them for $1 per bushel. That's his sworn statement. Now, what do you say? These instances are exceptional? Yes, they are, but surely you could do one-fourth as well. Then, how would you like to raise peaches at $83 per acre, cantaloupes at $50, and sweet potatoes at $142?

There are hundreds of just such opportunities for you in Eastern Colorado, Kansas, Arkansas and Louisiana on the

Missouri Pacific-Iron Mountain

Our Immigration Agent will help you find the right place and our Agricultural Commissioner will help you get right results. It's "your move" now. Send for our booklets and folders, "Eastern Colorado," "Western Kansas," "Arkansas Homebuilder" or "Louisiana Lands." They are free.

Dept. D,
1322 So. Wabash Ave. CHICAGO

The Great Majestic Range.

When it comes to a fine, lasting, superior range for a home in city, town or county, the Majestic Range is an example of practical range economy.

The Great and Grand Majestic is justly called "The Range with a Repuation," because it has a reputation of a reliable manufacturer behind it and because there are hundreds of thousands Majestic Ranges in use all over the country, each one of which is giving perfect satisfaction; some have been in constant use for more than twenty-five years and still give excellent results.

THE GREAT MAJESTIC.

Majestic Ranges are for sale in nearly every county in forty states. If our dealer doesn't handle them, you will do well to write the Majestic Manufacturing Company, Dept. 131, St. Louis, Missouri, for their interesting booklet, "The Story of Majestic Glory;" it is well worth reading. At the same time they will tell you where you can see and examine the Majestic and settle the range question.

Fall Work.

The approach of the fall hauling season suggests once more the advantages of the low, handy wagon. Thousands of farmers say it is emphatically the best in every way for all farm work. It is so much easier, for instance, to lift shocks of corn onto a low wagon than onto a high one. And why shouldn't the hauling be done the easy way?

Make this wagon matter a personal one this fall. The low-down Electric Handy Wagon, shown above, is the kind of wagon thousands of farmers are buying.

Figure how much labor it will save you. How much lighter it will make the work of the horses. How admirably it is hauling stones, earth, water, manure, fencing material, lumber, hogs to market, etc. Is there really any work for which such a wagon is not better suited than the high-wheeled wagon?

Take the matter up now with the Electric Wheel Company. If you don't care to purchase a wagon, they will supply you with low steel wheels to fit your old wagon and turn it into a handy wagon. Posting up on the matter will do no harm, at any rate. Lay the matter before them and get their free catalogue and particulars. Address, Electric Wheel Company, Box 40, Quincy, Ill.

Trapping as a Side Line.

Every year about this time we begin to understand that hunting and trapping is a good side line to farming. The dealers in furs begin to advertise in order to reach the source of supply.

Furs are not shipped to market in car-load lots very often or in regular standard packages, therefore the numbers and weight of furs received are not given in all Board of Trade reports. St. Louis is estimated to handle $8,000,000 to $10,000,000 worth of furs each year.

The Missouri Labor Commissioner will soon issue a bulletin on furs.

From advance sheets of this bulletin, which will appear in full in the 1911 Red Book, it is found that the professional trappers, as well as the small boy who works at this business on Saturdays to earn his spending money, had an unusually prosperous year in 1910.

There was trapped and taken to market in Missouri, in the year mentioned, 532,787 pounds of furs, valued at about $133,196, an increase over 1909 of something like 12,000 pounds.

Is No Mean Crop.

While this aggregate valuation is not large, as compared with many of Missouri's other immense productions, yet it nearly equals the combined value of the surplus shipments of barley, millet, cane seed and alfalfa, for the state for the year in question.

There are many trappers in the state who make this a business, yet it is estimated that the greater part of the vast production comes from men and boys who work this as a side line for a few weeks during the winter months.

In the production of furs McDonald county comes first, with a yield of 20,566 pounds. Then follows Saline, with 19,759; Pettis, with 17,206; Randolph, with 12,917; Cass, with 11,857; the smallest yield from any county being about 1,000 pounds.

Food Figures in, Too.

Missouri's fur-bearing animals consist, for the most part, of the mink, raccoon, skunk, o'possum, muskrat, fox, wolf, wild cat, civet and otter, although the mink, raccoon, skunk and o'possum produced most of the late catch, with the lowly o'possum far in the lead, so far as total number of pounds are concerned, while the tender, succulent meat of this animal, properly cooked, and flanked by the appetizing home-grown sweet potato, made many a savory meal for the hungry Missourians.

In the foregoing list, the fur of the mink brought the highest price, ranging from $6.00 for the large, dark kind, to $1.00 for the small, inferior skin. In point of value, the raccoon skin comes next, bringing from $2.00 for the large, extra heavy, down to a few cents for the ordinary kind. A prime, black skunk skin was worth about $1.75, while a large o'possum skin brought the owner in the neighborhood of 40 cents.

From present indications it is predicted that 1911 will far surpass any previous year in point of production and value of Missouri furs.

Agricultural School Premiums.

A unique plan which has aroused much interest and enthusiasm among the pupils of high schools in the state of Washington is the opportunity to win a silver trophy cup for their school. This cup was presented by the Great Northern Railway and is entitled: "To Be Presented to the High School Proving the Best Judge of Live Stock." This cup was won this year by the young live stock experts attending the Snohomish High School, and it was won at the Puyallup Valley Fair. This cup must be won three times before it becomes the property of the school.

Generally the only valuable trophies which have been retained by schools are banners and cups won in athletic or oratorical contests. The Great Northern cup is even more practical and valuable for self-evident reasons. The farm is the basis of all wealth. The agricultural and stock-raising opportunities are so many in the Evergreen State that the spreading of such practical knowledge among the high schools will have great and permanent value.

Old Tantalizer, the Squirrel.

Old Deacon Dockery, of Uplands, Nev., is letting out his wood lot to squirrel hunters again this fall, and is doing a pretty good business with city people.

The Deacon stocks his lot with squirrels in the spring and trains them just to show their noses and then to keep on the side of the tree away from the hunter.

If two hunters work together the squirrels crawl into holes and stay there.

The Deacon has one squirrel named Old Tantalizer that has been working for him five years and hasn't been shot yet.

Rambouillet Sheep Auction.

Mr. Dwight Lincoln, of Milford Ohio, advises us that he will take pleasure in sending a catalogue of the offerings at the auction of Rambouillet sheep to be held at the International Live Stock Exposition at Chicago, on December 5th. It is not often that such magnificent specimens of the breed are offered at public auction, but the breeders like to make a good showing at the International. If you are interested in the large Merinos that constitute two-thirds of the sheep in the range country, do not fail to write for the catalogue and attend the sale.

Clay, Robinson & Co.'s Prizes.

For the encouragement of live stock breeding, Clay, Robinson & Co., live stock commission agents, offer prizes amounting to one thousand dollars each year at the Chicago International Live Stock Exposition. The prizes are enumerated in the preliminary classification on page 137.

August Uihlein, of Milwaukee, Wis., died on October 10th on the island Heligoland, in the North Sea, which is owned by Germany. He had been visiting his relatives. He was owner of the world's champion trotting stallion, The Harvester, 2:01.

FREE TO YOU—MY SISTER

Free to You and Every Sister Suffering from Woman's Ailments.

I am a woman.
I know woman's sufferings.
I have found the cure.

I will mail, free of any charge, my home treatment with full instructions to any sufferer from woman's ailments. I want to tell all women about this cure—you, my reader, for yourself, your daughter, your mother, or your sister. I want to tell you how to cure yourselves at home without the help of a doctor. Men cannot understand women's sufferings. What we women know from experience, we know better than any doctor. I know that my home treatment is safe and sure cure for Leucorrhoea or Whitish discharges, Ulceration, Displacement or Falling of the Womb, Profuse, Scanty or Painful Periods, Uterine or Ovarian Tumors, or Growths; also pains in head, back and bowels, bearing down feelings, nervousness, creeping feeling up the spine, melancholy, desire to cry, hot flashes, weariness, kidney, and bladder troubles where caused by weaknesses peculiar to our sex.

I want to send you a complete ten day's treatment entirely free to prove to you that you can cure yourself at home, easily, quickly and surely. Remember, that, it will cost you nothing to give the treatment a complete trial; and if you wish to continue, it will cost you only about 12 cents a week or less than two cents a day. It will not interfere with your work or occupation. Just send me your name and address, tell me how you suffer if you wish, and I will send you the treatment for your case, entirely free, in plain wrapper, by return mail. I will also send you free of cost, my book—"WOMAN'S OWN MEDICAL ADVISER" with explanatory illustrations showing why women suffer, and how they can easily cure themselves at home. Every woman should have it, and learn to think for herself. Then when the doctor says—"You must have an operation," you can decide for yourself. Thousands of women have cured themselves with my home remedy. It cures all old or young. To Mothers of Daughters, I will explain a simple home treatment which speedily and effectually cures Leucorrhoea, Green Sickness and Painful or Irregular Menstruation in young Ladies, Plumpness and health always results from its use.

Wherever you live, I can refer you to ladies of your own locality who know and will gladly tell any sufferer that this Home Treatment really cures all women's diseases, and makes women well, strong, plump and robust. Just send me your address, and the free ten day's treatment is yours, also the book. Write to-day, as you may not see this offer again. Address

MRS. M. SUMMERS, Box H - - Notre Dame, Ind., U. S. A.

THE MILL ON THE FARM.

Col. Creecy was once Chief of Police of St. Louis, but he retired to his farm in Missouri. He is some proud of his splendid farm, but the poetry of the old mill appeals to him strongly—much more than it does to some of the more practical natives of Pulaski county.

A few days ago a farmer who had moved into the neighborhood from some other part of the county took a bag of grain to the mill and was going to wait for it to be transformed into the finished product.

Finally his patience became exhausted.

"Do yer know," he said, "I cud eat that there meal faster than yer durned mill can grind it!"

"Yes?" remarked the miller, "but how long could you keep on eating it?"

"Well," replied the farmer, conclusively, "I reckon I cud keep on at that rate till I starved."

The Style Books and Samples.

Our lady friends should remember the Style Book issued by the National Cloak and Suit Company, as advertised on page 3. Stylish clothes, good material and easy prices go together here. You can also get samples of material used in made-to-order tailored suits by asking for them. Address, National Cloak and Suit Company, 280 West 24th street, New York City, N. Y.

SPLENDID SUBSCRIPTION PREMIUM.

Beautify Your Home With This Popular Stencil Outfit.

Stenciling has long been a popular form of home decoration and is today used more extensively than ever. Ladies are particularly apt at this work, and anyone can produce beautiful effects. From every standpoint stenciling is a very fascinating art of extreme usefulness. You can make the most artistic pillow tops, curtains, portieres, centers, etc., in colors for yourself or for sale, without having any knowledge of painting, by using this up-to-date outfit. In fact, stenciling is so simple with this outfit that a child ten years old can do it.

This outfit is just the thing for beginners. It consists of six cut stencils on special oil board, six cups of water colors (something new, that will not spread, but dries instantly), two bristle stencil brushes, four thumb tacks, also full and explicit directions for mixing colors and using stencils.

Our Subscription Proposition.

Send us fifty cents by postoffice money order and we will send you the Universal Magazine for two years and you can select the Popular Stencil Outfit as a free premium.

The Universal Magazine is a nice, bright, cheerful, illustrated monthly magazine of thirty-two pages, three columns to the page, containing home reading, stories, fashions, patterns and poetry—a splendid publication for the money. Address, HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.

To Club Raisers:—Anyone sending us four subscriptions and $2.00 to pay for same will be credited with one two-year subscription to the Universal Magazine and one Stencil Outfit free.

Some Things About the Country School.

The most important of all country institutions is the country school. Poor as it has been in the main, yet it has given a certain amount of culture. Those that have been most helped by it have been those that have merely commenced to study in the country school. They have received their impetus there and have been fired by the country teacher with the love of learning. After dropping out of the country school they have gone on studying by themselves, often have gone to other institutions of learning, and so have reaped all there was of the benefits of the country school.

But those that, when they leave the country school, shut their books forever, get very little good from it. They go out into the world, having little ability to even read well, if they drop out before the higher grades are reached. The result is that in the battle of life they are poorly fitted to play their part. It must be remembered that the writer is speaking of the ordinary country school. There are some country schools that are exceptions, and may their number increase.

It is impossible in the ordinary country school to have any such curriculum as is found in the village and city schools. The work is too broken up by the constant change of teachers. Often the new teacher finds nothing by which she can tell what the school has been doing the previous year, and has to depend on the assertions of the pupil's relative to what they have done. This is especially true of the small schools, those having five to twenty pupils.

It is noticeable that parents of country children do not take an interest in the welfare of the schools. Once a year, when there is an exhibition or a school social of some kind or a picnic they turn out in large numbers and have a good time with the children, but that is the beginning and end of their interest in the schools. They seem to be fatalists and think that what is, is right; so they let the school take care of itself.

What is the reason why some of the little schools — schools with under ten pupils—were not long ago abandoned and the children transported to some other school, for in some of the states this has been possible by law. Illinois has just passed a law allowing schools of fewer than six pupils to be abandoned and the children transported at public expense to some other school. This costs less than hiring a teacher for such a small number and gives the children an opportunity.

The consolidation of small country schools and the transportation of pupils is the only possible solution of the country-school problem in many localities—in most localities. The transportation of the pupils at public expense is the key to the situation, for if the children are not transported at public expense the consolidation cannot be made, because the distances are too great for the children to walk, and farmers have something to do beside hauling their children to and from school. The money saved on teachers pays the cost of this transportation. This will not be accomplished till public sentiment in the rural localities is strong enough to demand it. In this, as in every other great reform, it is a question of public opinion.

Escape From Pirates.

Something happened in stageland the other day, and Lee Harrison, the theatrical manager, developed an acute need for Glenmore Davis, the best dressed agent on or off the stage, says the New York correspondent of the Cincinnati Times-Star. He called the Players' Club. "Mr. Davis telephoned that he would lunch up town to-day," said the office man. "No, he did not say where he would lunch."

Mr. Harrison began a tour at the Twenty-sixth street Martin's. He entered by the Broadway door and gave his hat to the check pirate. When he failed to find Davis he gave his check pirate a dime, thereby redeeming his hat, and walked on up the big street. He repeated this operation at twenty-five different restaurants. When he got to Churchill's he stopped at the door.

"Mr. Davis was there," said the doorman. "I think he is in the balcony now."

Therefore, Mr. Harrison checked his hat and invaded the balcony. Mr. Davis was not there. Mr. Harrison returned to the door and the check pirate was there with the ready palm and the brushed bonnet. Mr. Harrison felt in his pockets and began to figure on his fingers.

"That hat," said he, "cost me $2.00 originally, and I have paid out $2.75 on it in tips to-day. I may have to visit twenty more places before I find Davis. Keep the hat for the tip."

And he walked out bareheaded.

Ropp's Commercial Calculator.

This is a standard book, and a revised, enlarged and improved edition. There are millions in use. **Ropp's Commercial Calculator** is especially valuable to farmers. By its regular use many hard problems become easy. It will prevent mistakes, relieve the mind, save labor, time and money, and do your figuring in the twinkling of an eye. As handy as a watch, always ready and reliable. Anyone who will send 50 cents for one-year's subscription to this paper, The National Farmer and Stock Grower, can select one copy of **Ropp's Commercial Calculator** as a free premium. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

To Club Raisers:—Anyone who will send in four subscriptions and $2.00 to pay for same will be credited with one-year's subscription to The National Farmer and Stock Grower and one copy of **Ropp's Commercial Calculator.**

The Twice-a-Week GLOBE-DEMOCRAT

Is a magnificent newspaper, containing all the latest home, foreign and political news. It is unquestionably the best semi-weekly Republican newspaper in the United States, and is published at St. Louis, Mo.

The National Farmer and Stock Grower

The best monthly Farm Paper in the United States. Useful on any farm, in any state. Good for grain farmers, horse, cattle, hog and sheep raisers, also dairymen and vegetable growers.

The American Poultry Journal

Published at Chicago. The oldest, largest and best Poultry Journal in America. Beautifully illustrated. Issued on the first of each month.

Subscription Club.

Comparative Prices.

The United States Crop Reporter is authority for the following:

"Prices paid to farmers in the United States on October 1, compared with October 1 last year, for barley, averaged 45.6 per cent. higher, potatoes 30.2 per cent. higher, hay 22.7 per cent. higher, oats 17.4 per cent. higher, corn 7.5 per cent. higher, buckwheat 2.4 per cent. lower, wheat 5.7 per cent. lower, chickens 6.0 per cent. lower, butter 9.2 per cent. lower, eggs 10.7 per cent. lower, and cotton 23.3 per cent. lower."

NEW THIN MODEL SIZE 16 STEM WIND SET WATCH

This watch is a beauty of a timepiece with several new features in watch making. Thin model, size 16, (about 1-2 larger than picture) stem wind, stem set, bright nickel case with gold-plated winding stem. White dial has Arabic numerals printed in gold on a maroon background decorated with silver, all inside a circle of gold and silver stars and dots. Case has new double back, protecting works from accident and dust. Each watch thoroughly tested at factory and just the watch to wear every day in the year and know what time it is. Just as good a time keeper as a very expensive watch, will wear for years and it costs you nothing.

You Can Earn It in a Few Minutes

I will give you this fine watch and fob with your initial for just a few minutes of your time. New and easy plan, sure to win. Many friends have earned it in a half hour. Just send me your name and 4cts. postage for full free outfit of Post Cards, etc.

Write to F. H. PHELPS, Manager, 26 E Water St., Springfield, Mass.

FREE TO YOU

THIS GREAT TELESCOPE 3½ FEET LONG

NOT ONE CENT OF YOUR MONEY IS REQUIRED. Send for our free offer. UP-TO-DATE, Dept. 10, Indianapolis, Ind.

I can say every time it is worth $10.00 to me. I can see cattle at 15 miles and a nickel 600 yds. T. S. Sepeda, Morgan Hill, Cal.

SELECTED POETRY.

THE BALTIMORE GREYS.

Ah! well I remember that long summer's day,
When round about Richmond our broken ranks lay;
Week in and week out, we had been at the front,
And borne without flinching the battle's fierce brunt,
Till, shattered and weary, we needed repose
Ere we met, in death struggle, our numberless foes.
Our knapsacks were empty, our uniforms worn,
Our feet, from long marching, were naked and torn;
But not a man grumbled in rank or in file,
Our hardships we bore with a joke and a smile,
For Stonewall was with us, and under his eye
Each soldier determined to do or to die.

That evening old Jack had us out on review,
When a glance down the line showed us all something new;
Eighty-seven young boys, from old Baltimore,
Who had run the blockade, and that day joined our corps,
Their clothes were resplendent, all new, spick and span,
'Twas plain that a tailor had measured each man.
When we learned who they were what a shout did we raise,
How we cheered our new allies, "The Baltimore Greys."
There were Lightfoots and Carters and Howards and Kanes,
The grandsons of Carroll, the nephews of Gaines;
And as the brave boys dressed up in a row,
You could see the pure blood of Huguenot proud.

But we were old vets of Stonewall's brigade;
We had been fighting so long that war seemed a trade,
And some of us laughed at the youngsters so gay,
Who had come to the battle as if coming to play,
And through all the camp you could hear the rough wits
Cry: "Hello, young roosters," and "dandified cits;"
But the boys took it bravely and heartily laughed
At the hungry Confeds, by whom they were chaffed,
Till one ragged soldier, more bold than the rest,
Fired off this rough joke, which we all thought the best:
"Boys, you had better go home, 'tis getting quite late,"
When the girlish-faced Captain spoke up and said: "Wait!"

They didn't wait long, for the very next day
We were ordered right off to the thick of the fray,
For early that morning we heard the dull roar
Of the guns of our foemen on Rapidan's shore,
And all of us knew, with old Jack in command,
If fighting was near, he'd at once take a hand;
And, sure enough, soon marching orders we got,
And we swung down the road in "foot cavalry trot;"
The boys were behind us. I fell to the rear
To see how the youngsters on march would appear.
Their files were close up, their marching was true.
I reported to Stonewall: "Yes, General, they'll do."

In a few minutes more the action began;
We met the first shock, for we were the van;
But we stood to our ranks like oaks of the field,
For Stonewall's brigade never knew how to yield;
Upon us, however, a battery played,
And huge gaps in our ranks were now and then made,
Till Jackson commanded a charge up the hill.
We charged. In a moment the cannons were still.
Jackson said to the "Greys:" "Such valor you've shown
You'll veterans be ere your beards are full grown;
The stand you have taken you will ever uphold:
In this, your first action, you've proved yourselves bold."

Then the girlish-faced Captain, so straight and so tall,
Saluted and said: "You'll here find us all.
For wherever stationed this company stays."
How we laughed, how we cheered the bold Baltimore Greys.
But the red tide of battle around us still flowed,
And we followed our leader as onward he rode;
Cried: "Good-bye" to the boys, "take care of your guns;
We'll relieve you as soon as the enemy runs."
Ah! Yes, indeed, soon the boys were relieved
But not in the manner we all had believed.
Alas! the sisters who weep and the mothers who pine
For the loved and the lost of the Maryland Line.

By some fatal blunder, our left was exposed,
And by thousands of Federals the boys were enclosed.
They asked for no quarter—their Maryland blood
Never dreamed of surrender—they fell where they stood.
We heard in the distance the firing and noise,
And double-quicked back to the help of the boys.
The guns were soon ours; but, oh! what a sight!
Every Baltimore boy had been killed in the fight,
Save the girlish-faced Captain, and he scarce alive,
When he saw us around him, he seemed to revive,
And smiled when we told him the field had been won,
And the Baltimore Greys had saved every gun.

Then Stonewall rode up and endeavored to speak,
But utterance was choked, and down his bronzed cheek
The hot tears were flowing as he gazed on the dead;
"God pity their mothers and sisters," he said.
Then, dismounting, he knelt on the blood-sodden sand,
And prayed, while holding the dying boy's hand.
The gallant young hero said: "General, I knew
That the Greys to your orders would always be true.
You'll not miss a Grey from our final roll-call;
Look around you, my General, you'll here find us all."
Blood gushed from his mouth; his head sunk on his breast,
And the girlish-faced Captain lay dead with the rest.

—War Poem.

THE DRAGON.

Ye men who think ye are strong and bold,
Who fain would go forth to the fray,
And battle with dragons, as knights of old—
There's a dragon for you to slay.

He ravages every sea and land,
And levies a toll on the work of each hand,
On the poor and the rich, on the humble and proud,
On the christening robe and the burial shroud,
On human hearts' hopes and human health,
On bodies of beasts, and on nature's wealth.

With a giant's strength and a demon's heart,
And the magic and skill of the alchemist's art,
This dragon pours into his mortar all
Of his victims and spoils, and he grinds them small,
And out of them makes he his drink and meat,
And he tramples the refuse under his feet.

The name of this dragon is Selfishness,
And he lives in a dismal den,
Amidst a mysterious wilderness
Hid deep in the hearts of men.

Ye men who think ye are strong and bold,
Who fain would go forth to the fray,
And battle with dragons, as knights of old,
There's a dragon for you to slay.

—Claude Elwood Remick.

BELIEF.

If I were asked what I believe, I could not help but say,
The gentle and the simple creeds of boyhood's yesterday;
The tender faith in Bible things, the truth, the way, the right,
The golden rule to live one's life according to the light;
And everywhere the thought of God, that we are everywhere
The children of one Father's love and of His heavenly care.

If I were asked what I believe, I know my thoughts would go
Back to a little child at prayer in the soft evenglow;
And I can think of nothing else so beautiful, so sweet,
As prayer beside a mother's knee who tried to lead our feet
In paths of righteousness and truth, where none could go astray
From that dear life of simple trust in childhood's yesterday.

If I were asked what I believe, I'd have to say, as then,
A simpler faith in God's commands, a manlier trust 'mong men,
A clear and more abiding course t'ward that which men might call
The straight-out-from-the-shoulder faith of Peter and of Paul;
The teachings, most of all, that came to us in Sunday school,
Way back in little childhood's land, the land of Golden Rule.

—Baltimore Sun.

THE MARKET MUSE.

You've heard of Yates & Shearman's store;
The name's enough—what need of more?
But lend your ear and let us tell
What Yates & Shearman have to sell.

Sweet corn, tomatoes, beans and peas,
Young harvest apples from the trees,
And country eggs so lately laid
As seldom venture into trade.

Uneeda Biscuit
Always Ready
Wise foresight should lead you to keep in the cupboard a half dozen or more handy packages of
Uneeda Biscuit
They won't get broken, musty, soiled or soggy like ordinary soda crackers because their crisp, clean freshness is protected by the moisture-proof and dust-tight package.
Never Sold in Bulk
5¢
In the moisture-proof package
NATIONAL BISCUIT COMPANY

..New white potatoes which invite
The chance acquaintance of a bite,
And rhubarb suitable for pies
On which the angels gourmandize.

All this is true, as you will own,
If calling there. They have a phone,
And, order anything you will,
They'll rush it up or down the hill.

—Monroe City (Mo.) News.

THE FARMER.

The farmer who is yy,
Enough to take his ee,
And study with his ii,
And think of what he cc;
He hears the clatter of the jj,
As they each other tt,
And sees that when a tree dkk,
It makes a home for bb.

A yoke of oxen he will uu,
With many haws and gg,
And their mistakes he will exqq,
When plowing for his pp.
He little buys, but much he sells,
And therefore little oo;
And when he hoes his soil by spells
He also soils his hose.

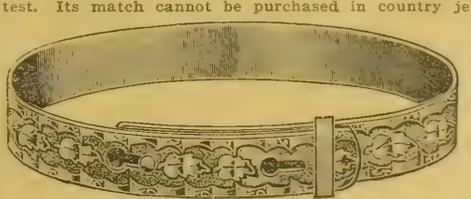
—Macon (Ga.) Telegraph.

"The riddle of the world is understood
Only by him who feels that God is good."

—Whittier.

The Universal Magazine Bracelet.

Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.** To Club Raisers:—Anyone who will get up a club of four two-year subscriptions in accordance with this advertisement and send us two dollars to pay for same will be credited with one extra two-year subscription to the **Universal Magazine** and we will also send one extra Bracelet for getting up the club.



Universal Magazine Bracelet.

OUR WONDERFUL DOLL OUTFIT

ALL FREE

10 Different Presents — All Free

This is positively the most liberal and biggest Doll Offer ever made. Think of the endless amount of pleasure a little girl can have with this wonderful collection of presents. All are given **Absolutely Free** to advertise and introduce our business in your locality. All that is required is a few minutes—at the outside not over half a day of your time. Read below and send coupon and we will take care of the rest.

Doll's House Extra

Our handsome little Doll's House is decorated in colors, with painted chimney, windows, porch, etc. It is given extra and in addition to the other nine presents included in this offer, **just for promptness.** Send the coupon below **promptly**—at once, and get this nice little Doll's House as an extra present to complete the combination.

Send this coupon today

M. CLARK
Sec'y
107-111 So. Clinton St.
CHICAGO

CUT OUT ON THIS LINE.

Dear Sir: — Send me your twelve new all-gold illuminated text pictures to distribute on your new plan, which will entitle me to all your nine doll presents and the extra present for promptness. I am under no obligation to distribute pictures after receiving your plan and can return at your expense.

Name_____

Address_____

318_____

Description of Presents

Our life-size doll is bigger than the ordinary baby—nearly two feet high. She is beautifully and stylishly dressed from head to toe, including large picture hat, trimmed with plume, lace, etc., fancy sateen dress with yoke, complete underwear, stockings, slippers with buckles, etc. Bisque body, jointed arms and legs, long curly waxen hair; opens and closes her eyes.

Dolly's buggy or go-cart is substantially made and amply large enough for Dolly to sit in, as shown in the above picture. It is guaranteed to run smoothly. Dolly's little chatelaine watch looks just like a real watch, and she is very proud of it.

Our little baby doll is very sweet and lovely, with long hair.

The five piece furniture set is the cutest doll set you ever saw—regular dining-room table already set up and four upright dining-room chairs.

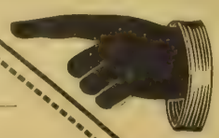
Just imagine the good times the little girl can have dressing dolly, making clothes for baby doll, and taking both out riding in the go-cart, serving dinner and tea, etc., etc.

Do not forget our little doll's playhouse, which is given extra for promptness, as explained elsewhere in this offer.

How to Secure All

If you want my ten grand doll premiums, simply sign your name on the coupon below and send to me promptly. I will then send you twelve of my new style, large, 16x20 inches, all **gold** illuminated text pictures, with decorations. These pictures are brand new and made especially for me; none like them on the market. You distribute these gold text pictures free on my special plan—collecting 25c. with each picture. Then you send me the $3.00 collected and the same day received I will ship you the big dressed doll, go-cart, five-piece dining-room set, baby doll, doll's chatelaine watch and also doll's house for promptness—not one, but **all ten presents.**

If you do not care to distribute my new gold text pictures on my easy plan, after receiving them, they can be returned at my expense. Nearly everyone, however, who sees my new pictures and hears about my new plan will jump at the offer, and you can do the distributing in a very little time. All you need to do now is to send the coupon without delay.



Just Send This Coupon

No Money Required My Company is a two and a half million dollar corporation, and I furnish highest references. Remember, if you do not care to distribute my new gold text pictures on my new plan—all well and good. I run all the risks, guarantee my presents and pay all postage. Don't fail to send the coupon at once and take advantage of this wonderful offer now. 1,000 grateful letters and large illustration of premiums in colors will be sent you.

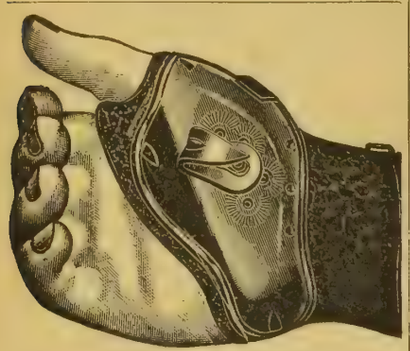
and Stock GROWER

Favorite Corn Husker.

Clark's Corn King with its new self-shedding hook. The spear point enters the husks easily. The slant bend turns the husks for shredding, and the rounded, curved and beveled edges throw out the husks and prevent clogging. As this is the most approved husker on the market, we have selected it as a seasonable subscription premium. The hook sets at any angle; two positions for a thumb hook and five positions for palm hook. Opening and closing the small end of the plate makes the adjustment perfect for any width of hand and prevents chafing. The strap passes through the leather tongue and the first ring and over



the hand to the opposite ring and back through the first ring. Be sure and have the strap enter the ring from the outer side. It brings the pulling strap underneath, forms the sinch draw and gives you the full benefit of the sinch-lock, which is the same as a half-hitch. The strap then passes to the last ring and then to the buckle; the half-hitch forms one fastening and the buckle holds the end of the strap. We will send The National Farmer and Stock Grower for one year and Clark's Corn King Husker for 50 cents. The Husker is a free premium. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Cement Workers' Handbook.

This book is designed to teach anybody how to work with cement; how to mix mortars of all kinds for all concrete purposes; how to make building blocks; how to build walls, floors, ceilings, walks, joists, cisterns, troughs, tanks, etc. It gives estimates of the cost of all kinds of mortars and concretes and all methods of house construction. It is a cloth-bound book of 100 pages and covers more than fifty most important subjects on cement and its uses and construction. This is a diamond of a book for wide-awake farmers. The price of the book alone is 50 cents.

For 60 cents we will credit one-year's subscription to The National Farmer and Stock Grower and send a copy of the Cement Workers' Handbook. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

To Club Raisers:—Anyone getting up a club of four subscriptions and sending in $2.40 will be credited with one book and one-year's subscription free.

Doubling the Value of Land For Crop Production.

It is said that there are in the United States about 1,900,000,000 acres of land. Of this about 950,000,000 acres can be used for tilling. Of this area about 873,000,000 are now in farms. The amount of land that can be wrested from the arid regions is now very small, and in the main we have reached our capacity for tillable acreage.

The great problem now confronting us is the increasing of the producing capacity of the land we now have. We speak of doubling its crop-producing capacity, but in reality its crop-producing power can be increased many fold. We have but just begun to make our land produce crops.

When we read the statistics of crop production we are reminded how very low the averages are. Many a good farmer produces a hundred bushels of corn to the acre, yet the average of all corn-producing land in the country is under twenty-five bushels to the acre. It is common for farmers to raise as high as forty or more bushels of wheat to the acre, but the average for the country as a whole is about one-third that. Oats are raised in excess of 100 bushels to the acre on some farms well managed and under proper conditions, but the averages drop to about one-third that. Moreover, we have not mentioned the high-water marks of production of even these three crops, for all of them have occasionally been produced in very much larger quantities per acre than the figures mentioned here.

Some years ago the writer was talking with a professor from one of the Southwestern Experiment Stations. He had been carrying on cultural tests with oats for some years. Asked as to how large comparative yields he had been able to secure, he replied that the yields were so big that they had not published them, as they did not believe it possible for farmers under existing farm conditions to get any such yields. He mentioned 170 bushels of oats to the acre as the results of the yields of certain plots. But it must be borne in mind that these plats were not acre plots, but very much smaller. They were so small that they had received perfect care in all things and had received all the water they could use during the growing season. This latter is an element that the common farmer cannot supply, for he cannot generally give an ideal water supply.

Nevertheless, it shows the possibilities in the increase of crops. Very few of our fields are being cultivated under ideal conditions. There is a marked contrast between the size of the crops grown from year to year on experimental farms and those grown on the average farms of the country, as told by the statistical tables. Even if the average of the country were up to that of the experimental farms, the crop production of the country would doubtless be doubled. And experimental farms are not for the purpose of making big records. They do, however, show the effects of good, sensible methods in farming.

We have yet a long way to go before we will have brought all our arable land under the highest possible culture.

Amount of Water Required For Crop Production.

Various investigators have found that it requires from about 400 to 1,000 pounds of water to produce a pound of dry matter of a farm crop. The water requirement increases with a higher temperature, a greater amount of sunshine and a dryer atmosphere. In the arid regions a moderately high temperature, a cloudless sky and a dry atmosphere prevail. Consequently the water requirements of plants naturally tend to be higher for the same kinds of crops. It is concluded that about 750 pounds of water are required in the arid regions for the production of one pound of dry matter of common farm crops.

The straw forms about one-half of the total weight of harvested grain. On this basis the total weight of straw and grain for every bushel of dry matter is 120 pounds. About 90 per cent. of this, or 108 pounds, is dry matter. Therefore, it will require 750 times 108 or 81,000 pounds of water to mature one bushel of wheat. This is equal to 40½ tons of water.

One inch of rainfall per acre weighs approximately 113 tons. It is estimated that under good tillage methods, about two-fifths of the total rainfall is available to the crop; therefore, about 45.2 tons of every acre inch of rainfall are used by the plants, and one inch of rainfall can produce about 1⅛ bushels of wheat. Under thse econditions, ten inches of rainfall would produce 11¼ bushels, fifteen inches 17 bushels. Where two-years' precipitation is stored in the soil it will be possible to produce about 27 bushels of wheat per acre on a twelve-inch rainfall.

Efficiency of conservation and actual water requirements of plants vary so much in different sections that for many localities the above figures must necessarily be suggestive rather than actual.—D. W. Frear, Agricultural College, Fort Collins, Colorado.

Butter Coming Back.

The New York Produce Review and American Creamery reports that 412 tubs of American creamery butter were exported to England last September and were returned to the United States to be sold on the the New York market because the American market is now high enough to justify the return of the goods, and the British butter market is not as high as it might be. The 412 tubs constitute a small fraction of 19,201 packages, but it is sufficient to show that the export trade is not all at guaranteed prices.

In order to make a point against the American meat packers and to bring about the admission of foreign meats into this country free of duty, representatives of the packers were quoted as saying that they sold meats cheaper in London than they did in New York. Whenever they do so it is for the same reason that the butter is returned, because they cannot sell at a profit. It is possible to correct an unfortunate shipment of butter by returning it to meet an advancing market, but when refrigerated meats are once on the hooks at the Smithfield market the sales have to be at the market price. Sometimes meat has to be sold at a loss.

Stolen Milk Bottles.

A car-load of glass milk bottles was seized on the tracks of the Burlington Railroad in St. Louis on Saturday, November 25th, which were claimed to have been stolen. The car contained 24,000 bottles, and the complaint was made by eight St. Louis dairy companies. It is asserted that the loss in bottles sustained by some of the larger dairy companies reaches amounts and value varying from $5,000 to $10,000 a year. It is claimed that an organized milk bottle stealing trust exists; that the stealing begins with children, tramps and rag pickers and ends with conniving syndicates, which interchange the bottles between different cities. It is claimed that in this instance the original thief gets about five cents a dozen, and the consumer pays five cents each. From this statement it appears there is a good-size opportunity for organized stealing in milk bottles, nevertheless it will be difficult to prove that the milk bottles were stolen.

Suppose you had time

to travel through 10,000 square miles of the richest sections Southwest, stopping off in every county and *investigating every* farm opportunity—think how *perfectly* you could locate the *one best* opportunity for you.

A *practical farm man* made just such a trip through Arkansas and Texas. He first stopped at Piggott, in northern Arkansas, went out and talked with Farmer Gray (who bought for $57 per acre a *better improved farm* than his Indiana place at $105 per acre.) He got the views and experiences of other farmers there, asking questions that an *experienced* farmer would ask who was planning to locate in that section; and took *actual* photographs of the stock and farms. Then he went to the *next* county—and so on, *clear* down to Lufkin, Texas., where J. E. Berry tells of starting with $12 capital and making $8300 in 6 years from dairying.

The result is two books with 115 *actual photo* pictures and 100 pages of plain farm facts, as given by *farmers themselves*, describing every kind of farm opportunity Southwest. They are the *next best thing* to an *actual trip* there, and will show you where *your* best opportunity is.

I will send you FREE

copies of these splendid books; I will also tell you about the low fare excursions Southwest twice a month via Cotton Belt Route. Write me *now*.

E. W. LaBeaume, General Passenger Agent
1419 Pierce Bldg., St. Louis, Mo.

The United States Department of Agriculture has issued a report of a preliminary soil survey of the Panhandle of Texas. Apply for it to the Secretary of Agriculture, Washington, D. C.

According to reports of the Department of Commerce, 7,421,836 pounds of sausage were exported n 1909.

Strychnine Poisoning in Dogs.

When the house dog comes home acting very strangely and frothy saliva driveling from the mouth, there are a number of things to be considered. Most people think first of rabies and secondly of poisoning. Since both are very common, the general public should be enlightened in regard to them.

Rabies cannot be easily diagnosed, but strychnine poisoning should be readily recognized by anyone.

The first symptoms of strychnine poisoning appear in from fifteen to sixty minutes after the drug has been administered; if it is carefully hidden in a large piece of meat, it may be an hour or more before any symptoms appear.

At first the animal acts extremely nervous; it cannot stand still and constantly lifts its feet as if the floor were hot. Rapidly the muscles become stiff and the dog assumes a position resembling a saw-buck; next spasms appear and last for a few seconds; then the muscles will partially relax and the animal will be able to breathe more freely.

Spasms will recur more and more frequently until death results.

What can the owner do for the patient until the doctor arrives? In the first place, do not waste valuable time trying home remedies before calling professional aid. Minutes are precious in cases of strychnine poisoning.

Lard, cream and all such agents are absolutely of no value, and the animal is only annoyed by attempts to administer them. The only household remedy that can be of value is mustard, and it is ordinarily too slow in action to accomplish any good. A teaspoonful in a cup of water may be given by means of a tablespoon. Other remedies are useless and are consequently worse than nothing. The doctor can produce vomiting in less than fifteen minutes or wash out the entire intestinal tract.

There is no danger of the animal biting and absolute quiet is good treatment.—H. E. Kingman, Colorado Agricultural College, Fort Collins, Colorado.

Wintering Horses on Pasture.

The custom of running horses out on pasture during the winter is the common one on the range in most sections of the South and to a certain extent in the corn belt. It is rare, however, in localities, such as New England, where the winters are cold. The greatest obstacle to profitable animal husbandry in New England is the necessity to feed and shelter live stock during the long winter period. The Department of Agriculture has found this to be a constantly increasing bill of expense at the Morgan Horse Farm near Middlebury, Vt., and is devising means to reduce it to a minimum. In 1910, cheap barns, costing $500 each, were built in three pastures, each barn having a door in each end and two having a door in one side, facing either south or east. Hay storage is overhead and grain storage at one end. A hay manger runs along the inside of the back wall and a grain trough is outside. One or all of the doors are open all the time, and plenty of bedding is provided.

The yearling fillies and the brood mares were given these accommodations during the winter of 1910, the brood mares being brought up to the main stables about three weeks before they were due to foal. The first winter's trial was completely satisfactory. The horses had a bed which was roomy, always dry and free from draughts, and were free to come and go as they wished. No colds or coughs were observed. The horses were undoubtedly better for their winter's outing. The cost of stabling was cut from $2.00 to $1.00 per head per month, and the cost attendance from $3.00 to $1.00 per head; it is possible still further to reduce the latter charge by increasing the number of animals on the pastures. The horses ate practically the same amount of grain that they would have consumed in stable and somewhat more hay.

During the coming winter the foals of 1911 will run out, having an open shed in an especially well-sheltered location. The barn for the brood mares has been enlarged and changed into an open L-shaped shed, facing south and east. A 100-ton concrete silo has been built in conjunction with this shed, and silage and timothy hay will make the ration of the brood mares during the winter.

The leading stallion at the farm, General Gates, has for a year been given the run of a tightly-fenced paddock of about three-fourths acre, to which he has access every day in winter and day and night during spring, summer and fall. In this time, he has never worn a blanket and has never been in better health or spirits or more easily handled.

The Department's experience thus far seems to indicate that horses may run out during the winter provided they have a dry bed, sheltered from storms, and are given enough to eat, and that the practice will result in a considerable saving in cost of stabling and attendance.

Secretary Wilson says that for twenty years a herd of horses has wintered outdoors on his Iowa farm. He puts the horses in at one year old coming to two. He built a shed for them when he put them out at first, but found they would not go into it, no matter how severe the weather was; they preferred to go into a heavily-timbered ravine, where they got all the shelter they seemed to want. A colt is never taken out until he is to be sold or broken for work. The hair of the animals grows long and thick and protects them. Unless the snow is too deep, horses paw the range for the blue grass, of which there is always an abundance in the pasture. It is well known that horses and sheep will paw the snow to reach grasses, while the bovine does not do this.

The June bulletin of the Missouri State Board of Agriculture, Columbia, Mo., was devoted to "Dairy Farm Management in the Ozarks," a very interesting bulletin. Bulletins are sent free on application.

30 Days' Free Trial

Write for our Free Trial Offer today—see how you can use this wonderful farm tool sharpener 30 days **free** without any obligations. **Sharpen all your farm tools** and then send it back at our expense if you don't want it. 5 years' guarantee.

Luther Hummer Tool Grinder

30 attachments to select from

Besides the 14-Attachment Farm Sharpening Outfit, as illustrated, the Luther Hummer Tool Grinder has **16 separate attachments**, such as **milk tester, horse clipper, jig and circle saws, etc.**, from which you can select whatever you want. **Steel frame, shaft drive, dust proof ball bearing.** Costs no more than old style chain grinders.

Dimo-Grit—"the wheel for steel"

The perfected artificial diamond sharpening substance. 25 times faster than the grindstone—10 times more efficient than emery. **No danger of drawing temper** or need of water. Carborundum wheels furnished, if wanted.

THE IDEAL HOME COUNTRY

lies in the wide territory traversed by the Southern Ry. System. From the high lands of the Appalachians, with their *dry, healthy climate*, to the Piedmont section, with its *heavy yielding lands*, on to the Atlantic and Gulf coasts, where *every crop thrives*—somewhere in this broad territory *you can find a place just suited to your needs and means.*

Land prices range from $15 to $50 per acre. The first year's crop often more than returns the purchase price.

All grasses, grains, fruits and vegetables known to the temperate zone thrive in the Southeast. Alfalfa grows nearly everywhere—4 to 6 tons per acre not uncommon—$15 to $22 per ton paid locally. Apple orchards net $100 to $500 an acre. Truck gardening yields $200 to $400 per acre—everything else in proportion.

The Southeast is the farmer's paradise.

We have booklets giving full information of conditions in each Southeastern State. Address

Depth of Root Penetration.

Much misapprehension exists among agriculturists regarding the depth to which roots penetrate the soil. It is a general belief that the roots of cultivated crops do not reach to a greater depth than one or two feet.

Corn roots have been found to penetrate four feet deep and to fully occupy the soil to that depth. On drier and deeper soils they went as deep as eight feet. Roots of small grains, such as wheat, oats and barley, penetrated the soil from four to eight feet, and even ten feet in depth. Perennial grasses have been found to go to a depth of four feet the first year and five and one-half feet the next year, and they probably go considerably deeper during succeeding years. Other crops have gone to the following depths: Potatoes, three feet; sugar beets, four feet; alfalfa, thirty to fifty feet. The buffalo berry penetrated the soil to the depth of fifty feet in Nebraska. In California grape vines went down twenty-two feet; figwort, more than ten feet; goosefoot, eleven feet; and hop plant, eight to ten feet

Most of the above results were obtained in humid or sub-humid regions. Soils and climate differ in such a way as to favor a somewhat deeper root penetration in arid regions, hence it is natural to expect to find roots at even greater depths than the above.

The conditions which encourage deeper rooting are drainage, limited supply of moisture and a soil porous and fertile to a great depth. Deep, early cultivation also forces roots to seek the lower depths. Deep-rooted plants are much more drouth resistant, due to the fact that they can draw on the lower water supply during the periods of drouth. They also have a larger feeding area and the fertility of the soil is not depleted so quickly.

Heavy irrigation in the early part of the season, when there is likely to be a deficiency of moisture later, is a bad thing, because it encourages surface rooting, which means that the plants are going to suffer later for want of moisture on account of their inability to draw on the supply in the lower subsoil.—D. W. Frear, Colorado Agricultural College, Fort Collins.

The Wheat Market Situation.

The closing day of November is not an eventful time in the grain market. Even on quiet days there must be a tremendous movement, otherwise the crops cannot be disposed of, for sooner or later every bushel of grain must pass from the producer to the consumer through the channels of trade, but the eventful days are selling days.

"The present conditions are on the hand-to-mouth order," said a grain dealer; "the wheat is passing into the hands of the miller, who is anticipating no boost in the price of flour, and the baker does not expect to get an advance on the price of bread.

At St. Louis, cash wheat sold as follows on the last day of each month: June, 1911, 86½ to 87½ cents a bushel; July, 84¾ to 86 cents; August, 88 to 89½ cents; September, 98½ to 99½ cents; October, 98 to 99½ cents; and November, 95½ to 97¼ cents. Here we have a decline of 2 to 2½ cents a bushel in thirty days, which is the usual result of hand-to-mouth business.

In the speculative trading at Chicago headquarters the December option, which is to be closed out December 31st, was quoted as follows during the last day of each month: June, 1911, 92¼ cents a bushel; July, 93⅝ cents; August, 94¼ cents; September, 98¼ cents; October, 96½ cents; November, 93⅜ cents.

The May wheat option is usually the most speculative of all options. It is at the end of one crop and before the new one arrives—an uncertain situation. Our readers are reminded that the May option of the year 1909 was closed out at $1.34 a bushel; in 1910 the May option closed at 94¼ cents a bushel; the May option was closed out this year (1911) at $1.04¾. The May option of 1912 was quoted July 31st at 98 cents; August 31st, at $1.00¼; September 30th, at $1.04¼; and on October 31st, at $1.02; but on November 29th (closing day of the month) the May option of next year (1912) was quoted at 99⅛ cents; and the July option of 1912 was quoted at 93⅞ cents.

The actual quantity of wheat available does not indicate a weakness in prices, but the chaotic condition of general business does, and that is what is responsible for the dull future outlook in wheat.

This review of the wheat market is designed to be read in connection with the current grain quotations which are published in every daily paper.

Poultry Profits and Farm Journal.

Read about poultry profits on page 18 and the book entitled "The Million Egg Farm," also the Farm Journal, a publication that the agricultural interests are proud of.

Five Crops of Alfalfa in One Season the Record of Sacramento Valley, California

Alfalfa, which has made wealthy more farmers in the irrigated West than any other known product, is grown to perfection in California. Five crops, with the corresponding profits, are not uncommon in this marvelous state.

And there is still enough land in California for you, and more is being put under water every year.

When you have made up your mind to sell your farm in the East and take the money to buy 40 acres, which will make more money in California with not so much work, travel over the

Try the Wonderful Columbia Kerosene Engine at our Risk

Test it out on your own place for fifteen days. Give it the hardest engine test you can think of. Compare it with any other engine. If the Columbia doesn't develop more power at less cost, send it back quick. No conditions. We are willing to let you be the judge and jury. Kerosene (common lamp oil) is by far the cheapest fuel today. The price of gasoline is climbing all the time, while kerosene remains the same, and in the right engine, it lasts longer and produces more power per gallon than gasoline. You get ALL the power when you use a Columbia, because it is the right engine. It is the one really simple and perfect kerosene engine. It never bucks when you need it most. It is always on the job.

Write for Particulars of Our Big Special Offer.

Size 2 to 16 H. P.

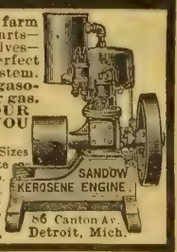
We are going to double our output for next year. We can do it easily. It is just a matter of getting engine users to test the Columbia for themselves. So we are making a great special money saving offer on Columbia Kerosene Engines. This offer is liable to be withdrawn at any time, so write today for full particulars, for it is a money saver you would hate to miss. **Free Book No. 84 full of engine facts you need to know, sent free.**

COLUMBIA ENGINE CO., 84 Fuller St., Detroit, Mich., U. S. A.

JAUNITA, 146,072—First-prize and junior champion Poland-China sow at the Missouri State Fair of 1911, where photograph was taken. Her weight at the Fair was 500 pounds. Owned by G. M. Curnutt, Montserrat, Mo. This is a sample of swine pictures collected for publication in the Book of Live Stock Champions mentioned on page 8.

Sandow $37.50
2½ H. P. Stationary Engine—Complete

Gives ample power for all farm uses. Only three moving parts—no cams, no gears, no valves—can't get out of order. Perfect governor—ideal cooling system. Uses kerosene (coal oil), gasoline, alcohol, distillate or gas. Sold on 15 days' trial. YOUR MONEY BACK IF YOU ARE NOT SATISFIED.



5-year ironclad guarantee. Sizes 2½ to 20 H. P., at proportionate prices, in stock, ready to ship. Postal brings full particulars free. Write for proposition on first engine in your locality. (116)

Detroit Motor Car Supply Co., 86 Canton Av. Detroit, Mich.

Western Range Grass Cattle.

On Thursday, November 16th, at the Chicago market, Messrs. Clay, Robinson & Co. sold for Louis Heitman, White Sulphur Springs, Montana, seventeen head of grass-raised Shorthorn steers, 1,551 pounds average, at $7.60 per 100 pounds. These were the first range cattle to sell as high in two years. During the range season in Chicago, Clay, Robinson & Co. topped the market with car-load lots nineteen times.

According to calculations by the Department of Commerce and Labor, the United States will not be selling meat products to other countries in another five years.

THREE-YEAR SUBSCRIPTIONS.

We desire to invite attention to our three-year subscription proposition. It is practically a trial subscription, payable at the end of the first year. The subscription can be stopped at any time by paying for the period the paper is taken. This method of taking subscriptions is the invention of Uncle Piper, our subscription editor, who has gnaranteed that every one of them will be paid when they are due. The subscription price of this paper is $1.00 for three years, and the bill for the subscription is sent to the subscriber at the end of the first year. When the bill goes out Uncle Piper slips in a list of handy premiums for the subscriber to select one from, providing he pays the bill promptly, and the general result is that the bill is soon paid. When it comes to getting subscriptions from intelligent, high-class farmers, Uncle Piper is at the head of the class.

Uncle Piper.

Postoffice.... .....

Will Pay a Big Bonus.

The United States Department of Agriculture has received a message from Minister of Agriculture Mackensie, of New Zealand, stating his government has announced an offer of a bonus of 12,000 pounds sterling ($56,700.00) for improved methods to be used in connection with the preparation and utilization of New Zealand hemp. Minister Mackenzie requested Secretary Wilson to give the offer publicity, as the circulation of this information will be for the benefit of American inventors and others in the United States. The offer is open to applicants until November 30, 1913. The conditions of the offer are "the extraction and dressing of fiber from the New Zealand hemp-plant; the utilization of the products obtained during the processes of extracting of the fiber, on condition that the machine or process, in regard to which the whole or any part of the bonus is to be paid, shall be recommended by the New Zealand Flax Millers' Association and approved by the government."

Minister Mackenzie has furnished Secretary Wilson with a leaflet giving giving full particulars on the subject.

The Range Sheep Exhibit.

Secretary Wilson ordered twelve yearling sheep, bred and owned by the Department of Agriculture, to be exhibited at the International Live Stock Exposition held at Chicago, December 2—9, and at the National Mid-winter Sheep Show in connection with the National Wool Growers' Association Convention at Omaha, December 13—16. This will be the first opportunity sheepmen have had to observe the progress of the experiment in breeding range sheep started by the Department in 1906, and still in progress at Laramie, Wyoming. The foundation stock experimented with was partly Delaine but largely Rambouillet. The aim has been to develop a range sheep of good size, at least 150 pounds at maturity, shearing a heavy fleece of combing wool and with enough constitution to thrive under range conditions.

A Bulletin on Emmer.

Emmer is a subspecies of wheat that is known as a profitable stock-feeding crop and a drouth resistant. It is commonly called "Speltz," but true Speltz is not Emmer. Emmer withstands extremes of climate much better than any other cereal. The United States Department of Agriculture has issued Farmers' Bulletin No. 466, entitled "Winter Emmer," by Mark Alfred Carleton, the cerealist in charge of the office of Grain Investigations Bureau of Plant Industry. All who are interested should write to the Hon. Secretary of Agriculture, Washington, D. C.

General Farm Notes.

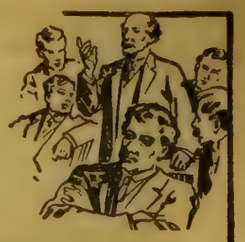
Pennsylvania raised but 70,597,000 bushels of corn in the year 1911, but led the United States with an average of 44½ bushels to the number of acres planted.

The average weight per measured bushel of this year's crop of wheat is 57.8 pounds, against 58.5 pounds in 1910 and 57.6 pounds the ten-year average.

The average weight of oats per measured bushel is 31.1 pounds, against 32.7 pounds in 1910 and 31.2 pounds the ten-year average.

It is reported from Western Kansas that in the short-grass country the Russian thistle is a boon to stockmen. By cutting the thistles before the thorns or spines develop they make good feed.

New Times, New Things



The old fertilizer formulas are giving way to the new. At every farmers' meeting one subject should be the fertilizer formula that will furnish a balanced ration to the crop and keep up the fertility of the soil. To do this the fertilizer should contain at least as much

POTASH

as Phosphoric Acid. Our note book has condensed facts essential in farmers' meetings and plenty of space to record the new things that you hear. Let us send one to you before your Institute meets.

A supply of these is furnished by request to every institute held in several states. We will be glad to send a supply delivered free of charge to every Institute, Grange or Farmers' Club Officer on request. It contains no advertising matter.

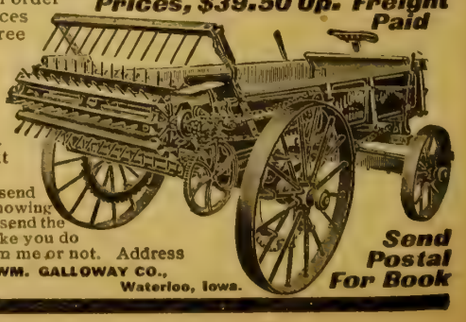
93 Nassau Street, New York

CHAMPION SHROPSHIRE RAM at Ohio, Indiana, New York and Michigan State Fairs of 1911. Sold for $600, the record price for a sheep of the English mutton breeds. Owned and exhibited by Geo. McKerrow & Sons, Pewaukee, Wis. This is a sample of the pictures of champions collected for publication in the Book of Live Stock Champions mentioned on page 8 of this paper.

Let Galloway Save You $25.00 to $40.00 on a Manure Spreader

If you'll send a postal for my Special 1911 Spreader Offer, I believe we can make a deal. If we do, you'll save at least $25.00, perhaps $40.00, according to size and style you want. And you get a free trial and a guarantee that would break me if my Spreader wasn't *right*. I know I *have* to go *high on quality* and *low on price*, because I sell by mail. The other fellow is right on the ground to *persuade* you personally. My *quality* and price has to do all *my* persuading. Let me try it. Our capacity is 42,000 spreaders this year in order to quote the low prices I do—30 to 365 days free trial and my long time binding guarantee in writing. $25.00 to $40.00 saved—think of it! That's fair, isn't it? If you can think of a fairer proposition than I'll make you, I'll print it in my next advertisement.

Prices, $39.50 Up. Freight Paid



Get your pencil or pen right now, and send me a postal for my big Spreader Book, showing 5 styles and sizes, from $39.50 up. I'll send the book free and a proposition that will make you do some tall thinking whether you buy from me or not. Address

WM. GALLOWAY, Pres., THE WM. GALLOWAY CO., 1289 Galloway Sta., Waterloo, Iowa.

Foreign Crop Conditions.

The United States Department of Agriculture has received the following cablegram, dated November 18, 1911, from the International Institute of Agriculture, Rome, Italy, regarding areas and production, this year, of the crops specified in the principal producing countries of the Northern Hemisphere, and in the countries named, and the conditions attending the sowing and germination of winter cereal crops in the Northern Hemisphere:

"All wheat. — Single numerical statement of production 100.2 per cent. of last year's production, indicating a total production of 1,637,000,000 cwt., or 3,055,732,000 bushels of 60 pounds.

All rye.—93 per cent. of last year's production, indicating a total production of 662,000,000 cwt., or 1,324,000,000 bushels of 56 pounds.

Barley.—99.4 per cent. of last year's production, indicating a total production of 518,000,000 cwt., or 1,208,667,000 bushels of 48 pounds.

Oats.—90.8 per cent. of last year's production, indicating a total production of 967,000,000 cwt., or 3,284,500,000 bushels of 32 pounds.

Corn.—The estimated production in Hungary is 62,032,000 cwt., or 138,064,000 bushels of 56 pounds.

Rice.—The area probably harvested in British India is 52,792,000 acres.

Cotton. — The estimated area planted in British India is 17,331,000 acres.

All wheat.—The estimated area sown in Argentina is 17,043,000 acres; in Chili, 1,853,000 acres; and in Australia 7,905,000 acres.

Oats.—The estimated area sown in Argentina is 2,547,000 acres; and in Australia 689,000 acres.

Winter cereal crops.—The sowing is approaching completion; the work preparatory to sowing, and the sowing, was accomplished under good conditions, and germination is regular."

Approved: W. M. Hays, Acting Secretary, November 20th, 1911.

Up-to-date Machinery.

"Departmental reports from our field men show that during the last year more up-to-date and modern machinery has been purchased and installed on the farm than during any previous ten years."

So declared Secretary Wilson in discussing the results of a recent investigation of the Department as to the extent the farmers were using modern tools and machinery for farm equipment.

The statement of Secretary Wilson is based on personal observation and by reports of sales of farm implements by the large dealers throughout the country. The Department has been urging the use of the latest tools and machinery for agricultural purposes, and reports show that not only such improved implements as disc plows, two-horse cultivators, disc harrows, twenty-foot drag harrows, and two-horse steel-beam plows, are used, but the latest improved gasoline plows are in considerable demand.

"The most striking feature of our reports is that they show that the sales to Southern farmers have been enormous and greater than in any other section of the country."

A report from Arkansas is a fair sample of the letters received by the Department: "Regarding your request for a word from us as dealers: We have sold more sectional harrows, divers cultivators, fourteen-tooth harrows and side harrow attachments for cultivators in the two years we have been pressing the farm-demonstration work in this county than we did during the whole of eighteen years we have been selling agricultural implements here. We are selling more and better breaking plows; in fact, a higher grade of agricultural implements than before."

Skill in Selling Crops.

Many a farmer remains poor because he never learns how to sell his crops to advantage. It is not necessary for a farmer to get high prices to do well, but it is necessary for him to get fair prices. What some farmers gain in skill in growing crops they lose in lack of skill in disposing of them. The sharp fellows from the commission houses in the cities are looking always for the men that are unsophisticated in the methods of disposing of crops.

One buyer of apples was boasting to some other men of the good bargain he made in the purchase of the apples in a small apple orchard. It was a year of short apple crop, but the owner of the orchard in question did not know that. He and his neighbors had good crops on their small orchards, and he imagined the whole country was full of apples. He evidently was not a reader of agricultural papers or he would have known more about the prospect for the apple crop. The buyer in question rode up to the farm house and casually mentioned that he was a buyer for a fruit commission house. But he said apples were so plentiful that he could not afford to give much for them. The apple grower became anxious to dispose of his, but the buyer thought he did not want to buy any more. However, if the farmer was willing to take ten cents a bushel for the apples on the trees, the buyer to do the picking at his own expense, he would take them. The farmer regarded this as his last chance and sold the crop. Result, the buyer ahead on the deal, and the farmer, who had nurtured his trees for years, the recipient of an absurdly low price for his produce.

More attention needs to be paid to the marketing of all kinds of farm produce. We have at the present time a good deal of help from numerous Experiment Stations on how to grow produce of various kinds, but as yet very little or no help has been given in the selling of what the farmer raises, and that is half of the game.

We have all kinds of conventions on how to produce, but very little is said on how to market. Science has not yet stepped in to do much in this important field.

As long as this condition exists so long will the farmers here and there be plundered by the men that are looking for bargains, and are not too conscientious to take advantage of a man that does not know as much about the market conditions as they do. The buyers that make a business of buying are always fully informed of the market conditions of the country at large. If there is a short crop, they know it, but always talk a big crop to the men from whom they are trying to buy.

Skill in marketing has many phases. One kind of skill is to know what the market conditions really are. Another kind of skill is shown in the form of marketing produce. Another kind of skill manifests itself in an ability to hold a crop till a fair price can be obtained for it.

A lot of 10,000 pounds of poor butter came to a big city market and was sold on the open board as "grease." The buyer said to the writer of this that ten per cent. would prove to be good butter and could be resold at the price of good butter. Good butter was sold at grease prices because the maker did not know how to protect himself from such a deal.

The Howard Watch

GIVE him a HOWARD for Christmas.

It means more to a man than any other thing you could choose for him.

It is a solid investment for his convenience and service. It will serve him as long as he lives—and then have a substantial value.

It is a compliment to his character—a recognition of him as the kind of man who will appreciate such a timepiece.

The HOWARD has a class and quality that no other watch in the world can equal.

It has a history—it has associations.

It was the first American watch—brought out in 1842.

It was the first watch in the world *adjusted to modern conditions.*

For sixty-nine years it has been the favored timepiece with the leaders of American affairs—and with well-to-do private citizens.

A HOWARD Watch is always worth what you pay for it.

The price of each watch—from the 17-jewel (*double roller*) in a Crescent or Boss gold-filled case at $40 to the 23-jewel in a 14K solid gold case at $150—is fixed at the factory and a printed ticket attached.

Find the HOWARD jeweler in your town. When a man makes a permanent investment like the purchase of a HOWARD Watch he naturally wants to *see* what he is buying—he wants to get the dealer's expert advice. The HOWARD Watch is sold only by legitimate jewelers—and not every jeweler can sell you a HOWARD. The jeweler who can is a representative merchant—a good man to know.

Send us your name on a postal card and we will send you—FREE—our pamphlet, THE STORY OF EDWARD HOWARD AND THE FIRST AMERICAN WATCH. It is a chapter of History that every man and boy in this country should read.

E. HOWARD WATCH WORKS

Dept. No. 122, Boston, Mass.

The Very Simple Boy.

A rather simple-looking lad halted before a blacksmith's shop on his way home from school and eyed the doings of the proprietor with much interest.

The brawny smith, dissatisfied with the boy's curiosity, held a piece of red-hot iron suddenly under the youngster's nose, hoping to make him beat a hasty retreat.

"If you'll give me half a dollar I'll lick it," said the lad.

The smith took from his pocket half a dollar and held it out.

The simple-looking youngster took the coin, licked it, dropped it in his pocket and slowly walked away whistling.—Sunday Magazine.

Maine leads the United States in potato growing with an average of 190 bushels per acre, but New York state with larger acreage leads in the production of potatoes.

The St. Louis produce market is being supplied with cauliflower from Western New York, Long Island and the state of California.

FRAZIER'S DISTEMPER CURE

Most for Money

$1.00 size bottle of Frazier's Distemper Cure holds 8 ounces (other so-called distemper cures hold 6 ounces). We authorize your druggist to refund the purchase price if "Frazier's" fails to give satisfaction in all cases of Distemper, Influenza, Coughs, Colds, Shipping Fever, Catarrhal Fever and all nose and throat diseases. Two sizes, 50 cts. and $1.00. Send for free horse booklet.

Entered at Postoffice at St. Louis, Mo., as second-class mail matter in January, 1901.

Subscription Price in the United States, 50 cents a year, or three years for one dollar.
Office of Publication, 3550 Vista avenue, St. Louis, Mo. Bell Phone: Grand 400.

Our Industrial Policy.

The National Farmer and Stock Grower is in favor of the United States collecting a reasonable range of customs duties upon all foreign farm products and all foreign manufactured goods admitted into the United States from foreign countries, said duties to be applied to the support of the national government.

Every farmer in the United States is taxed by his county and by the state, and he pays indirect taxation for the support of the federal government. We believe that the advantages of our own markets belong to the citizens of the United States, and that all foreign farm productions should pay a duty at the front door as the goods are admitted. By collecting these customs duties the United States government receives the income that is necessary and must be collected for the public service, and the farmer has a very moderate degree of what is called protection. In times of scarcity caused by drouth or other unavoidable influences the foreign farm productions can come in on a fair basis, and in times of abundance the country thrives better without them.

We believe the farmer as a producer outranks all other people; the manufacturer is next; but without the farmers' products the manufacturer would have to shut his doors. Legislation against the farming interest is the height of folly, and special discrimination against the farmer is a political crime. It will cause more poverty in the cities than most people imagine. The non-producing, so-called consumers in cities will be the first to find it out.

During Thanksgiving week, the rabbits shipped to the St. Louis market brought $1.00 per dozen, and jack rabbits $1.50 per dozen. Opossum sold at 15 to 25 cents each.

The Buttercup Cream Separator is advertised on page 8 in the Waterloo Gasoline Engine advertisement. Don't fail to read about it and write to the Waterloo Gasoline Engine Company, 228 West Third Ave., Waterloo, Iowa.

THE BOOK OF LIVE STOCK CHAMPIONS.

We are actively engaged in preparing the new edition of the Book of Live Stock Champions for publication.

We have published several editions of this valuable book and intend to make the new edition far superior to all others. To this end we have waited for the list of champions at the International Live Stock Exposition of 1911.

We already have illustrations of seven hundred different champions, and in each case the picture occupies a half page of the book. We are now gathering the remaining three hundred pictures.

Each illustration is a special demi-tone engraving from a photograph taken from life. No drawings or fancy pictures appear in the book.

First and second-prize winners are not eligible unless they have also won championship prizes. It is a Book of Live Stock Champions, not simply a book of ordinary prize winners.

Champions of the beef cattle breeds are admitted by their showring honors. We have enough pictures of beef cattle champions to make a book by themselves.

Dairy cattle are admitted by showring honors, also by officially tested dairy records. We have the finest selection of dairy cattle in the world.

Dairy cattle are admitted by showring honors. Trotters and pacers are admitted on track records or as noted sires. We have all the famous horses, going back thirty years.

Thoroughbred horses are admitted on account of track honors or as sire or dam of champions. Saddle horses and ponies are admitted as championship winners.

Jacks and jennets, also mules, are admitted on show-ring or market honors.

Hogs, sheep and Angora goats are admitted as winners of sweepstakes prizes at State, National or International Fairs.

Numbers of famous car-loads of cattle, horses and sheep which have won show-ring and market honors will be published in the book.

Every live stock champion is entitled to entry providing a first-class photograph can be obtained. We do not intend to disfigure the book with poor pictures. It is better to leave out the poor pictures than to apologize for an inferior book.

A number of live stock champions appear in this edition of The National Farmer and Stock Grower to show the character of the Book of Live Stock Champions.

We do not charge the owner for publication of his animal, but we do ask his co-operation in furnishing first-class photographs and the records of said animals.

It is worth something to a publisher to know how many books to print and bind. We therefore offer the first ten thousand copies of this edition at one dollar per copy, including a two-year subscription to The National Farmer and Stock Grower. The first ten thousand copies will be handsomely printed and elegantly bound in red cloth, with gilt title. This is an extraordinary offer. After publication the cloth-bound copies will cost two dollars a copy without the subscription. This is the last time the Book of Live Stock Champions will be offered before publication.

HERE IS A SUBSCRIPTION BLANK.

Hale Publishing Co., 3550 Vista Ave., St. Louis, Mo.:

Gentlemen:—Herewith plase find One Dollar to pay for two-years' subscription to The National Farmer and Stock Grower, for which please give me credit. You will please send me as a Souvenir Supplement, post free, safe delivery guaranteed, one copy of the Book of Live Stock Champions, cloth-bound edition of 1912, immediately after publication.

ROBERTS, Room 7, 160 West 119th St., New York.**

STOCK AND DAIRY BARN

Recently Constructed on the Farm of Dr. David Roberts, near Waukesha, Wis.

Our readers ought to be very well acquainted with Dr. David Roberts, D. V. S., who has an office at Waukesha, Wis., for the sale of his live stock remedies which are advertised on page 17. He is the Dr. Roberts we read of as Veterinarian of the state of Wisconsin and of the National Dairy Show.

Dr. Roberts is also a farmer, a dairyman and a live stock breeder. He recently invited the readers of The National Farmer and Stock Grower to attend a barn warming at his place and partake of his hospitality. As we could not all attend, he has kindly sent us a full description of the barn, also photographs, for which we are very thankful.

Dr. David Roberts' farm is located six miles east of Waukesha, twelve miles west of Milwaukee, on the Chicago and Northwestern Railroad and Milwaukee-Waukesha Interurban Car Line, eighty miles north of Chicago.

The dairy barn is located 500 feet from the Northwestern Depot and Electric Line Station.

The size of the barn is 36 feet by 115 feet, feed rooms and silos attached, making all 147 feet long.

The barn is of plank construction, balloon frame; foundation wall of broken hard-heads or field stone, and extends five feet above grade line.

The ceiling and inside of basement down to stone foundation is of yellow pine ceiling.

There is a driveway through the entire length of barn, making it possible to remove litter by team if desired.

The barn is equipped with a double overhead track and litter carrier.

In the east end of barn, on each side of center driveway, is a room 6 feet by 8 feet; one used for weighing milk, with lavatory and running water; the other, a hallway to second floor and coat room. Also a stairway in the addition at west end of barn.

Seventeen windows on each side of barn, size 30 by 54; size of glass, 6 by 12 inches. Windows double glazed with air space between glass, making them frost-proof. Windows rest on top of stone wall.

Windows hinged at bottom, permitting them to tip inward and are held at top by two eight-inch chains.

First floor equipped for housing sixty head of cattle; stanchions for forty-four head; cattle facing out; three bull stalls, and the remainder calf pens.

All floors under cattle built of cork brick with cement gutters and curbs and galvanized partitioned mangers.

The bottom of mangers is of cement and connected with water system, making it convenient for watering stock.

Gutters and watering mangers are connected with sewer.

The stanchions, bull and calf pens and partitions between cows are built of tubular iron pipes, making it more sanitary.

Bull pens as well as calf pens are provided with stanchions. Bull pens are equipped with metal spring mangers.

Fresh air is taken in through fourteen registers that are placed just above stone wall on outside of building. The air passes upward and enters four feet higher through fourteen adjustable registers near ceiling, distributing fresh air in front of cattle.

Foul air is taken from floor at both ends of barn by four chutes, size 18 by 24 inches each, and running directly out through roof and capped with galvanized ventilators. The chutes are built of double matched flooring with building paper in between, making them frost-proof.

The barn equipment includes hay carrier.

The barn is lighted by individual electric lighting plant.

In west end of hay loft are two large grain bins.

In building connecting main barn with silos on first floor are two feed rooms; on second floor are two rooms for storing and mixing feed, and hoppers connected with chutes to the first floor.

Two silos, of brick construction, 16 feet by 35 feet, with shingle roof, connected to west end of barn.

The barn and silos are rodded with woven copper-wire lightning-rods, with numerous points.

Milk house, one story high, located just east of dairy barn; size, 19 feet by 30 feet. East half of this building used for office purposes. West half of building equipped with cement floors, cement water tank, etc.

A gasoline engine is used for pumping water, running cream separator and dynamo which charges battery for lighting the buildings.

The water supply is from a well drilled into the rock and is located inside of milk house, and is equipped with a force pump and water system, which forces water to all parts of the buildings.

The feed to be stored in grain bins on second floor is to be hauled in wagons on driveway in the center of the barn direct under the feed bins, and with rope tackle to be drawn through straw chute to a point above the grain bins and then swung to the trap door in the center of the top of each bin. In this way it can be emptied into the center of the bins with the least possible work.

To make the exterior of the barn look right architecturally the hay loft is so high that it will accommodate a large amount of fodder.

The bull and calf pens are at one end of the barn, three bull pens on one side and opposite them the three calf pens. The cattle face out. All the cow stalls are 3 feet 4 inches wide. On one side of the barn they are 4 feet 8 inches long and on the other side 4 feet 10 inches long. The bottom of the mangers is 2 inches higher than the floor of the stalls. The sides of the gutters next to the stalls are 10 inches deep and next to the center driveway 4 inches deep.

In further explanation, in response to a letter of inquiry, Dr. Roberts states as follows:

"The stock farm contains one hundred acres of land. We sell half of our dairy product in the shape of whole milk to the Gridley Dairy Company, Milwaukee, Wis. The other half we separate and make butter and feed the skim milk to calves and pigs on the farm. We have a delivery wagon which is used in delivering the dairy products to the railroad station, which is within five hundred feet of the dairy barn.

"The cost of the barn is approximately $6,500. The monthly pay-roll should not exceed $100 so long as the stock on this place can be handled by two men. The barn now contains about thirty-five head of cows and young stock, and for the present milk but fifteen head. We do not use milking machines for the reason that I have seen so many of them discontinued.

"The milk is cooled in eight-gallon cans in a large cement vat. The milk house is so arranged and equipped with a gasoline engine which pumps water from a deep well drilled into the rock into this vat. It also runs a dynamo and the cream separator during milking hours. In this manner the expense of pumping water, lighting the barn and separating the milk is performed at practically the same expense as it requires to operate one.

"As the milk cans are placed in the vat to be cooled they very soon warm the water, so that when the cans are as cool as they should be, the water has become sufficiently warmed for the cattle, and by turning a faucet this water is turned into the cement mangers of the cattle. In this manner each cow is enabled to warm her own drinking water at practically no expense.

"It would require from three to four men to properly handle this barn filled with cattle if forty-four head were milking. The dynamo does not run excepting when water is pumped or cream is separated. We arrange to do the water pumping and the separating of cream during the milking hours, so that the dynamo furnishes light at the same time.

"When the dynamo is not running, and we only run it during milking hours, the lights are taken off the storage batteries; but if the dynamo is run during the daytime these batteries are recharged.

"The average dairy farmer owning one hundred acres of good land can afford to build a barn of similar construction, even when he is netting but twelve to fourteen cents per gallon for his milk.

"I have at the present time twenty head of pure-bred Holsteins and fifteen head of pure-bred Ayrshires. I sell bulls to breeders but no calves to butchers. I endeavor to raise all of my pure-bred heifers and give them official records. I have recently given a two-year-old Holstein heifer an eighteen-pound record in seven days. Am just starting a bunch of Holstein heifers in a seven-day test, also a yearly test."

Exterior view of Dr. David Roberts' barn near Waukesha, Wis. The photograph was taken on the day of the barn warming, when the subscribers of The National Farmer and Stock Grower were invited to attend.

Interior of dairy barn owned by Dr. David Roberts Veterinary Company, six miles east of Waukesha and twelve miles west of Milwaukee, Wis., with stanchions for forty-four dairy cows. See article and description.

BETTER CISTERNS --- WHY?

To protect the health of every member of your family. Medical experts have pronounced the brick and wood cistern to be the cause of many cases of sickness.

A Cistern to be perfectly sanitary must be made so tight that no impurities can possibly get through. This can only be accomplished by using the Steel Cistern.

STEEL ROOFING Of All Kinds,
Stock and Storage Tanks, Wagon Tanks, Etc.

SAVE MONEY THIS WINTER

Your horse will relish his feed,—get every ounce of benefit from it and keep in better condition this Winter, if stomach, blood and bowels are kept in good order with

Pratts Animal Regulator

It is a sure preventive of constipation due to dry fodder and lack of exercise. It is a necessity for keeping horses and cattle right up to the mark. Mix it every day in their feed and you won't have weak, rundown animals.

There is not a month in the year that you will not find Pratts Animal Regulator making money for you, both in saving feed and in increasing the efficiency of your horses, cows and hogs.

Satisfaction Guaranteed or Money Back

You do not risk a cent when you buy Pratts Animal Regulator, the 40 year old conditioner, tonic and digestive. If you tell your dealer that you are dissatisfied, he will promptly refund purchase price without a question. Start saving *now.*

25 lb. pails $3.50; also in smaller packages and 100 pound bags.

If your dealer can't supply you, write us. Ask for our valuable FREE Live Stock Book.

PRATT FOOD CO., Dept. 54, Philadelphia, Pa.

WISDOM FROM INDIANA.

A Cow Census the First Necessity in Starting a Creamery.

The successful organization of a co-operative creamery should not start with the selling of stock, but with an accurate cow census, writes H. C. Mills, of Purdue Experiment Station. It should be determined by those interested in the success of the creamery how many cows can be depended upon to furnish milk for the creamery when started. The creamery should not be started unless between 350 and 400 dairy cows are available.

The location of the community with respect to large dairy markets should be considered. If located within shipping distance of city milk plants or large private creameries, the success of the co-operative creamery may be doubtful. In fact, the co-operative creamery is really unnecessary in such cases because the competition of two private creameries will insure the highest price possible.

If a sufficient number of cows are available and the creamery seems to be needed, the next step is the selling of the stock. A dairymen's picnic or meeting may be held and some successful farmers or members of the Dairy Department of the Experiment Station asked to explain the advantages of the creamery and of dairy farming. At this meeting a committee may be appointed for selling stock. When sufficient stock is sold, a meeting of stockholders may be held and officers elected. The officers should be elected because of business ability along dairy lines.

The manager should be a man knowing something about creamery operation, if possible, and in a position to give much of his time to creamery work. The manager should be allowed to visit other creameries at the company's expense and learn how they are run.

The buttermaker should next be secured, and much depends upon his selection. He can best be secured through the assistance of a dairy school. An efficient man should be secured, although a higher salary must be paid than for some one with fewer recommendations. The buttermaker may assist in the planning and building of the creamery and the purchasing of the creamery machinery.

Co-operation of stockholders and patrons of the creamery should be secured by occasional creamery picnics and dairy meetings. Every stockholder should be made to feel that his help is needed and that a part of the creamery belongs to him. The success of the creamery depends upon hearty co-operation, which can only be secured where the farming community is composed of courteous, neighborly people.

The Live Stock Census.

Many people cry aloud for immediate statistics to find afterwards that all statistics require time to collect and to publish. The United States Census of Live Stock for the year 1910 reached us early compared with the time usually required; but for all that, there are lambs enumerated that were unborn when the census was taken that are now yearlings; thirty millions of pigs and hogs have been marketed since the census was taken and replaced by a new crop of pigs, and the cattle and horse ages have all advanced a full year, if the animals are still living, and the figures that are of the most value are the totals.

Last month we published the summary as written by the census officials; this month we show comparisons of the last two enumerations, also giving the total population in each census year. This is handy to be cut out and carried in a pocketbook.

The Live Stock Census.

Census of	June 1, 1900.	April 15, 1910.
Dairy cows	17,139,674	20,580,845
Other cattle	50,682,662	40,644,946
Calves not counted	.....	10,000,000
Total cattle	67,822,336	71,225,791
Horses enumerated	18,280,007	19,731,060
Colts not counted	.....	3,000,000
Total horses	18,280,007	22,731,060
Mules enumerated	3,271,121	4,183,572
Colts not counted	.....	500,000
Total mules	3,271,121	4,683,572
Jacks and jennets	95,603	101,392
Sheep and lambs	61,605,811	51,809,068
Lambs not counted	.....	10,000,000
Total sheep and lambs	61,605,811	61,809,068
Swine enumerated	62,876,108	58,000,632
Pigs not counted	.....	10,000,000
Total swine	62,876,108	68,000,632
Goats	1,871,252	2,798,160
Population	75,994,575	91,972,266

Whenever these figures are considered, it must be remembered that the 1910 enumeration is short the calves, lambs, colts and pigs that were dropped during the period of forty-five days between April 15th and June 30th. In the previous census they were counted up to June 30th.

The reason why the date of enumeration was changed has not been mentioned in our hearing, but we have already noticed that the figures of 1910 are misused. For instance, sheep are entitled to a credit of lambs dropped between April 15th and June 1st, and yet the census comparisons are made by politicians without explanation given by the Census Bureau. Our figures as given will enable a stockman to study the census enumeration in connection with the census.

Increase in Dairy Cows.

Wherever there is a city growing up there will be found an increase in the number of dairy cows for the simple reason that it requires more cows to satisfy the demand for milk and cream.

It is not surprising, then, that a gain of 20 per cent. has taken place in the number of dairy cows in the United States during the ten years from 1900 to 1910, because there has also been an increase of 21 per cent. in the population. In the year 1900 the number of milch cows was 17,139,674, and the population of continental United States was 75,994,575, and in the year 1910 the number of milch cows was increased to 20,580,845, and the population to 91,972,266. At the same rate of progression there will be 24,697,004 dairy cows in the year 1920, and 110,366,719 people in continental United States.

U.S. The United States Cream Separator for 1912 U.S.

Embodies Four Separator Requisites to a Degree Unequaled by any other Cream Separator

Close Skimming: The U. S. holds the World's skimming record — an ironclad fact.

Easy Running: The U. S. is now the easiest running Separator on the market.

Easy Washing: Our new patented skimming device is washed and made perfectly sanitary in less time than any other manufactured.

Durability: The same sterling workmanship which has made the U. S. famous for long life with fewest repairs.

The United States Cream Separator for 1912 is sold at the lowest price at which an *efficient Separator* can be sold — and this is the only basis of true economy.

The Slaughtering Surprise.

According to the Census of Manufactures, which takes place every five years, the number of packing plants in the United States increased from 1,221 in the year 1904 to 1,641 in the year 1909. The census authorities specially mention that these are all distinctively wholesale plants and does not represent the small slaughterers who are retailers.

In the five years from 1904 to 1909 the number of establishments increased 34 per cent.; capital invested, 59 per cent.; the gross value of products, 49 per cent.; cost of materials, 48 per cent.; value added by manufacture, 53 per cent.; average number of wage earners employed during the year, 19 per cent.; amount paid for wages, 26 per cent.; number of salaried officials and clerks, 43 per cent.; amount paid in salaries, 49 per cent.; miscellaneous expenses, 38 per cent.; primary horse power, 75 per cent.

The actual increase in wholesale slaughtering establishments amounts to eighty a year for five years. The census has given us the grand total but not the details. We cannot make a list of them by states from census information, neither can a complete list be had from the Department of Agriculture, because there are some wholesale slaughterers that do not have government inspection, for the reason they are not engaged in interstate trade. The meat-packing industry is surely expanding and the increase in the number of wholesale slaughtering establishments is quite a surprise.

Holstein Cattle Averages.

The average production of seventy-two Holstein cows and heifers being tested officially for seven days for admission to the advanced registry was 55.3 pounds of milk, which is equal to 26.3 quarts per day, and the butter-fat content amounts to 15.37 pounds of commercial butter per week. The average butter-fat content was 3.40 per cent.

Another lot of sixty-four Holstein cows and heifers being tested 325 consecutive days gave a total of 821,052.2 pounds of milk, containing 28,653.83 pounds of butter-fat, thus showing an average of 3.49 per cent. fat. The average production for each animal during the average period of 325 days was 12,828.9 pounds milk, containing 447.72 pounds of butter-fat, equivalent to 522.34 pounds of he best commercial butter. The average production per day for each animal for the entire test was 39.47 pounds milk, or 1.6 pounds of commercial butter. In this herd, in addition to the milk and fat, nineteen animals were tested for total solids. These nineteen animals produced 271,386.8 pounds milk, containing 9,479.72 pounds of butter-fat and 32,756.35 pounds of solids; the average production for each animal being 14,283.5 pounds milk, containing 498.93 pounds of butter-fat and 1,724.02 pounds of solids. The average per cent. of fat was 3.49, and the average per cent. total solids, 12.07; the proportion of fat to the solids not fat being as 1 to 2.46. That is, these cows produced 2.46 pounds of digestible food other than fat for every pound of fat produced.

Clipping Machines at Dairy Show.

At the Dairy Show in Chicago last month it was interesting to note the number of clipping machines used. No less than a dozen of these machines were in operation part of the time. The neat, clean and trim appearance of the cattle after clipping contrasted forcibly with the long and more or less unkept appearance of those not clipped. Clipping as a custom seems to be growing in favor rapidly.

A Troublesome Law.

The butter dealers of Boston are in trouble. It is reported that the Internal Revenue Commissioner is going through the storage houses to ascertain how much butter in storage contains over 16 per cent. of moisture. Under the law, such butter is classed as adulterated. Furthermore, as the law now reads, every dealer found handling butter with an excess of moisture is required to take out a license for handling adulterated butter, and also pay a tax of 10 cents per pound. Dealers claim that they should not be held responsible for excess of moisture in their consignments, which are sent to them as first-class butter, and that when the excess moisture is found, the makers should be held responsible and pay the penalty.

Dairy and Creamery Notes.

In the state of Iowa, 468 creameries were furnished milk by 110,918 patrons. The butter output was 96,695,584 pounds. The cheese sales amounted to 224,424 pounds, and ice cream to 250,000 gallons.

At the Texas Try-State Fair, the grand champion butter exhibit of the show was made by A. A. Low, of Dallas, score 95¾; this was classed as dairy butter. The sweepstakes creamery butter in twenty-six-pound tubs was exhibited by J. R. Donnell, of Belton, score 95½. The award for best butter in ten-pound tubs went to Edward Johnson, of Falfurrias.

At the last session of the Tulare County Dairymen's Association of California it was decided by the managers of the various co-operative creameries throughout that section that a grading system for cream will be adopted. There will be three classes, the divisions being based on the flavor and quality of the cream, a difference of four to five cents being made in the price returned per pound of fat in first and third grade.

At the New York Land Show, a giant cheese made by H. A. Rees, of Lowville, N. Y., was on exhibition. It weighed 6,296 pounds and required 62,285 pounds of milk to make it.

On November 15th, at New York City, the shippers in what is called the 26-cent freight zone, the milk producers, were receiving four cents a quart net and the cost delivered in New York City was $1.91 per forty-quart can.

On Friday, November 10th, at New York City, the best butter "creamery specials" touched high-water mark at 35 cents a pound wholesale, being 1½ cents a pound higher than the best price of last year.

At the middle of November this year, in New York City, the stock of butter in cold storage was 154,000 packages. Last year, at the same time, 299,000 packages, and the year before 200,000 packages.

"There is one feature of the poultry business that should appeal to more farmers than it does, which is, poultry yields an all-year-round income. The same may be said of the dairy business. Both dairying and poultry raising are always in season, so far as income is concerned."—Connecticut Farmer.

In the state of Wyoming 1,133,302 acres are irrigated out of a total of 1,256,160 acres in improved farms.

Keep Your Soil at Top Notch Producing Power

THE utmost care and attention given to plowing, harrowing, seeding, cultivating, and harvesting cannot make up for lack of fertilizer, which is necessary to keep the soil at the top-notch of its producing power. In fact, fertilizing is of first importance.

Of all fertilizers, manure is best, because it replaces just the elements the crops have extracted, and is most economical.

But to get its full value, manure must be spread evenly, in proper quantities. Only a good manure spreader will spread it this way. Get an I H C if you want to be sure of the greatest value for your money.

I H C Manure Spreaders

Corn King, Cloverleaf, Kemp 20th Century

are simple, strong, and perfect in design and construction. They are light in draft and durable. Here are some of the features and advantages that make I H C spreaders the best investment for you.

The method of transmitting power from the wheels to the beater is simple and direct. There are no unnecessary parts to wear. The beater is large in diameter, and the teeth are long, square, and chisel-pointed, so that the manure is thoroughly pulverized and thrown out before it wedges against the bars, thus reducing the draft.

The apron is supported by steel rollers, and the slats are placed close together, so that manure does not sift down and interfere with the movement of the rollers. The steel wheels have ample strength to carry many times the weight they will ever be called upon to bear. The rims are flanged inwardly to prevent cutting and rutting of meadows and accumulation of trash. There is no reach to prevent short turning.

I H C Manure Spreaders are made in several styles and sizes for field, orchard, and truck farm use. See the I H C local dealer for catalogues and complete information, or, write direct.

INTERNATIONAL HARVESTER COMPANY OF AMERICA
(Incorporated)

I H C Service Bureau

The Bureau is a clearing house for agricultural data. It aims to learn the best ways of doing things on the farm, and then distribute the information. Your individual experience may help others. Send your problems to the I H C Service Bureau.

"EVERYBODY"

Can Afford a Gasoline Engine With Galloway's New Low Prices

1½ HP $27.50

Other Prices in Proportion

You've never before heard of such startling values—I've never offered anything like them and you know full well that no one else has ever come anywhere near my regular prices. But this time I've a startling reason—*I want 10 men in every township in the county to own and operate a Galloway Engine*—I've decided to double my factory capacity by increasing the sales twice and sell two where I formerly sold one—this calls for unusual values—hence, the greatest offer I have ever made. I can save you from $25 to $300 on an engine according to the H. P. needed. It doesn't matter what sized engine you want I've got the one to fit your wants and do more work and better work at less actual cost than any other engine in the world. Write at once for full information of the Greatest Offer Ever Made To American Farmers—don't delay but send me your name and address now, before you do another thing. Let me prove to you in cold facts why I can put $25 to $300 in your pocket

FARM AND RANCH LANDS.

ALABAMA.—BARGAIN FOR QUICK SALE. Splendid place for truck, chickens, etc. Easy drive Birmingham, Ensley, Bessemer and Corey, on car line. Good five-room house, poultry and pigeon houses, etc.; city water, plenty fruit and shade trees. Easy living can be made off place. Price, $5,500.00; about $2,000.00 cash; balance easy. Address, **Owner,** Postoffice Box 691, Birmingham, Ala.

ARKANSAS.—For Sale: 1,200 acre stock farm, situated in Arkansas, 68 miles south of Memphis, on the Mississippi river, with landing on the place; several houses and commissary. This is counted by cattlemen as being one of the best all-round stock farms in the South. We have 700 acres of open land, about 400 acres in grass, balance in corn, cotton, etc., the land being all level and very rich. There is a small lake, about 100 feet wide and about one-fourth mile long, on one side of this tract. There is heavy cane all around the open land, which gives good protection in winter and makes excellent winter browsing. A better stock farm could not be found. We are offering this place at a sacrifice price of $20.00 per acre. Address, **St. John & Olcott (Owners),** 46 Porter Building, Memphis, Tenn.

ARKANSAS.—Lands on the Cotton Belt Route in Arkansas are offered for sale at remarkably low prices. All farmers and "intend-to-be farmers" should post themselves. Write for free books showing the best locations. Address, **E. W. LaBeaume,** G. P. & T. A., 1419 Pierce Bldg., St. Louis, Mo.

ARKANSAS.—LOOK! LOOK! BAXTER COUNTY, ARKANSAS. Thirty-five improved farms, $10 to $25 per acre. Write for Land List and Literature. **T. G. Higgins Land Company,** Box 335, Cotter, Ark.

ARKANSAS.—Rich bottom farm, 524 acres, 300 in cultivation; ten houses; rents for $6 acre. Price, $25 acre. Terms. **Ross-Moore,** Searcy, Ark.

ARKANSAS.—SOUTHEAST ARKANSAS is the best farming section of the state. I have for sale several good places near Eudora, in Chicot county. Owing to age and ill-health of my wife, I will sell my property at bargains. Address, **Dr. S. A. Scott,** Box 99, Eudora, Ark.

FREE Literature will be sent to anyone interested in the wonderful Sacramento Valley, the richest valley in the world. Unlimited opportunities. Thousands of acres available at right prices. The place for the man wanting a home in the finest climate on earth. No lands for sale; organized to give reliable information. Sacramento Valley Development Ass'n. SACRAMENTO. **California**

FLORIDA FARM SACRIFICE.

To close estate at once I must sacrifice beautiful 26-acre Florida home, six-room cottage, modern improvements, barn, outhouses, all necessary live stock, poultry, machinery and equipment. Will yield over $4,000 a year if properly cared for. Price complete, $1,500. Terms, $50 cash; $25 quarterly, if desired by responsible party. Possession March 1. **Owner, care of A. Jordan,** Glidden, Wisc.

TEXAS.—Many of the very best farms and farm lands are to be found on the line of the Cotton Belt Route in the state of Texas. A reference to that country will be found on page 2 of this paper. Send in your name and receive free books concerning the rich land bargains to be had on this line. Address, **E. W. LaBeaume,** 1419 Pierce Bldg., St. Louis. Mo.

To Buy, Sell or Exchange Property address **Northwestern Business Agency, Minneapolis, Minn.**

W. F. ALLEN,
116 Market Street, Salisbury, Md.

BARON VOUCHER—First-prize aged Clydesdale stallion at Minnesota State Fair of 1911. Exhibited by John R. Campbell, Utica, Minn. "A nobly-crested horse with strong thighs and free, straight action." This is a sample picture of famous animals collected for publication in the Book of Live Stock Champions mentioned on page 8 of this paper.

One of Our Premiums.

Mr. I. L. Haile, of Linville, La., is a regular prize winner with corn raised by himself from seed furnished by The National Farmer and Stock Grower as a subscription premium. Last year he won the sweepstakes prize, but this year he only won a second. We paid him $10.00, according to our advertised proposition.

Eastern cabbage is selling on the St. Louis market at $28 to $32 per ton.

PICADOR—A famous Percheron stallion. Winner in many contests. Owned by Oaklawn Farm, Wayne, Ill. This is a sample of the pictures of famous animals collected for publication in the Book of Live Stock Champions mentioned on page 8 of this paper.

Hog Cholera Raging.

One would naturally suppose from the amount of work done to prevent the spread of hog cholera by the United States Department of Agriculture and the state veterinary authorities that outbreaks of hog cholera hereafter would be confined to small districts. It appears, however, that hog cholera has wider territory than before, and reports continue to be alarming.

In a crisis such as this every man who raises hogs should exercise the most vigilant watchfulness and use every precaution to protect his herds from the contagion. Thousands of farmers are to-day keeping their hogs in a fine, healthy condition by the simple and inexpensive expedient of mixing a little Merry War Lye with their hog feed and feeding it twice each day. If the hogs are on a dry ration, the Merry War Lye is mixed with the drinking water. The proper proportion for mixing is one tablespoonful of Merry War Lye to swill for ten hogs, or one-half can to a barrel of swill. In drinking water one-half can should be added to each barrel and thoroughly stirred. This not only prevents an outbreak of hog cholera in a herd by rendering the hogs immune to the contagion, but it also effectually kills hog worms, keeps the hogs on their feed and in prime condition and adds materially to their weight.

The use of Merry War Lye as a hog conditioner and as a preventive of hog cholera is by no means an experiment among hog raisers. It is manufactured by the E. Myers Lye Company, who state that it is prepared especially as a hog remedy by a process exclusively their own, and claim that it is the only powdered lye on the market that can be administered to hogs with absolute safety. Read the card on page 19 and write to E. Myers Lye Company, Dept. 22, St. Louis, Mo., asking for their booklet on hog raising.

The Corn Market Situation.

As we have intimated several times in The National Farmer and Stock Grower, the corn market is not so bad. To give an idea of the strengthening of corn prices we will give the closing cash prices at St. Louis each month of the year 1911: January, 44½ cents; February, 44 cents; March, 45½ to 46 cents; April, 52¾ cents; May, 52½ cents; June, 60 to 60½ cents; July, 60½ to 65 cents; August, 63¼ cents; September, 68½ cents; October, 72 cents; and on the last of November old No. 2 corn sold at 74 cents and new at 62½ and 63 cents. All these quotations have no particular bearing on the future. For the future we must look to Chicago.

The next option to be closed out is December. On June 30th, December corn was quoted at 60⅛ cents; July 31st, at 61½ cents; August 31st, at 63¼ cents; September 30th, at 64 cents; October 30th, at 63 cents; and on the last day of November at 63 cents. These figures compare favorably with 46½ cents, the price at which the December option was closed out last year.

Now we come to the May option, which closed out last year at 52½ cents. The May corn option of 1912 was quoted at 63¾ cents on July 31st, and on the last day of November the quotation was 64¼ cents, and the July option was quoted at the same price.

The reason corn is keeping up in price is because the hog is also a good buyer of corn. If the corn is slow sale in town the hog demand is active in the country.

Clay, Robinson & Company's LIVE STOCK REPORT WILL HELP YOU IN YOUR BUSINESS

Mr. F. E. Ertel, Haddam, Kan., was on the market recently and purchased three cars of Feeders through us. While there he took occasion to speak of the "Live Stock Report" as follows:

"I don't know where you got hold of my name, but the paper arrived at my house one day. I opened it and read one of the articles, a fine one, too, advising the immediate purchase of Feeders. I took the hint and went and bought. Everything happened just as predicted in the "Report." I decided that a paper like that was just the kind for men like me, and that the firm publishing it was worthy of my patronage. I consider "The Live Stock Report" the most valuable paper of the kind published in this country."

Above letter speaks for itself. The "Report" is a 16-page weekly ILLUSTRATED market and general stock paper published by us from Chicago, but covering all the leading markets. Any person who ships one or more cars of live stock per year can have the paper for merely the cost of postage, viz.: 50c. per year. We do not solicit nor desire subscriptions from persons who market no live stock, as the paper costs us three times the amount charged. In other words, subscribers receive $1.50 value for 50c. We guarantee to refund the price upon request of any subscriber who does not find the paper worth to him many times the amount paid. SEND YOUR NAME AND ADDRESS TODAY, WITH 50 CENTS, AND RECEIVE THE PAPER FOR 12 MONTHS.

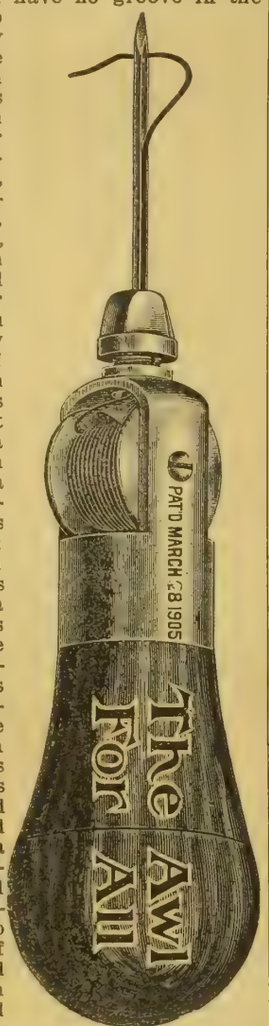
Address all Subscriptions as follows: Report Dept., CLAY, ROBINSON & CO., Union Stock Yards, CHICAGO.

Clay, Robinson & Co.

Leading Live Stock Commission Salesmen at the Ten Principal Markets.

THE SEWING AWL.

A farm on which there is not a sewing awl is in difficulties when work is most pressing. It is surprising how useful this little implement is. It is the Myers Famous Lock Stitch Sewing Awl. It is the only sewing awl made with a groove running the full length of the needle and has what is known as a diamond point. In order to sew leather or any heavy, thick material without breaking or cutting the thread it requires a needle with the groove running the full length of the needle. You might just as well have no groove in the needle as to have it only part of the way. With the Myers Awl you can sew old or new harness, saddles, carpets, canvas, tents, rugs, quilts, shoes, grain bags, and many other things. You can use any kind of thread in the Myers Awl, and it makes a lock stitch same as a sewing machine. It is very simple; a woman can use it as well as a man. It is one of the most practical devices ever invented. They are put up with two needles—one is straight and one curved—with a small screw-driver and wrench combined; also a reel of waxed thread with each awl ready for use. Every teamster and farmer should own a Myers Lock Stitch Sewing Awl, as there is use for one in almost every household. The Myers Awl is nicely finished, the metal parts are nickel-plated, the needles and wrench are kept in the hollow handle, which has a screw top.



Anyone who will send one dollar cash to pay in advance for two-years' subscription to The National Farmer and Stock Grower can select one of Myers' Lock Stitch Sewing Awls, which we will send by mail, postage paid, as a free premium. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

To Club Raisers:—Anyone sending us four subscriptions and $4.00 to pay for same will be credited with two-year's subscription and one Sewing Awl free.

BREEDING TIMOTHY.

Remarkable Results Obtained by the New York College of Agriculture in Breeding Timothy.

The following is taken from The Announcer, official organ of the New York College of Agriculture:

"Timothy has never been subjected to careful breeding and varieties have not been differentiated. As yet we grow simply timothy. Practically all other agricultural crops widely cultivated have been carefully bred and differentiated into numerous distinct varities. Hence we might expect great advances from carefully conducted breeding experiments with timothy.

"The timothy breeding experiments that have been under way at Cornell University since 1903 are now giving particularly interesting results. In beginning these experiments, timothy heads were obtained from 231 different places in various parts of the world, twenty-one states, Canada, Japan, and nine European countries being represented. From these seeds and from locally obtained seed, somewhat over 20,000 different plants were grown, from which selections were made to secure better yielding varieties.

"In the course of our experiments a large number of distinct varieties have been originated, many of them of interest, simply from a scientific standpoint, but others apparently possessing great value for general cultivation. For five years tests have been made of the comparative yields of different types when grown in rows, and for two years similar comparative-yield tests have been made with seventeen new varieties in plats sowed broadcast. The possible value of the results is clearly suggested by the yields of the broadcast plats. In testing these seventeen new sorts, they were planted in comparison with check plats sowed with the best timothy seed that could be purchased on the market, there being seven check plats equally distributed among the seventeen new sorts.

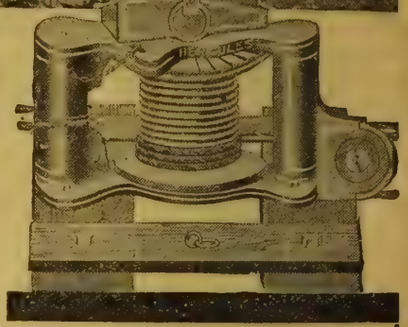
"The average results are shown by the following records: In 1910, the seventeen new sorts gave an average yield per acre of 7,451 pounds, and the check plats for the same year gave an average yield per acre of 6,600 pounds. The seventeen new sorts in this year thus gave an actual average increase per acre of 851 pounds for all seventeen selections. In this year three of the new sorts did not show their superiority, not getting well started, and gave yields below their corresponding checks. They served to keep the average increase in yield down to a comparatively low figure. The best and most vigorous of the new sorts gave very much higher increases, the highest increase being 2,120 pounds per acre, and the second highest 1,920 pounds per acre.

"The season of 1911 was very dry and severe and the timothy crop as a whole suffered considerably as a result. The plats of the seventeen new varieties gave an average yield of 7,153 pounds per acre, which is only slightly less than the yield of 1910 and which, considering the season, should be regarded as a larger yield. The seven check plats, however, gave an average yield of only 4,091 pounds per acre, a very material decrease from the yield of 1910. The average increased yield of seventeen new sorts in 1911 was 2,062 pounds per acre, which is an astonishing figure, being an increased yield of over 1½ tons per acre. Four of the high-yielding sorts in 1911 gave an increased yield of over two tons per acre, or practically double the average yield of the checks."

A Fine Animal Regulator.

Live stock and poultry books of useful quality are to be had free by addressing Pratt Food Company, Dept. 54, Philadelphia, Pa. Our readers will remember a few years ago the many stock foods, tonics and regulators that were advertised. Under close government scrutiny many of these have "petered" out because there was no merit in them. To-day Pratts Animal Regulator is a stronger proposition than ever. Read about it on page 10.

Money-Making Crops—Instead of STUMPS



THERE is no profit in raising stumps—unless you raise them out of the ground altogether. It doesn't pay to keep on paying taxes on stumpy land, year after year, without getting a single penny's profit back from it. Thousands of farmers have realized this already and have pulled out the stumps with the Hercules All-Steel, Triple Power Stump Puller. It is guaranteed to pull up any green tree, stump or hedge you hitch it to—and we will replace any broken castings any time within **three years,** whether the fault is yours or the machine's. You can pull an acre of stumps a day in your spare time and then pull stumps for your neighbors on contract jobs or rent the stump puller.

Hercules Stump Puller

All-Steel—Triple Power—30 Days' Free Trial
3-Year Guarantee—Special Price Proposition Now

That's our selling plan in a nutshell. We want you to own a Hercules Stump Puller and we are making the proposition that will get your order if you have stumps in your fields. Mail a postal now for this

Special Price Offer

—a price that is astounding thousands of men who are writing in to us now for this very same offer. We have only 5,000 Hercules Stump Pullers to sell at this remarkable introductory price, so send the postal now. Let us tell you about the double safety ratchets that insure the safety of you and your team; let us tell you about the careful machining and turning of each part of every Hercules.

Write Postal Now

Simply your name and address on a postal is all we want to send you our book and proposition. Study it over carefully; then decide whether or not you are going to have stumps in your field—or whether you are going to pull them out now quickly with the Hercules Address

Hercules Manufacturing Co. 2401 7th St., Centerville, Iowa

"Every great man is always being helped by everybody, for his gift is to get good out of all things and all persons."—Ruskin.

"The combination of cash crops with annual products pays better than either one alone."—New York College of Agriculture Announcer.

CHAMPION OXFORD DOWN EWE at State Fairs of Indiana, New York, Mchigan and Illinois, also at the American Royal Show of 1911. Owned and exhibited by Geo. McKerrow & Son, of Pewaukee, Wis. This is a sample of pictures collected for publication in the Book of Live Stock Champions mentioned on page 8.

The Future of Agriculture.

For a hundred years some men have been making the prediction that the time was or is at hand when the world would fail to supply enough food for its people. Where these alarmists get the figures on which to build their predictions it is hard to say. All things known generally to the public point in the other direction The more the population of the world increases the more is the world able to produce in the way of food for its people.

There was a time when this vast country, now included in the United States, was roamed over by scattered tribes of Indians They did some cultivating of the soil, and yet famine often stalked among them. Yet they had the whole vast land from which to gather food and on which to grow food. The number of those Indians in the whole United States is thought to have been far less than a million. Now we have 80,000,000 of people, and no one dreams of the food supply failing. That is because the present inhabitants know better than the other ones did how to make the soil produce food.

We are as far from the ultimate possibility of food production as the Indian was from the present method of producing food. The earth, as a whole, is as yet little used for food production, and much of what is produced is wasted or lost to man because of lack of market facilities. As yet vast areas of the earth are given over to deserts, many of which will ultimately be irrigated. The Desert of Sahara will yet grow green under the application of water and its fruits will enrich the markets of the world There was a time when the "Great American Desert" really existed, but it long ago went out of the newspapers, for where it once was are now rich farms and profitable ranches and a thousand industries. Every year what is still left is being narrowed, and the irrigator promises to take possession of all of it.

The future of agriculture is a bright one. The raising of crops is just passing out of the chaos of the dark past, and science is lending her aid. The trouble at the present time almost everywhere is not how to produce crops, but how to dispose of them. Oversupplied markets are very common, even when it is a fact that much of the world's produce cannot get to market on account of having no access to transportation. Millions of farmers in out-of-the-way localities are producing less than they would if they only knew how to get rid of it at a fair price.

The problem of the world's food supply is more how to market than how to produce. The whole tropical world is waiting for a way to send their fruit to market before swamping the world with bananas, oranges and other southern fruits.

The future prosperity of agriculture depends on transportation and methods of marketing. When every person in the world that grows things to eat can sell his product we will be at the point where we can really consider the great problem of irrigating deserts and producing more.

The world has a good reason for fearing that population will outstrip the food supply. The only fear is that population may outstrip the facilities for distributing among the people the food that is produced. And yet the genius of the ages discourages even that thought.

Virginia Corn Wins United States Championship Cup.

The $1,000 silver cup, offered by the International Harvester Company for the best thirty ears of corn grown in the United States, was awarded to William H. Dorin, of Clover, Halifax county, Virginia, whose exhibit of thirty ears of Boone County White at the American Land and Irrigation Exposition in New York City was pronounced by the committee of competent judges to be the best among hundreds of specimens sent in from corn growers in nearly every state of the Union.

This corn, thus stamped with the highest seal of approval known to the American agriculturist, was grown in the south central portion of Virginia, on a farm of some five hundred acres lying along the Southern Railway, whose territory in this section offers the finest lands obtainable for general farming purposes. Despite the bad drouth of midsummer, the yield averaged 137 bushels to the acre, as against a yield in 1910 of 136 bushels to the acre on the same land.

Mr. Dorin, the owner of the most coveted trophy offered the American farmer, is a man of the most progressive type. For a number of years he has been breeding up this variety of corn, entering all competitions with his superb yields and perfect ears, until at last he has carried off the Grand Sweepstakes for the United States. In competition with the Dorin exhibit at the Madison Square Show were ears grown by the foremost corn breeders in the country, notably L. D. Clore, of Indiana, who won the International Cup last year.

The farm on which this prize corn was produced differs not much from surrounding lands in the Southeast. Mr. Dorin purchased the place about five years ago for the sum of $8.00 per acre for 560 acres. To-day lands in the same region are worth from $15 to $35 per acre, and Mr. Dorin has refused an offer of $100 per acre for a certain portion of his farm. These figures are indicative of the possibilities of the vast acreage of available Southern lands to be had to-day at such low prices, as the winning of the Grand International Cup is illustrative of the yields which may be made from these same lands with proper methods and an intelligent system of agriculture.

Canadian Farms

Do you want a farm in Western Canada where the crops this year are in advance of anything grown on this continent? For wheat-growing, dairying, mixed farming and cattle-raising, the Province of Alberta is unsurpassed. Lands are now offered by the **Canadian Pacific Railway Company** at prices ranging from

$10 to $30 an Acre on Long Terms of Payment or on the Crop Payment Plan

—that is, paying for your farm with a portion of your crop each year. Land values have increased 30 per cent in two years. Great opportunities for the Homeseeker. Call or write for full particulars, booklets, maps. etc.

C. M. THORNTON, General Agent,

Alberta Land Dept., Canadian Pacific Railway, 112 W. Adams St., Chicago

MR. WILLIAM H. DORIN,
Winner of the corn championship at the American Land and Irrigation Exposition, New York City, 1911.

With the immense corn crop made in 1910 by the Southeastern States the Corn Belt had begun to be changed from its time-honored position. The capture, by a Southern farmer, of the International trophy, and the record made last year by Jerry Moore, of South Carolina, who grew 226 bushels of corn to the acre, combined with the tremendous crop of corn harvested last season in the South, still further demonstrates the truth of the claim that the Southeast is the ideal general farming section.

Seven Miles Down.

A traveling man who drove across the country to a little town in Western Kansas, the other day, met a farmer hauling a wagon-load of water.

"Where do you get water?" he asked.

"Up the road about seven miles," the farmer replied.

"And do you haul water seven miles for your family and stock?"

"Yep."

"Why in the name of sense don't you dig a well?" asked the traveler.

"Because it's just as fur one way as the other, stranger."—Argonaut.

In Texas, 52,985 tons of commercial fertilizers were purchased between September 1st, 1910, and May 1st, 1911. In six years the use of commercial fertilizers has been multiplied by four.

MISSOURI GIRL, 290,794—Grand Champion Duroc-Jersey sow at Missouri State Fair of 1911. The photograph was taken September 8th, 1911, when she weighed 450 pounds. Exhibited by McFarland Bros., Sedalia, Mo. This is a sample of pictures collected for publication in the Book of Live Stock Champions mentioned on page 8 of this paper.

INCLUSE—Grand champion Percheron stallion at the Missouri State Fair, 1911, where photo was taken. INCLUSE was three years old when exhibited and weighed 2,200 pounds. Owned by Percheron Importing Company, South St. Joseph, Mo. This is a sample of horse pictures collected for publication in the Book of Live Stock Champions mentioned on page 8 of this paper.

The Keystone Watch Cases.

When you buy a watch, think of the value of the case as well as of the works. As the Keystone Watch Case Company points out (see our advertising columns) there are many ways in which a gold-filled case can be debased without arousing the suspicions of the purchaser. Your only protection, as a consumer, is to see that the case of your watch bears the Crescent or the Jas. Boss trademark, endorsed by the responsible jewelry trade. Every representative jeweler in this country carries the Crescent and Jas. Boss gold-filled watch cases. See page 23.

Missouri Mules For Africa.

The fifth shipment of mules to South Africa by Messrs. Joseph A. Maxwell Mule Company, of the St. Louis National Stock Yards, consisted of 125 head, averaging 14½ to 15 hands, left the National Stock Yards on November 14th and arrived at Montreal, Canada, November 22d, whence they go by ship to Cape Town, thence up the country to the mines. The shipment is in charge of Kenneth Maxwell and Ira Pendleton, two young men who are experienced in handling mules. The shipment of mules to South Africa is becoming a regular incident to the business of the Joseph A. Maxwell Mule Company.

Sheep Sales at St. Louis.

Mr. Oscar A. White, sheep salesman at the St. Louis National Stock Yards with the firm of Clay, Robinson & Co., reports that the sheep and lamb trade of the National Stock Yards is picking up. Receipts so far this year are a quarter of a million larger than during the same period last year. During the last week in November prices advanced from $3.10 to $3.50 per 100 pounds for the best sheep, and fed Western wethers sold up to $3.90. The best lambs sold at $5.85, and real choice lambs would have sold for $6.00 per 100 pounds. Quotations can be had on short notice any day by asking Clay, Robinson & Co., National Stock Yards, Ill.

U. S. Cream Separator.

A very good picture of the U. S. Cream Separator will be found on page 10, also some very strong points in regard to the merits of the implement. When you write for catalogue, address Vermont Farm Machine Company, Box 125, Bellows Falls, Vermont. You will then get the name of the nearest representative of the company where you can see the U. S. Cream Separator in use.

At Chicago, December 1st, a load of 1,034-pound yearling steers sold at $8.35 per 100 pounds.

KENDALL'S SPAVIN CURE

"ONLY SURE REMEDY"

Gadsden, Ala., Apr. 26, 1909.

Dr. B. J. Kendall Co.

Gentlemen: Please send me copy of your TREATISE. I have been using your Spavin Cure for 20 years, and find it is the only sure remedy. It is the best liniment I can get for horse and man. Yours truly, W. J. McBee.

That tells the whole story, and it is the experience that hundreds of thousands have had in the past 40 years, and it's the experience you will have—"It is the only sure remedy"—

For Spavin, Ringbone, Curb, Splint, Swellings and All Lameness

IMPROVER—Poland-China boar. Junior champion of the breed at Missouri State Fair, 1911, where photograph was taken. His weight was 400 pounds. IMPROVER was exhibited by D. B. Rightmire, of Monticello, Mo. This is a sample of pictures collected for publication in the Book of Live Stock Champions mentioned on page 8 of this paper.

A GUIDE TO SUCCESS.

Legal Instruction in Regard to Land Ownership, Transfers, Mortgages, and Rights of Landlord and Tenant.

A course of instruction in real estate matters is an essential part of the education of a farmer. We have had such a course prepared for our patrons.

An attorney of eighteen-years' experience has written a course of study. It is in lessons. The first relates to sale of lands, buildings, trees, growing crops, also question of fixture, then personal property, title deeds, etc.

Lesson Two is devoted to landlord and tenant, liens, mortgages, looking up records, notice to quit, etc.

Lesson Three is devoted to fee simple estate, conditional titles, examples of deeds, exemption laws.

There are twenty-five lessons in all. For instance, Lesson Six considers the dower rights of the wife, also the rights of the husband in the property of the wife; also, divorce.

Lesson Seven relates to the rights of parents in the joint property; also the dower rights of the wife in partnership property.

Lessons Eight and Nine concern chattel mortgages; and Ten and Eleven discuss real estate mortgages. The remaining numbers are devoted to easements, possession, fences; who can convey or make deeds and mortgages; corporations, promissory notes, commissions, water rights, insurance, wills, settlement of estates of deceased persons, Lesson 25 being devoted to the question of making money in the real estate business.

Anyone who will send us one dollar to pay for two-years' subscription to The National Farmer and Stock Grower can select this Real Estate Course as a free premium. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

St. Louis Hog Trade.

At the St. Louis National Stock Yards, on December 1st, the light to medium-weight hogs, 160 to 210 pounds, sold from $5.75 to $6.40 per 100 pounds; choice mediums to heavies, 225 to 250 pounds, sold from $6.45 to $6.50; good heavies, 275 to 350 pounds, sold from $6.45 to $6.52½. The bulk of the lightweights sold from $5.90 to $6.15; and the bulk of the heavies sold from $6.35 to $6.45. Pigs weighing 100 to 140 pounds were selling from $4.75 to $5.40 per 100 pounds. We have had these figuers revised by the hog salesmen of Clay, Robinson & Co., live stock commission agents at the National Stock Yards.

Great Horse and Mule Trade.

Mr. T. H. Holland, of the firm of Holland, Nugent & Maxwell Bros., horse and mule commission salesmen at the National Stock Yards, reports the largest and best horse and mule business in the history of the trade. Receipts at the market nearly fifty thousand larger than last year and more buyers on the market than ever before. Mr. Holland expects very active business immediately after the holidays.

Breeders' Sale of Horses.

In the Coliseum at Bloomington, Ill., January 23d, 24th, 25th and 26th, 1912, will be held one of the greatest of horse sales. There will be sold 300 head of imported and native-bred Percherons, Belgiums, French Draft, English Shires and Clydesdale stallions and mares, also 100 head registered trotters, grade draft, saddle and all-purpose farm horses, and 100 head of the best Shetland ponies. Entries close December 15th, and the catalogue will be issued January 8th. D. Augstin is President of this organization, and most successful sales have been held under his leadership. Those who desire to furnish horses for this sale should act quick and address C. W. Hurt, Manager, Arrowsmith, Ill.

Coal Dealers Buying Draft Horses.

The New York Herald says that coal dealers have been uncommonly large buyers of high-grade draft horses this season, drawing most of their supplies from the Fiss, Doerr & Carroll Horse Company. In speaking of this trade Mr. Carroll said that some of the leading coal dealers were nowadays buying about as good horses and paying about as much for them as any of the New York brewers or contractors. They buy a stocky, close-built horse, weighing from 1,650 to 1,800 pounds, and they want finish and quality as well as weight in their drafters.

The Twice-a-Week GLOBE-DEMOCRAT

The Egg-laying Contest.

In the Missouri National Egg-laying Contest, 655 hens in pens and 131 substitutes constitute the fowls received at the State Poultry Experiment Station at Mountain Grove, Mo. There are five hens to the pen.

Twenty-five different states and Canada are represented. It is too soon to go into particulars of the egg-laying results, but it is interesting to know that at the end of the second week the leading pen had laid forty-one eggs. Seven other pens had laid over thirty eggs each. 543 eggs were laid the first week and 698 eggs the second week, making a total of 1,241 eggs for the two weeks. This does not include fifteen eggs that were laid on the floor and dropping boards at night, which could not be placed, nor soft-shelled or undersized eggs. This is an exceptionally good record, considering the fact that the birds were just recently shipped from all climates, the bad weather with which they had to contend with and everything being new and strange to them.

At the close of the first two weeks six pens were neck and neck. A pen of Cornish Indians, owned by Peter Erickson, of Cabool, Mo., and one of S. C. White Orpingtons, owend by Dr. Thos. Dietrich, of Washington, N. J., have made the best record the first two weeks. Only an egg or two behind follow the S. C. Rhode Island Reds entered by M. J. Ward, of St. Louis, Mo.; S. C. White Leghorns entered by E. L. Neel, of Asheville, N. C.; Barred Plymouth Rocks by Brooks Sanitary Hennery, Morgan Park, Ill.; and S. C. Black Orpingtons owned by E. A. Berg, of Dune Park, Ind.

Three hens laid every day for the first two weeks since the contest began—a Columbian Plymouth Rock entered by Clyde Patterson, of Sedalia, Mo.; a Barred Plymouth Rock by Brooks Sanitary Hennery, of Morgan Park, Ill.; and a S. C. Rhode Island Red by M. J. Ward, of St. Louis, Mo. Fourteen other hens have laid every day but one. A Cornish Indian, No. 820, laid two eggs in one day, one in the morning and one in the afternoon.

The largest hen entered in the contest is a White Langshan owned by Henry Brockschmidt, of Froistatt, Mo., and the smallest hen is a Silver Spangled Hamburg, which weighs 1¾ pounds. One of the largest hens in the contest lays one of the smallest eggs, and one of the smallest hens lays one of the largest eggs.

The weather for the first two weeks was not ideal for starting such a contest. It was cold and damp, and the day it opened the thermometer registered 18 degrees above zero. Snow fell for half a day, and the ground was covered a few days previous to the contest. On the eleventh day of the contest the thermometer registered 80 degrees above zero, and in less than twelve hours it had fallen to 4 degrees above zero, a drop of 76 degrees. About fifty head of young stock were frozen to death, and Mr. Quisenberry and a force of men worked half of the night in sleet and snow trying to save the poultry.

The houses used are of the colony type, shed roof and open front, protected by an old-fashioned window shutter. They are original and of a different construction from the ordinary colony houses used at the present time, differing from them principally as to ventilation, light and arrangement. These houses were built with a view to simplicity, economy, comfort and health of the birds at all seasons of the year. Some houses are comfortable in the winter, but are bake ovens in hot weather. Others are exactly opposite. These, with their shutters, windows and ventilation leave the comfort of the fowls largely under the control of the poultryman in charge.

The grain to be used consists of wheat, cracked corn and oats. Hoppers are also used in each house, and the hens have free access to a dry mash consisting of bran, wheat middlings, corn meal, Old Process oil meal, gluten meal, alfalfa meal, dry beef scraps, rolled oats, charcoal and salt.

Each house is provided with sufficient trap nests of the most improved and up-to-date kind. Each hen has a separate band number, running from No. 1 up. The nests are visited three times a day, and the egg from each hen is recorded. The eggs from each pen are weighed and all feed is weighed and charged to the pen consuming same. Later on there will be much interesting information to publish concerning this contest.

Shrinkage in Dressing Chickens.

In writing of the shrinkage in dressing poultry, A. R. Lee says in Bulletin 140, United States Department of Agriculture, which gives results from extended experiments, as follows:

"The loss of weight or shrinkage in dressing (without drawing) for the different classes of birds varied as follows: Hens, 13.4 to 14.9 per cent., average 14.4 per cent.; roosters, 13.7 to 16 per cent., average 14.7 per cent.; springs, 9 to 14.5 per cent., average 12.1 per cent.; and broilers, 14 to 14.7 per cent., average 14.3 per cent. The chickens at the different stations were fed a mixture of fine sand and very thin feed, or were first given a light feed and then sand and water for the last feed of the day before they were killed. Several of the pickers claimed that the chickens picked easier if the birds were watered freely before killing, and this practice was prevalent, although there was some difference of opinion as to the effect of the water."

Poultry Notes.

The incubator season has come again. Incubators are just as necessary as hens in poultry-raising as a business. The best makes of incubators are advertised in this publication.

The Iowa Agricultural Experiment Station at Ames, Iowa, has issued Bulletin No. 125 by Wm. A. Lippincott, poultryman of the Station, entitled "Trussing and Boning Chicken For Fancy Trade." It is splendidly illustrated, showing every operation, from the dressed chicken for the general market to the boned chicken ready to be stuffed and roasted.

Five Single Comb White Leghorn pullets at the Oregon Agricultural College lay 538 eggs, which sold for $12.66, at a cost of feed of $3.92½. It was a six-months' test, from November until May.

Unvarnished, *Cashable* Facts About Poultry Profits

If there ever was a straight-from-the-shoulder statement of facts, you'll find it in JOEL M. FOSTER'S book "THE MILLION EGG FARM."

Mr. Foster owns the famous Rancocas Poultry Farm, and in his book he tells his methods for producing upward of *eleven hundred thousand eggs a year,* and piling up a clean annual profit of close to $20,000.00.

We *know* that the statements in this book are cold facts—because we proved them before publishing

"The Million Egg Farm"

We have sold many thousand copies of this book, and we *know,* from the actual experiences of those who have read and followed it, that these facts can be profitably applied by *you*—whether you have a dozen hens on a back lot, or number your fowls by the thousands.

Up in Scranton, Pa., a clerk, Robert Liddle by name, read this book, followed its directions, and at last reports was cleaning up $17.00 a day profit on eggs.

In the light of such experiences, we *know* that farmers need this book. That's why we published it and are trying to put it into the hands of every poultry owner.

To *serve* the farmer is the whole purpose of FARM JOURNAL. To serve him with sound advice regarding every branch of farm work.

To enable him to profit by the labor-saving and money-making discoveries of other farmers. To serve the farmer's wife with helpful housekeeping suggestions. To serve the farmer and his entire family with clean, wholesome entertainment.

Upward of four million readers welcome its monthly visits.

You need this paper and *you need* the MILLION EGG FARM book, and you can have

Farm Journal every month for four years and "The Million Egg Farm" at once, postpaid, for only $1.00

Do yourself and family the favor of sending in the dollar to-day.

FARM JOURNAL, 257 N. Clifton St., Philadelphia

Poultry and Farm Paper Club.

Two first-class papers can be had for the price of one. **The National Farmer and Stock Grower** is one, and the **American Poultry Journal** is the other. There are other excellent poultry papers, but the one we take home to read and one the family is determined to read is the **American Poultry Journal.** We have made arrangements whereby we can send **The National Farmer and Stock Grower** and the **American Poultry Journal,** both papers, one year, for fifty cents. This is a bargain that is good now, but this advertisement may not appear again. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Automobile construction was the principal purpose of 178 establishments in 1904 and increased to 743 in 1909.

The 1911 crop of apples was 62.4 per cent. of a full crop.

THOUSANDS BUYING ALBERTA LAND.

Thousands of city folks who are tired of earning a bare living, and farmers who are sick of raking and scraping for just enough to buy the necessities of life, are accepting Canadian Pacific Railway offer of land in Sunny Alberta, at $12 to $25 per acre, on easiest terms, six or ten years to pay or on half-crop payment plan.

Detroit Engine Works, 383 **Bellevue Ave., Detroit, Mich.**

With the Meats.

In olden times butchering time was attended by so much rich food that the family were usually the worse for it, and after the first welcome of fresh meat came a reaction in which it was about the last thing to be desired. There was so much that must be eaten fresh or lost, that people felt forced, as it were, to play the glutton act.

But all this has been modified, and with so many ways of putting aside the choice portions and knowing so much better how to serve the remainder, there is small excuse for anyone being inconvenienced or seeing anything go to waste.

Canning has become the great storehouse for meat as well as fruit and vegetables. Sausage, tenderloin and mincemeat are partly cooked, covered with lard or the fat in their own substance and sealed. Even the ribs and backbones may be kept for a time in crocks and covered with lard. Just why the meat could not be separated from the bone and packed away in cans, we cannot see, nor have we given it a trial, though it seems worthy of one.

If you have no beef for mincemeat, a very god substitute may be obtained by using the pigs' legs and hearts, two parts which many do not care for in any other way. Scald the legs and reclean, carefully removing every bristle and defect. Cook with the hearts until tender. Separate all gristle and run the meat with the skin through a food chopper or chop fine in bowl. Add equal quantity of chopped apples with the other usual ingredients.

When making sausage, some prefer to add sage and other herbs. These in time tend to give the meat a bitter taste. Besides, some do not like them, and the custom is growing of keeping the herbs on hand to flavor as desired when cooking. Then one can have a variety, with only a single herb used at a time.

Study variety in serving the meats. The roaster is a great improvement over the old-fashioned dripping-pan, not only dispensing with the necessity of basting, but the steam confined cooks more evenly and thoroughly, besides allowing none of the rich flavor to escape. If you like stuffing, try for a change packing some of it among the pieces of spare rib, which may be placed together in a way to hold quite a quantity. Parsley will be found the choicest flavoring for this, while summer savory or sweet basil will be relished in the ordinary roast.

Be sure to sprinkle plenty of flour over the meat before placing it in the roaster. This well browned will insure an abundance of richly-colored gravy, which is quite as much relished as the meat. And if the gravy cannot all be used at the time, we have canned it for a short time until the fresh meats were disposed of.

If you do not like head cheese or "souse," and these pieces spoil the sausage for you, do not think for reasons of economy that you must still try to use them when they go against the taste. The cat and dog will be helpful at this stage. And since both are of use to you, they are entitled to their share of what is going. If these fail, the chickens will convert the discarded meats into high-priced eggs.

To prevent sameness, vary the vegetables as carefully as the meats. Cabbage with a touch of vinegar is a good relish. Baked squash served with a bit of pork instead of butter will be found a toothsome dish. Those liking kraut are sure to keep it on hand to accompany the fresh meat.

Then there are the various combinations of the tomato, including catsup and Chili sauce, which should not be forgotten. Never are they quite so appetizing as when served with fresh meat. The stuffed mangoes which seemed so fiery are now just the thing. And do not forget to have plenty of apples and apple sauce.—Bessie L. Putnam.

Prize Cattle Clipped at Show.

Not less than a dozen clipping machines might be seen being operated at the same time by the care-takers of the cattle exhibited at the National Dairy Show in Chicago last month. The cattle seemed to enjoy the sensation of being clipped and the clipped animals certainly presented a much better appearance than those not so fortunate as to be clipped. The men in charge of the cattle were unanimous in saying that the clipped ones were easy to keep clean and were much benefited by the operation.

Ensilage Corn Yields.

Ross Bros. Co., of Worcester, Mass., offered prizes for the heaviest yields of ensilage raised from their Eureka Ensilage Corn upon one acre.

The first prize was won by Mrs. H. Will Harris, of Adrian, Mich. Her wonderful yield, which was 68 tons and 800 pounds, is sufficient feed to keep seven head of cattle one year and then have enough left over for 181 days. Other yields were: Rudolph Hess, Washingtonville, N. Y., 22 tons, 1,120 pounds. R. T. Tooke, Hubbardsville, N. Y., 32 tons, 1,600 pounds. William Barron, Worcester, Mass., 35 tons, 720 pounds. B. W. Wilcox, New Albany, Pa., 36 tons. Herbert F. Hammond, Whitinsville, Mass., 40 tons, 360 pounds. L. J. Kendall, Worcester, Mass., 42 tons, 860 pounds. Briggs G. Blake, Williamstown, Mass., 47 tons, 76 pounds.

Consumption of Cotton.

The world's consumption of all the varieties of cotton for the twelve months closing with August 31st, 1911, amounted to 17,819,070 bales, distributed as follows: The United States, 4,696,000 bales; Great Britain, 3,384,480 bales; Russia, 1,751,619 bales; Germany, 1,685,192 bales; India, 1,479,803 bales; and Japan, 1,254,078 bales. The total consumption of American cotton was 11,559,401 bales; East Indian, 3,647,714 bales; and Egyptian, 664,822 bales. The total stocks of cotton held by spinners throughout the world on August 31st amounted to 2,619,052 bales, of which nearly one-half were American. This information is furnished the Department of Commerce and Labor by United States Consul-General Jno. L. Griffiths, of London, England.

The census reports that the state of Texas owns 672,781 mules, against 342,086 in Missouri. Mature mules in Texas are valued at $114.98, and in Missouri $141.89.

In Colorado out of 4,302,101 acres in farms, 2,792,032 acres are irrigated.

Let Me Show You How Feeding Merry War Lye Cures Your Sick Hogs

E. Myers, President, E. Myers Lye Company.

All the talk in the world won't kill one single hog worm—won't cure one single sick hog—but if I, by personally presenting these facts to you, can but persuade you, Mr. Hog Raiser, to give MERRY WAR LYE a fair, common sense feeding trial, I will have done you the greatest favor any one man can do another by putting you in touch with the best hog conditioner, cholera and worm cure the world has ever known.

This sounds like "big talk", but I know whereof I speak because I have spent years in untold experiment and test after test has resulted in unanimous, enthusiastic praise from thousands of farmers and Hog Raisers all over the United States who have fed MERRY WAR LYE regularly every day with their hog rations—and with wonderful results—proving beyond all shadow of doubt that MERRY WAR LYE WILL DO THE WORK—AND THAT NOTHING ELSE WILL.

The Cost is But a Trifle

Merry War Lye is NOT ONLY THE BEST protection against hog losses ever discovered—preventing Hog Cholera; killing worms; rendering hogs immune from infectious diseases; keeping them on their feed, with hearty appetites; toning them up; making them fat and sleek; insuring prime condition in the shortest possible time for top notch prices—BUT it is the LEAST EXPENSIVE AS WELL.

For Hog Cholera

The following letters are but samples of hundreds that come every week, telling how glad farmers and hog raisers are that they know about Merry War Lye.

Mrs. B., Aholt, Mo., writes as follows: "Fed Merry War Lye twice a day. It prevented our hogs from getting cholera, while our neighbors lost all of theirs."

H. G. Acker, Chickasha, Okla.: "I have been feeding Merry War Lye some two months, and it expelled worms after the first few feeds."

I can show you all the proof you want—as many letters like these as could be desired.

Feed Merry War Lye Every Day

—and begin today—for the sooner you begin, the sooner I will be able to prove to your complete satisfaction that Merry War Lye makes good every claim—and 10c will make the test.

Important Warning

Some commercial lye makers are trying to persuade dealers and hog raisers that any lye will do what Merry War will for hogs—but it will not, it can't—because no other lye maker knows the secret process that makes Merry War Lye safe to use in Hog feed—they don't know the combination in Merry War Lye that produces the fat, healthy hogs.

Merry War is the only Lye which is absolutely safe to feed your hogs—the greatest Hog Remedy the world has ever known, and Hog Raisers who make the mistake that any lye will do the work which is claimed for Merry War Lye—fail to obtain results—pay the penalty in loss of hog profits and are sorely disappointed.

Merry War Lye comes in 10c cans; full cases of 4 dozen cans for $4.80—at Grocers', Druggists' and Feed Dealers'. Don't allow yourself to be talked into a substitute for Merry War Lye—because there are no substitutes.

Follow These Directions

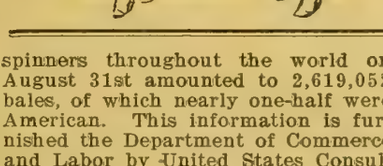
Follow these directions carefully: Mix one tablespoonful Merry War Lye with slop for ten hogs, or a half can with barrel of swill. Stir well and feed EVERYDAY, night and morning. If your hogs are on a dry feed ration, mix a half can Merry War Lye to each barrel drinking water.

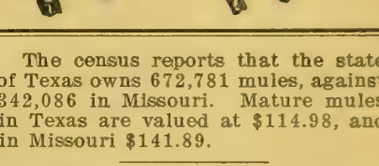
Kettle Powdered Lye For Soap Making

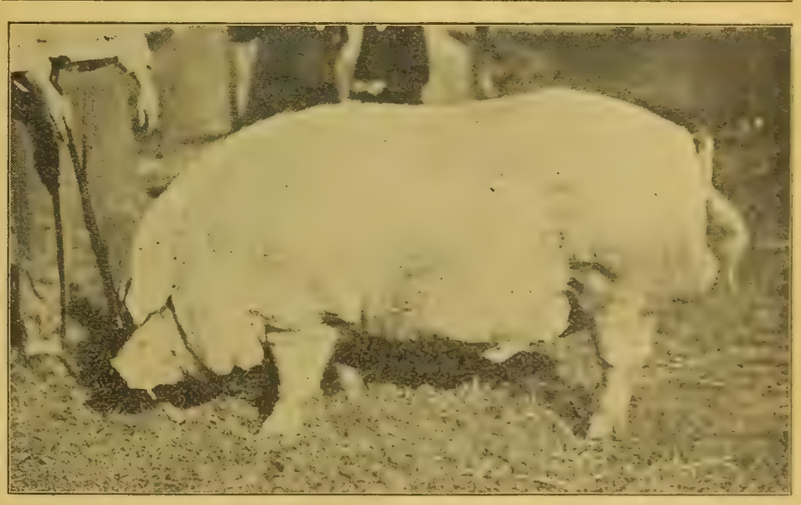
If you want the best lye, exclusively for Soap-Making, scouring, cleaning, disinfecting, etc., use my famous Kettle Powdered Lye—it makes the best soap you ever used—but DON'T feed it to your hogs. FEED ONLY MERRY WAR LYE TO YOUR HOGS.

At All Leading Dealers Most dealers handle Merry War Lye. If yours can't supply you, write us, stating your dealer's name—we will see that you are supplied and will also send you, free, a valuable booklet on, "How to Get the Biggest Profits From Hog Raising."

E. MYERS LYE COMPANY, Dept. 22 St. Louis, Mo.







SCOTTLEA CREDITOR, 24,637—Grand champion O. I. C. boar at the Missouri State Fair of 1911, where the photo was taken. When exhibited, SCOTTLEA CREDITOR was three years old and weighed 916 pounds. Owned and exhibited by L. W. and R. H. Scott, of Nelson, Mo. This is a sample of swine pictures collected for publication in the Book of Live Stock Champions mentioned on page 8 of this paper.

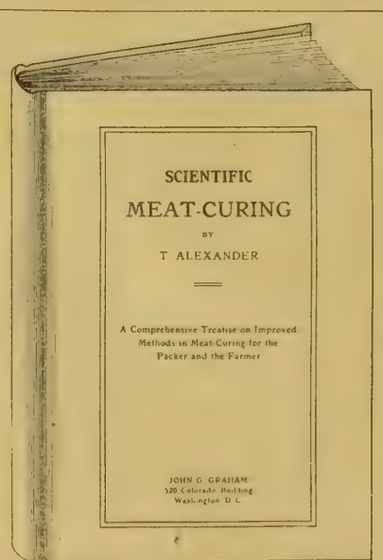
SCIENTIFIC MEAT CURING.

A Booklet For All Farmers, Stockmen, Butchers and Packers.

There is a book on meat curing. It is descriptive of the methods used by the most expert of all the butchers and packers. It is actually a text book for the curing of all meat products. It includes elimination of animal heat, difference between weight alive, dressed and cold, with shrinkages; table for making different strengths of pickle, mild and strong cured meats, temperatures,, pumping, pumping pickle, pumping of hams, calas, picnics etc. Time in pickle for different weights, curing pickle for hams, etc.; sweet pickle bellies, time for smoking, number of days in cure per pound, overhauling, handling old meats, soaking, washing, soaking first-grade bellies, soaking beef hams, long and short cut tongues, dry salt meats, temperature of smoke house, time for smoking to prevent skippers, kind of wood to use, use of sawdust for color, smoking S. P. meats, summer schedule, smoking colored and uncolored meats, first-grade hams, beef hams, No. 1 pork hams, picnics, No. 1 bacon wide, No. 1 bacon narrow, with shrinkage, smoking tongues, firing house for S. P. meats, coloring, use of liquid smoke, and insect proof covering. Instructions for preparing



mess beef for curing, chopping and scoring, mess chucks, mess rumps, curing mess beef, packing for curing, S. P. beef hams, beef rump butt cure, Antwerp beef hams, overhauling, packing mess beef for shipment, weights summer and winter, amount of capping salt to be used for Northern and Southern points, Scotch buttock cure, dry cure shoulder clods, dry cured boneless beef, beef tongue cure, weights and strengths of pickle to use in shipping, beef tongue smoking ages, for export shipment, handling and curing of lamb tongues and tables showing the strengths of pickle from day to day from which the amount of solids taken up by the meat can be computed. The book includes table giving average weights of the various cuts of pork, veal and mutton, lists of the different standard brands of sausages, giving per cent. of beef and pork used, parts of the carcasses and the amounts of cereal used, and the constituents of the cereal used in sausage, etc.

We have adopted the booklet "Scientific Meat Curing" as a subscription premium to be furnished subscribers to The National Farmer and Stock Grower. Send us sixty cents by money order and we will send you The National Farmer and Stock Grower for one year and you can select one copy "Scientific Meat Curing" as a premium, to be sent postpaid, safe delivery guaranteed. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Weekly Live Stock Report.

The Live Stock Report issued by Clay, Robinson & Co., Union Stock Yards, Chicago, Ill., and advertised on page 13, is by far the best weekly live stock market report; in fact, it is the only weekly report covering transactions of ten principal markets. Clay, Robinson & Co. are leaders in the commission business and do not issue the Live Stock Report for a profit, and all they require a shipper to do is to pay the postage on it as an evidence that they are interested in live stock markets.

Obtain Strawberry Catalogue.

It is early to plant strawberries, but not too early to obtain and study a reliable catalogue. Mr. W. F. Allen, of 116 Market street, Salisbury, Md., has 120 acres planted in Strawberries, and he will furnish plants true to name. See his advertisement in this edition.

Concerning the Hercules Stump Puller

We have received a letter from Mr. Chas. Smith, proprietor of the Meadow Valley Stock Farm, Edholm, Nebraska, who is a breeder of Aberdeen-Angus cattle and Poland-China hogs. It relates to a Triple-power Stump Puller purchased by him last year. He said as follows:

"To the Hale Publishing Co., St. Louis, Mo.: Gentlemen:—Your letter of inquiry of November, 1911, at hand, and in reply would say last spring I purchased a Hercules Stump

Puller, which I shipped in to Canada, where I have a large farm in what they call scrub land. I also purchased what they call a grub hook, and would say this small puller pulled out roots five and six feet out of the ground of burr-oak and the hook where the grubs were burned off or cut off would hold on like a bull-dog, and both hook and stump puller worked admirably. I am sorry I have no photographs of our work; would say the company dealt fair with me in every respect. Respectfully Yours, (Signed) Chas. Smith."

Home-grown horseradish at St. Louis was selling at $4.25 to $4.50 per barrel on December 1st.

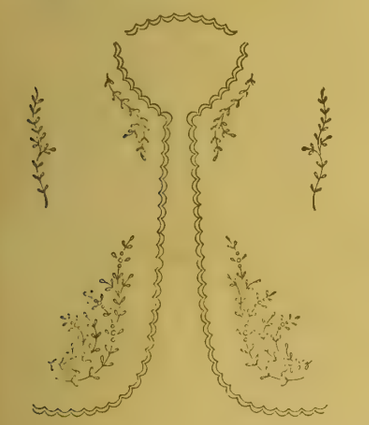
MAY MANTON EMBROIDERY.

These paper patterns require only a hot iron to insure a perfect transfer on cloth. The way to do it is to lay the material to be stamped on a padded ironing board or table, place the pattern over it with the printed side down and press over the entire surface of the paper with a hot iron, when a perfect outline will result. Please order by embroidery number.



Elegant Sacque Design.

No. 612.—Design for embroidering a child's sacque. Especially adapted to May Manton's Pattern No. 7191. The price of the pattern is 10 cents.

Design For Motifs.

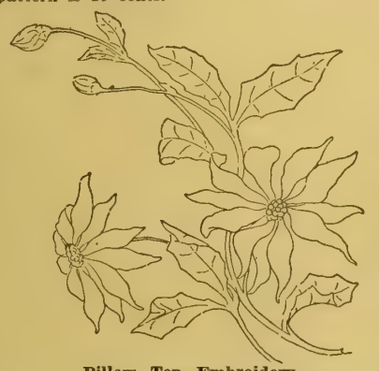
No. 609.—Design for motifs to be used in various ways. Adapted to braid, beads, French knots, outline and solid embroidery. One large and six smaller motifs are given. The price of the pattern is 10 cents.

Scarf Design For Table.

No. 610.—A design for an embroidered table or dresser scarf. Two ends, fourteen inches wide, are given. The price of the pattern is 10 cents.

Embroidered Wreaths.

No. 608.—A design for embroidered wreaths. Transfers for one wreath nine inches in depth and for two wreaths six inches in depth are given. The price of the pattern is 10 cents.



Pillow Top Embroidery.

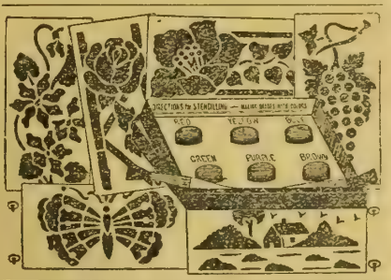
No. 611.—Design for an embroidered pillow top seventeen inches square. The price of the pattern is 10 cents.

Please send all orders for these embroidery patterns to the **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

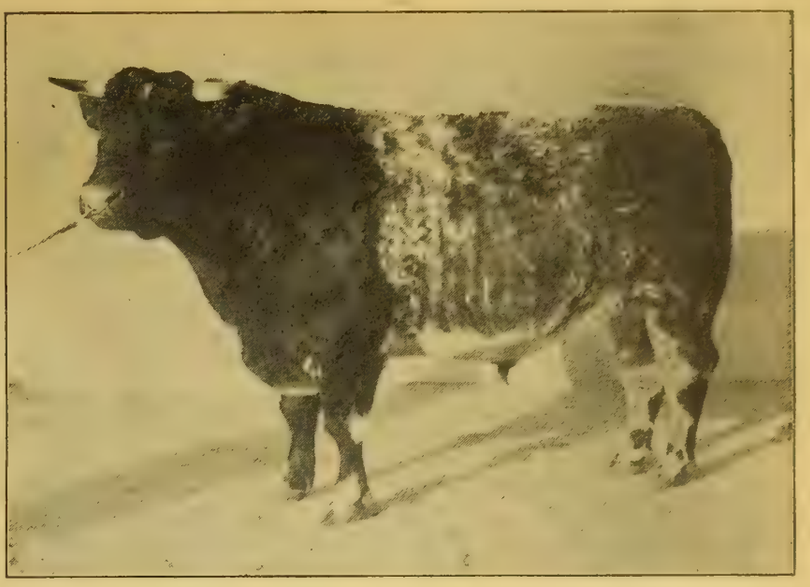
SPLENDID SUBSCRIPTION PREMIUM.

Beautify Your Home With This Popular Stencil Outfit.

Stenciling has long been a popular form of home decoration and is today used more extensively than ever. Ladies are particularly apt at this work, and anyone can produce beautiful effects. From every standpoint stenciling is a very fascinating art of extreme usefulness. You can make



the most artistic pillow tops, curtains, portieres, centers, etc., in colors for yourself or for sale, without having any knowledge of painting, by using this up-to-date outfit. In fact, stenciling is so simple with this outfit that a child ten years old can do it.



ROYAL SULTAN, 223,948—A grand champion Shorthorn bull at the International Live Stock Exposition. He was exhibited by Herr Bros. & Reynolds, Lodi, Wis. This is a sample picture of famous animals collected for publication in the Book of Live Stock Champions mentioned on page 8 of this paper.

This outfit is just the thing for beginners. It consists of six cut stencils on special oil board, six cups of water colors (something new, that will not spread, but dries instantly), two bristle stencil brushes, four thumb tacks, also full and explicit directions for mixing colors and using stencils.

We also agree to refund money and pay return postage to anyone who is not satisfied with the bargain. Address, **HALE PUBLISHING CO., 3550 Vista Ave.. St. Louis, Mo.**

Christmas Presents That Boys and Girls Can Make.

In the few weeks that remain before Christmas the boy and girl readers of this department will be as busy as bees using their nimble fingers and their ready wits in making Christmas gifts. Perhaps a few suggestions along this line may give some new ideas which they will be glad to use.

Spoolholder. — For mother's or somebody else's work table, select a smooth board about 10x8 inches; if the board is rough, rub it smooth with sandpaper; paint the board, then drive into it nails just far enough apart to allow space for spools; the heads of the nails will be at the under side of the spoolholder and the spikes projecting through the right side will serve as the spool rests. It will make the sewer's tasks much easier if the spools are all in sight on this holder instead of hid away in the machine drawers.

Workstand.—If your grocer is good-natured, perhaps he will give you a cheese box for the asking; at best, he will charge only a few cents for it. Cut for this three strips of wood to serve as legs, making them long enough so as to raise the cheese box to about the height of an ordinary table; let these legs run to the top of the cheese box and nail them right to the outside. Next stain the whole with some dark color. Line the box by tacking in some sateen, cretonne, or any suitable material you have on hand. This makes just the kind of a workbox a woman with much mending or sewing appreciates. If you wish to go a step farther, make a cushion and attach it to the top of the box; also screw in a brass hook upon which to hang a pair of shears, and make a pocket for holding buttons and another for holding darning cottons and yarns.

Oven cloths.—Take strips of denim or any other heavy material, about one yard long and ten inches wide; hem both ends, then turn them up about six inches and stitch them down the sides so as to form pockets; now hem the two raw edges left between the pockets. See the scheme? When mother wishes to take something out of the oven she slips one hand in each pocket and so there is no danger of burning some unprotected part of the hand.

Magazine protector.—Whover has a favorite magazine which he is trying to preserve will welcome a protector made out of two pieces of cardboard about one-half inch larger each way than the magazine they are to cover. Paste some pretty wall paper on this cardboard, make three sets of corresponding holes in the cardboard and run ribbon through the holes, thus joining the two pieces of cardboard and making a satisfactory cover of them. Cut the ribbon long enough so that the case can be enlarged to hold several of the magazines if desired. If handy with a paint brush, perhaps you can paint the name of the magazine which it is intended for on the cover of the case, or perhaps you may be able to find some discarded numbers and from these can get out the name and paste the letters in order on the cover.

Desk blotters.—Cut out some of the pretty heads and figures in the advertisements of magazines or on their covers; paste each of these on a thick piece of paper on thin cardboard; cut out the cardboard to the outlines of the figures. Next cut out several thicknesses of blotting paper by tracing the outline of each figure upon it and cutting to the inside of your pencil mark. Attach the blotting paper to the cover by means of a bow of ribbon run through the perforations which you must make in the most convenient place. Now you have a set of blotters which you can give to sisters or friends.—Janet Thomas Van Osdel.

Care of the Eyes.

The eye is one of the most sensitive as well as most essential organs; and yet on every side we see rank abuse of it. Reading when riding is most trying to the sight, the unsteady motion of the car or carriage requiring a constant readjustment of the focus. To scan the large headlines is all that one should attempt.

Once we saw a lady saving (?) the hour spent in a ride on the train by using it to make point lace! Just think of it! The most trying of fancy work, even under favorable circumstances. It scarcely seems possible that a person of intelligence would not know better. Some day she would surely pay for the folly, perhaps without being able to trace the source of the trouble.

Fancy needlework should only be done with the best of surroundings, and then in moderation. While it is so beautiful that one can be pardoned for much trouble in securing it, to continue the work when the eyes are tired or the light not the very best is the greatest of folly. Sunlight is required, and a dark day used for work of a less trying nature.

Fashion, too, has other kinks against which guard should be placed. The dainty veils with fancy mesh are very becoming to the wearer, yet injurious to the eyes, especially those with dots or figures of any kind. If you must wear a veil, select a plain one, even though you do look plain. The optical figures which may attend the wearing of the fancy weaves are too unpleasant and persistent to be courted.

The jaunty little hats of the modern school girls carry also a menace to the eye in the fancy cord and tassel which fall down gracefully in front of it. You may not be in the height of fashion in so doing, but it is far wiser to adjust the ornament to fall at the side.

Another common abuse is the wearing of glasses which are not fitted to the eye. If one accustomed to wearing glasses happens to find that they are needed and are not at hand, how common it is for an obliging friend to pass along his own, as though glasses were glasses; and yet an attempt to wear those of another usually results with no advantage, and perhaps positive injury. Far better have none than those which are not adapted to the wearer.

During the long winter evenings it is especially desirable that the light be bright and steady. If you use kerosene, take heed that all parts of the lamp are kept clean and bright. If the burner is of nickel rather than brass it will give a white instead of a yellow light, which will be found a great improvement. The large wick is to be preferred, even if more oil is consumed. Oil is cheaper than eyesight.

Avoid using the eyes after they become tired or there is an inclination to rub them. Bathing in cold or even quite warm water is in many instances beneficial. The treatment which helps one may not be the best for another, and if one has a suspicion that the course recommended by a friend is injurious in his own case, it should be at once discontinued. In fact, any radical treatment should never be commenced save under the direction of a skilled oculist. The quack who has a cure-all for every ailment should not be allowed to practice upon the eye.

If you need glasses, consult a competent man. The place where you can get them the cheapest may prove to you the dearest in the end. A perfectly-fitting lens is of much more value than a gold frame. Scarcely any pair of eyes are exactly alike, and it requires science and skill to make the proper adjustment. Only the competent oculist should be allowed to make the attempt.—Bessie L. Putnam.

Averted the Goslings.

"Why is it," asked Rose Stahl, "that in the spring a young woman's fancy is so apt to turn to clucking hens? Last year one of my best friends abandoned the footlights and sought the actors' oft-dreamed-of paradise, a little home in the country.

"As a recreation she decided to start a poultry farm, which she did with a barn-yard hen and thirteen eggs from the village store. Not having even the most elementary knowledge of poultry, she inquired of a neighbor how long eggs generally took to hatch. She received the reply:

" 'Three weeks for chickens and four for ducks.'

"The neighbor met her some time afterward, and, on being asked how the poultry farming was going on, she replied, with a lowering countenance:

" 'Oh, I've finished with it. At the end of three weeks there were no chickens, so I took the hen off, as I didn't want ducks.' "—Young's Magazine.

$5.00 Worth of Havana Smokes For 99 Cents

YOUR idea of what is meant by the word "stogie" will undergo a big change after you smoke one of the fifty Menges Stogies I will send you postpaid for 99 cents. I call them stogies because they resemble ordinary stogies in size and shape, but in other respects, tobacco quality and smoke satisfaction, they are equal to any 10-cent straight cigars. Old smokers have written me often regarding the tobacco I put into my stogies—it is grown in this country from the purest Havana seed. It is impossible to equal this tobacco in any stogies or cigars at my prices. This is absolutely the greatest smoker's offer made, and no smoker can get such genuine satisfaction and pleasure for so little money elsewhere.

Exact Size

Menges Stogies Sure to Afford You Lasting Pleasure

The value is in the filler, not wasted in a fancy but worthless wrapper. My wrapper is good, honest leaf, free from breaks or openings and therefore draws well. A Menges Stogie is a real treat, a smoke good enough to offer to your friend or guest. I have sold thousands upon thousands of Menges Stogies under my **money-back guarantee.** I have not had a single stogie of the thousands returned but, instead, **have had repeat orders from 96 out of every 100 smokers who have tried them.**

Absolute Good Faith in Every Detail of This Big Value Offer

I guarantee my goods. I guarantee you satisfaction. I can't afford to let a single man question anything—I don't leave a single loophole for myself. I say to you in plain English—if after you smoke a few of the 50 Menges Stogies I will send you at 99 cents you find that you do not consider them worth what you have paid for them, you do not consider them satisfactory or pleasant smokes, then return what you have left to me and I will refund what you have paid me without argument and cheerfully. This offer practically means getting Havana cigars of 10-cent straight quality for 2 cents each, so let me have your order at once. Just send me the coupon or a note and money order and I will send you the goods postpaid very promptly.

H. MENGES
The Smoker's Friend
519 Menges Bldg., St. Louis, Mo.

Send This COUPON Today

H. Menges, 519 Menges Bldg., St. Louis, Mo.
I enclose 99 cents for which send me postpaid 50 of your Havana Seed Stogies. It is understood that I am to keep them 10 days, smoke as many of them as is necessary to try them, and if not thoroughly satisfied to receive full refund on returning remainder.

Use and Waste of Barn-yard Manure.

The indiscriminate application of barn-yard manure is often attended with considerable loss. Often it is put onto land where it would be more profitable to apply other kinds of fertilizer. It must be remembered that barn-yard manure is a complete fertilizer. It contains all the elements of plant growth—the nitrogen, the potash and the phosphorus. It should be always applied to the lands that need the three elements, rather than to land that is deficient in only one element.

It is therefore a mistake generally to apply farm-yard manure to reclaimed swamp land. Such soil is very rich in nitrogen and the added nitrogen in the farmer's manure is just so much nitrogen thrown away. It would be far more economical to put potash onto such swamp land and perhaps phosphate than to waste the three-fold barn-yard fertilizer on it.

In the fall and winter barn-yard manure can be placed on top of the soil with less loss than at any other time of year. In the spring and summer the atmospheric conditions are such that much of the volatile portion of the manure is dissipated into the air, to the benefit of no one. But in the fall and winter the cold and rains keep the volatile portions from going off in the form of gas, and most of the manurial elements are washed into the soil.

The old-fashioned manure-pile should be a thing of the past. A manure-pile properly protected from sun, wind and rain is profitable and to be encouraged, but the one that formerly existed was exposed to all kinds of deteriorating influences, so that by the first of April a large percentage of its fertilizing value had been taken away. Where it is convenient to do so, hauling out the manure onto the land at least once a week will be a safe way to dispose of it. If exposed to the rains in the barn-yard the soluble portions are washed out into some brook or drain and are lost, but if exposed to the rains in the fields the soluble portions are washed into the soil, where they will do the greatest possible amount of good.

Getting the manure under the ground as soon as possible is still the way to get the most out of it. It should be worked into the soil as soon as possible after it is made. The old idea of waiting till manure is well rotted before plowing it under is now an exploded theory. The manure that is freshly made contains the greatest possible amount of fertility, and no process of handling can make it contain any more. Every day that it remains unused it loses some of its value.

After all, the greatest waste in manure comes from not using more of the commercial kinds to supplement the barn-yard manure. Often such soil as reclaimed marsh land would produce double its usual crop by the application of a few dollars' worth of potash or some other kind of which the land chances to be in need. Few of our farms produce enough barn-yard manure to meet the requirements of the farms.

Drainage and the Water Table.

In the drainage of all kinds of land the water table in the soil should be taken into consideration. Usually in the past, the drainage operations have been carried on with the idea that it was not possible to get too much drainage. It was supposed that if the too abundant water were taken out of the soil there would still remain enough capillary water in the soil to satisfy the requirements of all crops. That this is not true is now shown by the experiences of men in all parts of this country.

The real object of drainage operations is to lower the water table in the soil. But this table should not be lowered to a greater depth than three or four feet at the most. Usually about thirty-six inches is the best distance for the surface of the soil above the water table. Often the result of deep ditches has been to reduce the water table to a distance of ten feet or more below the surface of the soil. It is plain to see that in such a case crops will suffer on such land every season that is not unusually wet.

Even marsh lands are sometimes drained too well. Recently a Wisconsin bulletin cautioned against this error as to swamp lands. It says: "On some marshes * * it is possible that too thorough drainage may occur, so that crops on such land during very dry seasons may suffer for lack of water. Under such conditions it is quite probable that the use of dams at intervals in the mains and larger lateral ditches for holding back the water during very dry seasons will be found advantageous."

Of course the use of the dams would be to cause the water table in the soil to rise to a point where the water would be within the reach of capillarity. It is probable that in the future, tile-draining systems may be so constructed that it will be possible to cause them to become inoperative at such times as it is desirable to hold the meager water supply in the soil.

The reckless lowering of the water table in the soil through drainage has been a fruitful source of loss to parks and wooded areas. When, in preparation for the World's Fair at Chicago, in 1893, the lagoons were dug in Jackson Park, large numbers of fine trees died. The great lagoons were really immense drainage ditches, which lowered the water table in the soil sometimes as much as ten feet. The roots of the trees had accustomed themselves to a certain strata of soil filled with capillary moisture and plant food. When the lagoons were made the trees found their roots in perfectly dry soil in the summer time, and their leaves wilted months before the coming of frost. In every place where sewer systems are put in this result is common. Many a lot loses some of its good trees.

We need the drainage on our farms and elsewhere, but we need also to keep in mind the fact that the relation of the moisture supply to the soil is one of supreme importance.

This is a Crescent gold-filled watch case enlarged to show detail. You will find "gold-filled" watches sold by all sorts of jewelers at all sorts of prices. If you buy on price or *guarantee* stamp you are pretty sure to get a shoddy case.

You can tell a reliable case by the depth of the engraving and engine-turning—and by the "Crescent" or "Jas. Boss" trademarks stamped inside.

Deep engraving always indicates a thick gold-wearing surface. In a trashy case the gold is not thick enough to stand deep cutting. The design is shallow cut or merely burnished on.

Don't be misled by irresponsible "guarantees" stamped inside the case. A true warranty of value and service is the "Crescent" or "Jas. Boss" trademark. They are standard with the fine jewelry trade and have been for fifty years.

The Keystone Watch Case Co.

A Boy Corn Champion.

A fifteen-year-old high-school boy, J. Sam Griffin, is the champion corn grower of Lucas county, Ohio. In a contest held at the Lucas County Fair this fall, he won a first prize of $20 for having grown, at the least expense, the greatest yield of corn on an acre of ground. He also won a first prize of $6.00 on twelve ears of corn of best quality shown in the class for boys under eighteen years. In the acre contest, the second prize of $15 was won by Ross Kaspar, fourteen years old, an elementary school boy. These boys both live in Richland Township, where, for the past two years, agriculture has been taught in the high school.

FREE TO HORSE OWNERS.

A booklet on the horse is published by the Binkley Medical Co., Nappanee, Ind., sole manufacturers and owners of Frazier's Distemper Cure. You can learn the causes, symptoms and treatment of all contagious diseases among horses from this book. It is sent free. Address, Binkley Medical Co., Dept. H, Nappanee, Ind.

Our Rose Premiums.

During the coming rose season we intend to give all of our readers a chance at a new collection—the finest collection ever offered. There will be eight choice, hardy, one-year roses, as follows: Etoile de France, Yellow Kaiserin, Helen Gould, Clothilde Soupert, President Taft, White Killarney, Marigold, Everbloom Rambler.

Our Special Offer.

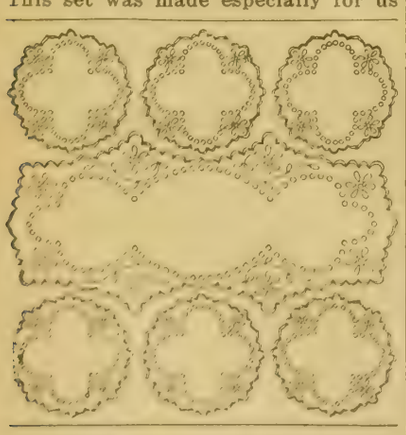
Send us sixty cents. We will send you The National Farmer and Stock Grower for one year. We will send you direct by mail, postpaid, the full set of eight hardy, ever-blooming roses directly it is safe to deliver them. We will also send you a 16x20-inch picture entitled **"The American Beauty Rose."** The picture is most beautiful. There is a great bunch of roses resting on the white linen cloth of a table. It is glorious, magnificent. We have sent out many thousands of these pictures and sets of roses, and all receiving them have been well pleased. Send your orders early to avoid getting left. We are only allowed ten thousand sets of roses.

UNIVERSAL EMBROIDERY SET.

A Subscription Premium in Connection With the Universal Magazine.

The most beautiful of all trays and doilies are those which display a great deal of eyelet work; there is nothing more attractive on the dining room table than white linens embroidered in open work through which the polished wood may show.

The pretty Universal Embroidery Set illustrated below shows a dainty pattern that should be carried wholly in eyelets, both ovals and rounds. This set was made especially for us



and consists of one large tray, size 8x17 inches; six doilies to match, size 5½x5½ inches, all stamped on fine white imported linen.

Send us thirty cents and we will send you this dainty set for a short time only, absolutely safe delivery guaranteed, and the Universal Magazine for one year The Universal Magazine is a nice, thirty-two-page, three-column magazine, issued monthly. It contains illustrated reading matter of interest to all the family. There are nice stories, historical sketches, selected poetry, a splendid line of patterns, and has a number of original household articles. Address, **HALE PUBLISHING CO, 3550 Vista Ave., St. Louis, Mo.**

To Club Raisers:—Anyone who will send in four subscriptions and $1.20 to pay for same will be credited with one-year's subscription to the Universal Magazine and one Embroidery Set.

AN OPINION OF ABSORBINE.

Rev. A. E. Stanton, 1223 Marshall Ave., Mattoon, Ill., under date of March 28th, 1911, stated his opinion of Absorbine in these words: "Your remedies came safely and wish to say that they have accomplished far more than we really expected." Use Absorbine for wind puffs, capped hock, thoroughpins, bog spavin, lame shoulder, ruptured ligaments, swollen tendons, etc. At druggists, $2.00 a bottle, or sent direct, express prepaid, upon receipt of price. Descriptive pamphlet sent free upon request. W. F. Young, P. D. F., 106 Temple street, Springfield, Mass.

BIG LABOR-SAVING FARM MACHINE.

The Luther Hummer Tool Grinder, an advertisement of which appears in another section of this paper, is indeed a great labor-saving device for the farm. Although it is only one machine, it is so constructed that attachments can be quickly interchanged which enable one to apply many different operations.

The sharpening wheels of this machine are of Dimo-Grit, the newly-discovered artificial abrasive, which is as hard as South African diamonds. These wheels revolve at a speed of 4,000 revolutions per minute and do the work very rapidly, without the need of water and without danger of drawing the temper. Dimo-Grit is a substance peculiarly adapted to the sharpening of steel.

Besides doing all kinds of grinding and sharpening of ordinary tools at a great saving of time, this machine has a flexible shaft attachment for sharpening ensilage and threshing machine knives and mower guards, flutes on corn huskers, etc., without removing them, also for sharpening horseshoe calks, clipping horses and shearing sheep.

It has a milk-tester attachment for testing butter-fats. One-third of the cows in the country are milked at a loss, therefore it provides a means of detecting the money-losing cows. It also has a lathe attachment, rip saw, jig saw, drill for boring holes into wood or iron, and attachments for sharpening discs, sickles and gumming saws—thirty attachments in all.

In these days of inventions the farmer is being well taken care of in the way of labor-saving machinery. For particulars concerning thirty-days' free trial address Luther Grinder Mfg. Co., 157 Stroh Bldg., Milwaukee, Wis.

NEW TRAPPING LAWS.

The wide variation in trapping laws in various states makes it quite necessary for the trapper and farmer to be in close touch with game legislation at all times. The old saying that "ignorance of the law excuses no man" has caused regret in the heart of many only when it has been too late.

As a rule, the professional trapper makes it his business to become acquainted with all new laws regarding hunting and trapping, but there are many farmers and amateur trappers who are not as familiar with game laws as they should be.

These people will be glad to learn of a book which is now being distributed free by F. C. Taylor & Co., 315 Fur Exchange Building, of St. Louis, Mo., the world's greatest fur house. This book gives game laws of every state in the Union and Canada. It also tells how and when to trap, what baits to use for various animals, and reveals some trapping secrets which have always been carefully guarded by trappers in the past. We suggest that those of our readers who are interested in hunting or trapping send for a copy of the book.

HOW HE STARTED IN LIFE.

Reporter—"Is it true that you started life as a poor plow boy?"

Citizen—"No, sir; I started life as a small, red-faced baby. Good day, sir!"—Exchange.

YOU **$5 to $10 a Day Easy Money** **YOU**

MAKES no difference if you never sold a dollar's worth of goods in your life—big money comes easy taking orders for our famous made-to-order union made suits, pants and overcoats. Prices so low, quality so high, they sell on sight.

Be a Bank-Roll Owner—Not a Small-Change Man

You'll never have a better chance to get in with the big-money crowd than we're offering you right now without a cent of expense. And remember, there's no hard work involved. It's a snap. We sell suits from $5 to $10 less than other houses, give better materials, better tailoring, better fit—and an absolute guaranty of satisfaction or money refunded.

We Back You We will put our enormous capital, our years of experience, back of you—you don't need a cent. **We start you free** on the high road to wealth—your success is our success. Regal representatives are pointed out with pride in their home towns as substantial citizens. DON'T LET THIS WONDERFUL OFFER WAIT BUT WRITE ME NOW--TODAY.

L. R. FORD, Manager, **36 Friend Bldg., KANSAS CITY, MISSOURI.**

More Christmas Presents.

On page 22 appears an article entitled "Christmas Presents That Boys and Girls Can Make." This is an additional list which will be found both practical and interesting.

Fruit basket.—If you have learned at school how to weave baskets, you can probably make a pretty fruit basket out of raffia. But if that is not one of your accomplishments, select a small grape basket or a box and cover it with green tissue paper; the crepe paper will look the prettier. Polish half a dozen of the biggest and best best-tasting red apples you can find, fill the basket with these, then go to the attic where are the nuts you have gathered this fall, select a few generous samples of each kind and put them in the basket in the empty spaces between the big apples. Such a gift as this to your school teacher or to your Sunday school teacher, or to any person who does not have all the country privileges you do, will be considered a great treat.

Pine cones and needles.—If you live near a pine grove, you have a rare opportunity to make odd Christmas gifts. There is nothing prettier than a fire of pine cones on Christmas Eve. When they burn, they do not fall to pieces readily, and the cone is a mass of fire, in perfect shape for some moments before it falls apart or chars, and the odor they give out when burning is delightful. Collect the cones and let them dry in the sunshine for a couple of days. Make bags out of some kind of bright red material, fill the bags with the cones and attach a card bearing your wishes for a "bright Christmas fire." The pine needles make fragrant cushions. The needles sent alone would make a very good present, or made up into a cushion would be still better .

Set of cupboard cans.—Hunt up all the empty cocoa or baking-powder tin cans you can find. Soak them in hot water until all the paper can be taken off of them. Then polish the cans, take a paint brush and a tube of green or red oil paint and print upon the middle of the cans the words "Salt," "Pepper," "Cinnamon," "Sugar," and so on. Now take the tops of the cans and a small nail, and with the nail punch holes through the covers. This makes it possible for your mother to use the can in sprinkling pepper, salt, sugar, or any of the other seasonings into her cooking kettles.

Tea cosy.—Every person dislikes warm tea; if it isn't served on ice, then it must be piping hot. To help these particular elders to keep their tea hot, suppose you make a tea cosy as follows: Use a dinner plate as a guide to cut two round pieces of goods, either cretonne, sateen or even gingham or calico; now cut two layers of cotton wadding, about half an inch thick; place one piece of wadding on the wrong side of each of your pieces of goods. Now double the goods over, so that it will form a semi-circle, with the wadding as a lining. Run a few basting threads across these semi-circles so as to keep the wadding in place, then turn in the edges of the goods and baste neatly together all around. After the basting is finished, sew together by overcasting or by buttonholing the edges. Next knot a few pieces of yarn or ribbon through the sides of your cosy to keep the cotton in place. Pull out all of the basting threads, then sew together the two curved edges of the semi-circles. When these are joined, fasten a ribbon right in the middle of the curve, which, you see, makes a handle for the top of the cosy. Now slip the cosy over the teapot. Doesn't it cover up the pot so nicely that none of the warmth can escape?

Snapshots.—There is only room to suggest that if you have a camera, no matter how small, you make use of it in taking snapshots of pretty scenes in your neighborhood or pictures of the little brother or sister or of father or mother. Take them when they are not posing for a picture, for you know an unstudied pose is always best. Mount these snapshots on little calendars or on match scratchers or make a small book of them and give them to members or relatives of the family. What a laugh grandmother and grandfather would have over a funny picture of baby! And how a big brother or sister away from home would enjoy a book of home pictures! And there are uncles and aunts who would like nothing better than pictures of the home or of the members of the family. — Janet Thomas Van Osdel.

A Novel Sleeve.

One of the newest sleeves is long and very close-fitting, with a slash from the shoulder to deep cuff depth, where a row of buttons makes a finish to the hand.

The slash is filled with soft, scanty lace frills, or with one long lace puff of scanty fullness. Sometimes, when a touch of bright color is used with a dark tone, the deep color appears under this slash. There is no end to the possible variations.

Yesterday and To-day in Foods.

About a century ago the beneficial effects to the digestion, and the appetite, of foods made from coarse flour was discovered by Dr. Sylvester Graham. Flour thus made was named Graham flour. after Dr. Graham.

In those days Graham flour contained a great deal of nourishment, and stimulated and strengthened digestion and appetite, but was so coarse that it was almost "like taking medicine" to eat it.

But to-day the Graham Crackers baked by the National Biscuit Company have a most delicious nut-like flavor and are a toothsome delicacy as well as being healthful. This is due to perfected modern processes which preserve all the natural goodness, sweetness and healthfulness of the wheat. They are packed by the National Biscuit Company under their well-known In-er-Seal Trade-Mark in moisture- and dust-proof packages, thus retaining crispness and flavor.

Range of Prices on Fish.

On November 30th, wholesale fish receivers at St. Louis quoted prices as follows: Black bass, 12c. per pound for large, 15c. for medium and 19c. for order size; crappie, 8c. per pound for small, 10c. for medium and 12c. for large; dressed cat, with collar bones off, at 11½c.; collar bones on, at 10½c.; gross do. at 6c.; spoonbill cat, 8c. for large, 7c. for medium and 6c. for small; dressed bullheads, with collar bones off, at 11c.; collar bones on, at 10c.; buffalo, large gross at 5c.; medium gross at 3½c.; large dressed at 6½c.; medium dressed at 5½c.; German carp, large dressed at 5c.; small dressed at 4c.; large gross at 2c.; sunfish, 3½c. for small to 4½c. for large; white perch, 3c.; large striped bass, 6c.; eels, 7c.; turtles, soft-shell, 5c.; snapping turtles, 3c.; turtle meat, 8c.

I Am Willing To Prove I Can Cure You

To That End I Am Giving Away $10,000 Worth of Medicine

In order to show beyond all doubt that I am in possession of a medicine that will cure kidney trouble, bladder trouble or rheumatism, I will this year give away ten thousand dollars' worth of this medicine and anyone suffering from these diseases can get a box of it absolutely free. All that is necessary is to send me your address.

I don't mean that you are to use a part of it or all of it and pay me if cured. I mean that I will send you a box of this medicine absolutely free of charge, a gift from me to the Uric Acid sufferers of the world, so I can show them where and how they may be cured. I will not expect payment for this free medicine, nor would I accept it now or later if you sent it. It is free in the real meaning of the word.

For twenty-five years—a quarter of a century—I have been trying to convince the public that I have something genuine, something better than others have, for the cure of stubborn, chronic rheumatism, for torturing kidney backache, for annoying calls to urinate. But it is hard to convince people—they try a few things unsuccessfully and give up all hope and refuse to listen to anyone thereafter. Happily, I am in a position now to demonstrate to sufferers at my own expense that I have a medicine that cures these diseases. I don't ask them to spend any money to find out; I don't ask them to believe me, nor even to take the word of reliable people, but all I ask is that they allow me to send them the medicine at my own cost. That is surely fair.

DR. LYNOTT
who is giving away $10,000 worth of medicine.

To this end I have set aside ten thousand dollars, which will be used to compound my medicine. Much of it is ready now to be sent out, all of it fresh and standard. There will be enough for all sufferers, though there be thousands of them. And anyone who needs it can get some of it free. But in order that I shall know that you have a disease for which the medicine is intended, I ask you to send me some of your leading symptoms. If you have any of the symptoms in the list printed here you need my medicine, and if you will write me I will gladly send you a box of it free with full directions for your use. Look the symptoms over, see which symptoms you have, then write me about as follows: "Dear Dr., I notice symptoms number"—here put down the numbers, give your age, full address, and send it to me. My address is Dr. T. Frank Lynott, 4921 Occidental building, Chicago, Ill.

The ten thousand dollars I am spending for the compounding of my medicine is only a part of the money I am devoting to this cause, for the package of medicine I send you will be fully prepaid at my expense. From any standpoint you view it, YOU incur no expense or obligation. Just tell others who you know are suffering who sent you the medicine that cured you.

I am promising to give away ten thousand dollars' worth of medicine, and I will do that; I am promising to send any sufferer who writes me a box of this medicine and full directions free of charge, and I will do that. I can say further that this medicine has been vouched for to the Government as complying in every detail with all requirements. It will stop rheumatism; it will stop pain and backache; it will stop too frequent desire to urinate; it will heal, soothe and strengthen. You will be better in every way for having taken it. There is not an ingredient that can injure; not one but will benefit. All that I ask is that you use it yourself so that you may be personally convinced.

Owing to the large number of requests, I have had ten thousand more copies of my medical book printed. This book is new and up to date and contains complete descriptions, symptoms, causes, effects and cures of kidney, bladder and rheumatic diseases. All who write for the free medicine will be sent a copy of this grand illustrated medical book—the largest ever written on these diseases for free and general distribution.

If you need medicine such as I have, if you are anxious to be cured and don't want to spend any money LOOKING for cures, write me. Read the symptoms over and let me hear from you today.

These Are the Symptoms:

1—Pain in the back.
2—Too frequent desire to urinate.
3—Burning or obstruction of urine.
4—Pain or soreness in the bladder.
5—Prostatic trouble.
6—Gas or pain in the stomach.
7—Geneal debility, weakness, dizziness.
8—Pain or soreness under right rib.
9—Swelling in any part of the body.
10—Constipation or liver trouble.
11—Palpitation or pain under the heart.
12—Pain in the hip joint.
13—Pain in the neck or head.
14—Pain or soreness in the kidneys.
15—Pain or swelling of the joints.
16—Pain or swelling of the musles.
17—Pain and soreness in nerves.
18—Acute or chronic rheumatism.

Only 40 Cents

Anti-Nicotine Calabash Pipe

THIS splendid Calabash is modeled on the lines of the original African Calabash Gourd. I have placed in it my famous Anti-Nicotine Bowl, made of a clay-like material which absorbs the nicotine and uses it to color the pipe like the finest Meerschaum. You do not have to "break in" this pipe. There are no vile fumes. It is always sweet, clean, dry. With German Silver mountings, 40 cents each, three for a dollar. Sent prepaid anywhere with a copy of our fine catalog of smokers' articles. Send today. Money back if not satisfied.

Including medicines, prepared for any one giving a full description of the case and sending names of 2 asthmatic sufferers. Address **FRANK WHETZEL, M. D.** Dept. N, American Express Building, Chicago.

Paper-bag Cookery.

During the past months the method of soaking food in paper bags has been much talked of. There are so many points in its favor that every woman interested in setting a good table at as low a cost as possible will be glad to learn of this way of cooking.

The bags come in assorted sizes and are especially prepared for the purpose of cooking food, being made of strong, waterproof, odorless material. Meats, potatoes and many other vegetables can be better cooked in this way than by the old method. In the main, the directions for using the bags are to prepare the food exactly as for cooking in the ordinary manner, using this precaution, however: Nothing in the way of juices, flavors or seasonings is lost in paper-bag cookery, so be a little sparing at first in the use of salt, pepper, sugar, or any sort of seasoning. After a few experiments on your own part you will understand exactly how to temper the seasoning. When the food is ready for the oven (all paper-bag cooking must be done in the oven) grease the inside of a bag which is the right size to contain the food. Have the bag a rather close fit, as this gives the best results in the finished product and also does away with a tendency for the unfilled portions of the bag to harden and crumble away; where the food touches the bag, the latter is kept moist and pliable. Have the bag right side up to receive the food; that is, with the seam on the top side. Then fold over the open edges of the bag several thicknesses and fasten them with a pin or a wire clip. Slip the bag into the oven, which should be at a sufficiently high temperature to slightly brown the corners of the bag within a couple of minutes. But after cooking at this temperature for about ten minutes, lower the heat about one-sixth. After you have experimented enough to know how to use your oven in this manner of cooking, there is no need of looking at the food from the time it is put into the oven until it is time to take it out. It should be cooked according to the usual scheduled time for cooking the dish. And if, perchance, the food should stay in the oven ten or fifteen minutes longer than the scheduled time, it will not be spoiled in the least. When taking from the oven, slip the bag upon the platter or dish which is to bear it to the table, split the bag across the top and remove the fragments of paper.

I am giving two recipes for food cooked in paper bags:

Roast chicken.—Select a young roasting fowl, clean and wash it, then fill with a dressing made from stale bread which has been soaked in water until soft, then squeezed almost dry and mixed with a beaten egg, the chopped liver of the chicken, one tablespoonful of lard, pepper, salt, and either sage or onion for seasoning. Sew up the chicken and rub a little butter and some pepper and salt over it, slip it into a buttered paper bag, seal the bag and put into the oven to cook the required time.

Baked apples.—Select firm cooking apples, wash and core them, then fill the opening left by the removal of the core with sugar, a few drops of water and a dab of jelly. Put into the buttered or greased bag, seal the bag, slip it into the oven and cook for twenty to twenty-five minutes.—Janet Thomas Van Osdel.

Winter Birds.

There is no more fascinating or more helpful study for the entire family than the birds of your own farm. And they have so great an economic value that it is really good business as well as good mental discipline to get acquainted with them.

Popular notions to the contrary, winter is really the most opportune time to begin a study of their habits. There are fewer forms to confuse the amateur, and the leafless branches render their coming and going more readily seen. Besides, they are more inclined to be friendly at this season, especially if you preface your advances at familiarity with a few crumbs or stray bits of grain.

Commence with the species which is nearest at hand, and though you may fancy it so commonplace that there is little to learn about it, careful study and observation for a few days will reveal many interesting traits. There are habits peculiar to the species and others which may be said to belong to individual birds. And the separating of these becomes another valuable part of the work. The study is of general interest, or can be made so, even baby contributing his share to the fund of knowledge.

The number of winter birds will be found much larger than is usually supposed, some of them frequenting the yard and others being found in sheltered thickets or woodlands. How they subsist is the first question, and it can be answered in two words—seeds and insects. The seeds are largely those of weeds; the insects such as can be found on or inside the bark of our common trees.

There are many wild fruits which cling until devoured by our winged friends. And the thicket of black haw may prove a delightful retreat. In taking up the study, it may be well to select some well-known family, like the woodpecker, and note the traits of various species at the same time.—Bessie L. Putnam.

Illinois raised a corn crop of 365,504,000 bushels in 1911, which is 58,000,000 bushels more than was raised in any other state.

Sister Woman!

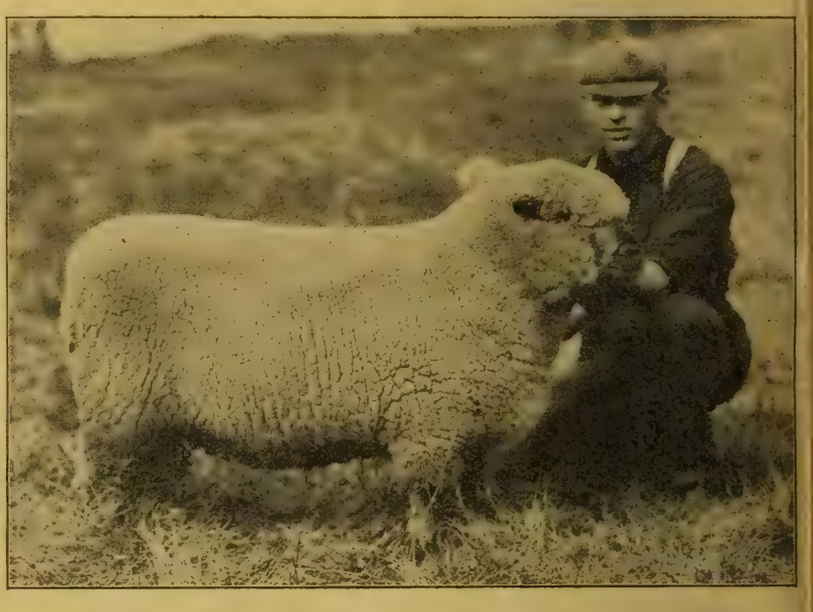
READ MY FREE OFFER

My Mission is to make sick women well, and I want to send you, your daughter, your sister, your mother, or any ailing friend, a full 50-cent box of Balm of Figs Compound absolutely free. It is a remedy for the treatment of woman's ailments, and I want to tell you all about it—just how to use it yourself—right at home without any inconvenience—and the best of it is that it will not in the least interfere with your work or pleasure. Balm of Figs Compound is a remedy that has made sick women well and weak women strong, and I can prove it—let me prove it to you, and I will gladly do it, for I have never heard of anything that has, according to the abundance of testimonials at hand, so quickly and surely cured women's ailments. No internal dosing necessary—it is a local treatment, yet it has to its credit some of the most extraordinary cures on record. Therefore I want to place it in the hands of every woman suffering with any form of female weakness or diseases so common to women.

This 50c box of Balm of Figs Compound will not cost you one cent

I will send it to you **absolutely free,** to prove to you its splendid qualities, and then if you wish to continue further, it will cost you only a few cents a week. I do not believe there is another remedy equal to Balm of Figs Compound, and I am willing to **prove** my faith by sending out these **50-cent boxes** free. So, dear reader, irrespective of your past experience, write to me **at once — today** — and I will send you the treatment **entirely free** by return mail, and if you so desire, I can readily refer you to many, who can personally testify to the great and lasting cures that have resulted from the use of this remedy. But after all, the **very best test** of anything is a **personal trial** of it, and I know a 50-cent box of Balm of Figs Comcound will **convince you** of its merits. Nothing is **so convincing** as the **actual test** of the article itself. Will **you** give Balm of Figs Compound this test? Write to me today, and remember I will gladly send you a **50-cent box of this remedy absolutely free.** Address,

MRS. HARRIET M. RICHARDS, Box C 223, JOLIET, ILLINOIS



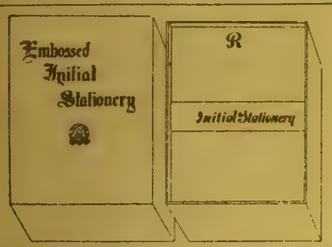
CHAMPION OXFORD DOWN RAM at Indiana, New York and Michigan State Fairs of the year 1911. Owned and exhibited by Geo. McKerrow & Son, of Pewaukee, Wis. This is a sample of the sheep pictures collected for publication in the Book of Live Stock Champions mentioned on page 8 of this paper.

The Army and Navy Needle Book.

A TEN-CENT PROPOSITION WORTH TEN TIMES AS MUCH. The Army and Navy Needle Book contains five packages of Peerless Steel Needles, warranted; sizes, 3 to 9, 5 to 10, 6 to 7. There is no needle in the market better. There is also an assortment of fifteen other cloth-stuck needles, such as darners, mending needles, stitching needles, crewel needles, glove needles, straw-working needles, worsted needles, etc. The book as a whole cannot be beat. We have adopted the Army and Navy Needle Book as a subscription premium with the **Universal Magazine,** our own publication. It is a thirty-two-page, three-column illustrated monthly magazine. It contains interesting reading, stories, poetry, history, and useful information, fashions, patterns, etc. It is a magazine that recommends itself. Send us 10 cents in silver and we will send you the **Universal Magazine** on a trial subscription for three months, and we will send you one Army and Navy Needle Book. Address, **THE HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo. TO CLUB RAISERS:**—Anyone who will get up a club of four subscriptions to the **Universal Magazine** in accordance with this advertisement will be credited with an extra three-months' subscription to the **Universal Magazine** and an extra package of needles will be sent for getting up the club. Don't wait. Remember, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

Universal Magazine Initial Stationery.

One of the most refined and elegant subscription premiums ever offered. A box of elegant white, cloth-finish embossed initial stationery sent free, postpaid, and safe delivery guaranteed. This is a splendid subscription premium offer in connection with the interesting publication entitled the Universal Magazine. The Universal Magazine is a nice, bright, cheerful, illustrated monthly magazine of thirty-two pages, three columns to the page,



Embossed Initial Stationery.

containing home reading, stories, fashions, patterns and poetry — a splendid publication for the money. To anyone who will send us a money order for 50 cents we will send the Universal Magazine for two years, and they can select their own initial for the stationery, and we will send it as a free premium, postpaid. Money refunded if not satisfied. Address, **HALE PUBLISHING CO., 3550 Vista Ave., St. Louis, Mo.**

To Club Raisers:—Anyone sending in four subscriptions and $2.00 to pay for same will be credited with a two-year subscription to the Universal Magazine and one box of Initial Stationery.

Washable Hangings and Ceverings.

For daintiness and serviceableness there is nothing that can come up to the pretty cretonnes and chintzes which can be had in almost any desirable pattern and color. They are washable, which makes them so practical for bedrooms and even for living rooms. It is so often necessary in homes of limited means to put discarded furniture into the bedrooms, something that was once good enough, perhaps, for the parlor, but because of shabbiness or other unfitness has been relegated to a less conspicuous place. Here is where cretonne or chintze can be worked in. Suppose this discarded chair is an upholstered one. Select a cretonne in which the flowers match the wall paper and make a slip-over cover for the old chair. This can be done by cutting the cover after the outlines of the chair; finish off with a flounce around the bottom. This gives a chair which is a real addition to the comfort and appearance of the room; the covering is washable and can be removed at any time. Now, to carry the idea out a little farther, make a bedspread with a valance of the same kind of goods as was used for the chair cover; put a valance across the top of the windows and also inside curtains, using either the same cretonne or white material bordered with a strip of the goods. If there is a good dresser in the room, make a dresser cover of white and border it with a strip of the cretonne; if there is no dresser, make a dressing table by taking a discarded kitchen table or even a box will do, and making a hanging of cretonne to go all around the edge. This will completely hide the legs of the table or the sides of the box; an extra valance a few inches wide running around the top of the other hanging will give a pretty finish. Cover the top of the table with the same material. Above the dressing table hang a mirror and surmount it with a valance of the cretonne. Perhaps the best way to attach the valance to the mirror is to first tack the half of a barrel hoop to the top of the mirror and then attach the valance to the hoop. A finishing touch will be several sofa cushions, if there is place for them, made of the cretonne or of harmonizing plain materials bordered with strips of the cretonne. —Janet Thomas Van Osdel.

How the Nervous Child May Be Helped.

Some children are born nervous and some are made nervous by their manner of living. But whatever the cause of this condition, it can be relieved to a great extent by the mothers themselves. Nervous children, more than any others, require a simple, nutritious diet, something that will give the most nourishment with the least expenditure of energy on the part of the digestive organs of the child. Candy, rich pastries and heavy foods of all sorts should be avoided. The child should not be allowed to eat at any and all times between meals. There are times when undoubtedly he needs food between the regular meals of the day, but he does not need it if he insists that it be cake, pie or candy, and refuses a glass of milk or a slice of whole wheat bread and butter.

Pure air, in abundant quantities, both day and night, is what a nervous child needs. There is no place better than the farm for the child with such trouble, and the mother should see to it that he spends a large part of the day out of doors, both summer and winter. There is always danger that the naturally delicate child will be coddled, and this so often means that when the first cool weather comes he is kept indoors. As the days grow chill, he should be dressed a little warmer, but be sent out to play every day; by the time the really cold weather comes he will be so hardened to it that he will want to be out of doors every day, just as in summer. Ten to one, he will not have a cold all winter. The healthiest youngsters I ever knew were five children who were out every day in the year, rain or shine, hot or cold. As the cool weather came on these five began to grow in bulk by reason of their additional clothing, and by the middle of winter they were as round as barrels. I remember that the least of these was so very small that his additional clothing made him almost round, and it sometimes seemed easier for him to roll than to walk.

The mother must not suggest to her child that he is nervous. Any mention of his condition tends but to accentuate it. Also, she must not make him any more nervous by any nervousness of her own. So often nervous children are the offspring of nervous parents, and if it is the mother who is thus disposed, her task will be doubly hard; but self-control which she must exert for the sake of her child will result in the greatest good to herself. I have seen a mother, herself all aquiver with nerves, shriek out to a restless little one: "Oh, you make me so nervous, Bessie! Do sit still!" Of course, the tone and manner serve only to increase the restlessness of Bessie, but the mother thinks she has done her best to quiet the child. If instead she had said in a calm tone: "Shall we see how still we can be for five minutes, Bessie?" or, "Wouldn't you like to sit down and look at the pictures in this book, dear?" Bessie would have yielded immediately and settled down to some quiet occupation without any nerve strain on either mother or child.

Another woman I know fusses at her child. Perhaps she is straightening the hat or pulling out its ribbons or jerking down its dress or urging it to look at this, that or the other thing. Thus the child is kept constantly on the alert and loses what little natural repose it may have. If left a large part of the time to its own amusement it would become more resourceful and gain a poise that it can never have if constantly in the company of a fussy mother.—Janet Thomas Van Osdel.

$1 Worth of Mayr's Wonderful Stomach Treatment FREE

It is a positive remedy for all Stomach, Liver and Intestinal Trouble, Gastritis, Indigestion, Dyspepsia, Pressure of Gas around the Heart, Sour Stomach, Distress After Eating, Nervousness, Dizziness, Fainting Spells, Constipation, Congested and Torpid Liver, Yellow Jaundice, Sick Headache and Gall Stones.

The above ailments are mainly caused by the clogging of the intestinal tract with **mucoid and catarrhal accretions**, backing up poisonous fluids into the stomach, and otherwise deranging the digestive system. I want every sufferer of any of these diseases to test this wonderful treatment. **You are not asked to take this treatment for a week or two** before you will feel its great benefits—**only one dose is usually required.** I say emphatically it is a positive, permanent remedy and I will prove it to you if you will allow me to. I will send the complete $1.00 treatment to sufferers absolutely **Free** so you can try it in your own home at my expense.

The most eminent specialists declare that 75 per cent of the people who suffer from Stomach Trouble are suffering from **Gall Stones.** I firmly believe that this remedy is the only one in the world that will cure this disease. Sufferers of Stomach and Liver troubles and **Gall Stones** should not hesitate a moment, but send for this **Free** treatment at once. Put a Rivet in Your Future

Go into business for yourself and insure your own success and comfort. Here are some fresh instances showing how to succeed on small investments. The facts given are substantiated by our agricultural commissioner, Mr. L. A. Markham, formerly with the United States Government as an expert on agriculture:

THE Oakland Fruit Company has 18 acres in Elberta peaches four miles east of Van Buren, Arkansas. Last year that 18 acres yielded 6,000 crates of peaches. Those peaches sold for $6,000. Mr. G. A. Howell, of Van Buren, Arkansas, had 3½ acres in cantaloupes last year. The yield was 472 crates. The 472 crates sold for $603.32. Then he followed the cantaloupes on 1½ acres with beans. The beans sold for $85. Total income from 3½ acres, $688.32.

Mr. J. G. Nordin, of Russellville, decided to plant 2 acres in Nancy Halls. Nancy Halls are a particularly luscious and succulent variety of sweet potatoes. He got 1140 bushels and sold them for $1 per bushel. That's his sworn statement. Now, what do you say? These instances are exceptional? Yes, they are, but surely you could do one-fourth as well. Then, how would you like to raise peaches at $83 per acre, cantaloupes at $50, and sweet potatoes at $142?

There are hundreds of just such opportunities for you in Eastern Colorado, Kansas, Arkansas and Louisiana on the

Missouri Pacific-Iron Mountain

Our Immigration Agent will help you find the right place and our Agricultural Commissioner will help you get right results. It's "your move" now. Send for our booklets and folders, "Eastern Colorado," "Western Kansas," "Arkansas Homebuilder" or "Louisiana Lands." They are free.

Saving in the Kitchen.

A nice way to use up the scraps of bread that are not eaten at meals is to cut the pieces into small squares and brown them in the oven; then they can be put away carefully and they are ready to use in soup, and many prefer them to crackers.

It is a good plan to save all the broken dishes that are worth mending and mend them all at once, and the white of an egg and flour makes a good cement, and melted alum is another, but the best cement is made of Plaster of Paris and a thick solution of gum arabic. Small holes in tinware may be mended with putty, and another good cement for tinware and stone jars is made by mixing together litharge and glycerine to the consistency of thick cream.

A good way to save all kinds of fat, no matter if it is burned, is to pour it all into a crock, and when you have a gallon or more, put into a large kettle with twice the quantity of water, and when the fat is all dissolved, let it boil for about twenty minutes, then cool it, and when it is all hard, take it off and render it down and pour back into the crock, and you will have a nice lot of pure, clean fat. Waste fat may be utilized in the making of an excellent hard, white soap for household use. Fry it out and strain, then to one-half pound of reliable potash and a little water add three pounds of melted fat and stir for ten minutes, then turn into pans to cool.

It takes less than five minutes to rinse the dish towels out in warm, sudsy water after each meal; then to keep them soft and white without hard rubbing, wash them in the usual way, then boil them in good suds containing plenty of borax, and this should be done at least once a week. After using this borax suds for boiling the towels it can be used for cleansing the kitchen table or added to the water for scrubbing the floor, as there is nothing better for whitening wood than strong, hot borax suds, or it can be used for cleaning the kitchen utensils that have become dark or discolored by filling with the suds and allowing it to boil until they are thoroughly clean.

After cleaning and whitening the biscuit board with the borax suds you can keep it clean a long time and save scrubbing by using a large piece of heavy, brown wrapping paper for rolling pie crust or molding light bread upon instead of the biscuit board.—Martha.

Books For Special Buying.

See page 15 and indicate on the coupon which of the thirty-two special books you need. This refers to the advertisement of Montgomery Ward & Co. You can send the coupon to their house at Chicago or Kansas City, whichever is nearest to your home. Absolute satisfaction for the buyer is the rule with this house.

Don't forget to read about the Indian Runner Ducks advertised by W. M. Sawyer, of Lancaster, Mo. He is one of the leaders in Missouri in this line.
